RE: Docket No. DE 20-170 - Electric Vehicle Time of Use Rates
Public Service Company of New Hampshire d/b/a Eversource Energy
Electric Vehicle Time of Use and Managed Charging Proposals

Director Howland:

On August 18, 2020, the New Hampshire Public Utilities Commission (“Commission”) issued Order No. 26,394 in Docket No. IR 20-004, opening the instant docket and requiring New Hampshire electric utilities to submit separately-metered Electric Vehicle (“EV”) Time of Use (“TOU”) rate proposals for residential and small commercial customers. The Order requires that these proposals “include testimony, projected costs, and be accompanied by illustrative tariff language.” (Order at 18). With this filing, Public Service Company of New Hampshire d/b/a Eversource Energy (“Eversource”) submits its separately-metered, residential and small commercial EV TOU rate proposal and required supporting materials, along with a proposal detailing a recommended Managed Charging Program.

It should be noted that the Order also requires a “rate proposal for separately-metered high demand draw commercial customer applications” (Id.). Eversource has already submitted such a proposal in the form of a Demand Charge Alternative Rate Design, along with an EV Make-Ready proposal. These were both compliance items for the settlement agreement in Eversource’s last rate case, Docket No. DE 19-057. To consider those two proposals, the Commission opened a new docket, Docket No. DE 21-078; both of those proposals can be found in that docket.

Consistent with current Commission policy, this filing will be made electronically only. Please contact me if there are any questions, and thank you for your assistance with this matter.
