Good morning,

I am writing regarding docket number 23-063.

I believe that community aggregation is an important mechanism for electricity customers to purchase better electricity. My home is in Liberty territory, we have virtually net metered solar electricity, and a third-party supplier, not community aggregation but North American Power. Our bills are more complex than most, I suspect, yet Liberty has begrudgingly figured out our bills, although it takes them much longer than normal. I want to be part of Hanover Community Power. Please ensure that Liberty follows through on their duties to distribute electricity purchased by consumers, even if that means that Liberty must provide more data to suppliers.
