Re: Northern Utilities, Inc., New Hampshire Division - Docket DG 19-154  
January 2020 Monthly Cost of Gas Report

Dear Director Howland:

Pursuant to the Commission's Order No. 26,303 in Docket DG 19-154, enclosed is Northern Utilities - New Hampshire Division's ("Northern") current calculation of its projected over or under collection of gas costs for the 2019 / 2020 Winter Period.

Northern's current calculation of costs has been updated to reflect the actual November 1, 2019 balance, actual costs and revenues for November through December 2019, and NYMEX futures prices as of January 22, 2020. The updated calculations indicate that a rate change is not required at this time. Support for this decision is provided in the attached summary and tables.

If you have any questions regarding this filing, please do not hesitate to contact me or Chris Kahl at (603)773-6425.

Very truly yours,

  
George H. Simmons Jr. CAK

## New Hampshire Monthly Cost of Gas Report

### Winter Period

#### January 2020 Summary

The objective of the Winter Period Monthly Cost of Gas (“COG”) analysis is to determine if COG rates need to be adjusted in order to minimize differences between the April 30, 2020 target balance and the corresponding estimated end of Winter Period balance. An adjustment is made to COG rates if the difference between the estimated and target end of Winter Period balances exceeds 2% of total projected gas costs.

For the January 2020 analysis, a revision was made to the April 30, 2020 target balance in order to align the peaking demand costs in the COG model to those in the Company’s accounting models. Typically, peaking contracts are billed over the five month period November through March. For the 2019 -2020 COG year, Northern has two peaking contracts, both of which were included in the COG model as being billed during the five month winter period. However, one of these contracts has demand charges billed over the 12 month period November 2019 through October 2020. This contract<sup>1</sup> has now been revised in the COG model to reflect the 12 month payment period. As a result, the allocation of demand costs in the winter months is now lower which increases the target balance over-collection from (\$2,379,671) to (\$4,302,677).

In addition to the revision in the COG model, estimated costs and revenues for November and December 2019 have been replaced with actual values. Also, estimated commodity costs for January through April 2020 have been updated to reflect NYMEX prices as of January 22, 2020. As shown on Table 1, Line 23, the estimated end of Winter Period balance is an over-collection of (4,220,629). This is lower than the target end of Winter Period balance of (\$4,302,677), Line 25. The variance between the estimated and target balances is an under-collection of \$82,049, Line 27. This under-collection represents a variance in 0.43% of total gas costs, Line 31 and is below the 2% threshold. Therefore, no rate change is proposed at this time.

Support for the estimated end of Winter Period balance is provided in Table 2. Support for the target end of Winter Period balance is provided in Table 3.

---

<sup>1</sup> This peaking contract is listed as Peaking Contract 1 in Confidential Schedule 20-FXW in the Company’s annual cost of gas filing submitted on September 17, 2019.
