Re: DW 18-056 – Lakes Region Water Company, Inc.  
Investigation to Determine Rate Effects of Corporate Tax Reductions  
Staff Recommendation

Dear Ms. Howland:

On June 26, 2019, Blue Ridge Consulting Services, Inc. (Blue Ridge), the Commission Staff's (Staff) consultant in this docket, submitted a report containing its findings and recommendations relative to the treatment of savings realized by Lakes Region Water Company, Inc. (LRWC or Company), from recent federal and state corporate income tax rate reductions, effective January 1, 2018. In response to comments provided by LRWC concerning that report, on July 17, 2019, Blue Ridge submitted its response to LRWC's comments. This correspondence includes Blue Ridge's original report, LRWC's comments, Blue Ridge's response to LRWC's comments, and Blue Ridge's supporting workpapers as attachments. Based on Blue Ridge's original report and follow-up responses, Staff recommends the Commission order LRWC to record various deferred liabilities that are reflective of its realized tax savings since January 1, 2018, through the date that the Commission next establishes rates for LRWC in a future rate proceeding.

**Background**

On January 3, 2018, the Commission issued Order No. 26,096 in IR 18-001 to open an investigation to determine utility treatment of the effects of federal and state corporate income tax rate reductions. These tax changes resulted from federal passage of the 2017 Tax Cuts and Jobs Act (TCJA) as well as reductions in the NH Business Profits Tax (BPT) and the NH Business Enterprise Tax (BET) that became effective in 2018. To that end, all New Hampshire regulated utilities, including LRWC, were required to file responses to the Commission's order by April 1, 2018, addressing the anticipated effects of these corporate tax rate reductions. Further, if the changes in federal and state tax laws

Page 2

resulted in reducing a utility's tax obligations and, thereby increasing its net income, it would be necessary to determine how those reduced obligations should be reflected in the utility's rates going forward. Consequently, the Commission also ordered each effected utility to calculate its interim tax savings and record a deferred liability.

On February 9, 2018, LRWC filed a motion for extension of the Commission's April 1, 2018, compliance deadline to June 1, 2018. On April 4, 2018, the Commission issued a Secretarial Letter acknowledging LRWC's February 9 filing and assigning the case Docket No. DW 18-056.

On April 9, 2018, the Office of the Consumer Advocate (OCA) filed a letter of participation in accordance with RSA 363:28. There are no other intervenors in this proceeding.

On June 6, 2018, LRWC submitted a request for an additional 30-day extension in which to submit its compliance filing with the Commission. On June 11, 2018, via Secretarial Letter, the Commission granted an extension to LRWC until July 11, 2018. On August 8, 2018, the Company submitted a third request for a further filing extension until August 31, 2018. The Commission granted LRWC's request for further extension via a Secretarial Letter issued on August 10, 2018. On October 9, 2018, LRWC submitted its filing in response to Commission Order No. 26,096.

In its filing, LRWC provided a revised set of settlement schedules based on its most recent rate proceeding in Docket No. DW 15-209.<sup>1</sup> The Company's schedules calculated tax savings of \$28,835 associated with its last approved permanent rate revenue requirement, in addition to tax savings of \$4,393 associated with its approved initial step adjustment in Docket No. DW 15-209, for a total calculated annual tax savings of \$33,228. LRWC's filing, however, did not propose a plan for the prospective establishment of a revenue requirement reflective of the recent tax law changes. Further, LRWC's filing did not address the matter of Excess Deferred Income Taxes (EDIT) as directed in Order No. 26,096.

The Commission contracted Blue Ridge to review LRWC's filing and issue a report based on its analysis. As part of its review, Blue Ridge propounded discovery regarding LRWC's filing. Staff submitted these questions to the Company on January 15, 2019, with a requested date to respond of January 29, 2019. On February 4, 2019,

---

<sup>1</sup> On November 28, 2016, the Commission issued Order No. 25,969 in Docket No. DW 15-209 approving a 17.63% increase in revenues that encompassed a permanent increase and an initial step adjustment. The revenue requirement approved in that order reflects LRWC's prior federal and state marginal income tax rates of 34% and 8.5%, respectively. On June 8, 2018, the Commission issued Order No. 26,143 approving a subsequent step adjustment in revenues of 2.77%. The subsequent step adjustment approved for LRWC reflected federal and state marginal income tax rates in effect during 2018 of 21% and 7.9%, respectively. As such, any revenue adjustments calculated for LRWC resulting from the recent corporate tax rate reductions would only apply to the permanent and initial step increases approved in Commission Order No. 25,969, but not the subsequent step adjustment approved in Commission Order No. 26,143.

LRWC filed a request for a 90-day extension in which to submit its discovery responses. On February 12, 2019, the Commission issued a Secretarial Letter approving LRWC's extension request.

On April 30, 2019, LRWC submitted its responses to the first round of discovery. On May 29, 2019, LRWC, along with its own consultants, Staff, and Blue Ridge, conducted a teleconference to discuss the Company's discovery responses. On that same date, Staff submitted a second round of discovery to LRWC to which the Company provided responses on June 10, 2019.

As stated previously, on June 26, 2019, Blue Ridge submitted a report to Staff containing its findings and recommendations, which Staff provided to LRWC for review and comment. On July 8, 2019, LRWC submitted its comments regarding Blue Ridge's report. On July 17, 2019, Blue Ridge provided Staff its response to LRWC's comments.

### **Blue Ridge Calculation of Interim Annual Tax Savings**

Based on the revenue requirement approved by the Commission in Order No. 25,969 in LRWC's last rate proceeding, Docket No. DW 15-209, Blue Ridge applied the "FERC Formula" to derive a total annual tax savings amount of \$42,707. This amount consists of \$38,193 relative to the approved permanent rates and \$4,514 relative to the approved initial step adjustment in that proceeding. Blue Ridge's computed interim tax savings are \$9,479 greater than the tax savings calculated by LRWC in its original filing. (\$42,707 - \$33,228 = \$9,479). Staff notes, however, that in its July 8, 2019 response, LRWC stated that it agreed with Blue Ridge's computed interim tax expense savings.

The Commission approved the application of the FERC Formula to derive the interim tax savings of two other water utilities in proceedings similar to this. (Docket No. DW 18-054, Aquarion Water Company of New Hampshire, Inc., in Order No. 26,245 (May 2, 2019); and Docket No. DW 18-047, Abenaki Water Company, Inc., in Order No. 26,251 (May 10, 2019)).

Staff further notes that Blue Ridge's proposed calculations are consistent with recent Commission rulings approving revenue requirements for gas and water utilities based, in part, on the application of the FERC Formula relative to the income tax component contained in each. The gas utility proceedings include Docket No. DG 17-048, Liberty Utilities (EnergyNorth Natural Gas) Corp. d/b/a Liberty Utilities, in Order Nos. 26,122 (April 27, 2018) and 26,187 (November 2, 2018); and Docket No. DG 17-070, Northern Utilities, Inc., in Order No. 26,129 (May 2, 2018). The water utility proceedings include Docket No. DW 17-118, Hampstead Area Water Company, Inc., in Order Nos. 26,165 (July 31, 2018) and 26,195 (November 28, 2018); and Docket No. DW 17-165, Abenaki Water Company, Inc. - Rosebrook Water System, in Order Nos. 26,171 (August 31, 2018) and 26,205 (December 27, 2018).

### **Blue Ridge Calculation of Excess Deferred Income Taxes**

#### Blue Ridge Report

LRWC's records showed that, as of December 31, 2017, it had calculated an Accumulated Deferred Income Tax (ADIT) liability of \$205,000. The Company's ADIT balance stemmed from the timing difference between the book depreciation and tax depreciation of its plant assets. As previously stated, however, LRWC's filing with the Commission in this docket did not include a calculation of EDIT.<sup>2</sup> In its response to Staff Data Request 1-4, the Company explained, "... given the similarities of the Company's tax provision under both the previous and existing tax rates, there was not deemed to be a significant impact in the deferred tax liability as established at year end and no reserve was necessary." Blue Ridge disagreed with LRWC's conclusions in this regard and its original report proposed an EDIT deferred liability of \$148,065.

In deriving its proposed EDIT amount, however, Blue Ridge did not accept LRWC's reported ADIT liability of \$205,000 for two reasons:

1. In its review of the supporting workpapers for LRWC's ADIT calculation, Blue Ridge found that the Company applied a 15% federal tax rate to derive its reported amount. Blue Ridge disputed the use of that rate because the Company's 2017 Tax Return indicated marginal and effective tax rates of 34% and 26.4%, respectively. Further, LRWC's permanent increase and initial step adjustment in revenues approved in Docket No. DW 15-209 reflect an income tax expense based on the 34% marginal tax rate. Therefore, Blue Ridge's calculation applied a 34% marginal rate.
2. Blue Ridge noted a \$44,629 difference between the net book value of plant assets used in LRWC's ADIT calculation (\$4,216,660) and that indicated in the Company's 2017 NHPUC Annual Report (\$4,261,289). As such, Blue Ridge elected to use the latter amount in its calculations.

Applying these changes, Blue Ridge's original report contains a calculation of a revised ADIT balance for LRWC as of December 31, 2017 of \$428,084. Based on that amount, Blue Ridge calculated its proposed EDIT liability for the Company of \$148,065, leaving an adjusted ADIT balance of \$280,019. Further, based on its analysis of fixed asset records provided by LRWC, Blue Ridge determined an amortization period relative to its proposed \$148,065 EDIT of 33.5 years.

---

<sup>2</sup> For a more complete discussion of Accumulated Deferred Income Taxes (ADIT) and Excess Deferred Income Taxes (EDIT) as it pertains to LRWC, please refer to the "Conclusions and Recommendations" section on page 4 of Blue Ridge's Response to LRWC's Comments dated July 17, 2019 (Attachment C).

LRWC's Comments

Included in its comments regarding the Blue Ridge report dated July 8, 2019, LRWC disputed Blue Ridge's proposals relative to the recording of an ADIT liability, making three assertions:

1. The ADIT reflected in the rates last approved for LRWC in Docket No. DW 15-209 was only \$180,680. Therefore, LRWC should record an ADIT deficiency of \$99,339 (\$280,019 - \$180,680), rather than an excess ADIT as recommended by Blue Ridge.
2. Even when comparing the ADIT balance of \$205,000 actually recorded on the Company's books as of December 31, 2017 with the adjusted ADIT balance of \$280,019 calculated by Blue Ridge, the result still demonstrates an ADIT deficiency for LRWC, rather than an excess ADIT position.
3. Blue Ridge is incorrect in its assertion that the net book value of plant assets reflected in the Company's calculations does not agree with its 2017 NHPUC Annual Report. LRWC stated that the \$44,629 difference indicated in Blue Ridge's report is because the net book value balance used in the Company's calculations includes the net acquisition adjustment balance of \$44,885. The Company further maintains that the remaining \$256 difference (\$44,885 - \$44,629) is de minimis.

Blue Ridge's Response

In its July 17, 2019 response to LRWC's comments, Blue Ridge addressed the Company's three assertions, as follows:

1. Blue Ridge calculated the Company's ADIT liability in accordance with the normalization provisions contained within the TCJA, which are counter to LRWC's stance in this regard.
2. LRWC provided no additional information that would cause Blue Ridge to reconsider the Company's recorded ADIT balance as appropriate.
3. Due to the immaterial consequences resulting from inclusion of the net acquisition adjustment in the excess ADIT calculation, Blue Ridge no longer disputes LRWC's calculation in this regard. Specifically, this reduces the calculated ADIT liability by \$6,070 from \$148,065 to \$141,995. Thus, the resulting annual amortizing tax credit reflected in customer rates will also be lower by \$181 per year. ( $\$6,070 \div 33.5 \text{ years}$ )

### **Staff's Recommendations**

Based on the findings and conclusions contained in Blue Ridge's original report and follow-up response, and consistent with Commission Order No. 26,096, Staff recommends that the Commission order LRWC to create regulatory liabilities, as of January 1, 2018, to account for the impact of federal and state statutory tax rate reductions. These regulatory liabilities would (1) enable the realization of significant annual tax expense savings included in current customer rates, and (2) recognize an EDIT liability owed to customers.

- (1) Tax Expense Savings. Staff recommends the Commission direct LRWC to record an annual regulatory liability of \$42,707 to track tax savings realized through the effective date of the Company's next approved base rates in a general rate proceeding. The deferred liability would accumulate, as follows: for 2018, the year-end balance would be \$42,707; for 2019, the year-end balance would be \$85,414 (\$42,707 + \$42,707); for 2020, the year-end balance would be \$128,121 (\$85,414 + \$42,707), etc. The annual regulatory liability was determined based on FERC Order No. 475, which employs a formula approach using data from LRWC's most recent rate case, Docket No. DW 15-209, to approximate the cost of service impact (as if the new tax rates were in effect at the time of the last rate order).
- (2) EDIT. Staff recommends the Commission direct LRWC to record a separate regulatory liability for EDIT in the amount of \$141,995. Staff further proposes that the annual amortization of this amount, representing income tax credits to customers, should be resolved in LRWC's next general rate proceeding.

Staff believes that the recommendations proposed above provide a satisfactory and full resolution of the issues contained in Docket No. DW 18-056. Therefore, Staff further recommends that, if approved, the Commission close Docket No. DW 18-056.

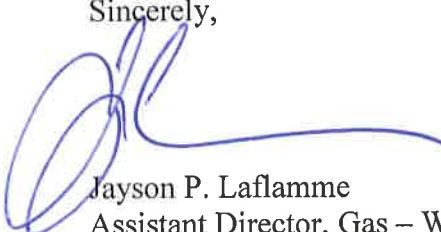

Prior to filing this recommendation with the Commission, Staff forwarded draft copies to the OCA and LRWC, seeking their respective positions with regard to Staff's recommendations. In response, the OCA stated that it concurred with Staff's recommendations. LRWC indicated that it would be filing a response to Staff's recommendations within ten days. Staff, therefore, requests that the Commission hold the record open in this docket to allow the Company an opportunity to submit that response.

July 29, 2019

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Tax Change Effect Analysis**

**INTRODUCTION**

At the end of December 2017, the Federal Tax Cuts and Jobs Act ("2017 Tax Act") was signed into law resulting in major changes in the U.S. tax structure beginning January 1, 2018. Among other actions, the 2017 Tax Act substantially reduced the maximum corporate income tax rate from 35 percent to 21 percent. It also impacted deferred tax reserves on the balance sheet, which had to be revalued with the resulting excess deferred income taxes (EDIT) flowed back to public utility ratepayers. In addition, in 2018, the New Hampshire Business Enterprise Tax (BET) rate was reduced from 0.72 percent to 0.675 percent, and the Business Profits Tax (BPT) was reduced from 8.2 percent to 7.9 percent.

In Order No. 26,096 in Docket No. IR 18-001, the New Hampshire Public Utilities Commission ("Commission") initiated an investigation into how the 2017 Tax Act and the reductions to the BPT and BET would affect the expenses of each New Hampshire public utility. If the changes in the tax laws reduced the tax obligations and increased the net incomes of those utilities, it would be necessary to determine how those reduced obligations should be reflected in rates. The Commission also ordered each utility to calculate its interim tax savings and record a deferred liability.<sup>1</sup>

Blue Ridge Consulting Services, Inc. ("Blue Ridge") was asked to review the tax-change-effect calculations of **Lakes Region** Water Company (LRWC or "Company") in Docket No. DW 18-056. This report reflects our analysis of the responses provided by the Company in answer to Commission Order No. 26,096.

**COMPANY'S RESPONSE TO COMMISSION ORDER No. 26,096**

On February 9, 2018, LRWC filed the first of three requests for extensions to reply to the Commission's Order No. 26,096 in IR 18-001. LRWC's filing was assigned Docket No. DW 18-056.

***Company-Calculated Income Tax Expense Change***

On October 9, 2018,<sup>2</sup> LRWC filed a set of revised settlement schedules from Docket Nos. DW 15-209 / 15-422, the Company's last general rate case. The revised settlement schedules reflected the change in the permanent rates and the Step 1 revenue requirements using the net tax rates. Table 1 below summarizes the Company's filings regarding the tax-change effect on the approved revenue requirements.

---

<sup>1</sup> NHPUC Order No. 26,096, page 2.

<sup>2</sup> The filings cover letter is dated October 5, 2018.

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Tax Change Effect Analysis**

**Table 1: Annual Revenue Requirement Reduction Computed by Company<sup>3</sup>**

Line No.	Description	Reference	Base Rate	Step Increase	Total Reduction
1	Total Operating Revenues - Updated	Note (a)	\$ 1,436,219	\$ 57,305	\$ 1,493,524
2	Total Operating Revenues - Current Rates	Note (b)	<u>\$ 1,407,384</u>	<u>\$ 52,912</u>	<u>\$ 1,460,296</u>
3	<b>Revenue Reduction Per LRWC</b>	Line 1 - Line 2	<b>\$ 28,835</b>	<b>\$ 4,393</b>	<b>\$ 33,228</b>

Source:

- (a) DW 15-209 / DW 15-422 Settlement
- (b) DW 15-209 / DW 15-422 Settlement, substituting updated tax factor in model

Blue Ridge reviewed the Company's filing and found that while Order No. 26,096 directed each utility to propose a plan to establish a revenue requirement that reflects the tax-law changes prospectively, the Company's response did not facilitate a path forward. Accordingly, Blue Ridge issued Staff Data Request 1-2 to obtain the Company's plan.

**REQUEST:**

- a) Does the Company propose to reduce permanent customer rates to reflect the impact of the 2017 Tax Act and the reductions to the BPT and BET? If yes, when and how?
- b) Does the Company propose to refund customers for the interim tax savings accrued from January 1, 2018, through the date of the revised permanent rates? If yes, when and how?

**RESPONSE:**

- a) Not specifically. To the extent that there are decreases in tax expenses, that such decreases should be netted against increases in other expenses as well as additions to plant, changes in capital structure, increases / decreases in revenue, etc. At some point, the next rate case, such changes will be taken into consideration.
- b) No. The Company is not convinced that "interim tax savings" exist and, to the extent that they do, then such decreases in tax expense should be offset by increases in other expenses, etc.

---

<sup>3</sup> Company Response dated October 5, 2018, in Docket DW 18-056.

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Tax Change Effect Analysis**

***Excess Deferred Tax Reserve***

The Company's initial response did not discuss the matter of Excess Deferred Income Taxes (EDIT). Accordingly, Blue Ridge issued Staff DR 1-4.<sup>4</sup>

**REQUEST:**

Order No. 26,096 at page 2 states, "Each public utility subject to this notice shall calculate the excess deferred tax reserve caused by the reduction in the corporate federal income tax rate and recognize as a deferred liability the estimated reduction of the utility's revenue requirement."

- a) Did the Company set up a regulatory liability for excess deferred taxes as ordered? Please provide the balance, supporting calculations, and journal entries.

**RESPONSE:**

- a) No. On the advise [sic] of its tax accountant, Leone, McDonnell & Roberts, given the similarities of the Company's tax provision under both the previous and existing tax rates, there was not deemed to be a significant impact in the deferred tax liability as established at year end and no reserve was necessary.

**OBSERVATIONS AND RECOMMENDATIONS**

***Income Tax Expense Savings***

1. Blue Ridge found the Company's filing in response to Order No. 26,096 quantifying the revenue reduction to be incomplete. Staff DR 1-3 requested the Company demonstrate how its approach accounted for the impact on total income tax expense, apart from the tax gross-up applied to the income deficiency in DW 15-209 / 15-422. The Company did not respond directly, repeating that it "substituted the new federal and state tax rates and allowed the new rates to flow thru [sic] the schedules to determine lower revenue requirement."<sup>5</sup>
2. The annual level of income tax expense reflected in current customer rates was established in DW 15-209/15-422. Table 2 presents the statutory tax rates for the test year ended December 31, 2014, compared to the tax rates effective January 1, 2018.

---

<sup>4</sup> Company's response was labeled Staff 1-4. The Company submitted three responses identified as Request No. Staff 1-3

<sup>5</sup> Revised Response to Staff DR 1-3(a) filed on May 29, 2019.

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Tax Change Effect Analysis**

**Table 2: Tax Rates Reflected in Current Customer Rates<sup>6</sup>**

Line No.	Description	Per Dkt. DW 15-209	Effective 1/1/2018	Percent Change
1	Taxable Income	100.00%	100.00%	
2	Less: NH Business Profits Tax	-8.50%	-7.90%	
3	Federal Taxable Income	91.50%	92.10%	
4	Federal Income Tax Rate	x 34.00%	x 21.00%	-38.24%
5	Effective Federal Income Tax Rate	31.11%	19.34%	
6	Add: NH Business Profits Tax	8.50%	7.90%	-7.06%
7	Effective Tax Rate	39.61%	27.24%	-31.23%
8	Percent of Income Available if No Tax	100.00%	100.00%	
9	Less: Effective Tax Rate	-39.61%	-27.24%	
10	Percent Used as a Divisor in Determining Revenue Requirement	60.39%	72.76%	
11	Tax Rate Factor (Line 7 ÷ Line 10)	<u>0.6559</u>	<u>0.3744</u>	(0.4292)

3. Consistent with the Commission's approach in other dockets, Blue Ridge computed LRWC's interim tax expense savings using the FERC formula approach in Table 3 below. Using the percent change for the old and new tax rate factors of 0.4292 from Table 2, we recommend the Company record a regulatory liability to defer interim tax savings of \$38,193 annually, beginning January 1, 2018, and on a prorated basis until revised permanent rates are established in the next rate case proceeding or until otherwise ordered by the Commission. The FERC formula approach results in a difference of \$9,358 from the Company's approach in its October 9, 2018, filing.

**Table 3: FERC Formula Approach vs. LRWC Calculation—Permanent Rates<sup>7</sup>**

Line No.	Description	Reference	Permanent Rates
1	Income Tax Expense	See Note (a)	\$ 88,990
2	Δ Tax Rate Factor		<u>0.4292</u>
3	<b>Revenue Reduction Per FERC Formula</b>	Line 1 x Line 2	<b>\$ 38,193</b>
4	Revenue Reduction Per LRWC		28,835
5	Difference	Line 3 - Line 4	\$ 9,358

(a) Total income tax expense on a fully adjusted basis reflected in Permanent Rates per DW 15-209 / DW 15-422 Settlement - Schedule 3, Column 10

<sup>6</sup> Data obtained from DW 15-209/15-422.

<sup>7</sup> Data obtained from DW 15-209/15-422 Settlement.

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Tax Change Effect Analysis**

4. Blue Ridge also computed LRWC's interim tax savings for the step adjustment using the FERC formula approach. As shown in Table 4 below, the results are consistent with the Company's computation in its October 9, 2018, filing. Blue Ridge recommends the Company record the computed annual savings of \$4,514 in the same manner as the deferral we proposed for permanent rates.

**Table 4: FERC Formula Approach vs. LRWC Calculation--Step Adjustment<sup>8</sup>**

<b>Line No.</b>	<b>Description</b>	<b>Reference</b>	<b>Step Increase</b>
1	Income Tax Expense	See Note (a)	\$ 10,518
2	Δ Tax Rate Factor		0.4292
<b>3</b>	<b>Revenue Reduction Per FERC Formula</b>	<b>Line 1 x Line 2</b>	<b>\$ 4,514</b>
4	Revenue Reduction Per LRWC		4,393
5	Difference	Line 3 - Line 4	\$ 121

(a) Income tax gross up recovered in Step Increase #1 per DW 15-209 / DW 15-422 Settlement - Schedule 1

5. All deferrals for interim tax savings should be recorded to Account 254 (Other Regulatory Liabilities). The amortization period is at the discretion of the Commission. Unlike the normalization requirement for Excess ADIT, no IRS rules govern the treatment of interim tax savings. We recommend the Company begin amortizing the deferred savings in Account 410.1 (Provision for Deferred Income Taxes, Utility Operating Income) on the date new rates go into effect.
6. When asked about the impact of the Business Enterprise Tax (BET) rate reduction on the Company's tax obligation and net income in Staff DR 1-5,<sup>9</sup> the Company responded, "Please note Sch 1b Tax Factor. The permanent rates and step adjustment rates do not appear to take into consideration the NHBET. As such, the Company did not take NHBET into consideration."<sup>10</sup> While the answer was not on point because the BET is not a tax on corporate income, Blue Ridge concludes the impact is immaterial based on the Company's size and Blue Ridge's review of the BET impact on other utilities.

***Excess Deferred Taxes***

7. Since the Company did not set up a regulatory liability for excess deferred taxes as ordered, Blue Ridge recommends the Company be directed to record an obligation of \$148,065 in Account 254 (Other Regulatory Liabilities). The Excess ADIT is to be amortized to Account 410.1 (Provision for Deferred Income Taxes, Utility Operating

<sup>8</sup> Data obtained from DW 15-209/15-422 Settlement.

<sup>9</sup> Company's submitted three responses identified as Request No. Staff 1-3.

<sup>10</sup> Revised Response to Staff DR 1-5 filed on May 29, 2019.

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Tax Change Effect Analysis**

Income) over the weighted average useful life of the net plant assets as of December 31, 2017. The regulatory liability for Excess ADIT is to be tracked separately and not combined with deferred amounts related to the Company's interim tax savings.

8. We present our calculation of the estimated liability in Table 5 below.

**Table 5: Excess ADIT Balance as of December 31, 2017<sup>11</sup>**

9. In estimating the EDIT liability, Blue Ridge did not accept the Company's reported ADIT balance as of December 31, 2017. Blue Ridge reviewed the supporting ADIT workpapers and determined the 15% federal tax rate the Company selected and applied to the timing difference (Table 5, line 8) was not supported.<sup>12</sup> Per our review of the 2017 Tax Return, the Company's marginal and effective tax rates were 34% and 26.4%, respectively.<sup>13</sup>

---

<sup>11</sup> Company reported provide in response to Staff Data Request 2-2, 2017 and 2018 Deferred Taxes and Blue Ridge computations using the LRWC 2017 Annual Report filed with the Commission.

<sup>12</sup> Company's response to Staff Data Request 2-2, 2017 and 2018 Deferred Taxes.

<sup>13</sup> Company's response to Staff Data Request 2-5, 2017 Federal Tax Return, page 18. Effective tax rate of 26.4% computed based on \$35,026 (taxes payable) / \$132,759 (taxable income).

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Tax Change Effect Analysis**

Moreover, the Company's permanent rates and step adjustment authorize it to recover federal income tax expense at the 34% marginal rate.

10. The second reason Blue Ridge did not accept the Company's reported ADIT balance was that the plant book values (line 1 through line 3 in Table 5) used to compute the depreciation timing difference did not tie to the Annual Report filed with the Commission. In response to Staff DR 2-2, the Company provided its ADIT calculation based upon a net plant book balance of \$4,216,660 (Gross Plant \$6,312,164 less Accumulated Depreciation \$2,095,504). The Annual Report reported net plant book balances \$4,261,289 (Gross Plant \$6,225,342 less Accumulated Depreciation \$1,964,053). We inquired about the difference during a conference call with the Company and Staff on May 28, 2018; we also followed up with Staff DR 2-3. While the Company's response claims "the data provided in Staff 2-2 tie to the data reported in the Annual Report," we disagree based on the fact that Accounts 101 (Utility Plant in Service) and 108 (Accumulated Depreciation) do not match. Our estimate of the EDIT liability is, therefore, based on the plant net book value (excluding CWIP) reported in the Annual Report.
11. The Company's Annual Report for 2017 showed that the ADIT balance was created due to a timing difference between book and tax depreciation of plant assets. Thus, the Excess ADIT liability of \$148,065 should be returned to customers over the weighted average useful life of the net plant assets as of December 31, 2017. The weighted average useful life is the method prescribed by IRS guidelines when the Company does not have sufficient accounting data to return the Excess ADIT using the Average Rate Assumption Method (ARAM).
12. The Company did not provide an estimate of the remaining useful life of its assets as of December 31, 2017. Therefore, Blue Ridge requested LRWC's fixed asset ledger. Table 6 below presents the results of our analysis, which support an amortization period of 33.5 years.<sup>14</sup>

Concord, New Hampshire 03301-2429

Ref: Blue Ridge Consulting Services Analysis of the Tax Change Effect.

Dear Mr. Laflamme,

After reviewing Blue Ridge Consulting Services (“BRCS”), Inc analysis of the Tax Change Effect, the Company agrees with the computed interim tax expense savings of \$38,193 and \$4,514 for permanent rates and step adjustment rates, respectively.

With respect to the Accumulated Deferred Income Taxes (ADIT), the Company disagrees and respectfully requests that BRCS review DW 15-209, Staff’s Settlement Schedules – Permanent Rates. In DW 15-209, Permanent Rates, Sch.2, Rate Base, Col. 8, Ln 50, Staff’s Proforma Rate Base for ADIT amounted to \$180,680.

In the event the Company accepts Blue Ridge Consulting Calculated ADIT- Remeasured of \$280,019, the Company believes that it should be adding \$99,339 to the ADIT liability. Instead of having excess deferred income taxes, its deferred tax position is deficient by \$99,339. The deficient deferred tax position needs to be taken into consideration in determining the computed interim tax savings. Also, wouldn’t the excess deferred tax be calculated by what was actually recorded on the books of \$205k and \$280k? Either way it still appears as though the Company has a deficit in deferred taxes rather than an excess.

The Company disagrees with Blue Ridge’s second reason (item 10). The Company’s reported ADIT Balance does tie out to the Annual Report, less a minor \$256.00 discrepancy. Please reference the F-1 Balance Sheet Total Net Utility Plant Line 5 Totaling \$4,216,404. This amount was computed using Accounts 101-106 (Utility Plant), 108 (Accumulated Depreciation) and the net of Accounts 114 (Acquisition Adjustment) and 115 (Accumulated Amortization).  
(\$6,225,342 + \$41,779 - \$1,964,053 - \$86,664 = \$4,216,404).

The Company continues to believe that any interim tax savings should be netted against increases in other expenses as well as additions to plant, changes in capital structures, increases / decreases in revenue, etc.

Sincerely,

Leah Valladares  
Utilities Manager

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Review of the Company's Response to Blue Ridge's Tax Change Effect Analysis Memo**

**INTRODUCTION**

At the end of December 2017, the Federal Tax Cuts and Jobs Act ("2017 Tax Act") was signed into law resulting in major changes in the U.S. tax structure beginning January 1, 2018. Among other actions, the 2017 Tax Act substantially reduced the maximum corporate income tax rate from 35 percent to 21 percent. It also impacted deferred tax reserves on the balance sheet, which had to be revalued with the resulting excess deferred income taxes (EDIT) flowed back to public utility ratepayers. In addition, in 2018, the New Hampshire Business Enterprise Tax (BET) rate was reduced from 0.72 percent to 0.675 percent, and the Business Profits Tax (BPT) was reduced from 8.2 percent to 7.9 percent.

In Order No. 26,096 in Docket No. IR 18-001, the New Hampshire Public Utilities Commission ("Commission") initiated an investigation into how the 2017 Tax Act and the reductions to the BPT and BET would affect the expenses of each New Hampshire public utility. If the changes in the tax laws reduced the tax obligations and increased the net incomes of those utilities, it would be necessary to determine how those reduced obligations should be reflected in rates. The Commission also ordered each utility to calculate its interim tax savings and record a deferred liability.<sup>1</sup>

Blue Ridge Consulting Services, Inc. ("Blue Ridge") was asked to review the tax-change-effect calculations of Lakes Region Water Company (LRWC or "Company") in Docket No. DW 18-056. Blue Ridge's report was shared with the Company on June 27, 2019. The report reflected our analysis of the responses provided by the Company in answer to Commission Order No. 26,096.

The Company responded to Blue Ridge's report on July 9, 2019. This report reflects our review of the Company's response to our report.

**REVIEW OF THE COMPANY'S RESPONSE TO BLUE RIDGE'S JUNE 27, 2019, REPORT**

1. The Company agrees with the computed interim tax expense savings of \$38,193—Permanent Rates and \$4,514—Step Adjustment which was calculated using the FERC formula approach.
2. With respect to the Accumulated Deferred Income Taxes, the Company disagrees with Blue Ridge's analysis.
  - a. Issue #1—Definition of Excess ADIT Liability

Company Position: The Company asserts it should record a *deficient* accumulated deferred income tax balance (ADIT) rather than an *excess*. This position is taken because Blue Ridge determined the Company's excess liability based on the ADIT balance as of December 31, 2017, versus the amount reflected in DW 15-209.

---

<sup>1</sup> NHPUC Order No. 26,096, page 2.

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Review of the Company's Response to Blue Ridge's Tax Change Effect Analysis Memo**

**Table 1: Comparison of Blue Ridge's Excess ADIT and the Company's Deficient ADIT based upon DW 15-209 ADIT Balance**

	<b>Blue Ridge Report</b>	<b>Company Response</b>
ADIT as of December 31, 2017 - Valued at 34% and 8.5%	\$ 428,084	
ADIT per DW 15-209, Sch. 2, Col. 8, Ln. 50		\$ 180,680
ADIT as of December 31, 2017 - Valued at 21% and 7.9%	280,019	280,019
Excess(Deficient) ADIT	<u>\$ 148,065</u>	<u>\$ (99,339)</u>

**Blue Ridge Response:** Under the Tax Cut and Jobs Act ("the Act"), regulated utilities are subject to normalization provisions, which require certain treatment of excess ADIT resulting from the corporate tax rate reduction. Section 13001 of the Act defines "excess ADIT" as the excess of

- i. the reserve for deferred taxes as of the day before the corporate rate reduction (that is, December 31, 2017) over the
- ii. the amount which would be the balance in such reserve if the amount of such reserve were determined by assuming that the corporate rate reductions provided under the Act were in effect for all prior periods.

Blue Ridge applied the normalization provisions in its calculation of the Company's EDIT liability consistently with the Act and New Hampshire PUC precedent.

**b. Issue #2—Valuation of the ADIT as of December 31, 2017**

**Company Position:** The Company recorded a \$205,000 ADIT balance as of December 31, 2017, on its books. Applying the Company's recorded balance to calculate the EDIT liability also results in a *deficient* deferred income tax position.

**Table 2: Comparison of Blue Ridge's Excess ADIT and the Company's Deficient ADIT based upon ADIT per Books**

	<b>Blue Ridge Report</b>	<b>Company Response</b>
ADIT as of December 31, 2017 - Valued at 34% and 8.5%	\$ 428,084	
ADIT as of December 31, 2017 - Valued at 15% and 7.9%		\$ 205,000
ADIT as of December 31, 2017 - Valued at 21% and 7.9%	280,019	280,019
Excess(Deficient) ADIT	<u>\$ 148,065</u>	<u>\$ (75,019)</u>

**Blue Ridge Response:** The Company has provided no additional information to facilitate Blue Ridge's reconsideration of the matter. The reasons Blue Ridge did not accept the Company's recorded ADIT balance were stated in Paragraph 9 under the Observations and Recommendations section of its report:

In estimating the EDIT liability, Blue Ridge did not accept the Company's reported ADIT balance as of December 31, 2017. Blue Ridge reviewed the supporting ADIT workpapers and determined

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Review of the Company's Response to Blue Ridge's Tax Change Effect Analysis Memo**

the 15% federal tax rate the Company selected and applied to the timing difference (Table 5, line 8) was not supported. Per our review of the 2017 Tax Return, the Company's marginal and effective tax rates were 34% and 26.4%, respectively. Moreover, the Company's permanent rates and step adjustment authorize it to recover federal income tax expense at the 34% marginal rate.

c. Issue #3 – Net Book Value of Plant Assets as of December 31, 2017

**Company Position:** The Company disagrees with Blue Ridge's statement that the net book value of the plant assets used in valuing the ADIT liability as of December 31, 2017, does not tie to the values reported on its balance sheet.

**Blue Ridge Response:** Blue Ridge reviewed the Company's reconciliation of the net book value of the plant assets (which reflects the acquisition adjustment) and accordingly reduces its recommended total excess ADIT liability by \$6,070 from \$148,065 to \$141,995. The impact on the amortizing tax credit to be flowed back through customer rates is \$181 annually ( $\$6,070 \div 33.5$  years). The adjustment reflects that Blue Ridge no longer disputes the Company's calculation of the taxable temporary differences used to measure the ADIT liability as of December 31, 2017, before and after tax reform.

**Table 3: Revised Excess ADIT Reflecting Agreed Upon Net Book Value**

		<b>Blue Ridge Report</b>	<b>Company Response</b>	<b>Difference</b>
1	Utility Plant in Service	101	\$ 6,225,342	\$ -

14	Adjustment to Total Excess ADIT (Lines 9+12)			(6,070)
15	<b>Excess ADIT - Blue Ridge Revised</b>			<b>\$ 141,995</b>

**BEFORE THE NEW HAMPSHIRE PUBLIC UTILITIES COMMISSION**  
**Docket No. DW 18-056**  
**Lakes Region Water Company, Inc.**  
**Review of the Company's Response to Blue Ridge's Tax Change Effect Analysis Memo**

**CONCLUSIONS AND RECOMMENDATIONS**

1. The Company's current utility rates charged to customers reflect the recovery of income tax expense at the federal and state marginal rates of 34% and 8.5%, respectively.
2. Due to the current timing difference between book and tax depreciation, the Company is currently paying out less in income taxes than it is collecting from customers.
3. The purpose of the ADIT account is to show the difference attributable to that timing difference between the income taxes collected from customers through rates and the income taxes paid by the Company when it files its returns. Therefore, effectively, the balance of the ADIT account currently reflects the balance of a "loan" from customers relative to the payment of future income taxes.
4. The ADIT of \$205,000 calculated by the Company as of 12/31/17, using the federal and state income tax rates of 15% and 8.2%, respectively, understates the value of the "loan" balance funded by customers (before tax reform) because it does not comport with the marginal income tax rates collected from customers (34% and 8.5%).
5. Further, to increase the ADIT by \$99,339 from \$180,680 (per DW 15-209) to \$280,019, as suggested by the Company, also appears to miss the point that the Company previously collected income taxes from customers that were based on the federal and state marginal rates of 34% and 8.5%, respectively.
6. Therefore, in order to ensure that customers (at least theoretically) are eventually made whole, the ADIT liability (before tax reform), should be valued consistently with the tax rates reflected in customers' water rates.
7. As a result, by using the 34% and 8.5% tax rates, the "before tax reform" liability (including the acquisition adjustment) is determined to be \$409,116. The same liability after tax reform (based on 21% and 7.9%) is \$267,121. The difference or *excess* deferred taxes is \$141,995.
