Concord, N.H. 03301-2429

Re: DG 21-104 Northern Utilities, Inc. – Step Adjustment

Chairman Goldner:

On August 2, 2021, Northern Utilities, Inc. (“Northern” or the “Company”) submitted, in the above-referenced docket, its petition to implement new permanent rates beginning September 1, 2021 for gas service. Included in the Company’s filing was a request to implement a multi-year rate plan the three annual step adjustments for certain non-growth capital in the investment years 2021, 2022, and 2023. As explained in the prefiled testimony of Christopher Goulding and Daniel Nawazelski, the Company proposed to make each step adjustment compliance filing on or before the last day of March for the prior year’s additions. The enclosed filing is for the investment year 2021 additions, with rates to take effect on August 1, 2022.

Please do not hesitate to contact me with any questions that you have regarding the enclosed filing.

Sincerely,

A handwritten signature in black ink, appearing to read "Patrick H. Taylor", written over a horizontal line.

**THE STATE OF NEW HAMPSHIRE
BEFORE THE
PUBLIC UTILITIES COMMISSION**

Northern Utilities, Inc.

DOCKET NO. DG 21-104

REQUEST FOR CHANGE IN RATES

PETITION FOR STEP ADJUSTMENT

On August 2, 2021, Northern Utilities, Inc. (“Northern” or the “Company”) submitted, in the above-referenced docket, a request for an increase in permanent rates that included, *inter alia*, a request to implement a multi-year rate plan with three annual step adjustments to recover the revenue requirement associated with certain non-growth capital additions to rate base. As explained in the prefiled testimony of Christopher Goulding and Daniel Nawazelski, the Company proposed to make each step adjustment compliance filing on or before the last day of March for the prior year’s additions. Thus, the filing for investment year 2021 additions would be filed on March 31, 2022, with rates to take effect on August 1, 2022.

Consistent with the Petition and the Testimony of Mr. Goulding and Mr. Nawazelski, Northern hereby petitions the Commission to approve a step adjustment for certain 2021 non-growth capital additions, with rates to take effect on August 1, 2022. In support of this Petition, the Company states as follows:

1. On August 2, 2021, the Company submitted a Petition and accompanying materials, including pre-filed Testimonies, in support of a permanent rate increase in the

above-referenced docket. In addition to a request to implement new permanent rates for gas service, the Company proposed, *inter alia*, to implement a multi-year rate plan with three annual step adjustments to recover the revenue requirement associated with certain non-growth capital additions to rate base. Under the proposed Rate Plan, it is anticipated that the initial step adjustment will be implemented on the effective date of permanent rates. DG 21-104, Petition at 2-3 (August 2, 2021).

2. In support of its request for a multi-year Rate Plan, the Company submitted the direct testimony of Robert Hevert and the joint direct testimony of Christopher Goulding and Daniel Nawazelski.

3. As explained in the direct testimony of Mr. Hevert and the joint direct testimony of Mr. Goulding and Mr. Nawazelski, each March 31st (beginning 2022), the Company will make a compliance filing to recover the revenue requirement associated with eligible plant additions made during the prior calendar year. The approved revenue requirement then would be recovered over rate years beginning August 1st and ending July 31st of the following year. Under that structure, the Company would make its first compliance filing on or before March 31, 2022, identifying the revenue requirement associated with eligible investments made during calendar year 2021, to be recovered over the rate year August 1, 2022 through July 31, 2023. DG 21-104, Direct Testimony of Robert Hevert at Bates 00021; Joint Direct Testimony of Christopher Goulding and Daniel Nawazelski at Bates 00091.

4. The Commission has previously authorized the Company to implement a similar series of step adjustments. *See Northern Utilities, Inc.*, DG 17-070, Order No.

26,129 at 14-15, 16 (May 2, 2018); *Northern Utilities, Inc.*, DG 13-086, Order No. 25,653 at 9-11 (April 21, 2014)

5. Included with this Petition are the Direct Testimony of Christopher J. Goulding, Kevin E. Sprague, and Christopher J. LeBlanc (marked as Exhibit GSL-1) and supporting Schedules (Schedules GSL-1 through GSL-5). The testimony, and the supporting schedules, present the Company's revenue requirement for its 2022 Step Adjustment based on 2021 capital spending, a summary of projects placed into service in 2021, budget input sheets and construction authorizations for projects placed into service in 2021, and cost records for specific and blanket projects placed into service in 2021.

6. As described in the above-identified testimony, and the supporting schedules, this filing provides the relevant support for the Company's August 1, 2022 Step Adjustment for 2021 non-growth capital investments as proposed in the Company's initial petition and rate filing. The revenue requirement associated with 2022 non-growth capital spending is \$2,355,084.

7. The Company's proposed investment year 2021 Revenue Requirement is below the Company's proposed three-year Revenue Requirement cap of \$10,500,000. As described in the Company's initial filing Exhibit CGDN-1, bates 96, the Company proposed a revenue requirement cap of \$10,500,000 which is the sum of the revenue requirements for investment years 2021-2023 plus an increase of approximately 10%. Exhibit GSL-1 at 8.¹

7. The rate adjustments requested by the Company in this filing result in rates that are just and reasonable and in the public interest and should, therefore, be approved.

¹ The additional approximate 10% is to accommodate unknown conditions, such as municipal projects that may arise in the future but are not known today. Id.

WHEREFORE, the Company respectfully requests that the Commission:

A. Grant the Company's 2022 Step Adjustment request for a revenue requirement increase in the amount of \$2,355,084 as described in the included testimony and supporting schedules; and

B. Order such further relief as may be just and appropriate.

Respectfully submitted,

NORTHERN UTILITIES, INC.

By its Counsel:

Patrick Taylor
Chief Regulatory Counsel
Unitil Service Corp.

Schedule GSL-5	2022 Step Adjustment

1 **I. INTRODUCTION**

2 **Q. Please state your name and business address.**

3 A. My name is Christopher J. Goulding, and my business address is 6 Liberty Lane
4 West, Hampton, New Hampshire 03842.

5 My name is Kevin E. Sprague, and my business address is the same as Mr.
6 Goulding's.

7 My name is Christopher J. LeBlanc, and my business address is 325 West Road,
8 Portsmouth, New Hampshire.

9 **Q. Mr. Goulding, what is your position and what are your responsibilities?**

10 A. I am the Director of Rates and Revenue Requirements for Unitil Service Corp.
11 ("Unitil Service"), a subsidiary of Unitil Corporation ("Unitil Corp" that provides
12 managerial, financial, regulatory and engineering services to Unitil Corp's utility
13 subsidiaries including Northern Utilities, Inc. ("Northern" or the "Company"). My
14 responsibilities include all rate and regulatory filings related to the financial
15 requirements of Northern and Unitil Corp's other subsidiaries.

16 **Q. Please describe your business and educational background.**

17 A. In 2000 I was hired by NSTAR Electric & Gas Company ("NSTAR", now
18 Eversource Energy) and held various positions with increasing responsibilities in
19 Accounting, Corporate Finance and Regulatory. I was hired by Unitil Service in
20 early 2019 to perform my current job responsibilities. I earned a Bachelor of

1 Science degree in Business Administration from Northeastern University in 2000
2 and a Master's in Business Administration from Boston College in 2009.

3 **Q. Have you previously testified before this Commission or other regulatory**
4 **agencies?**

5 A. Yes, I have testified before the New Hampshire Public Utilities Commission (the
6 "Commission") on various financial, ratemaking and utility regulation matters,
7 including utility cost of service and revenue requirements analysis. I have also
8 testified before the Maine Public Utilities Commission and Massachusetts
9 Department of Public Utilities on similar matters on several occasions.

10 **Q. Mr. Sprague, what is your position and what are your responsibilities?**

11 A. I am Vice President of Engineering for Unitil Service. In this capacity, I manage
12 all engineering functions, including electric engineering, gas engineering,
13 computer-aided design and drafting, Geographic Information Systems ("GIS"),
14 and management of utility-owned land and property.

15 **Q. Please describe your business and educational background.**

16 A. I have been employed by Unitil Service for over 25 years. I was originally hired
17 as an Associate Engineer in the Electric Distribution Engineering group. I have
18 held the positions of Engineer, Distribution Engineer, Manager of Distribution
19 Engineering, Director of Engineering and now Vice President of Engineering. I
20 accepted the Vice President of Engineering position in January of 2019. I hold a
21 Bachelor of Science in Electric Power Engineering from Rensselaer Polytechnic
22 Institute and a Master of Business Administration from the University of New

1 Hampshire.

2 **Q. Do you have any licenses that qualify you to speak to issues related to**
3 **engineering?**

4 A. Yes. I am a registered Professional Engineer in the State of New Hampshire and
5 the Commonwealth of Massachusetts.

6 **Q. Have you previously testified before the Commission, or other regulatory**
7 **agencies?**

8 A. Yes, I have testified on previous occasions before the Commission, the Maine
9 Public Utilities Commission and the Massachusetts Department of Public
10 Utilities. I also filed testimony in the Company's base rate case proceeding in DG
11 17-070.

12 **Q. Mr. LeBlanc, what is your position and what are your responsibilities?**

13 A. I am Vice-President of Gas Operations for Unitil Service. In this capacity, I am
14 responsible for managing all gas operations for Northern and Unitil's other
15 subsidiaries, including the safe, reliable, and efficient production, transportation
16 and delivery of natural gas service to customers.

17 **Q. Mr. LeBlanc, please summarize your professional and educational**
18 **background.**

19 A. I have more than 25 years of experience in the utility industry and an extensive
20 background in the operation, maintenance and construction of natural gas
21 distribution systems. I have been Operator Qualified in 84 covered tasks and have
22 had formal industry-specific training at the Gas Technology Institute in Gas
23 Distribution Operations, Transmission Operations, Pipeline Design and

1 Construction Practices and Regulator Station Design.

2

3 I joined Unitol Service in 2000 as a Field Technician and since then have
4 progressed through several positions of increasing responsibility including Project
5 Leader in 2002 and Manager, Gas Operations in 2003. I was promoted to
6 Director, Gas Operations in 2008 and was named Vice-President, Gas Operations
7 on January 1, 2017. Prior to joining Unitol Service, I was employed for nine years
8 at R.H. White Construction Company, where I was responsible for leading and
9 directing field crews in construction and installation of underground utility
10 infrastructure.

11

12 I hold a Bachelor of Arts degree in Business Administration from Assumption
13 College and a Master's degree in Business Administration from the same
14 institution. Additionally, I have completed civil engineering course work at the
15 University of Massachusetts, Lowell.

16 **Q. Have you previously testified before the Commission or other regulatory**
17 **agencies?**

18 A. Yes, I have testified before the Commission on numerous issues related to gas
19 safety and operations. In addition to the Commission, I have also testified before
20 the Massachusetts Department of Public Utilities and the Maine Public Utilities
21 Commission on issues related to gas safety and operations.

22 **II. SUMMARY OF TESTIMONY**

1 **Q. What is the purpose of your testimony?**

2 A. The purpose of our testimony is to present and support the Company's revenue
3 requirement for its 2022 Step Adjustment based on 2021 capital spending.

4 **Q. Please explain the increase for the 2022 Step Adjustment.**

5 A. The calculated 2022 Step Adjustment is \$2,355,084 for 2021 non growth capital
6 spending and is included in this testimony pursuant to the proposed 2021 Rate
7 Plan in DG 21-104. The 2022 Step Adjustment was derived by calculating the
8 revenue requirement associated with the annual Change in Non-Growth Net Plant
9 for the period January 1, 2021 through December 31, 2021. Additional details for
10 the 2022 Step Adjustment are provided later in this testimony.

11 **III. 2022 STEP ADJUSTMENT**

12 **Q. What was the Company's forecasted capital spending for calendar year 2021
13 for the 2022 Step Adjustment in docket DG 21-104?**

14 A. As shown on Table 1 (Bates 326) of the Company's pre-filed direct testimony of
15 Kevin Sprague and Christopher LeBlanc in docket DG 21-104, the forecasted
16 capital spending was \$30,048,049. This was based upon a five year capital budget
17 forecast that was developed in 2020. The actual 2021 plant additions and cost of
18 removal closed to plant was \$20,391,878.

19 **Q. Has the Company provided a summary of projects placed into service in
20 2021?**

1 A. Yes. Schedule GSL-1 provides a summary, by project, of capital additions placed
2 into service during calendar year 2021. This schedule provides each applicable
3 project's authorization number, budget code, associated FERC accounts,
4 installation costs, cost of removal, salvage, original and any subsequent
5 authorizations, budget, and date the project(s) were placed into service.
6 Importantly the summary also designates each project as Growth ("G") or Non-
7 Growth ("NG") and a split showing the amount of capital additions for each
8 category is provided. During calendar year 2021 the Company had \$19,749,334 of
9 additions with \$16,442,711, or 83% classified as Non-Growth.

10 **Q. Has the Company provided Capital Budget Input Sheets and Capital**
11 **Authorization requests?**

12 A. Yes. Schedule GSL-2 provides the Company's Capital Budget Input Sheets and
13 Capital Authorizations for all investments placed into service during 2021.
14 Capital Budget Input Sheets provide the scope, justification and raw budget inputs
15 used by the capital budget system to calculate the budgeted amount. The Capital
16 Authorizations provide further detail on the scope and justification for the project,
17 the budgeted amount, and the authorized amount. If any subsequent Revised or
18 Supplemental Authorizations were required the Company has provided those
19 documents as well.

20 **Q. Has the Company provided Cost Records for projects placed in service in**
21 **2021?**

1 A. Yes. Schedule GSL-3 provides the Company's Cost Records for specific projects
2 placed in service in 2021. Schedule GSL-4 provides the Company's Cost Records
3 for blanket projects placed in service in 2021.

4 **Q. Please describe the derivation of Rate Base on page 1 of Schedule GSL-5.**

5 A. Rate Base is calculated by sourcing lines 1 and 2 from the Company's plant
6 accounting records summarized in Schedule GSL-1 to arrive at the investment
7 year 2021 Non-Growth Capital Expenditures as shown on line 3. Accumulated
8 Depreciation is calculated on line 4 by taking 50% of the calculated Depreciation
9 Expense which is calculated on Line 20. Next, Accumulated Depreciation is
10 removed from the investment year 2021 Non-Growth Capital Expenditures to
11 derive Net Utility Plant as shown on line 5. Then Accumulated Deferred Income
12 Taxes (ADIT) is calculated on line 6 by applying the Effective Income Tax Rate
13 to the difference between Book and Tax Depreciation as shown on lines 18-26.
14 Lastly, ADIT is deducted from Net Utility Plant to get the Rate Base associated
15 with the investment year 2021 Non-Growth Capital Expenditures as shown on
16 line 7 of \$16,736,837.

17 **Q. Please describe the derivation of Revenue Requirement on page 1 of**
18 **Schedule GSL-5.**

19 A. As described above, once Rate Base is calculated it is multiplied by the Pre-Tax
20 Rate of Return on line 9 to derive the Return and Related Income Taxes on line 10
21 of \$1,631,302. Next, Depreciation Expense associated with investment year 2021
22 Non-Growth Plant Additions is calculated on lines 18-20 based on a composite

1 depreciation rate of 3.73 percent, which is calculated in Line 39 Column 3 from
2 Schedule RevReq-3-16, Page 2. Then, State Property Taxes are calculated on Net
3 Utility Plant on line 12 using a property tax rate of 0.66%, which corresponds to
4 the statutory tax rate in RSA 83-F:2, currently \$6.60 per \$1,000 of investment.
5 Finally, Return and Related Income Taxes, Depreciation and Property Taxes are
6 added together to arrive at the Revenue Requirement on line 13.

7 **Q. What schedules support Schedule GSL-5, Page 1?**

8 A. Schedule GSL-5, Page 2 shows the calculation of the pre-tax rate of return.

9 **Q. What is the Revenue Requirement that you derived?**

10 A. Page 1 of Schedule GSL-5, Line 13, shows the Revenue Requirement of
11 \$2,355,084.

12 **Q. Is the Revenue Requirement at or below the Company's proposed Revenue
13 Requirement Cap?**

14 A. Yes, the Company's proposed investment year 2021 Revenue Requirement is
15 below the Company's proposed three-year Revenue Requirement cap of
16 \$10,500,000. As described in the Company's initial filing Exhibit CGDN-1, bates
17 96, the Company proposed a revenue requirement cap of \$10,500,000 which is
18 the sum of the revenue requirements for investment years 2021-2023 plus an
19 increase of approximately 10%. The additional approximate 10% is to
20 accommodate unknown conditions, such as municipal projects that may arise in
21 the future but are not known today.

22

1 **IV. CONCLUSION**

2 **Q. Has the Company provided rate design, monthly revenue per customer**
3 **targets for decoupling and bill impacts associated with the 2022 Step**
4 **Adjustment?**

5 A. No. The Company has not provided this information given the point in the base
6 rate case proceeding procedural schedule the Company is in. The Company
7 intends to supplement this filing once the permanent rate increase is finalized.

8 **Q. Does this conclude your testimony?**

9 A. Yes, it does.

ESTIMATED COST SUMMARY

Action Date	Approved	Approver/Title	Description	Amount
2/19/2019	YES	Laffond, Courtney <i>General Accountant</i>	Total Project Cost:	\$187,960.00
2/20/2019	YES	Hobart, Darrell <i>Manager, Gas Distribution Operations</i>	Less Customer Contribution:	\$0.00
2/19/2019	YES	Bickford, Timothy <i>Manager Gas Engineering</i>	Net Authorized Cost:	\$187,960.00
2/20/2019	YES	Leblanc, Christopher <i>VP, Gas Operations</i>	Retirement:	\$0.00
2/19/2019	YES	Sprague, Kevin <i>VP, Engineering</i>	Cost Of Removal:	\$33,833.00
2/20/2019	YES	Main, Dan <i>Manager of Regulatory Services and Corporate Compliance</i>	Salvage:	\$0.00
			Blanket Authorization Total:	\$154,127.00

DESCRIPTION/SCOPE

Normal additions and replacements of gas distribution system components. These include pipe, fittings, and other distribution related materials, as well as all labor, transportation, material, road spoils, sand, gravel and other associated items that pertain to these projects.

This authorization is for the first six months, Jan through Jun of 2019.

JUSTIFICATION

This budget item covers all required replacement and additions of pipe, fittings and other gas system related components. These are often a result of external third party damage, corrosion, age related failure, system enhancements, fitting failure etc.

DESCRIPTION/SCOPE

Revision 1: This revision is for the additional costs for the 25 Farm tap replacements in 2019. The original dollar amount was to bring PLV's not in compliance above ground into an approved PLV enclosure.
Many of these PLV's required additional work up to and including full replacements of the service to bring them into compliance.

Replace 25 existing buried farm tap regulators in 2019 with the current engineering design for above ground PLVs. This is a multi-year project to replace approximately 550 farm taps.

This authorization is for the full year 2019.

JUSTIFICATION

This project is to upgrade services with buried farm tap regulators.

2/14/2019	YES	Main, Dan <i>Manager of Regulatory Services and Corporate Compliance</i>	Salvage:	\$0.00
			CWO Total:	\$251,350.55

DESCRIPTION/SCOPE

This budget item is for the replacement of approximately 160 feet of 8" coated steel main across the Route 125 bridge with new rollers and expansion joints.

JUSTIFICATION

The current main is lifted off of the rollers and shows signs of corrosion. This corroding 8" coated steel main is in need of replacement and is a carrier for a substantial portion of the load in the northern half of the Plaistow IP system (NH-System 2). This bridge crossing is also projected to deliver the majority of the 75 MCFH load that will be supplied to Benevento, whose load is predicted to come on next summer. In order to mitigate against a low pressure incident in the Plaistow IP system, an 8" coated steel pipe with expansion joints is needed to remediate against the existing corrosion and to prevent potential stress damage to the pipe, which is no longer being supported by the existing rollers.

Salvage:	

Description/Scope

This budget item is for the replacement of approximately 160 feet of 8" coated steel main across the Route 125 bridge with new rollers and expansion joints.

Justification

The current main is lifted off of the rollers and shows signs of corrosion. This corroding 8" coated steel main is in need of replacement and is a carrier for a substantial portion of the load in the northern half of the Plaistow IP system (NH-System 2). This bridge crossing is also projected to deliver the majority of the 75 MCFH load that will be supplied to Benevento, whose load is predicted to come on next summer. In order to mitigate against a low pressure incident in the Plaistow IP system, an 8" coated steel pipe with expansion joints is needed to remediate against the existing corrosion and to prevent potential stress damage to the pipe, which is no longer being supported by the existing rollers.

DESCRIPTION/SCOPE

Design ,fabricate and install new 56PSIG MAOP Epping Road regulator station to be constructed at existing Epping Road/Brentwood supply station site. located in Exeter, NH.

JUSTIFICATION

Installation of this station is required to:

1. Support load growth in the Exeter IP system and
2. Allow for the existing Exeter West station flow to be backed off, to help mitigate significant station icing concerns at this location. The Exeter West site is not suitable for adding ta pre-heat unit to mitigate the icing concern.

DESCRIPTION/SCOPE

REVISED SCOPE:

This revision covers the additional cost associated with both adding another level of OPP-burst disk, as well as fabrication/material cost increases from when the project was quoted in 2018.

2018 Budget (loaded): \$381.8K

Cost Revision (loaded): \$545.7K

Difference between initial budget & revision: \$163.9K

Major contributors to cost over run:

OPP design & fabrication: \$48K-not in original estimate

Fabrication Cost: \$80K-185% increase in fabrication costs

Material Cost: \$16K-25% increase

Project Incidentals: \$20K-items not included in original estimate-grounding, electrical & extensive painting.

Total: \$164K

INITIAL SCOPE:

Design ,fabricate and install new 56PSIG MAOP Epping Road regulator station to be constructed at existing Epping Road/Brentwood supply station site. located in Exeter, NH.

JUSTIFICATION

Installation of this station is required to:

1. Support load growth in the Exeter IP system and
2. Allow for the existing Exeter West station flow to be backed off, to help mitigate significant station icing concerns at this location. The Exeter West site is not suitable for adding a pre-heat unit to mitigate the icing concern.

8/27/2020	YES	Brock, Laurence <i>Senior Vice President & Chief Financial Officer</i>		

DESCRIPTION/SCOPE

REVISED SCOPE #2:

This revision covers additional cost to the project as a direct result of construction cost overruns, added additional and unplanned work and increased contractor/material/component cost from when the project was originally quoted in 2018 and revised in 2019. The summary is as follows;

2018 Budget (loaded): \$381.8K

2019 Cost Revision #1 (loaded): \$545.7K

2020 Cost Revision #2 (loaded): \$755.5K

Diff between initial budget & revision #2 (loaded): \$373.7K

Diff between Rev #1 & Rev #2 (loaded): \$210K

Major contributors to cost overrun:

Site Excavation to accommodate install of piping and sona tubes-inside active station and in close proximity to GSG pipeline: \$125K-250% increase-more handwork than planned-including extensive vac truck excavation..

Fabrication & Material Cost associated with the addition of a super-monitor run required for downstream system OPP: \$60K-not included in initial project OPP scope

Project Incidentals: \$25K-increased costs of electrical work as well as additional scope in station painting and SCADA work.

Project to be completed in the Fall of 2020.

REVISED SCOPE #1:

This revision covers the additional cost associated with both adding another level of OPP-burst disk, as well as fabrication/material cost increases from when the project was quoted in 2018.

2018 Budget (loaded): \$381.8K

Cost Revision (loaded): \$545.7K

Difference between initial budget & revision: \$163.9K

Major contributors to cost over run:

OPP design & fabrication: \$48K-not in original estimate

Fabrication Cost: \$80K-185% increase in fabrication costs

Material Cost: \$16K-25% increase

Project Incidentals: \$20K-items not included in original estimate-grounding, electrical & extensive painting.

Total: \$164K

INITIAL SCOPE:

Design ,fabricate and install new 56PSIG MAOP Epping Road regulator station to be constructed at existing Epping Road/Brentwood supply station site. located in Exeter, NH.

DESCRIPTION/SCOPE

This Authorization is for the installation of gas mains and services associated with the Company's system expansion initiative. The project(s) associated with this "blanket" authorization are smaller in scale and have an estimated per project total capital expenditure that is not expected to exceed \$30,000. Each of the project(s) associated with this Authorization will have an individual CWO assigned, which will correspond to specific G-Intake package. The authorized amount was derived using a historical trend analysis from 2016-2018.

The 2019 projection is for 18 projects with an estimated expenditure of \$250,000.

JUSTIFICATION

These growth projects will be evaluated and approved for construction by Business Services in accordance with Unutil's Policies for the Installation of New Gas Service/Main Extension and Rate of Return Criteria.

			CWO Total:	\$93,783.00

DESCRIPTION/SCOPE

This authorization is for the relocation of approx. 200' of 4" CS main and 200' of 2"CS main in Rt 1 by-pass Portsmouth. The main will be removed from the culvert during construction and replaced after construction has been completed. The City is doing a bridge replacement at Hodgson Brook crossing.

This project has been reviewed and approved by the local engineering department.

JUSTIFICATION

As City and State projects develop it is often necessary that gas lines be relocated and/or upgraded due to construction conflicts. The NHDOT is doing a culvert replacement on Rt 1 by-pass.
State Mandate - gas lines in conflict with any City or State project will be relocated by the utility.

NH Department of Transportation.

DESCRIPTION/SCOPE

This project will require the fabrication of a new district regulator station within the boundary of the existing Forrest Street Station in Plaistow, NH. This station will be supplied directly from the GSGT-492 PSIG and will operate at a 99PSIG MAOP. This cost is the NU-NH portion of this project. A separate budget request will be submitted by GSGT.

JUSTIFICATION

This new station is required to facilitate the addition of multiple large commercial customers in Atkinson & Kingston, NH.

DESCRIPTION/SCOPE

Amended Scope/Description-07/03/2019

New, contracted demand coming on in the spring of 2020 in the Plaistow/Atkinson IP system requires the fabrication of a new district regulator station to be built within the boundary of the existing Forest Street Regulator station located in Plaistow, NH. Optimization of both the current operational configuration of the station as well as future redundancy design considerations, future demand in the Plaistow/Atkinson IP system, combined with enhancements to operational safety via the installation of additional levels of system over-pressure protection-providing for a minimum of (5) levels , are directly attributable to the significant scope change to this project from when it was submitted into the 2019 capital budget in August of 2018.

The high level overview of the impact to the budget per the change in project scope is as follows:

2019 Actual Dollars (Initial Budget): \$402K
2019 Budget w/Overheads: \$560K
Revised Actual Dollars (7/3/19): \$900K

Difference of 2019 Actual Budgeted
To Actual (re-calculated); \$498K

Total revised budget w/overheads: \$1.242 million

Major Contributors to overrun:

Adding Filter to NUNH budget: \$45K-installation of the filter was originally planned on GSG side of the station, but upon further design review, the filter will now be located on the NU side of the station.

Bridle by-pass components cost \$55K-cost not included in original estimate-upon further design analysis, utilization of existing bridle was deemed infeasible-requiring the construction of a by-pass.

Pipe & Fittings: \$22K-240% higher than estimate-to accommodate additional OPP initiatives.

Additional Design: \$38K-215% higher than estimate-additional OPP design/additional future GSG operational redundancy enhancements & other future facilities at this location

Specific OPP equipment req: \$32K-cost not included in original estimate

Fabrication & Installation Contractor: \$158K-210% higher than estimate-bid in early May '19 Additional fabrication costs due to OPP requirements as well as it being determined that the existing GSG bridle cannot facilitate a tap

Overall Component Cost Increases: \$50K-25% higher than estimate-material cost increases in 2019 higher than what was anticipated when the budget was initially developed.

Project Incidentals (fencing, etc): \$23K-cost not included in original estimate-station footprint is larger/additional security with new fencing/AC
 Mitigation measures not originally considered
 Total: \$423K (actual dollars)

Initial Scope & Description:

This project will require the fabrication of a new district regulator station within the boundary of the existing Forrest Street Station in Plaistow, NH. This station will be supplied directly from the GSGT-492 PSIG and will operate at a 99PSIG MAOP. This cost is the NU-NH portion of this project. A separate budget request will be submitted by GSGT.

JUSTIFICATION

Amended Justification-07/03/2019

This new station is required to facilitate the addition of multiple newly contracted large commercial customers in Atkinson & Kingston, NH coming on in the spring of 2020. The additional costs required to fund the completion of this project are based primarily on enhancing safety and security at this new station via the installation of additional means of over-pressure protection-for a total of (5). Higher material and component costs as well as a change from both the original design and construction sequencing strategies also contribute to the cost overrun.

Initial Justification

This new station is required to facilitate the addition of multiple large commercial customers in Atkinson & Kingston, NH.

DESCRIPTION/SCOPE				
Install approximately 11,000' of 8" HDPE from the existing Forrest Ave station in Plaistow along Forrest Ave to East Pine St, Main St, and tie in on Route 125. Upon completion of the engineered plans and Town approvals, additional cost needed to be added to this project which includes the following: 2 HDD drills to avoid State routes 125 and 121A as directed by the NHDOT - \$155,496 T& M costs associated with drills - \$47,451 Additional police detail associated with drills - \$27,360 Town is requiring a 6' grind and inlay of gas trench upon completion - \$347,363 Engineering is requiring the replacement and tie over of 5 existing services to new main and an additional main tie in. -\$19,382 wetlands remediation - \$29,302 Flagger assigned to entire project when police cannot fill detail - \$30,400 Additional police detail for service replacements and main tie over.\$12,768				
JUSTIFICATION				
The Plaistow system improvement is to provide additional flow and pressure support to the Plaistow IP system. Due to substantial forecasted load growth in Plaistow, Atkinson, and Kingston, the Plaistow IP system (56 PSIG MAOP) distribution system pressures will fall significantly below the design threshold. This system reinforcement is necessary to support forecasted load growth and recently contracted large commercial customers in both Atkinson and Kingston. This system improvement will provide the required supply for the anticipated growth and will improve system reliability.

DESCRIPTION/SCOPE

Revision:

There has been a scope change to the Plaistow system improvement project and the additional scope is as follows:

Scope: The Plaistow IP System (NH #2 – MAOP 56psig) is to be improved within 2019, 2020 and 2021 to facilitate increased load growth throughout its areas. This improvement has been proposed in three phases:

Phase 1 – 2019: An approximate 3,400 foot 6 inch HDPE IP main extension from the existing 6 inch HDPE IP main at 153 Plaistow Rd. (Rte. 125) to the intersection of Plaistow Rd. and Old County Rd. in Plaistow, NH and the installation of 1000' of 6" HDPE in Old County Rd to the existing 4" main in Old County Rd.

Phase 2 – 2020: An approximate 3000 feet 6 inch HDPE IP main extension from end of the Phase 1 main extension replacing the existing 4 inch main along Old County Rd.

Phase 3 – 2021: An approximate 3000' 6" main extension from the end of the Phase 2 main extension replacing the existing 4" main along Kingston Rd and ending at the existing 6" main at sweet Hill Rd.

Original estimate: \$1,857,718
Revision Cost for 2019 Work: \$998,873
Total 2019 Cost: \$2,856,591

Install approximately 11,000' of 8" HDPE from the existing Forrest Ave station in Plaistow along Forrest Ave to East Pine St, Main St, and tie in on Route 125.

Upon completion of the engineered plans and Town approvals, additional cost needed to be added to this project which includes the following:

2 HDD drills to avoid State routes 125 and 121A as directed by the NHDOT - \$155,496

T& M costs associated with drills - \$47,451

Additional police detail associated with drills - \$27,360

Town is requiring a 6' grind and inlay of gas trench upon completion - \$347,363

Engineering is requiring the replacement and tie over of 5 existing services to new main and an additional main tie in. -\$19,382

wetlands remediation - \$29,302

Flagger assigned to entire project when police cannot fill detail - \$30,400

Additional police detail for service replacements and main tie over.\$12,768

JUSTIFICATION

The Plaistow system improvement is to provide additional flow and pressure support to the Plaistow IP system. Due to substantial forecasted load growth in Plaistow, Atkinson, and Kingston, the Plaistow IP system (56 PSIG MAOP) distribution system pressures will fall significantly below the design threshold.

This system reinforcement is necessary to support forecasted load growth and recently contracted large commercial customers in both Atkinson and Kingston. This system improvement will provide the required supply for the anticipated growth and will improve system reliability.

DESCRIPTION/SCOPE

This authorization is for the installation of approx. 1000' of 12" CS main for a City paving project.

This project has been reviewed and approved by the local engineering department.

JUSTIFICATION

As City and State projects develop it is often necessary that gas lines be relocated and/or upgraded due to construction conflicts. The City of Rochester is doing a full depth reconstruction of Railroad Ave.
State Mandate - gas lines in conflict with any City or State project will be relocated by the utility.
NH Department of Transportation.

DESCRIPTION/SCOPE				
As part of the 12" CS main installation on the Dover-Somersworth (397 PSIG) high-line, it was determined that a new header configuration at the Varney Brook Station would be required to accommodate the tie-in of the station to the new main.				
This work will include engineering, the material to fabricate the tie-in (fittings and valves) and CWI/NDT. In addition, supports for the new header configuration will require the installation of new sono-tubes, and due to the wet conditions in this area, additional civil engineering work will need to be completed. The new header configuration is changing the over-all foot-print of the station, requiring additional safety fencing. Modifications to the existing AC mitigation measures as well as finish paint for the new header install will be required to complete the project.				
JUSTIFICATION				
Although consideration was given to the tie-in of the new 12" main when the project was originally quoted, a direct tie-in to the station was not the first option. Rather, the plan was to have the new 12" main parallel the existing 6" main with the 12" being directly tied over to the 6" main via the use of a control fitting. Gas Engineering determined that the existing 6" main would eventually be repurposed and a direct tie-in of the new 12" main to the station was needed to be support the increased downstream demand. Because this station work falls outside of the scope of the budgeted main installation project, a separate authorization is required to fund this work. The main installation will be completed in the fall of 2019, with the expectation that gas will be in the 12" main by the 2019/2020 winter season so as to support that increased downstream demand.

2/24/2020	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Salvage:	\$0.00
			Blanket Authorization Total:	\$247,831.64

DESCRIPTION/SCOPE

Normal additions and replacements of gas distribution system components. These include pipe, fittings, and other distribution related materials, as well as all labor, transportation, material, road spoils, sand, gravel and other associated items that pertain to these projects.

2020 amounts were projected using a 3-year average with a 3% increase for materials and contract services

This authorization is for the first six months, Jan through Jun, 2020.

JUSTIFICATION

This budget item covers all required replacement and additions of pipe, fittings and other gas system related components. These are often a result of external third party damage, corrosion, age related failure, system enhancements, fitting failure etc.

DESCRIPTION/SCOPE

To provide cathodic protection to coated steel pipe on the HP and LP distribution systems throughout the service territory. These sections of main are identified through our on going corrosion control inspection program.

JUSTIFICATION

Federal regulations 49 CFR Part 192.453 Corrosion Control, requires cathodic protection and monitoring of coated steel pipe within our distribution system. This work is necessary to comply with State and Federal minimum safety standards 49 CFR Part 192.453.
The budget amount is based on necessary additions and upgrades identified by preliminary evaluation of CP testing results from 2019

Description/Scope	
To provide cathodic protection to coated steel pipe on the HP and LP distribution systems throughout the service territory. These sections of main are identified through our on going corrosion control inspection program.	
Justification	
Federal regulations 49 CFR Part 192.453 Corrosion Control, requires cathodic protection and monitoring of coated steel pipe within our distribution system. This work is necessary to comply with State and Federal minimum safety standards 49 CFR Part 192.453. The budget amount is based on necessary additions and upgrades identified by preliminary evaluation of CP testing results from 2019

2/10/2020	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Salvage:	\$0.00
			Blanket Authorization Total:	\$0.00

DESCRIPTION/SCOPE

The permanent abandonment at the main of inactive service lines.
Based on a 3-year average with a 3% increase
This authorization is for the first six months, Jan through Jun, 2020.

JUSTIFICATION

The abandonment of inactive gas services is a Federal requirement in accordance with CFR 149 and a State requirement in accordance with PUC 500. All services that have been inactive for (3) years, unless the service is plastic or cathodically protected steel, must be physically disconnected (i.e. abandoned) at the main. A plastic or cathodically protected steel service must be abandoned no later than (10) years from the most recent inactivation date.

DESCRIPTION/SCOPE

This budget item will cover all costs associated with the upgrade (renewal) of existing gas services. This will include labor, material transportation, police details, sand, gravel, road spoil disposal, loam & seed, and asphalt restoration

Based on a 3-year average with a 3% increase

This authorization is for the first six months, Jan through Jun, 2020.

REVISION:

This revision is for the remaining six months, July through December, for 2020.

Spending January through June:

Amount authorized: \$567,600

Actual spending: \$624,000

Projected spending July through December: \$987,560

Revision: In an effort to meet compliance requirements the meter protection program was accelerated in 2020 installing nearly three times the meter posts installed in 2019. There were 1,727 meter posts installed in 2020 which brought the number of outstanding meter protection locations to a manageable level for code compliance.

JUSTIFICATION

The upgrade (renewal) of existing gas services is in response to odor complaints, customer construction, added load, and the relocation of meters.

2/10/2020	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Salvage:	\$0.00
			Blanket Authorization Total:	\$150,240.30

DESCRIPTION/SCOPE

Normal additions and replacement of equipment and components in gas metering and pressure regulating facilities including labor and contract services for equipment installation. Included are pressure regulators, valves, instrumentation, pressure recorders, pipe, pipe fittings and other equipment associated with gate stations and regulator stations.

JUSTIFICATION

This project includes additions and replacements necessary due to unanticipated equipment failure to maintain system safety and reliability. The anticipated spending level in the category is based on analysis of recent annual expenditures and applying a 3% increase over 2019.

DESCRIPTION/SCOPE				
Revised Scope: Blanket spending in 2020 has exceeded the original cost estimate by approximately 50% due to several significant, unplanned events that occurred during the year that include;				
1. \$25K spending associated with flooding mitigation installed at Andy's Mobile due to NHDOT drainage issues. 2. \$25K spending to address OPP remediation due to a tree falling on the Bartlett Ave station from a tropical storm in August. 3. \$15K spending to remediate sever roadway erosion occurring because of road grading at the Exeter West Station 4. \$30K of additional pipe installation and site work at the new Forest Street station to cover unplanned pipe relocation work to accommodate GSG bridal modifications that could not be done in 2019 as part of the original station project.				
Total unplanned expenses: \$95K New authorization request: \$\$270K				
Initial Scope: Normal additions and replacement of equipment and components in gas metering and pressure regulating facilities including labor and contract services for equipment installation. Included are pressure regulators, valves, instrumentation, pressure recorders, pipe, pipe fittings and other equipment associated with gate stations and regulator stations.

2/14/2020	YES	Vaughan, Christine <i>SVP, CFO and Treasurer</i>		

DESCRIPTION/SCOPE

Design, site and construct a completely new 99PSIG MAOP station, served from the existing 150 PSIG Rochester High line and sited at the existing Route 125 Station in Rochester, NH .This cost reflects updates based on real pricing for current 2019 regulator station projects in both ME & NH and also includes updated cost associated with the installation of additional levels of OPP not included in the initial proposal.

JUSTIFICATION

Due to substantial forecasted load growth in North Rochester as part of the Granite Ridge Development-Phase I & Phase II , a new single feed system operating at a 99PSIG MAOP is required to support this load as the existing Rochester 45PSIG IP system cannot support this growth expansion and this is needed to ensure the operational integrity of the Rochester IP system is not compromised.

3/26/2020	YES	Brock, Laurence <i>Chief Accounting Officer & Controller</i>	Total Project Amount:	\$1,389,451.00
DESCRIPTION/SCOPE				
This authorization includes replacement of IT asset purchases as outlined in the IT 1.01 Asset Management Policy. Generally this requires most PC and laptop assets be replaced on a 5/year replacement cycle; critical server, storage and firewalls are on a 5-year replacement cycle; and larger assets replaced as needed to maintain integrity of systems and minimizing financial risk to the Company from asset obsolescence or loss.				
Of particular interest this year:				
1) Network: Replacement of Cisco 2960 and 300 Switches, Upgrade of wireless networks and Sonic Wall firewalls at 5 sites; and upgrade of Sonic Wall Management console				
2) Servers: Replacement of 20 servers reaching end of life (5 years); purchase of 2 Compellent 50 TB drives for Seacoast and Portsmouth; finishing the upgrade of the enQuesta server; upgrade of both OMS and SharePoint servers; and upgrade to Highly Available server environments for our critical business applications				
3) PC's: replacement of aging equipment, licensing renewals and desktop equipment for 150 users				
Estimates: Internal Labor \$39,300 Network \$253,367 Servers/Desktops \$845,484 IT Consulting \$251,300 Total Infrastructure \$1,389,451				
JUSTIFICATION				
Aging infrastructure and hardware require these purchases

3) PC's: replacement of aging equipment, licensing renewals and desktop equipment for 150 users				
Estimates:				
Internal Labor \$39,300				
Network \$253,367				
Servers/Desktops \$845,484				
IT Consulting \$251,300				
Total Infrastructure \$1,389,451				
JUSTIFICATION				
December 7, 2020 Revision:				
Infrastructure is submitting a revision to the 2020 capital budget primarily for the following reasons;				
1) Unexpected Oracle audit findings, additional payments & premier support - \$188,576				
2) Unbudgeted INTERNAL LABOR costs for PM resources on server replacements - ~\$120,000 (estimated)				
3) Unexpected consulting needs for Multi-Factor & Mobile Device Management - ~\$50,000 (estimated)				
The original IT Infrastructure budget was \$1,389,451 and the estimated revision should be for \$1,748,027 or \$358,576 over budget.

			Total Project Amount:	\$50,000.00
DESCRIPTION/SCOPE				
This budget item is to cover the costs of internal time associated with small Technology additions, enhancements, and upgrades where such activities cannot be reasonably identified or are too small (< \$10,000) to budget as a specific project. These small projects maintain the value and viability of systems or are small projects that add value unto themselves.				
JUSTIFICATION				
1. Required to maintain the value and viability of Unitil Information Technology systems. 2. Capture smaller capital projects that would not otherwise be capitalized.

Estimates

Internal Labor (\$):	45000
Purchases (\$):	
Contract Services (\$):	
Other Specific Charges (\$):	
Retirement (\$):	
Salvage (\$):	

Description/Scope

SalesForce - Reporting and data analytics

In order to begin moving gas sales analytical capabilities into the Salesforce platform (from GINTAKE), we will complete the following tasks:

- Complete Salesforce object meta data and model cleaning
- Create Gintake "Completed Added Load/Upgrade Packages Report (decoupling)" in Salesforce
- Create Gintake "Completed Conversion Burners" in Salesforce
- Create Gintake "Completed Meter Sets" in Salesforce
- Create Gintake "DOC Work Plan" in Salesforce

Justification

Improved sales reporting

It is important that sales is up to date in order to develop accurate forecasts which help provide a good view of the market conditions and predict sales. Salesforce offers high quality reports which are readily available. The advantages to management are clear, a CRM will allow management to track sales activity—every lead, opportunity, and potential customer as well as track the productivity of the sales force by combining a number of performance measures such as : revenue per sales person, revenue per territory, margin by customer segment, margin by customer, number of calls per day, time spent per contact, ratio of orders to calls, revenue as a percentage of sales quota, number of new customers per period, number of lost customers per period etc...

Marketing:

Planning

Long-term market plans can be made using this CRM and quantitative as well as qualitative measures (targets) can be set for a defined period and for different groups, geographies etc. These are then monitored based on the actual performance throughout the defined period.

2/24/2020	YES	Vaughan, Christine <i>SVP, CFO and Treasurer</i>		

DESCRIPTION/SCOPE

Replace 25 below ground farm tap regulators.

This authorization is for the full year, 2020.

JUSTIFICATION

This is an initiative to replace non-compliant buried pressure limiting valves (PLV's) regulators. Buried PLV's, also known as farm taps, are mostly Fisher-627 model regulators. These regulators, according to the manufacturer, should not be buried. Historically, direct buried PLV's are vulnerable to leakage. PLV's are identified in the company's DIMP program, by subject matter experts, as being a significant risk.

DESCRIPTION/SCOPE

To cover the costs for asphalt restoration for 2019 projects requiring remediation.

This authorization is for the full year, 2020.

Revision1:

The 2019 paving budget was estimated for projects that required second year paving in Hampton, Seabrook, Salem , Rochester, Dover, and Portsmouth.

Nearly all of the towns in NH have added second year paving to their excavation permit requirement. Plaistow required second year paving which was not budgeted for the Forest St. system improvement and cost approx. \$235,000 to mill and inlay.

JUSTIFICATION

All distribution projects within municipal streets require asphalt restoration according to local specifications. This budget item will capture all paving costs for distribution projects over that multi-year time frame and allow the majority of the project to be closed out.

DESCRIPTION/SCOPE

Install 3700' of 12" coated steel on Railroad Ave Gonic parallel the existing 6 and 8 inch main as a system improvement. This project includes a bridge crossing / HDD.

JUSTIFICATION

The addition of the 47 Mscfh load (2 CNG compressors) from Waste Management Compressed Natural Gas facility on Rochester Neck road decreases the inlet pressure to the Route 125 station and Gear road station to unacceptable levels due to the existing undersized piping in Gonic. This project will have to be completed before the 2020 heating season.

DESCRIPTION/SCOPE

Install 3700' of 12" coated steel on Railroad Ave Gonic parallel the existing 6 and 8 inch main as a system improvement. This project includes a bridge crossing / HDD.

Revision

The originally planned route down Railroad Ave., Gonic for 4400' of 12" for this System Improvement JPB46 had a major job scope change and an alternative route was taken.

The new route has us tying into the 8" CS near Juniper on Old Dover Rd and continuing down Old Dover Rd to the baseball, this include a bridge crossing at Willow Brook where we hung on the bridge and an approximate 600' HDD under the Cocheco River to the station.

We have encountered many unanticipated challenges due to the environmental restrictions within Axe Handle Brook Station due to contamination. There were significant charges for Hazmat safety monitoring and removal of contaminated material. There have been areas that needed additional depth due to grade changes and culvert crossings. There were several wet areas that required 100% haul away of spoils, this has slowed the entire job and extended the costs of additional traffic control measures which have been required for the entire project due to heavily traveled road and extended jobsite.

Total Actual Costs Net \$5,019,772

Total additional costs \$2,657,298

JUSTIFICATION

The addition of the 47 Mscfh load (2 CNG compressors) from Waste Management Compressed Natural Gas facility on Rochester Neck road decreases the inlet pressure to the Route 125 station and Gear road station to unacceptable levels due to the existing undersized piping in Gonic. This project will have to be completed before the 2020 heating season.

DESCRIPTION/SCOPE

The reinforcement is starting from Washington Street going down Brock Street to Rt 125, down Rt 125 to Station at Axe Handle Brook for a total footage of 6600' of 8" HD PI, This reinforcement is to support the Farmington Growth project on Route 11.

JUSTIFICATION

Rochester reinforcement is to expand into Farmington and reinforce the Rochester system. Due to substantial forecasted load growth in Rochester and Farmington, the Rochester 45 psig (MAOP) distribution system pressures will fall significantly below the design threshold. This system reinforcement is necessary to support forecasted load growth in both Rochester and Farmington. This system reinforcement will provide the required supply for the growth expansion down Route 11, the distribution system that will be improve system reliability.

DESCRIPTION/SCOPE				
An upgrade to the Power Plan software is required to stay current with the latest revision and enable us to receive support under our maintenance agreement.				
Major Upgrade Components: -Tax Repairs -Lease Accounting Module (Disclosure Reporting) -Property Tax (New Filing Format for MA) -Security Capabilities				
JUSTIFICATION				
By upgrading the Power Plan software on a regular basis the system will allow the company to use all of the enhancements developed in the latest versions and stay current with all security enhancements. These upgrades are performed every three years.				
Power Plan is critical component that allows accurate accounting in order to comply with SEC, FERC, SOX, audit and regulatory reporting.				
The project amount over budget is due to a change in scope from the original statement of work provided by Power Plan based on Unitil's need to separate the Time & Billing project from the Upgrade. Training workshops on new aspects of upgrade are included as well as preliminary workshops for Power Plan to understand how the systems are interfaced.				
This is an estimate supplied by Power Plan. Est Schedule for April-Oct timeframe IT time includes ~ 20 hrs

Description/Scope	
An upgrade to the Power Plan software is required to stay current with the latest revision and enable us to receive support under our maintenance agreement.	
Justification	
By upgrading the Power Plan software on a regular basis the system will allow the company to use all of the enhancements developed in the latest versions and stay current with all security enhancements.	
Power Plan is critical component that allows accurate accounting in order to comply with SEC, FERC, SOX, audit and regulatory reporting.

DESCRIPTION/SCOPE

This Authorization is for the installation of gas mains and services associated with the Company's system expansion initiative. The project(s) associated with this "blanket" authorization are smaller in scale and have an estimated per project total capital expenditure that is not expected to exceed \$40,000. Each of the project(s) associated with this Authorization will have an individual CWO assigned, which will correspond to specific G-Intake package. The authorized amount was derived using a historical trend analysis from 2016-2018. The 2020 projection is for 18 projects with an estimated expenditure of \$250,000.

JUSTIFICATION

These growth projects will be evaluated and approved for construction by Business Services in accordance with Unittl's Policies for the Installation of New Gas Service/Main Extension and Rate of Return Criteria.

Total 2020 Budget: \$3,360,439
Total Authorization to date: \$993,697
Total Net This Authorization: \$250,000
Remaining Budget: \$2,116,742

5/12/2020	YES	Hurstak, Daniel <i>Controller</i>		
5/12/2020	YES	Brock, Laurence <i>Senior Vice President & Chief Financial Officer</i>		
DESCRIPTION/SCOPE				
This project will extend new pipeline from the end of Phase 1 at the tie in on Route 125, and carry gas south down Route 125 to Wentworth Ave. From there, the new pipeline will transverse on Wentworth Ave until it reaches the proposed district regulator station. There will be approximately 3500 feet of new 8 inch HDPE to complete this phase. This will include a tie in on both ends of the new pipeline.				
JUSTIFICATION				
The Plaistow system improvement is to provide additional flow and pressure support to the Plaistow IP system. Due to substantial forecasted load growth in Plaistow, Atkinson, and Kingston, the Plaistow IP system (56 PSIG MAOP) distribution system pressures will fall significantly below the design threshold. This system reinforcement is necessary to support forecasted load growth and recently contracted large commercial customers in both Atkinson and Kingston. This system improvement will provide the required supply for the anticipated growth and will improve system reliability.

5/12/2020	YES	Hurstak, Daniel <i>Controller</i>		
5/12/2020	YES	Brock, Laurence <i>Senior Vice President & Chief Financial Officer</i>		

DESCRIPTION/SCOPE

The existing station is within close proximity to the northbound side of Spaulding Turnpike (NH 16) where it crosses over New Bellamy Lane in Dover. This project will include the design and construction of a main-extension and abandonment of the existing station. The main-extension is planned for two phases. Phase #1 of the main-extension would begin at the existing "Spur Road, Dover" system (NH #21) at 195 Dover Point Road and then continue northerly along Dover Point Road to its intersection with Middle Road. Phase #2 of the main-extension would begin at the Dover Point Road and Middle Road intersection and continue northerly along Middle Road for tie-in at the existing "Dover IP" system (NH #29).

JUSTIFICATION

The initial scope of this project was planned for a replacement of the New Bellamy Lane Station to accommodate anticipated construction along Spaulding Turnpike (NH 16) and to upgrade the station with over-pressurization protection. However, NH Bureau of Turnpikes indicated development plans for this portion of NH 16 is not imminent in their strategic plan (2020). Further, in lieu of station replacement it appears to be advantageous from a standpoint of safety / reliability / economy / efficiency to design and construct a main-extension from "Spur Road, Dover" system (NH #21) to the "Dover IP" system (NH #29).
The aforementioned main-extension will eliminate the need for station replacement. The existing station is within close proximity to the northbound side of Spaulding Turnpike (NH 16). Due to its proximity to Spaulding Turnpike, the station is vulnerable to vehicular collisions and turnpike-development. The station was constructed over 40 years ago and is not built to current standard of care. The station is not equipped with proper over pressurization protection, filtration, pre-heat, or SCADA communication. The station is only accessible by private property and steep-grade making it difficult to maintain safely. The aforementioned main-extension will eliminate the need for station improvements or a full station replacement. The aforementioned main-extension, and abandonment of New Bellamy Lane Station, will eliminate the need for bridge replacement. The existing bridge off New Bellamy Lane in Dover is not capable of pigging. The ability to inspect mains via pigging is part of the Integrity Management Plan (IMP) currently being implemented by GSGT. The risk of not inspecting mains on a regular basis increases the potential for poor integrity pipe to remain in place. Poor integrity pipe may be the result of poor construction, third-party damage, corrosion, or other sources. Failure of poor integrity pipe could result in inadequate volume of gas to support existing customers and temporary loss of service for existing customers. There is also risk of gas mixture within the air being within the explosive limits and unintentional ignition. The aforementioned main-extension will eliminate the need for bridge improvements or a full bridge replacement.

DESCRIPTION/SCOPE

This authorization is for the relocation of 3300' of 6" CS and replacing with 6" HEPE in Banfield Rd., Portsmouth to relocate main due to a city project. This will tie into the existing 8" CS main in Ocean Rd. and will tie into the existing 6" Plastic main past Heritage Ave. We will also install 350' of 4" HDPE main to replace the existing 4" CS main in Heritage Ave. This will include tying over 13 services here. This project has been reviewed and approved by the local engineering department.

Corrosion has reviewed and approved the plans. They are requesting is a 2 wire test station with 3- 17lb anodes at the Ocean Rd Tie-in.

JUSTIFICATION

As City and State projects develop it is often necessary that gas lines be relocated and/or upgraded due to construction conflicts. The City of Portsmouth is working on a full road improvement project that requires us to relocate our existing gas main. The main needs to be relocated due to direct conflicts with the new infrastructure.

State Mandate - gas lines in conflict with any City or State project will be relocated by the utility. NH Department of Transportation.

Total 2020 Budget: \$2,178,304
Total Authorized to Date: \$ 768,246
Total this Authorization: \$1,175,314
Remaining: \$ 234,744

DESCRIPTION/SCOPE

Replace existing 300' of 3/4" PE main in Salter St with 2" HDPE main and tie-over 8 services. There is also a new service for 57 Salter St package ID# 66766 with a separate CWO.
This project has been reviewed and approved by the local engineering department.

JUSTIFICATION

There is a new gas service request for a residential service to 57 Salter St., Portsmouth. Per engineering the existing 3/4" PE main in Salter Street needs to be replaced with a new 2" HDPE main here to install this service.

			CWO Total:	\$111,025.13

DESCRIPTION/SCOPE

Install 2,000' of 4" HDPE as a main extension along Old Dover Rd., Rochester. This will include a HDD under Willow Brook to reach the Partridge Green system. This main will be installed in the same trench as the 12" steel system improvement on Old Dover Rd.

JUSTIFICATION

The purpose of the main extension will be to tie in the existing Partridge Green System #36 to the existing Rochester IP System #40. This will allow the retirement of the 16B regulator station and improve pressures in the Partridge Green System. There is also interest from residents in the area for gas service which this system improvement will allow to be connected. The city of Rochester is working in this area on a water/sewer project to be completed in 2021. Some savings in pavement costs can be realized if this project is completed in 2020.

DESCRIPTION/SCOPE

This Authorization will cover the cost associated with the installation of 240' of 2" CS main. This will include 1 – 1&1/4" PLV service with 5 total meters.

Engineering has reviewed and approved.

JUSTIFICATION

These growth projects will be evaluated and approved for construction by Business Services in accordance with Unitol's Policies for the Installation of New Gas Service/Main Extension and Rate of Return Criteria. There is no customer contribution required for this project. The project specific IRR Analysis and cost information is included in G-Intake Package Number 64368

Total 2020 Budget: \$3,360,439
Total Authorization to date: \$4,750,559
Total Net This Authorization: \$56,273
Remaining Budget: -\$1,446,393

Revision:

This revision is to cover the cost associated with work slower than expected which incurred additional T&M. There were more costs incurred from Welding/ Welding inspection than originally anticipated, we had a second welder on the job for 4 hrs. Had to cut pavement due to collapsed sleeve on the property and hand dig to find and make repair. There was additional traffic control measures needed for this job. Sales re-ran the rate of return based on the Incremental amount of \$52, 050. and there is still no customer contribution required for this project.

Total authorized amount \$38,281 incremental Net Authorized was \$56,273.

Cost of Removal \$0

Total Actual Costs \$ 81,326 Net

Total Actual Costs Incremental \$52,050

Total additional costs \$ 25,053 Net

APPROVALS

ESTIMATED COST SUMMARY

Action Date	Approved	Approver/Title	Description	Amount
2/10/2021	YES	Hilton, Mary Jane <i>Sr. Plant Accountant</i>	Total Project Cost:	\$358,000.00
2/11/2021	YES	Hobart, Darrell <i>Manager, Gas Distribution Operations</i>	Less Customer Contribution:	\$0.00
2/11/2021	YES	Bickford, Timothy <i>Manager Gas Engineering</i>	Net Authorized Cost:	\$358,000.00
2/17/2021	YES	Leblanc, Christopher <i>VP, Gas Operations</i>	Retirement:	\$0.00
2/12/2021	YES	Sprague, Kevin <i>VP, Engineering</i>	Cost Of Removal:	\$64,440.00
2/17/2021	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Salvage:	\$0.00
			Blanket Authorization Total:	\$293,560.00

DESCRIPTION/SCOPE

Normal additions and replacements of gas distribution system components. These include pipe, fittings, and other distribution related materials, as well as all labor, transportation, material, road spoils, sand, gravel and other associated items that pertain to these projects.

2021 amounts were projected out on a 3-year average with a 3% increase

Projecting \$358,000 from January to June for the first 6 months out of the total budget of \$572,785.16

JUSTIFICATION

This budget item covers all required replacement and additions of pipe, fittings and other gas system related components. These are often a result of external third party damage, corrosion, age related failure, system enhancements, fitting failure etc.

DESCRIPTION/SCOPE

This budget item will cover the cost associated with the installation of new residential and commercial gas services.

2021 amount based on a 3-year average with a 3% increase

This initial authorization is for January through June for \$600,000 Based on previous year history

JUSTIFICATION

New service installations for commercial and residential gas service is customer driven by their request for new service. The budget request is derived from historical trend analysis of past years installations and projections from business development as part of the system expansion initiative and marketing campaign.

			Blanket Authorization Total:	\$151,383.86

DESCRIPTION/SCOPE

To provide cathodic protection to coated steel pipe on the HP and LP distribution systems throughout the service territory. These sections of main are identified through our on going corrosion control inspection program.

JUSTIFICATION

Federal regulations 49 CFR Part 192.453 Corrosion Control, requires cathodic protection and monitoring of coated steel pipe within our distribution system. This work is necessary to comply with State and Federal minimum safety standards 49 CFR Part 192.453. The budget amount is based on necessary additions and upgrades identified by preliminary evaluation of CP testing results from 2020. There will be more work given to contractors in 2021 and less Company labor. The contract labor includes installing cp measures on coated steel pipe on bridges.

2/9/2021	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Salvage:	\$0.00
			Blanket Authorization Total:	\$0.00

DESCRIPTION/SCOPE

The permanent abandonment at the main of inactive service lines.
Based on a 3-year average with a 3% increase.
Projected cost from January to June: \$82,600

JUSTIFICATION

The abandonment of inactive gas services is a Federal requirement in accordance with CFR 149 and a State requirement in accordance with PUC 500. All services that have been inactive for (3) years, unless the service is plastic or cathodically protected steel, must be physically disconnected (i.e. abandoned) at the main. A plastic or cathodically protected steel service must be abandoned no later than (10) years from the most recent inactivation date.

DESCRIPTION/SCOPE		
Normal additions and replacement of equipment and components in gas metering and pressure regulating facilities including labor and contract services for equipment installation. Included are pressure regulators, valves, instrumentation, pressure recorders, pipe, pipe fittings and other equipment associated with gate stations and regulator stations.		
JUSTIFICATION		
This project includes additions and replacements necessary due to unanticipated equipment failure to maintain system safety and reliability. The anticipated spending level in the category is based on a 3 year analysis of recent annual expenditures and adding additional costs to cover additional station improvement expenses and other required Gas System Operations system improvements.

DESCRIPTION/SCOPE

Replace 25 below ground farm tap regulators to an above ground location.

JUSTIFICATION

This project is to capture farm tap services.
Buried farm tap regulators against manufacture recommendations, could cause problems, some have white bursting disc, with a pressure of 72 to 88 pounds.

DESCRIPTION/SCOPE

Phase #2 of the main-extension would begin at the Dover Point Road and Middle Road intersection and continue northerly along Middle Road for tie-in at the existing "Dover IP" system (NH #29).
"Install 4600' of 4" HDPE from Middle Rd/Dover Rd intersection to Tuttle Rd.

JUSTIFICATION

"The initial scope of this project was planned for a replacement of the New Bellamy Lane Station to accommodate anticipated construction along Spaulding Turnpike (NH 16) and to upgrade the station with over-pressurization protection. However, NH Bureau of Turnpikes indicated development plans for this portion of NH 16 is not imminent in their strategic plan (2020). Further, in lieu of station replacement it appears to be advantageous from a standpoint of safety / reliability / economy / efficiency to design and construct a main-extension from "Spur Road, Dover" system (NH #21) to the "Dover IP" system (NH #29).

The aforementioned main-extension will eliminate the need for station replacement. The existing station is within close proximity to the northbound side of Spaulding Turnpike (NH 16). Due to its proximity to Spaulding Turnpike, the station is vulnerable to vehicular collisions and turnpike-development. The station was constructed over 40 years ago and is not built to current standard of care. The station is not equipped with proper over-pressurization protection, filtration, pre-heat, or SCADA communication. The station is only accessible by private property and steep-grade making it difficult to maintain safely. The aforementioned main-extension will eliminate the need for station improvements or a full station replacement.

The aforementioned main-extension, and abandonment of New Bellamy Lane Station, will eliminate the need for bridge replacement. The existing bridge off New Bellamy Lane in Dover is not capable of pigging. The ability to inspect mains via pigging is part of the Integrity Management Plan (IMP) currently being implemented by GSGT. The risk of not inspecting mains on a regular basis increases the potential for poor integrity pipe to remain in place. Poor integrity pipe may be the result of poor construction, third-party damage, corrosion, or other sources. Failure of poor integrity pipe could result in inadequate volume of gas to support existing customers and temporary loss of service for existing customers. There is also risk of gas mixture within the air being within the explosive limits and unintentional ignition. The aforementioned main-extension will eliminate the need for bridge improvements or a full bridge replacement.

Description/Scope

"The existing station is within close proximity to the northbound side of Spaulding Turnpike (NH 16) where it crosses over New Bellamy Lane in Dover. This project will include the design and construction of a main-extension and abandonment of the existing station.

The main-extension is planned for two phases. Phase #1 of the main-extension would begin at the existing "Spur Road, Dover" system (NH #21) at 195 Dover Point Road and then continue northerly along Dover Point Road to its intersection with Middle Road. Phase #2 of the main-extension would begin at the Dover Point Road and Middle Road intersection and continue northerly along Middle Road for tie-in at the existing "Dover IP" system (NH #29).

Install 4600' of 4" HDPE from Middle Rd/Dover Rd intersection to Tuttle Rd.

Justification

"The initial scope of this project was planned for a replacement of the New Bellamy Lane Station to accommodate anticipated construction along Spaulding Turnpike (NH 16) and to upgrade the station with over-pressurization protection. However, NH Bureau of Turnpikes indicated development plans for this portion of NH 16 is not imminent in their strategic plan (2020). Further, in lieu of station replacement it appears to be advantageous from a standpoint of safety / reliability / economy / efficiency to design and construct a main-extension from "Spur Road, Dover" system (NH #21) to the "Dover IP" system (NH #29).

The aforementioned main-extension will eliminate the need for station replacement. The existing station is within close proximity to the northbound side of Spaulding Turnpike (NH 16). Due to its proximity to Spaulding Turnpike, the station is vulnerable to vehicular collisions and turnpike-development. The station was constructed over 40 years ago and is not built to current standard of care. The station is not equipped with proper over pressurization protection, filtration, pre-heat, or SCADA communication. The station is only accessible by private property and steep-grade making it difficult to maintain safely. The aforementioned main-extension will eliminate the need for station improvements or a full station replacement.

The aforementioned main-extension, and abandonment of New Bellamy Lane Station, will eliminate the need for bridle replacement. The existing bridle off New Bellamy Lane in Dover is not capable of pigging. The ability to inspect mains via pigging is part of the Integrity Management Plan (IMP) currently being implemented by GSGT. The risk of not inspecting mains on a regular basis increases the potential for poor integrity pipe to remain in place. Poor integrity pipe may be the result of poor construction, third-party damage, corrosion, or other sources. Failure of poor integrity pipe could result in inadequate volume of gas to support existing customers and temporary loss of service for existing customers. There is also risk of gas mixture within the air being within the explosive limits and unintentional ignition. The aforementioned main-extension will eliminate the need for bridle improvements or a full bridle replacement.

DESCRIPTION/SCOPE

This Authorization is for the installation of gas mains and services associated with the Company's system expansion initiative. The project(s) associated with this "blanket" authorization are smaller in scale and have an estimated per project total capital expenditure that is not expected to exceed \$40,000. Each of the project(s) associated with this Authorization will have an individual CWO assigned, which will correspond to specific G-Intake package. The authorized amount was derived using a historical trend analysis from 2018-2020. The 2021 projection is for 18 projects with an estimated expenditure of \$350,000.

JUSTIFICATION

These growth projects will be evaluated and approved for construction by Business Services in accordance with Unitol's Policies for the Installation of New Gas Service/Main Extension and Rate of Return Criteria.

Total 2020 Budget: \$2,385,028
Total Authorization to date: \$0
Total Net This Authorization: \$350,000

DESCRIPTION/SCOPE				
Relay 78 services, and 4758 feet of main with 2" HDPE in the Partridge Green and Bramber II complexes.				
JUSTIFICATION				
Partridge Green and Bramber II are two multi-unit apartment complexes located off Old Dover Road (Rte-16B) in Rochester NH. There are 140 meters in total at these two complexes. Gas mains and services were installed to these complexes in 1986. This system, known as the Rte-16B system (#36), has a MAOP of 20 psig. This system is supplied from the Rochester 150 psig system (#31) via the Rte-16B district regulator station. There is presently a 2020 project to extend the Rochester 45 psig MAOP system (#40) ~1750-feet to connect to the Rte-16B system (#36). This system improvement project will allow the company to eliminate the aged Rte-16B district regulator station.				
In order to connect the Rochester 45 psig MAOP system (#40) to the Rte-16B 20 psig MAOP system (#36) mitigation work must first be completed. It has been verified that the mains and services installed to Partridge Green and Bramber II, in 1986, do not have pressure test documentation. Furthermore, it has been verified that both the mains and services throughout the two complexes are shallow and many of the main and services connections are inferior. Some service connections appear to have been saddle fusions installed by hand. There is also evidence that service risers were use below ground to connect pipe.

			CWO Total:	\$174,766.40

DESCRIPTION/SCOPE

Install 1800' of 4" HDPE main to tie in Meadowood Dr. and Hampton Rd.

JUSTIFICATION

DIMP has identified our buried farm taps to be a high risk. To mitigate this risk, we have developed a plan to replace 25 at-risk farm taps per year. We use a grading system to identify priority, and we engineer each farm tap replacement to ensure the new service us up to current company standards.

We found there were a significant number of high risk Farm Taps that now have IP mains that run very near to them. It is significantly more efficient to convert a high risk Farm Tap from HP to IP, than it is to replace the Farm Tap with a new above ground PLV in a box.

One of the systems that has the most potential for these IP conversions is the NH 12 – Route 88, Exeter (IP) system. Due to the uneven load distribution across this system, there is a section of the system that would fall below our standard tolerance with the additional load from the Farm Tap conversions.

By installing approximately 1800-feet of 4-inch HDPE to connect the two unevenly loaded sections of the system, we not only provide enough capacity for the Farm Tap conversions, we create enough capacity to satisfy anticipated system growth for several years.

2/9/2021	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Salvage:	\$0.00
			CWO Total:	\$226,688.00

DESCRIPTION/SCOPE

The replacement of approximately 100 LF of 4-inch coated steel pipe (System #17 – 56 psig MAOP) on the Borthwick Avenue foot bridge in Portsmouth, NH. This main replacement, over the foot bridge spanning the Pan-Am Railroad, will include the installation of new pipe supports (hangers) and an expansion joint.

JUSTIFICATION

The existing 4-inch coated steel main, suspended under the footbridge, is not properly supported. Due to the expansion and contraction of the pipe, and the absence of proper expansion absorption system, the main has shifted out from the existing supports.

			CWO Total:	\$498,258.18

DESCRIPTION/SCOPE

Phase 2 – 2021: Approximately 4,000 feet 6 inch HDPE IP main extension from end of the Phase 1 main extension replacing the existing 4 inch main along Old County Rd. and ending with a tie-in to the existing 6 inch main on Hale Spring Rd. in Plaistow, NH.

JUSTIFICATION

The Plaistow IP system (NH #2 – MAOP 56psig) has seen significant growth within the town of Plaistow and its surrounding townships. Therefore, to maintain system integrity for the Plaistow IP system these improvements have shown that Phase 1 and 2 will increase system low pressures by approximately 1.5% and 6% respectively. This will result in a greater capacity for growth in the town of Plaistow and ensure current customers will not be at risk for service interruption.
Studies were performed on a 50EDD using Synergi Gas 4.9.1 (Model: NU - 04-12-2019 – 80 EDD.mdb), including forecasted load throughout Plaistow, Kingston, and Atkinson.

12/20/2021	YES	Hurstak, Daniel <i>Chief Accounting Officer & Controller</i>		
12/20/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

Phase 2 – 2021: Approximately 4,000 feet 6 inch HDPE IP main extension from end of the Phase 1 main extension replacing the existing 4 inch main along Old County Rd. and ending with a tie-in to the existing 6 inch main on Hale Spring Rd. in Plaistow, NH.
Revision: The original authorization for this project provided for the installation of 4,000' of 6" HDPE main in Plaistow from the end of Phase 1 main extension replacing the existing 4 inch main along Old County Rd. and ending with a tie-in to the existing 6 inch main on Hale Spring Rd. in Plaistow, NH.
The revised authorization is required because of a change in scope that included a Directional Drill under the railroad crossing on Kingston Rd where we increased the main to 8" HDPE main for approximately 665 feet and encased it in a 12 inch steel sleeve for 500 feet. Pam Am Railroad required us to perform this HDD at night to accommodate their train schedule. There was also an additional portion of main that had to be installed on Kingston Rd to cut over from Nicolas Rd. to the Probark entrance that was originally unknown due to poor records. The new total footage is approximately 4,400 feet.

JUSTIFICATION

The Plaistow IP system (NH #2 – MAOP 56psig) has seen significant growth within the town of Plaistow and its surrounding townships. Therefore, to maintain system integrity for the Plaistow IP system these improvements have shown that Phase 1 and 2 will increase system low pressures by approximately 1.5% and 6% respectively. This will result in a greater capacity for growth in the town of Plaistow and ensure current customers will not be at risk for service interruption.
Studies were performed on a 50EDD using Synergi Gas 4.9.1 (Model: NU - 04-12-2019 – 80 EDD.mdb), including forecasted load throughout Plaistow, Kingston, and Atkinson.

NOTES

Revision: Due to a change in project scope by the Pam AM Railroad and Engineering that required the main to be drilled under the Railroad Track and increased sized to prepared for future growth, the new estimate and costs have been updated.

DESCRIPTION/SCOPE

Replace the existing indirect fired gas preheater at the Newfields Rd station in Exeter, NH. Project scope includes removal and disposal of the existing heater and installation of pipe, valves and fittings to accomodate the replacement heater. This cost reflects updates based on real pricing for current 2021 regulator station projects in both ME & NH.

JUSTIFICATION

The existing heater was installed in 1975 and has deteriorated, causing frequent off-hours callouts for repairs and relights. Heater failure causes the gas temperature to drop, increasing the risk of pressure regulator freeze-ups and the potential for system overpressurization.

During the 2019-2020 heating season the gas preheating requirements exceeded the heater capacity, resulting in low gas temperatures and SCADA alarms. A recent review by Gas Engineering confirmed that the heater capacity is below the required capacity to maintain temperatures within Gas Engineering standards.

DESCRIPTION/SCOPE

New Mueller equipment for tapping and stopping larger diameter steel mains in NH.

Revision: The Mueller equipment was originally budgeted over a three year period @ \$110k per year. In this scenario the tapping equipment would not have been operational until year 3. By purchasing most of the major components in year one the equipment will be operational and ready to tap and stop 4" diameter high pressure mains this year. Operationally it is more practical to purchase the equipment in this manner. Also by purchasing most of the major components in year one costs for years 2 and 3 will be substantially less than originally budgeted.

JUSTIFICATION

The NH DOC does not have the capability to tap and stop larger diameter steel mains. The Mueller equipment will enhance the DOCs ability to tap and stop these steel mains and will increase the capability for emergency response.

DESCRIPTION/SCOPE

This authorization is for the relocation of 525' of 2" HDPE main in Columbia St., Portsmouth from Islington St. to State St. There are 10 services here that need to be tied over also.
This project has been reviewed and approved by the local engineering department.

JUSTIFICATION

As City and State projects develop it is often necessary that gas lines be relocated and/or upgraded due to construction conflicts. The City of Portsmouth is working on a full depth improvement. The main needs to be relocated due to direct conflicts with the new infrastructure. State Mandate - gas lines in conflict with any City or State project will be relocated by the utility. NH Department of Transportation.

DESCRIPTION/SCOPE

This authorization is for the relocation of 400' of 4" HDPE main in N. Main St and 90' of 2" main in Walnut St and cut and cap the main in Washington St at 11 Washington St. There are 7 services here, 6 to be tied over services in N. Main St and 1 new service in Washington St. This project has been reviewed and approved by the local engineering department.

JUSTIFICATION

As City and State projects develop it is often necessary that gas lines be relocated and/or upgraded due to construction conflicts. The City of Portsmouth is working on a full depth improvement. The main needs to be relocated due to direct conflicts with the new infrastructure. State Mandate - gas lines in conflict with any City or State project will be relocated by the utility. NH Department of Transportation.

CWO Total:	\$708,630.00

DESCRIPTION/SCOPE

Replacing 800' of 4" HDPE, 1885' of 2" HDPE and 12 Services
used 18% for Cost of Removal

JUSTIFICATION

The mains and services in this system are shallow and do not include tracer wire therefore they are unlocatable. It has been determined that this system also contains materials that are unexpectable per recent federal and state guidelines therefore we are required to replace the mains and services within Franklin Heights at our earliest convience.

9/22/2021	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	CWO Total:	\$140,842.00
9/22/2021	YES	Hurstak, Daniel <i>Chief Accounting Officer & Controller</i>		
9/22/2021	YES	Hevert, Robert <i>Senior Vice President & Chief Financial Officer & Treasurer</i>		

DESCRIPTION/SCOPE

This cost it to remove existing underground vaults. It also includes the cost of installing the inlet and outlet of the Rutland Street station.
This will be 30' of 6" HDPE, 20' of 4" HDPE. There will be 4 -30' - 1& 1/4" Sensor lines here with 5 - 1& 1/4" risers. There will also be 3-4" risers and 1 - 6" riser.

JUSTIFICATION

This new station is required as the current station poses severe operational concerns due to its geographic location. Although mitigation measures have been installed, the station is still prone to flooding and its location in a sidewalk-located next to a school makes it impossible to appropriately swale the water. In addition, the buried sense lines at this location are in immediate need of replacement which will require significant excavation and station reconfiguration incurring a significant costs. Combining the costs of the sense line relocation with the operational difficulties at this station warrants a relocation so that the station can be installed above ground and incorporate necessary additional OPP to ensure operational integrity and customer safety.

NOTES

used 18% for cost of removal

DESCRIPTION/SCOPE

Install 40' 6" HDPE from Woodbury Ave to Granite St to provide additional flow to the downstream mains fed from Granite St. New 6" HDPE main to tie-in to existing 6" PL on Woodbury Ave with a full tee using a 2" HDPE bypass to maintain flow.

JUSTIFICATION

From GER-005-2021.R1:
Gas Engineering has determined a needed improvement to mitigate less than adequate pressures that were experienced at 9 Michael Succi Dr. in Portsmouth, NH on January 30th and 31st 2021 by installing approximately 40 feet of 6 inch IPS HDPE from the existing 6 inch PP main on Granite St. to the existing 6 inch PP main on Woodbury Ave. in Portsmouth, NH. Hydraulic studies shows an approximate 6 psig increase at the aforementioned address.

Results of hydraulic simulation show an increase of pressure at National Gypsum from 26.83 psig to 32.69 psig. Minimum pressure requirements for National Gypsum are approximately 24 psig, therefore this will an increased buffer in pressure in the event that National Gypsum's transient gas consumption causes further pressure drop than the steady state model is calculating.

Install 40' 6" HDPE from Woodbury Ave to Granite St to provide additional flow to the downstream mains fed from Granite St. New 6" HDPE main to tie-in to existing 6" PL on Woodbury Ave with a full tee using a 2" HDPE bypass to maintain flow.

Revision

Poor records, the swing ties on our records were incorrect and we had to do exploratory digging to locate the end of the main, this also caused us to incur additional restoration costs. There was a drain that we had to go over and utilize shallow main plates due to depth constraints. The street was under moratorium and resulted in an inflated permit cost.

Original Total Project Cost : \$50,665
Original Cost of Removal (18%): \$9,20
Original Total Authorization: \$41,545

Revised Total Project Cost: \$85,166
Revised Cost of removal (18%): \$15,330

This Authorization will cover the cost associated with the installation of 500' of 8" HDPE main. This new main is to be tied into the existing 8" HDPE main fed from Janell Ct., Epping. This will also include 3- 1&1/4" hdpe Commercial Services and 3 meters. Engineering has reviewed and approved.

Revision:

Total Project Cost Authorized \$143,887
 Total Actual project Costs \$187,442
 Additional Amount Requested for Authorization \$43,555

Reason for Revision-

The overheads fir this job were significantly higher than estimated. The original overheads were estimated at a total of \$39,621 where actual overheads came in at \$79,432.55 that makes up a total of \$39,811 of the amount that we were over.

We also utilized a IC REED to hold poles for 2 days and the material costs were higher than originally estimated.

JUSTIFICATION

This is a system growth project that has been evaluated and approved by Business Development in accordance with Unutil's Policies addressing Installation of New Gas Services/Main Extension and Rate-of Return Criteria. There is no customer contribution required for this project. The project specific IRR Analysis and cost information is included in G-Intake Package No 65011.

DESCRIPTION/SCOPE

This Authorization will cover the cost associated with the installation of 600' of 2" HDPE main. This new main is to be tied into the existing 2" HDPE main at the end of Willey Creek Rd, Exeter. This will also include 8- 1&1/4" hdpe Residential Services and 33 meters. Engineering has reviewed and approved.

JUSTIFICATION

This is a system growth project that has been evaluated and approved by Business Development in accordance with Unutil's Policies addressing Installation of New Gas Services/Main Extension and Rate-of Return Criteria. There is no customer contribution required for this project. The project specific IRR Analysis and cost information is included in G-Intake Package No 69229.

Total 2020 Budget: \$2,385,028
Total Authorization to date: \$3,308,121
Total Net This Authorization: \$67,268
Remaining Budget: -\$990,361

NOTES

This job is Open Trench

10/22/2021	YES	Diggins, Todd <i>Treasurer, Director, Finance</i>	Salvage:	\$0.00
			CWO Total:	\$57,366.00

DESCRIPTION/SCOPE

This authorization is for the replacement of 20' of 4" CS main at the intersection of Cluff Crossing and Route 28 in Salem NH in conjunction with a city drain project.
This project has been reviewed and approved by the local engineering department.
18% used for Cost of Removal.

JUSTIFICATION

As City and State projects develop it is often necessary that gas lines be relocated and/or upgraded due to construction conflicts. The City of Salem is working on a full depth improvement. The main needs to be relocated due to direct conflicts with the new infrastructure.
State Mandate - gas lines in conflict with any City or State project will be relocated by the utility.
NH Department of Transportation.

Northern Utilities, Inc. - New Hampshire
2022 Step Adjustment

Northern Utilities, Inc.
Docket No. DG 21-104
Schedule GSL-5
Page 1 of 2

Line No.	Description	Rate Effective Date	Investment Year 2021
	Rate Base:		
1	Utility Plant Additions ⁽¹⁾		\$ 16,442,711
2	Cost of Removal ⁽¹⁾		601,671
3	Capital Expenditures - Non-Growth Plant Additions		17,044,382
4	Accumulated Depreciation		306,657
5	Net Utility Plant		16,737,725
6	Accumulated Deferred Income Taxes (ADIT)		888
7	Rate Base		\$ 16,736,837
	Revenue Requirement:		
8	Rate Base		\$ 16,736,837
9	Pre-Tax Rate of Return		9.75%
10	Return and Related Income Taxes		1,631,302
11	Depreciation Expense		613,313
12	Property Taxes ⁽²⁾		110,469
13	Revenue Requirement		\$ 2,355,084
	Rate Cap Limit:		
14	Revenue Requirement		\$ 2,355,084
15	Cumulative Revenue Requirement		2,355,084
16	Revenue Requirement Cap		10,500,000
17	Allowable Revenue Requirement		\$ 2,355,084
	Supporting Calculations		
	Book Depreciation		
18	Utility Plant Additions		\$ 16,442,711
19	Book Depreciation Rate ⁽³⁾		3.73%
20	Book Depreciation		613,313
	Tax Depreciation		
21	Utility Plant Additions		16,442,711
22	Tax Depreciation Rate		3.75%
23	Tax Depreciation		616,602
24	Tax-Book Timing Difference		3,289
25	Income Tax Rate		27.00%
26	Accumulated Deferred Income Taxes (ADIT)		888
27	Accumulated Depreciation = Book Depreciation * 0.5		\$ 306,657

Notes:

(1) Refer to Schedule CGKSCL-1

(2) Property Taxes shall include State utility property taxes for all Non-Growth Plant Additions, calculated using the statutory tax rate in RSA 83-F:2, currently \$6.60 per \$1,000 of investment. Local property taxes shall not be included in the calculation and will be recovered through the Company's Property Tax Adjustment Mechanism ("PTAM")

(3) Book Depreciation Rate Based on the Average Depreciation Rate in Docket No. DG 21-104

Northern Utilities, Inc. - New Hampshire
Pre Tax Rate of Return
5 Quarter Average Ended December 31, 2020 Pro Forma

Northern Utilities, Inc.
