Subject: Pennichuck rate increase

Hello

I'm writing you about the ridiculous proposed rate increase by Pennichuck East Utility, Inc. It's been only three years since their last rate increase. In Raymond, they purchase water from the town and just oversee the distribution network. I believe that much of that network was paid for by an EPA grant. Their proposed rate hike is ridiculous. 21.24% for four years is over 5% a year. Inflation hasn't been even half that. I certainly hope you do not approve such a ridiculous request.

Regards
