Subject: LNG Depot in Lebanon, NH

Dear Director Howland,

As a resident of Hanover, NH, I would like to go on record as taking a position against the Liquid Nitrogen Depot being considered in Lebanon, NH. Hanover is committed to working toward 100% renewable energy, and the fracked gas and pipeline would impede this process. I am in support of sustainable, renewable energy sources and ask you to block the request by Liberty Utilities to create a Liquid Nitrogen Depot in Lebanon or anywhere in the Upper Valley.

Thank You,

Karen Geiling

Hanover, NH
