To the PUC c/o Ms. Debra Howland:

I am writing to express strong support for the proposed Energy Efficiency Plan now before the PUC for consideration. Opponents cite the increased costs to ratepayers without accounting for the offsetting savings that accrue to individuals and businesses who implement qualifying efficiency measures. These are not one time savings, but continue indefinitely so that the long-term economic equation is clearly a plus for NH. In addition this money returns very directly into the NH economy in the form of goods, services and jobs for residents at the same time - a double win. It is an energy truism that the least costly strategy to contain and reduce the economic and environmental costs of energy use is in the generation of Negawatts -the conserved energy that never needs to be generated in the first place. I urge you to support the implementation of this EEP as developed and forwarded by the NH Legislature without delay.

With hopes for a safe and clean energy future,  
Tim Miner - 603-707-0856
