---

Dear PUC,

I am writing with concern about the possibility of our state not going forward with the energy efficiency plan as updated by the settlement agreement signed by the Consumer Advocate, the Conservation Law Foundation, and all four of the electric and natural gas utilities.

Granite Staters have learned over the last 15 or so years the important role energy efficiency plays not only in our utility bills, but in the effort to minimize greenhouse gasses.

There are no good reasons to take a step backwards by not encouraging our residents, business owners, and municipal entities to continue to make energy efficiency a default in their energy use and planning. NH should not be a troglodyte.

Thank you,  
Suzanne Harvey  
Grantham, NH
