Re: Electric Distribution Utilities Electric Vehicles TOU Rates
Public Service Company of New Hampshire d/b/a Eversource Energy – EVSE Pilot
Proposal

Chair Goldner:

Public Service of New Hampshire Company d/b/a Eversource (“Eversource”), hereby submits the following filing in compliance with the Public Utilities Commission (“Commission”) Order No. 26,604 Approving Distribution Utilities Electric Vehicle TOU Rates (“Order”).

The Order at page 27 states:

FURTHER ORDERED, that Eversource shall develop an alternative metering feasibility assessment pilot proposal and submit it to the Commission within six months of this order.

In compliance with the Order this filing contains Eversource’s proposal for a pilot program for an alternative metering feasibility assessment. This pilot requires approval and implementation of Eversource’s proposed Residential EV Time of Use rate, filed to this docket on July 6, 2022 at Tab 121, before the pilot can commence.

Consistent with current Commission policy this proposal is being filed electronically only; paper copies will not follow. If you have any questions, please contact me. Thank you for your assistance with this matter.

Regards,
