Subject: Granite Bridge Redacted Information

Hello Ms. Howland,

This is a request for information pursuant to Puc 104 and Puc 201.07. Please file this letter as a public comment.

I work with the state based environmental advocacy group 350NH with office in Concord in Dover and member that live along the pipeline route.

I request unredacted copies of all documents which Liberty Utilities submitted in support of its Granite Bridge petition, as identified in its motion for protective order. For the reasons explained in the opposition to that motion, filed by the Office of Consumer Advocate, I ask that the motion for protective order be denied and unredacted copies be made public immediately.

We can not build the granite bridge pipeline because it locks us into fossil fuel use for decades to come. Science has showed us that we need to transition to 100% renewable energy by 2050. I am 23 years old and I am terrified that in my lifetime I will see millions of people displaced due to sea level rise, millions loose access to clean drinking water, and millions of lives ruined due to more frequent and more powerful storm surges. We already see this happening! If the granite bridge pipeline is built it will only add the chaos the fossil fuel industry has created for my generation.

The public must be allowed to scrutinize the details of the proposal in order to evaluate the company's claims if there is to be any confidence that the public interest has been served.

Best,
Griffin Sinclair-Wingate
