DESCRIPTION/SCOPE

Replace the Unitil Service Corp. ("USC") Time and Billing system ("T&B") software with a solution from PowerPlan ("PP"), for a total estimated project cost of \$520,000. T&B is an essential business function which tracks and calculates USC direct labor, indirect labor, overhead, and other direct charges billed monthly, as Outside Professional Services, to each of Unitil's subsidiaries as required by the Service Agreements between USC and its affiliates. Total annual outside services billed by USC are approximately \$70 million in 2020. The existing USC T&B software is over 20 years old and is not stable, therefore presenting an operational risk which can be addressed with a proven, reliable technology product from PP. The project will also include purchasing a software license for the Departmental Budgeting module. This module will be used, along with logic from the time and billing solution, to budget service bill amounts and for automated reporting of budget to actual comparisons, as well as other related activities

Project Internal Labor Staff estimate: Information Technology = 300 hrs @ \$75 = \$22,500 Accounting/Testing/Project Management 500 hrs @ \$75 = \$37,500 Total Internal Labor \$60,000

PP License & Contractor costs estimate:

Original SOW = 342,638 Change Order 1 = 21,226 Change Order 2 = 23,840 Budgeting Module = 140,000

Total PP License & Contractor costs \$527,704

The original budgeted amount of \$204,000.00 was estimated based on a PP proposal which was revised after a complete review of the business requirements of USC's TB processes and interfaces.

JUSTIFICATION

USC's current TB software is end of life and presents an unacceptable operating risk should it stop functioning. That software is not supported by a maintenance contract and is unstable. The current USC TB software is over 20 years old and not scalable or adaptable to new and changing reporting requirements.

The PP solution provides enhanced and appropriate built-in security features which will strengthen USC Internal Controls. The new solution will be able to accommodate changes in employee data, organization department changes and billable Job order Number ("JON") changes and additions used in a modern time billing system. The new system will be menu driven and appropriately segregate system access between IT Staff and Accounting staff.

The USC TB software receives staff salary data from ADP and calculates the direct labor, indirect labor, and overhead components of Outside Professional Services which are charged to the USC client companies according to direct JON's charged on each employee's monthly time card submissions in the The Employee Database ("TED") which is uploaded to USC TB each month and reconciled. Each USC employee receives an annually updated USC Time Billing Guidelines Policy which instructs the staff on USC's time billing standards and criteria. All staff timecards are approved by their Manager.

Revised Revenue Requirement S Energy 4-3

The USC TB maintains preset and dynamic allocation tables which are approved by Senior Management according to Unitil's Internal Controls over Financial Reporting ("ICFR") and are used to complete a monthly USC billing cycle. These tables, and the inputs from ADP and TED drive the calculations required to comply with the rules approved under the Energy Policy Act of 2005 (previously the Public Utility Holding Company Act of 1935 ("PUHCA" or the '35 Act").

Allocation of PUHCA service company costs among affiliate companies is regulated by the FERC and our regulators in New Hampshire, Maine and Massachusetts.. Compliance with these regulations is a vital part of Unitil's operations.

Management reviews the output of USC's TB system monthly and uses TB system data for budgeting and planning purposes.

The project plan includes a complete system upgrade test plan in accordance with Unitil's Application and Change Management Policy in our General IT Controls, as part of our ICFR. This requires Controller and Internal Audit sign-off of the new system's readiness to be promoted into production.

DESCRIPTION/SCOPE

This project will update our existing Flexi Financial System. The upgrade is required to stay current with the latest revision of Flexi and enable us to receive support under our maintenance agreement.

Required Resources

- 1.Flexi consulting is 1-2 days and can be done remotely.
- a. Using the data upgrade wizard, the data will all be moved over automatically
- b. User Application Testing (UAT) normally takes 2-5 man days of customer time, estimate of 80 hours..
- i. This is made up of documenting current processes
- ii. Parallel processing of data to insure no corruption
- iii. Taking advantage of new features in the software
- 2. IT TBD
- a. Test server and loading new database
- b. Imports and exports out of Flexi (data to the bank)
- 3. Accounting teams testing, import and export testing, data integrity and interfaces.

Internal Labor estimate: 40 Internal labor App Dev =3,000

PM (20%) = 600

SME/Testing 352@ \$75 = 26400

Total internal labor estimate = 30,000

Upgrade support (servers, loads, etc): no changes are required to the server for this upgrade.

Support interface testing for minor upgrade: part of our support agreement (no cost)

Accounting and IT department internal labor: \$30,000 (includes 55% fringe)

JUSTIFICATION

The upgrade of Flexi will allow us to take advantage of many new enhancements that have occurred in the last couple of revisions which we have not applied and stay up to date with all security enhancements. The upgrade will also keep our maintenance agreement valid so we can receive support from Flexi. Flexi is critical component that allows accurate accounting in order to comply with SEC, FERC, SOX, audit and regulatory reporting. If the upgrade is not performed, we risk loosing FLEXi system support

Audit Issue #4 Expense Account Overstated

Background

Audit selected one invoice from account 923 was reviewed in the amount of \$6,925 from OnSolve. The invoice is the Emergency Alert System (EAS) and Mobile Services from March 5, 2020 through March 4, 2021.

Issue

\$1,385 of the invoice was booked to account 30-40-22-00-923-15-00, OS-Emergency Management & Compliance. 20% of the invoice was booked to NU-NH. Per the Cost Allocation Manual, it appears that 19%, or \$1,315.75, should have been booked to this account.

Recommendation

Audit recommends removing the difference of \$69.25 from the test year expense total.

Company Response

The Company agrees with the inadvertent allocation issue described above and will reduce test year O&M by \$69.25.

Audit Response

Audit concurs with the Company Response, and as noted in Audit Issue #3, acknowledges that the amount is immaterial.
