Re: DW 22-054: Bedford Waste Services Corporation  
Petition for Approval of Refinancing of Existing MCSB Loan, Repayment of Additional  
Paid in Capital and Short-term Debt and Financing for Past Due Amounts  
NH Department of Energy Position Statement

Dear Chairman Goldner:

Pursuant to RSA 12-P:2, IV, please accept this letter as the Department of Energy's (DOE) position statement in the above-referenced matter. The DOE has reviewed Bedford Waste Services Corporation's (Bedford Waste or the Company) September 9, 2022 filing for approval to refinance an existing Merrimack County Savings Bank (MCSB) Loan, repay Additional Paid in Capital (APIC) and Short-term Debt (STD), and finance past due amounts. The DOE has also reviewed discovery responses submitted by Bedford Waste on October 6, 2022. *See attached.* As such, and described below, the DOE does not recommend Commission approval of Bedford Waste's financing petition at this time, but, rather, recommends that the Company's petition should be further reviewed in conjunction with its pending petition for increased rates filed on October 17, 2022, in DW 22-058, in accordance with N.H. Admin. Rule Puc 203:19.

Bedford Waste's financing petition requests authority to borrow \$201,743 from its owner, Robert S. LaMontagne, over 15 years at a fixed interest rate of 8.00%. Approximately \$125,200 will be used to refinance the Company's existing MCSB loan; \$15,000 consists of a conversion of additional paid-in capital from the owner to long-term debt relative to previous capital investments; \$18,000 consists of a conversion of short-term debt from the owner to long-term debt for other previous capital investments; \$17,543 will be used to pay past due accrued liabilities to the Company's service providers; approximately \$6,000 will be used to pay anticipated financing costs associated with the instant petition; and approximately \$20,000 will be used to pay anticipated rate case expenditures in DW 22-058 via a separate line of credit from the owner.

The DOE believes that it would be prudent to investigate Bedford Waste's financing proposal in conjunction with its pending rate case for the following reasons:

1. Bedford Waste's rate petition requests an approximate 40% increase in permanent rates in addition to two step increases of approximately 15% each, resulting in a combined increase in customer rates of approximately 70%. Given the significant impact that the Company's financing request is likely to have on its proposed rate increase, the DOE believes that Bedford Waste's financing should not be reviewed in a vacuum, but, rather, in the light of the other factors contributing to the Company's substantial request for rate relief. The DOE is concerned that approval of Bedford Waste's proposed financing, and the resulting impact on its capital structure and cost of capital, prior to a full investigation of the Company's rate request, may not ultimately result in just and reasonable rates for customers.
2. The DOE notes that the Bedford Three Corners Owners Association, Inc. was an active intervenor and signatory to the settlement agreement in Bedford Waste's last rate proceeding, DW 04-144. *See Bodwell Waste Services Corporation*, Order No. 24,479 (July 1, 2005). As such, it is presumed that this homeowners' association will likely take a similar active role in Bedford Waste's recently filed rate case in DW 22-058.<sup>1</sup> Given the impact of the Company's financing request on its proposed rate increase, the DOE contends that it would be fair and reasonable to provide the homeowners' association an opportunity to fully participate with regard to the issues relevant to Bedford Waste's financing proposal, as well.
3. Based on the pre-filed testimony of Stephen P. St. Cyr (pages 3-4) and the Company's responses to DOE discovery (DOE 1-4 and 1-6), the DOE has concerns regarding whether the proposed financing from Mr. LaMontagne is the most economically efficient alternative as opposed to other potential funding sources. The DOE contends that further investigation should be conducted relative to the Company's previous due diligence in this regard and the existence of potential lower-cost financing alternatives.
4. The petition (page 1) proposes to replace \$15,000 in existing equity capital with long-term debt as well as add an additional \$18,000 in long-term debt all for the purpose of financing previous capital improvements made by the Company. This action, however, appears to be counter to what the DOE believes was the Commission's clear directive in Docket No. DW 17-143, where it stated, in Order No. 26,073 at 4 (November 9, 2017):  
*"We concur with Staff's recommendation that future capital improvements should be financed by equity capital instead of debt in order to address the Company's high percentage of debt in its capital structure."*

The DOE believes that further investigation should be conducted in this regard, especially considering its impact on Bedford Waste's capital structure and cost of capital as they relate to the determination of just and reasonable rates in the current rate proceeding.

---

<sup>1</sup> The DOE further notes that Paul Casazza, purporting to represent the Bedford "ratepayer community," circulated questions to Mr. St. Cyr via email to the DW 22-058 service list on October 24, 2022.

5. The petition (page 1) proposes to establish a line of credit of \$20,000 for anticipated rate case expenses to be incurred in the DW 22-058 petition for increase in rates. The DOE is concerned whether this proposed financing arrangement for rate case expense recovery is just and reasonable, especially considering the rate case expense relief already provided for in N.H. Admin. R., Puc 1906.

For the reasons discussed above, the DOE believes that Bedford Waste's financing proposal in DW 22-054 is an integral component of the Company's concurrent rate request made in DW 22-058, and thus should not be reviewed apart from such. Therefore, the DOE recommends that further review of the DW 22-054 financing request should occur in conjunction with the DW 22-058 rate case filing, pursuant to N.H. Admin. Rule Puc 203:19. The DOE believes that this action will assist in the orderly and efficient conduct of both cases and will ultimately result in just and reasonable rates.

Thank you for your consideration.

Sincerely,

*/s/ Robyn J. Descoteau*

Date Request Received: 9/26/22                      Date of Response: 10/06/22  
Request No. DOE 1-1                                      Witness: Stephen P. St. Cyr

Request: **Per Public Utilities Commission Docket #DW 17-143, Order No. 26,073, November 9, 2017, page 4:**

*“We concur with Staff’s recommendation that future capital improvements should be financed by equity capital instead of debt in order to address the Company’s high percentage of debt in its capital structure.”*

Please provide a detailed explanation as to why the Company’s financing proposal as described in its current petition appears to be counter to the Commission’s clear directive in Order No. 26,073, as shown above.

Response: While the Commission did concur with Staff’s recommendation, the Company did not interpret the Commission’s concurrence as a “clear directive.” The Commission did not order the Company to fund future capital improvements with equity capital. Also, the Company did not agree with Staff’s recommendation. The Company’s owner prefers debt to equity, prefers being repaid the invested capital, prefers utilizing lower cost capital and prefers the deductibility of the interest on debt.

Request: **Stephen P. St. Cyr Testimony, page 2, begins a discussion regarding the cost of various pump replacements.** For each year from 2017 to present, please indicate:

- a) Number of pumps replaced.
- b) Type or location of pumps replaced.
- c) Total cost of pumps replaced.

Response:

- a) Bedford replaced 11, 8, 3, 7, 7 & 4 in 2017, 2018, 2019, 2020, 2021 & 2022 YTD.
- b) The location of pumps replaced is in the pump chamber of each customer's septic tank.
- c) Bedford incurred \$30,858, \$25,544, \$9,094, \$22,203, \$26,353 & \$17,176 in 2017, 2018, 2019, 2020, 2021 & 2022 YTD.

Request No. DOE 1-3

Witness: Stephen P. St. Cyr

Request: Regarding pump replacements, please indicate:

- a) Total number of pumps in the system.
- b) What triggers a pump replacement?
- c) What is involved in replacing a pump?
- d) Typical pump life.
- e) Who performed the replacements from 2017 to present.
- f) The anticipated rate of pump replacements going forward.

Response:

- a) There are 78 pumps in the system.
- b) Each pump is wired to an alarm. The alarm goes off when the pump stops working. When an alarm goes off, customer calls AAA Pump. AAA Pump calls Maznek to open up tank and pump out waste. AAA Pump crew reviews pump failure, and decides what needs to be done, i.e., pump replacement, pump repair and/or replacement/repair of pump accessory equipment, i.e., float.
- c) See response to b).
- d) A typical pump life last 5 – 10 years.
- e) AAA Pump performed the replacements from 2017 to present.
- f) The Company generally anticipated replacing 5 – 10 pumps per year.

Date Request Received: 9/26/22  
Request No. DOE 1-4

Date of Response: 10/06/22  
Witness: Carleton Roberts

**Request: Re: Stephen P. St. Cyr Testimony, page 3, regarding MCSB’s seeming reluctance to increase its lending exposure to the Company.**

- a) Please provide further explanation regarding the Company’s discussions with MCSB regarding the Company’s need for additional capital, rising interest rates and the December 7, 2022 interest rate reset.
- b) Please provide further explanation regarding what is meant by the statement, “…[MCSB] was not sure it wanted to be increasing its lending exposure.”
- c) Please provide any and all documentation in support of MCSB’s notification to the Company that it “was not sure it wanted to be increasing its lending exposure.”
- d) Did MCSB request further securitization either from the Company or its owner before it would agree to increase the Company’s loan? Please explain.

Response:

- a) On July 12, 2022 Mr. Gallagher and Ms. Connelly of Merrimack County Savings Bank met with Mr. LaMontagne (owner of Bedford Waste), Mr. Roberts (CFO LaMontagne Companies), and Mr. St. Cyr who was in attendance via telephone. The meeting had been set up to review Bedford Waste’s request for financing and other LaMontagne companies’ loans. Mr. LaMontagne and Mr. St. Cyr explained to MCSB Bedford’s need for cash and Bedford’s proposed refinancing/ financing in order to cover a current cash deficit, increased costs, and funds needed for filing rate case and refinancing/financing cases with the NH PUC. They also gave a brief overview of the regulatory process and the rate case requirements in order to increase rates. Mr. Gallagher mentioned that the original loan was agreed upon based upon MCSB’s years of providing financing for LaMontagne entities and was approved mostly because of Mr. LaMontagne’s personal guarantee. He expressed concern over the debt essentially never being paid off, since future cost increases and plant replacement will cause the need for additional financing and the company’s rates are not designed to create a reserve. Although hesitant to turn down financing of an existing customer, his position remained the same as “not wanting to increase lending exposure.”
- b) See response to a).
- c) See 1-4 attachment.
- d) Since all company assets were pledged and Mr. LaMontagne had already provided a personal guarantee, no other securitization was discussed.

Based upon this conversation, Mr. LaMontagne decided that any future financing would have to be by himself as owner or by a lender without a personal guarantee. Bedford's approved customer rate has not been and likely will never be sufficient to cover cost increases over time, which means that the company will eventually run out of money to pay the bank, and he will be left to ensure payment until a costly rate case can be filed. Rather than strain his relationship with lenders, he believes the best option is to provide owner financing.

Request: **Re: Stephen P. St. Cyr Testimony, page 4, proposed terms and conditions of the proposed owner financing.** Please provide any analysis conducted by the Company in support of its contention that a proposed fixed interest rate of 8% over 15 years will be competitive in December 2022.

Response: The most current 5-Year Federal Home Loan Bank of Boston Regular 5/15 Amortizing Advance Rate is 4.43%. The existing MCSB loan interest rate is scheduled to reset on 12/7/22. If Bedford uses the most current rate of 4.43% plus the 2.75% adder, the interest rate of the existing MCSB loan would be 7.18% today. The Company anticipates that the Federal Reserve will increase rates .75% - 1.50% between now and the end of the year, resulting in a potential rate of 7.93% - 8.68%. It is also likely that the Federal Reserve will increase rates in 2023.

Date Request Received: 9/26/22

Date of Response: 10/06/22

Request No. DOE 1-9

Witness: Stephen P. St. Cyr

Request: **Re: Stephen P. St. Cyr Testimony, page 3, Financing Costs.** Please provide further detail in support of the Company's estimated financing costs of \$6,000.

Response: As of 9/30/22, Bedford has expended \$3,543.75 and \$150.00, on services provided by Stephen P. St. Cyr & Associates and LaMontagne Management Corp., respectively. Bedford anticipates spending an additional \$1,500 and \$750 by Stephen P. St. Cyr & Associates and LaMontagne Management Corp., respectively.

**Petition for Approval Financing**  
**NH Department of Energy (DOE) Data Requests –Set 1**

---

Date Request Received: 9/26/22

Date of Response: 10/06/22

Request No. DOE 1-10

Witness: Stephen P. St. Cyr

Request: **Re: Petition items 5. And 6.**

- a) Please confirm that the estimated rate case expenditures of \$20,000 and the requested Line of Credit of \$20,000 are for one in the same item(s).
- b) Please provide further detail in support of the Company's estimated rate case expenses (Line of Credit) of \$20,000.
- c) Please provide further explanation regarding the necessity of a \$20,000 line of credit to cover the Company's rate case expenses in light of N.H. Admin. R., Puc 1906.

Response:

- a) Yes, the estimated rate case expenditures of \$20,000 and the requested Line of Credit of \$20,000 are for one in the same item(s).
- b) Bedford has expended \$4,109.25 and \$150.00 on services provided by Stephen P. St. Cyr & Associates and LaMontagne Management Corp., respectively. Bedford anticipates incurring an additional \$8,000 - \$12,000 by provided by Stephen P. St. Cyr & Associates and \$3,000 - \$4,000 by LaMontagne Management Corp. Of course, the amount expended by the Company is very dependent on the parties involved in the proceeding, the number of rounds of data requests and the willingness of the parties to reach a settlement on the various issues.
- c) Bedford does not have the funds internally to pay for rate case expenditures. As such, it has to borrow such funds in one fashion or another. Bedford proposed that its owner provide a \$20,000 line of credit to pay for rate case expenditures. Bedford envision utilizing the line of credit during approximately year 1 and paying back the line of credit over years 2 – 3 or 2 – 4 period with funds received from customers via a rate case surcharge. Bedford anticipates that all such rate case expenditures will meet the requirements of N.H. Admin. R., Puc 1906, Allowed Expenses.
