**Subject:** Docket#DT-16-872 Consolidated communications holdings

My name is Shawn Roden and my wife, Angie and our 5 children, live at 99 Tunnel Stream Rd. in Benton, N.H. I would like to request that the P.U.C. require Consolidated Communications Holdings to update the speed and reliability of our internet connection in this area before they are granted approval for this purchase of Fairpoint Communications.

My understanding is the F.C.C. says 10 mbps is the minimum speed you should have on your internet service and ours runs from 0 to 3 mbps. My wife and I have 5 children in school who all have homework to do online and EVERY NIGHT after 5 when they get home the internet goes out and they can't get online. In this day and age when all schools are having kids do homework online this is totally unacceptable and should be fixed asap. My Daughter who is a senior in high school is taking 2 online classes and she has to leave the house at 6am to go to the school to use the internet because ours is hardly ever working.

Thank you,  
Shawn Roden
