Dear Mr. Howland; Sept 13, 2017

I consider a pipeline carrying fracked gas from the Liberty Utilities depot to Hanover to be a direct threat to the environment and a huge step backward in the Upper Valley's effort to advance renewable alternatives.

DG 16-852 Sincerely, Charles P. [Signature]

Director Howland,  
Hanover has just voted to do  
100% renewable energy by 2050.  
Natural gas doesn't move us toward  
this goal. Allowing this pipeline  
will be bad for our region and  
the planet.

Dear Sir/Madam,

With all due respect, your proposal to bring fracked gas to the Upper Valley region of NH (Lebanon to Hanover) by truck from Appalachia and then store it in Lebanon and pipe it to businesses and homes is in every respect a criminal and treasonable venture. In short a crime against humanity and the planet, borne of ignorance and greed. Please rethink...

My name is Hannah Taska, and I am opposed to the pipeline for natural gas proposed in the Lebanon area. I live in West Lebanon, and am deeply concerned about increased risks of cancer, methane leaks, chemical explosions, and other risks associated with the pipeline. I advocate instead for energy conservation and increased use of renewables such as solar.
