

Daniel C. Goldner, Chairman  
New Hampshire Public Utilities Commission  
21 South Fruit Street, Suite 10  
Concord, NH 03301

**Re: DE 22-060, Consideration of Changes to the Current Net Metering Tariff Structure, Including Compensation of Customer-Generators**

Dear Chair Goldner

We are writing on behalf of the Town of Rollinsford and requesting the commission's support for NH Saves initiatives. Rollinsford, a small town, is not unlike so many other communities statewide. This past year, Rollinsford, with CENH and CPCNH guidance, has been working to establish an initiative to manage energy affordability and to seek supply options, including but not limited to municipal hydroelectric and solar projects.

The advancement of more attractive net metering initiatives to allow smaller communities to benefit and to combine their limited resources with others is meaningful progress. Making clean energy alternatives affordable for taxpayers and businesses must be a priority for the NHPUC.

As NH looks to brighten the future for residents and businesses alike, we must become better stewards of our resources. NH Saves Programs embrace this goal. We urge the NH PUC to support their initiatives. In doing so, together we not only preserve our beautiful environment, but also make more clean affordable energy a part of our vision for NH. This is surely the "NH Way",

Sincerely,  
Charles E George, Chairman  
Rollinsford Energy Commission
