

NH Public Utilities Commission
Docket No. DE 20-170 & DE 22-035
Record Request

Received: July 14, 2023
Request Number: DOE RR-C

Date of Response: July 20, 2023
Respondent: Department of Energy

Request:

Record Request A (Liberty)

Please confirm whether any customers' bills have been impacted, or will be impacted, by the errors and corrections Liberty has made to the EV-L and EV-M rates since July 2022.

Record Request B (Liberty)

- (i) Please refer to page 5 of the Settlement Agreement in Docket No. DE 20-170. Please confirm whether the input sources provided on June 15, 2023 for the G1 and G-2 revenue requirements (i.e., Att. HMT-1 DE 22-035 reference 8-1-2022 and Att. DE 19-064 rev req Order No. 26,537) for on-peak, off-peak, credits, etc. are correctly reflected in calculating the time-varying kWh rates for EV-L and EV-M, respectively, per the Settlement Agreement.
- (ii) Please ensure, or provide an explanation confirming, that the distribution rates on tariff pages 128 and 133 match the rates calculated in the model, as provided under Docket Nos. DE 20-170 and DE 22-035, and that the page numbers are also correctly reflected in the latter docket.

Record Request C (DOE)

The Commission requests that the DOE review the questions above and provide their independent assessment on the same questions above by July 20, 2023.

Response:

Concerning Record Request – A:

Liberty has confirmed to the Department that no customers currently pay the rates that are the subject of the record request (EV-L and EV-M).

Concerning Record Request – B:

Given that no current customers are affected by the tariffs in question, and given that (the Department believes) the tariffs in question will be superseded by rates approved in Liberty's ongoing rate case, the Department has not dedicated the significant effort needed to answer Record Request B.

The Department will review the response to be provided by Liberty and would be available to explore further in a technical session with Liberty and the PUC advisors if further inquiry of these EV rates and tariffs is needed.
