

Dear Executive Director and Secretary, Debra Howland,

I am a long-time Liberty Utilities customer and do not think Liberty Utilities should raise their rates and charge customers to try to make up for their loss with regards to the Granite Bridge pipeline. I have used my own money to invest in solar; and I expect Liberty to be a responsible company and work toward renewables and away from fossil fuels. That is the only chance we have to slow climate change and protect the planet for future generations. Ethical, morally responsible business practices should be top priority, not profits for shareholders.

Thank you,  
Gail McPeck  
Enfield, NH
