Dear New Hampshire Public Utility Commissioners Mr. Daniel Goldner, Mr. Pradip Chattopadhyay, and Mr. Carleton Simpson,

I write regarding DE22-060 to support maintaining the current net metering policy. Weakening or removing it would not be fair to those of us who installed solar panels with the understanding that net metering will help recover the cost. Solar power is the wave of the future. The technology continues to improve to the advantage of many individuals and businesses in NH and across the country. The incentive of net metering will continue to help more people and companies upgrade their electrical systems to save money and benefit the economy. Using new and improved solar technology instead of relying on old fashioned and outdated fossil fuel produced power will also protect the environment, resulting in a better quality of life for everyone.

I'm sure you want New Hampshire residents to enjoy these advantages, so please keep the current net metering policy in place. Thank you for your kind attention.
