

Dear Executive Director and Secretary, Debra Howland,

I have been a subscriber to Liberty Mutual Ins for my home, business and car for many years. I have been considering changing to another company for a few months as information continues to come through about fossil fuel projects supported through that company. I have always had immediate and very good service whenever I have needed to contact LM but I feel strongly I can no longer support your company b/c of its interests that support more negative climate change in an era when we cannot continue this greedy thinking.

I may only be a single consumer but you do not want to start a landslide of others ---Please change while you still can.

Sincerely Dr Christine Kuhlman
