NEW HAMPSHIRE ACCESS SERVICES TARIFF

SECTION 5 - SWITCHED ACCESS RATES

5.1 General

This section contains the specific regulations governing the rates and charges that apply for Switched Access Services:

The Company offers Tandem Switching Access Service, Local Switching Access Service – Direct Connection, and Local Switching Access Service – Indirect Connection.

There are three types of rates and charges that apply to Switched Access Service:

- Non-Recurring Charges: One-time charges that apply for a specific work activity.
- Recurring Charges: Fixed charges apply each month and depend on the number and type of facilities in place.
- Usage Charges: Charges that are applied on a per access minute basis. Usage rates are accumulated over a monthly period.

NEW HAMPSHIRE ACCESS SERVICES TARIFF

SECTION 5 - SWITCHED ACCESS RATES

5.2 Rate Categories

(M)

5.2.1 Tandem Switching Access Service (Originating and Terminating)

Tandem Switching is an access service providing transmission and tandem switching between the Customer designated premises and the Company switch(es) where the Customer's traffic is switched from or to an entity other than an End User for purposes of originating or terminating the Customer's communications. The Tandem Switching Access Service composite rate is comprised of the following rate elements: tandem switching charges, tandem termination charges, and tandem facility mileage charges.

(M)

The terminating tandem-switched transport rate schedules are bifurcated into price cap LEC end office ("PC LEC EO") and non-price cap LEC end office ("non-PC LEC EO") rates. The Company bills the PC LEC EO or the non-PC LEC EO terminating tandem-switched transport rate schedule based on the rates the competing price cap LEC would charge for tandem-switched transport traffic delivered to the same terminating entity other than an End User. In other words, the Company mirrors the tandem switched transport rates the price cap LEC would charge if it were the terminating tandem-switched transport provider rather than the Company.

(N)

(N)

5.2.2 Local Switching Access Service - Direct Connection (Originating and Terminating)

(M)

Local Switching Access Service - Direct Connection is an access service providing the Customer connections to and use of end office switching equipment for the origination or termination of the Customer's communications to the Company's End Users. The Local Switching Access Service - Direct Connection rate consists of end office switching charges and may also include a DS3 trunk port charge. With Direct Connection, Customer is responsible for ordering or providing the DS3 facility to the Company's point of presence in the access tandem serving area. The DS3 trunk port charge applies on an Individual Case Basis when the Customer is not collocated with the Company's switch. The rate will not exceed that of the competing ILEC rate for the same function.
