

Attn: Ms. Debra Howland, Executive Director
New Hampshire Public Utilities Commission

Dear Ms. Howland.

I am writing to express my support for moving forward with the current provisions and timeline for the Triennial Energy Efficiency Plan (Docket No. DE 20-092 2021-2023).

As the agency overseeing the relationship between public utilities and its consumers, this appears to be a relatively straightforward decision, as the industry is in favor of this plan, which ultimately is aimed at benefiting its consumers as well. The costs imposed are minimal and are greatly outweighed by the benefits. The utilities cite cost savings, economic and workforce benefits, and environmental protection as a 'triple win' for this plan. The opposition, seeking to delay the plan, seems largely motivated by politics instead of sound policy, and threatens to scuttle much good work at a time when positive movement is needed on all fronts.

I sincerely hope you will uphold the current plan and timeline for the benefit of our state's residents, the utilities themselves, and the environment.

Sincerely,

Eric Turer
