

Docket No. DG 17-048 Request No. OCA 1-74

h. The following table lists only those companies that have either a RPC or RDM decoupling mechanism. If these companies also have a cost tracker, it is noted in the last column. Our screening for a cost tracker was based on whether the Company had a tracker related to capital expenditures (e.g., a cast iron/bare steel tracker, etc.). Other pure cost-trackers, such as pension trackers, were not considered. The results are as follows:
