Commissioners,

I urge you to approve the plan put forward but our utility companies and other stakeholders to move our electric grid in NH in the right direction. Our tourist economy will soon be trying to meet the demand of more EVs coming to use more chargers at the same time that more and more customers will be heating primarily with electric heat pumps. In the near term, we can only be ready for the accelerating pace of change by having robust efficiency plans in place.

Thank you for your time and consideration.

Jennifer Smith

Member of the Pembroke Energy Advisory Committee
