Eversource Energy is a public utility holding company primarily engaged, through its wholly-owned regulated utility subsidiaries, in the energy delivery business. Eversource Energy's wholly-owned regulated utility subsidiaries consist of CL&P, NSTAR Electric and PSNH (electric utilities), Yankee Gas, NSTAR Gas and EGMA (natural gas utilities) and Aquarion (water utilities). Eversource is organized into the electric distribution, electric transmission, natural gas distribution, and water distribution reportable segments.

The following items in this executive summary are explained in more detail in this combined Annual Report on Form 10-K:

##### *Earnings Overview and Future Outlook:*

- We had a loss of \$442.2 million, or \$1.26 per share, in 2023, compared with earnings of \$1.40 billion, or \$4.05 per share, in 2022. Our 2023 results include after-tax impairment charges of \$1.95 billion, or \$5.58 per share, recorded at Eversource parent to reflect our current estimate of the fair value of the offshore wind projects. Our 2023 results also include after-tax land abandonment and other charges recorded at Eversource parent of \$6.9 million, or \$0.02 per share. Our 2022 results include after-tax transaction and transition costs of \$15.0 million, or \$0.04 per share. Excluding the offshore wind impairments and these other charges, our non-GAAP earnings were \$1.52 billion, or \$4.34 per share, in 2023, compared with \$1.42 billion, or \$4.09 per share, in 2022.
- We project that we will earn within a 2024 non-GAAP earning guidance range of between \$4.50 per share and \$4.67 per share, which excludes the impact of the expected sales of our 50 percent interests in three jointly-owned offshore wind projects and related transaction costs. We also project that our long-term EPS growth rate through 2028 from our regulated utility businesses will be in a 5 to 7 percent range.

*Liquidity:*

- Cash flows provided by operating activities totaled \$1.65 billion in 2023, compared with \$2.40 billion in 2022. Investments in property, plant and equipment totaled \$4.34 billion in 2023 and \$3.44 billion in 2022.
- Cash and Cash Equivalents totaled \$53.9 million as of December 31, 2023, compared with \$374.6 million as of December 31, 2022. Our available borrowing capacity under our commercial paper programs totaled \$512.3 million as of December 31, 2023.
- In 2023, we issued \$5.20 billion of new long-term debt and we repaid \$2.01 billion of long-term debt.
- In 2023, we paid dividends totaling \$2.70 per common share, compared with dividends of \$2.55 per common share in 2022. Our quarterly common share dividend payment was \$0.675 per share in 2023, as compared to \$0.6375 per share in 2022. On January 31, 2024, our Board of Trustees approved a common share dividend payment of \$0.715 per share, payable on March 29, 2024 to shareholders of record as of March 5, 2024.
- We project to make capital expenditures of \$23.12 billion from 2024 through 2028, of which we expect \$9.71 billion to be in our electric distribution segment, \$5.44 billion to be in our natural gas distribution segment, \$5.77 billion to be in our electric transmission segment, and \$1.08 billion to be in our water distribution segment. We also project to invest \$1.12 billion in information technology and facilities upgrades and enhancements.
- On February 13, 2024, we initiated an exploratory assessment of monetizing our water distribution business and are exploring the potential sale of the business.

*Strategic Developments:*

- On February 13, 2024, Eversource announced that it has executed an agreement to sell its existing 50 percent interests in the South Fork Wind and Revolution Wind projects to Global Infrastructure Partners (GIP). As part of this transaction, Eversource expects to receive approximately \$1.1 billion of cash proceeds upon closing, which includes the sales value related to the 10 percent energy community ITC adder of approximately \$170 million related to Revolution Wind, and to exit these projects while retaining certain cost sharing obligations for the construction of Revolution Wind. The purchase price is subject to future post-closing adjustment payments based on, among other things, the progress, timing and expense of construction at each project. The cost sharing obligations provide that Eversource would share equally with GIP in GIP's funding obligations for up to approximately \$240 million of incremental capital expenditure overruns incurred during the construction phase for the Revolution Wind project, after which GIP's obligations for any additional capital expenditure overruns would be shared equally by Eversource and Ørsted. Additionally, Eversource's financial exposure will be adjusted by certain purchase price adjustments to be made following commercial operation of the Revolution Wind project and closing of South Fork as a result of final project economics, which includes Eversource's obligation to maintain GIP's internal rate of return for each project as specified in the agreement. Eversource currently expects that South Fork Wind will reach full commercial operation prior to closing of the sale with GIP and Eversource does not expect any material cost sharing or other purchase price adjustment payments for South Fork Wind. Closing of the transaction is currently expected to occur in mid-2024.
- On January 24, 2024, Ørsted signed an agreement with Eversource to acquire Eversource's 50 percent share of Sunrise Wind. The sale is subject to the successful selection of Sunrise Wind in the ongoing New York fourth solicitation for offshore wind capacity, signing of an OREC contract with NYSEERDA, finalization of sale agreements, receipt of final federal construction permits, and relevant regulatory approvals. If Sunrise Wind is not successful in the solicitation, then the existing OREC contract for Sunrise Wind will be cancelled according to the state's requirements, and Eversource and Ørsted's joint venture for Sunrise Wind will remain in place. In that scenario, Ørsted and Eversource would then assess their options in determining the best path forward for Sunrise Wind and its assets, which include the BOEM offshore lease area.
- On January 25, 2024, Eversource and Ørsted submitted a new proposal for Sunrise Wind in the New York fourth offshore wind solicitation.
- Four of South Fork Wind's twelve turbines were installed and placed into service by January 1, 2024, meeting the project commercial operation date requirements under the power purchase agreement with LIPA. All wind turbines are expected to be installed and placed into service by the end of March 2024.

## Earnings Overview

*Consolidated:* Below is a summary of our earnings/(loss) by business, which also reconciles the non-GAAP financial measures of consolidated non-GAAP earnings and EPS, as well as EPS by business, to the most directly comparable GAAP measures of consolidated Net (Loss)/Income Attributable to Common Shareholders and diluted EPS.

| <i>(Millions of Dollars, Except Per Share Amounts)</i>              | For the Years Ended December 31, |           |            |           |            |           |
|---|----------------------------------|-----------|------------|-----------|------------|-----------|
|   | 2023                             |           | 2022       |           | 2021       |           |
|   | Amount                           | Per Share | Amount     | Per Share | Amount     | Per Share |
| Net (Loss)/Income Attributable to Common Shareholders (GAAP)        | \$ (442.2)                       | \$ (1.26) | \$ 1,404.9 | \$ 4.05   | \$ 1,220.5 | \$ 3.54   |
| Regulated Companies (Non-GAAP)                                      | \$ 1,509.3                       | \$ 4.31   | \$ 1,460.4 | \$ 4.21   | \$ 1,342.4 | \$ 3.89   |
| Eversource Parent and Other Companies (Non-GAAP)                    | 8.4                              | 0.03      | (40.5)     | (0.12)    | (12.2)     | (0.03)    |
| Non-GAAP Earnings   | \$ 1,517.7                       | \$ 4.34   | \$ 1,419.9 | \$ 4.09   | \$ 1,330.2 | \$ 3.86   |
| Impairments of Offshore Wind Investments (after-tax) <sup>(1)</sup> | (1,953.0)                        | (5.58)    | —          | —         | —          | —         |
| Land Abandonment Loss and Other Charges (after-tax) <sup>(2)</sup>  | (6.9)                            | (0.02)    | —          | —         | —          | —         |
| Transaction and Transition Costs (after-tax) <sup>(3)</sup>         | —                                | —         | (15.0)     | (0.04)    | (23.6)     | (0.07)    |
| CL&P Settlement Impacts (after-tax) <sup>(4)</sup>                  | —                                | —         | —          | —         | (86.1)     | (0.25)    |
| Net (Loss)/Income Attributable to Common Shareholders (GAAP)        | \$ (442.2)                       | \$ (1.26) | \$ 1,404.9 | \$ 4.05   | \$ 1,220.5 | \$ 3.54   |

- <sup>(1)</sup> We recorded impairment charges resulting from the expected sales of our offshore wind investments and to reflect our current estimate of the fair value of the offshore wind projects. For further information, see "Business Development and Capital Expenditures – Offshore Wind Business" included in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.
- <sup>(2)</sup> The 2023 charges primarily include a loss on the disposition of land. The land was initially acquired to construct the Northern Pass Transmission project and was subsequently abandoned.
- <sup>(3)</sup> Transaction costs in 2022 and 2021 primarily include costs associated with the transition of systems as a result of our purchase of the assets of Columbia Gas of Massachusetts (CMA) on October 9, 2020 and integrating the CMA assets onto Eversource's systems.
- <sup>(4)</sup> The 2021 after-tax costs are associated with the October 1, 2021 CL&P settlement agreement approved by PURA that included credits to customers and funding of various customer assistance initiatives and a 2021 storm performance penalty imposed on CL&P by PURA.

*Regulated Companies:* Our regulated companies comprise the electric distribution, electric transmission, natural gas distribution and water distribution segments. A summary of our segment earnings and EPS is as follows:

| <i>(Millions of Dollars, Except Per Share Amounts)</i>              | For the Years Ended December 31, |           |            |           |            |           |
|---|----------------------------------|-----------|------------|-----------|------------|-----------|
|   | 2023                             |           | 2022       |           | 2021       |           |
|   | Amount                           | Per Share | Amount     | Per Share | Amount     | Per Share |
| Net Income - Regulated Companies (GAAP)                             | \$ 1,509.3                       | \$ 4.31   | \$ 1,460.4 | \$ 4.21   | \$ 1,256.3 | \$ 3.64   |
| Electric Distribution, excluding CL&P Settlement Impacts (Non-GAAP) | \$ 608.0                         | \$ 1.74   | \$ 592.8   | \$ 1.71   | \$ 556.2   | \$ 1.61   |
| Electric Transmission   | 643.4                            | 1.84      | 596.6      | 1.72      | 544.6      | 1.58      |
| Natural Gas Distribution  | 224.8                            | 0.64      | 234.2      | 0.67      | 204.8      | 0.59      |
| Water Distribution  | 33.1                             | 0.09      | 36.8       | 0.11      | 36.8       | 0.11      |
| Net Income - Regulated Companies (Non-GAAP)                         | \$ 1,509.3                       | \$ 4.31   | \$ 1,460.4 | \$ 4.21   | \$ 1,342.4 | \$ 3.89   |
| CL&P Settlement Impacts (after-tax)                                 | —                                | —         | —          | —         | (86.1)     | (0.25)    |
| Net Income - Regulated Companies (GAAP)                             | \$ 1,509.3                       | \$ 4.31   | \$ 1,460.4 | \$ 4.21   | \$ 1,256.3 | \$ 3.64   |

Our electric distribution segment earnings increased \$15.2 million in 2023, as compared to 2022, due primarily to a base distribution rate increase effective January 1, 2023 at NSTAR Electric, higher earnings from CL&P's capital tracking mechanism due to increased electric system improvements, an increase in interest income primarily on regulatory deferrals, the impact of a new regulatory tracking mechanism at PSNH that allows for the recovery of previously incurred operating expenses associated with poles acquired on May 1, 2023, and higher AFUDC equity income. Those earnings increases were partially offset by higher operations and maintenance expense, higher interest expense, higher property and other tax expense, higher depreciation expense and lower pension income.

Our electric transmission segment earnings increased \$46.8 million in 2023, as compared to 2022, due primarily to a higher transmission rate base as a result of our continued investment in our transmission infrastructure and a lower effective tax rate.

Our natural gas distribution segment earnings decreased \$9.4 million in 2023, as compared to 2022, due primarily to higher depreciation expense, higher interest expense, a higher effective tax rate, an unfavorable regulatory adjustment resulting from NSTAR Gas' GSEP reconciliation filing, higher operations and maintenance expense arising primarily from higher uncollectible expense, and higher property tax expense. Those earnings decreases were partially offset by higher earnings from capital tracking mechanisms due to continued investments in natural gas infrastructure, base distribution rate increases effective November 1, 2023 and November 1, 2022 at NSTAR Gas and effective November 1, 2022 at EGMA, and an increase in interest income primarily on regulatory deferrals.

Our water distribution segment earnings decreased \$3.7 million in 2023, as compared to 2022, due primarily to higher depreciation, operations and maintenance expense and higher interest expense.

*Eversource Parent and Other Companies:* Eversource parent and other companies' losses increased \$1.90 billion in 2023, as compared to 2022, due primarily to the 2023 impairments of Eversource parent's offshore wind investments, which resulted in a total after-tax charge of \$1.95 billion, or \$5.58 per share. Earnings were also unfavorably impacted by higher interest expense and a loss on the disposition of land in 2023 that was initially acquired to construct the Northern Pass Transmission project and was subsequently abandoned. Earnings benefited by a lower effective tax rate as a result of the ability to utilize tax credits and benefits in 2023, as well as a decrease in after-tax transaction and transition costs. Additionally, 2023 earnings were favorably impacted from the liquidation of Eversource parent's equity method investment in a renewable energy fund, partially offset by a charitable contribution made with a portion of the proceeds from the liquidation in 2023.

#### Liquidity

*Sources and Uses of Cash:* Eversource's regulated business is capital intensive and requires considerable capital resources. Eversource's regulated companies' capital resources are provided by cash flows generated from operations, short-term borrowings, long-term debt issuances, capital contributions from Eversource parent, and existing cash, and are used to fund their liquidity and capital requirements. Eversource's regulated companies typically maintain minimal cash balances and use short-term borrowings to meet their working capital needs and other cash requirements. Short-term borrowings are also used as a bridge to long-term debt financings. The levels of short-term borrowing may vary significantly over the course of the year due to the impact of fluctuations in cash flows from operations (including timing of storm costs and regulatory recoveries), dividends paid, capital contributions received and the timing of long-term debt financings.

Eversource, CL&P, NSTAR Electric and PSNH each uses its available capital resources to fund its respective construction expenditures, meet debt requirements, pay operating costs, including storm-related costs, pay dividends, and fund other corporate obligations, such as pension contributions. Eversource's regulated companies recover their electric, natural gas and water distribution construction expenditures as the related project costs are depreciated over the life of the assets. This impacts the timing of the revenue stream designed to fully recover the total investment plus a return on the equity and debt used to finance the investments. Eversource's regulated companies spend a significant amount of cash on capital improvements and construction projects that have a long-term return on investment and recovery period. In addition, Eversource uses its capital resources to fund investments in its offshore wind business, which are recognized as long-term assets. These factors have resulted in current liabilities exceeding current assets by \$2.09 billion, \$308.5 million and \$143.6 million at Eversource, NSTAR Electric and PSNH, respectively, as of December 31, 2023.

We expect the future operating cash flows of Eversource, CL&P, NSTAR Electric and PSNH, along with our existing borrowing availability and access to both debt and equity markets, will be sufficient to meet any working capital and future operating requirements, and capital investment forecasted opportunities.

As of December 31, 2023, \$1.95 billion of Eversource's long-term debt, including \$1.35 billion at Eversource parent and \$139.8 million at CL&P, matures within the next 12 months. Eversource, with its solid credit ratings, has several options available in the financial markets to repay or refinance these maturities with the issuance of new long-term debt. Eversource, CL&P, NSTAR Electric and PSNH will reduce their short-term borrowings with operating cash flows or with the issuance of new long-term debt, determined by considering capital requirements and maintenance of Eversource's credit rating and profile.

Cash and Cash Equivalents totaled \$53.9 million as of December 31, 2023, compared with \$374.6 million as of December 31, 2022.

*Short-Term Debt - Commercial Paper Programs and Credit Agreements:* Eversource parent has a \$2.00 billion commercial paper program allowing Eversource parent to issue commercial paper as a form of short-term debt. Eversource parent, CL&P, PSNH, NSTAR Gas, Yankee Gas, EGMA and Aquarion Water Company of Connecticut are parties to a five-year \$2.00 billion revolving credit facility, which terminates on October 13, 2028. This revolving credit facility serves to backstop Eversource parent's \$2.00 billion commercial paper program.

NSTAR Electric has a \$650 million commercial paper program allowing NSTAR Electric to issue commercial paper as a form of short-term debt. NSTAR Electric is also a party to a five-year \$650 million revolving credit facility, which terminates on October 13, 2028, and serves to backstop NSTAR Electric's \$650 million commercial paper program.

The amount of borrowings outstanding and available under the commercial paper programs were as follows:

|  | Borrowings Outstanding as of December 31, |            | Available Borrowing Capacity as of December 31, |          | Weighted-Average Interest Rate as of December 31, |        |
|--|---|------------|---|----------|---|--------|
|  | 2023                                      | 2022       | 2023  | 2022     | 2023  | 2022   |
| (Millions of Dollars)                      |   |            |   |          |   |        |
| Eversource Parent Commercial Paper Program | \$ 1,771.9                                | \$ 1,442.2 | \$ 228.1  | \$ 557.8 | 5.60 %  | 4.63 % |
| NSTAR Electric Commercial Paper Program    | 365.8                                     | —          | 284.2   | 650.0    | 5.40 %  | — %    |

There were no borrowings outstanding on the revolving credit facilities as of December 31, 2023 or 2022.

CL&P and PSNH have uncommitted line of credit agreements totaling \$375 million and \$250 million, respectively, which will expire in 2024. There are no borrowings outstanding on either the CL&P or PSNH uncommitted line of credit agreements as of December 31, 2023.

Amounts outstanding under the commercial paper programs are included in Notes Payable and classified in current liabilities on the Eversource and NSTAR Electric balance sheets, as all borrowings are outstanding for no more than 364 days at one time. As a result of the CL&P long-term debt issuance in January 2024, \$207.3 million of commercial paper borrowings under the Eversource parent commercial paper program were reclassified as Long-Term Debt on Eversource parent's balance sheet as of December 31, 2023.

*Intercompany Borrowings:* Eversource parent uses its available capital resources to provide loans to its subsidiaries to assist in meeting their short-term borrowing needs. Eversource parent records intercompany interest income from its loans to subsidiaries, which is eliminated in consolidation. Intercompany loans from Eversource parent to its subsidiaries are eliminated in consolidation on Eversource's balance sheets. As of December 31, 2023, there were intercompany loans from Eversource parent to CL&P of \$457.0 million and to PSNH of \$233.0 million. As of December 31, 2022, there were intercompany loans from Eversource parent to PSNH of \$173.3 million. Eversource parent charges interest on these intercompany loans at the same weighted-average interest rate as its commercial paper program. Intercompany loans from Eversource parent are included in Notes Payable to Eversource parent and classified in current liabilities on the respective subsidiary's balance sheets, as these intercompany borrowings are outstanding for no more than 364 days at one time. As a result of the CL&P long-term debt issuance in January 2024, \$207.3 million of CL&P's intercompany borrowings were reclassified to Long-Term Debt on CL&P's balance sheet as of December 31, 2023.

*Availability under Long-Term Debt Issuance Authorizations:* On June 14, 2022, the DPU approved NSTAR Gas' request for authorization to issue up to \$325 million in long-term debt through December 31, 2024. On November 30, 2022, the PURA approved CL&P's request for authorization to issue up to \$1.15 billion in long-term debt through December 31, 2024. As a result of CL&P's January 2024 long-term debt issuance, CL&P has now fully utilized this authorization. On June 7, 2023, PURA approved Yankee Gas' request for authorization to issue up to \$350 million in long-term debt through December 31, 2024. On November 21, 2023, NSTAR Electric petitioned the DPU requesting authorization to issue up to \$2.4 billion in long-term debt through December 31, 2026. On February 8, 2024, the NHPUC approved PSNH's request for authorization to issue up to \$300 million in long-term debt through December 31, 2024.

*Long-Term Debt Issuances and Repayments:* The following table summarizes long-term debt issuances and repayments:

| <i>(Millions of Dollars)</i>                          | <b>Interest Rate</b> | <b>Issuance/<br/>(Repayment)</b> | <b>Issue Date or<br/>Repayment Date</b> | <b>Maturity Date</b> | <b>Use of Proceeds for Issuance/<br/>Repayment Information</b>  |
|---|----------------------|----------------------------------|---|----------------------|---|
| CL&P 2023 Series A First Mortgage Bonds               | 5.25 %               | \$ 500.0                         | January 2023                            | January 2053         | Repaid 2013 Series A Bonds at maturity and short-term debt, and paid capital expenditures and working capital |
| CL&P 2013 Series A First Mortgage Bonds               | 2.50 %               | (400.0)                          | January 2023                            | January 2023         | Paid at maturity  |
| CL&P 2023 Series B First Mortgage Bonds               | 4.90 %               | 300.0                            | July 2023                               | July 2033            | Repaid short-term debt, paid capital expenditures and working capital   |

As a result of the CL&P and Eversource parent long-term debt issuances in January 2024, \$139.8 million and \$990.9 million, respectively, of current portion of long-term debt were reclassified as Long-Term Debt on CL&P's and Eversource parent's balance sheets as of December 31, 2023.

*Rate Reduction Bonds:* PSNH's RRB payments consist of principal and interest and are paid semi-annually. PSNH paid \$43.2 million of RRB principal payments in each of 2023 and 2022, and paid \$16.2 million and \$17.6 million of interest payments in 2023 and 2022, respectively.

*Common Share Issuances and 2022 Equity Distribution Agreement:* On May 11, 2022, Eversource entered into an equity distribution agreement pursuant to which it may offer and sell up to \$1.2 billion of its common shares from time to time through an "at-the-market" (ATM) equity offering program. In 2023, no shares were issued under this agreement. In 2022, Eversource issued 2,165,671 common shares, which resulted in proceeds of \$197.1 million, net of issuance costs. Eversource used the net proceeds received for general corporate purposes.

*Cash Flows:* Cash flows from operating activities primarily result from the transmission and distribution of electricity, and the distribution of natural gas and water. Cash flows provided by operating activities totaled \$1.65 billion in 2023, compared with \$2.40 billion in 2022. Operating cash flows were unfavorably impacted by an increase in regulatory under-recoveries driven primarily by the timing of collections for the CL&P non-bypassable FMCC and other regulatory tracking mechanisms, the timing of cash payments made on our accounts payable, a \$26.7 million increase in cash payments to vendors for storm costs, an \$11.9 million increase in cost of removal expenditures, and the timing of other working capital items. In 2023, CL&P increased the flow back to customers of net revenues generated by long-term state-approved energy contracts by providing these credits to customers through the non-bypassable FMCC retail rate. The reduction in the CL&P non-bypassable FMCC retail rate decreased the regulatory over-recovery balance and created an under-recovery balance as of December 31, 2023, which resulted in a decrease to amortization expense of \$802.3 million in 2023, as compared to 2022, and is presented as a cash outflow in Amortization on the statement of cash

flows. The impacts of regulatory collections are included in both Regulatory Recoveries and Amortization on the statements of cash flows. These unfavorable impacts were partially offset by the timing of cash collections on our accounts receivable, the absence in 2023 of \$78.4 million of payments in 2022 related to withheld property taxes at our Massachusetts companies, a decrease of \$76.3 million in pension contributions made in 2023 compared to 2022, the absence in 2023 of \$72.0 million of customer credits distributed in 2022 at CL&P as a result of the October 2021 settlement agreement and the 2021 storm performance penalty for CL&P's response to Tropical Storm Isaias, and a \$38.7 million increase in operating cash flows due to lower income tax payments.

In 2023, we paid cash dividends of \$919.0 million and issued non-cash dividends of \$23.4 million in the form of treasury shares, totaling dividends of \$942.4 million, or \$2.70 per common share. In 2022, we paid cash dividends of \$860.0 million and issued non-cash dividends of \$23.1 million in the form of treasury shares, totaling dividends of \$883.1 million, or \$2.55 per common share. Our quarterly common share dividend payment was \$0.675 per share in 2023, as compared to \$0.6375 per share in 2022. On January 31, 2024, our Board of Trustees approved a common share dividend payment of \$0.715 per share, payable on March 29, 2024 to shareholders of record as of March 5, 2024.

Eversource issues treasury shares to satisfy awards under the Company's incentive plans, shares issued under the dividend reinvestment and share purchase plan, and matching contributions under the Eversource 401k Plan.

In 2023, CL&P, NSTAR Electric and PSNH paid \$330.4 million, \$327.4 million and \$112.0 million, respectively, in common stock dividends to Eversource parent.

Investments in Property, Plant and Equipment on the statements of cash flows do not include amounts incurred on capital projects but not yet paid, cost of removal, AFUDC related to equity funds, and the capitalized and deferred portions of pension and PBOP income/expense. In 2023, investments for Eversource, CL&P, NSTAR Electric, and PSNH were \$4.34 billion, \$1.09 billion, \$1.38 billion and \$605.1 million, respectively. Capital expenditures were primarily for continuing projects to maintain and improve infrastructure and operations, including enhancing reliability to the transmission and distribution systems.

Capital contributions in the offshore wind investments, including the 2023 contribution for the tax equity investment in South Fork Wind, are included in Investments in Unconsolidated Affiliates on the statements of cash flows. Proceeds received from the sale of the uncommitted lease area of \$625 million in 2023 and from an October 2023 distribution of \$318 million received primarily as a result of being a 50 percent joint owner in the Class B shares of South Fork Wind which was restructured as a tax equity investment, are included in Proceeds from Unconsolidated Affiliates on the statement of cash flows. Proceeds from the October 2023 distribution were used to pay down short-term debt. Proceeds from Unconsolidated Affiliates also includes proceeds received from the liquidation of an equity method investment in a renewable energy investment fund of \$147.6 million in 2023.

*Contractual Obligations:* For information regarding our cash requirements from contractual obligations and payment schedules, see Note 9, "Long-Term Debt," Note 10, "Rate Reduction Bonds and Variable Interest Entities," Note 11A, "Employee Benefits - Pension Benefits and Postretirement Benefits Other Than Pension," Note 13, "Commitments and Contingencies," and Note 14, "Leases," to the financial statements.

Estimated interest payments on existing long-term fixed-rate debt are calculated by multiplying the coupon rate on the debt by its scheduled notional amount outstanding for the period of measurement as of December 31, 2023 and are as follows:

| (Millions of Dollars) | 2024     | 2025     | 2026     | 2027     | 2028     | Thereafter | Total       |
|-----------------------|----------|----------|----------|----------|----------|------------|-------------|
| Eversource            | \$ 933.3 | \$ 868.1 | \$ 827.5 | \$ 774.5 | \$ 671.6 | \$ 6,860.6 | \$ 10,935.6 |

Our commitments to make payments in addition to these contractual obligations include other liabilities reflected on our balance sheets, future funding of our offshore wind equity method investments until the expected sales are completed, and guarantees of certain obligations primarily associated with our offshore wind investments. The future funding and guarantee obligations associated with our offshore wind investments will be impacted by the expected sales of our offshore wind investments and related developments.

For information regarding our projected capital expenditures over the next five years, see "Business Development and Capital Expenditures - Projected Capital Expenditures" and for further information on the expected sales of our offshore wind investments, see "Business Development and Capital Expenditures - Offshore Wind Business" included in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

*Credit Ratings:* A summary of our current corporate credit ratings and outlooks by S&P, Moody's, and Fitch is as follows:

|                   | S&P     |           | Moody's |          | Fitch   |         |
|-------------------|---------|-----------|---------|----------|---------|---------|

#### Business Development and Capital Expenditures

Our consolidated capital expenditures, including amounts incurred but not paid, cost of removal, AFUDC, and the capitalized and deferred portions of pension and PBOP income/expense (all of which are non-cash factors), totaled \$4.59 billion in 2023, \$3.79 billion in 2022, and \$3.54 billion in 2021. These amounts included \$214.4 million in 2023, \$266.5 million in 2022, and \$238.0 million in 2021 related to information technology and facilities upgrades and enhancements, primarily at Eversource Service and The Rocky River Realty Company.

*Electric Transmission Business:* Our consolidated electric transmission business capital expenditures increased by \$240.8 million in 2023, as compared to 2022. A summary of electric transmission capital expenditures by company is as follows:

| (Millions of Dollars)       | For the Years Ended December 31, |            |            |
|-----------------------------|----------------------------------|------------|------------|
|                             | 2023                             | 2022       | 2021       |
| CL&P                        | \$ 470.4                         | \$ 416.8   | \$ 400.0   |
| NSTAR Electric              | 567.4                            | 438.4      | 480.3      |
| PSNH                        | 410.0                            | 351.8      | 235.0      |
| Total Electric Transmission | \$ 1,447.8                       | \$ 1,207.0 | \$ 1,115.3 |

Our transmission projects are designed to improve the reliability of the electric grid, meet customer demand for power and increases in electrification of municipal infrastructure, strengthen the electric grid's resilience against extreme weather and other safety and security threats, and enable integration of increasing amounts of clean power generation from renewable sources, such as solar, battery storage, and offshore wind. In Connecticut, Massachusetts and New Hampshire, our transmission projects include transmission line upgrades, the installation of new transmission interconnection facilities, substations and lines, and transmission substation enhancements.

*Distribution Business:* A summary of distribution capital expenditures is as follows:

| (Millions of Dollars) | For the Years Ended December 31, |                |          |                |             |          |            |
|-----------------------|----------------------------------|----------------|----------|----------------|-------------|----------|------------|
|                       | CL&P                             | NSTAR Electric | PSNH     | Total Electric | Natural Gas | Water    | Total      |

| Load Growth and Other | 80.2                             | 169.9          | 37.1     | 287.2          | 83.3        | 0.6      | 371.1      |
| Total Distribution    | \$ 514.4                         | \$ 568.9       | \$ 160.8 | \$ 1,244.1     | \$ 799.0    | \$ 144.2 | \$ 2,187.3 |

For the electric distribution business, basic business includes the purchase of meters, tools, vehicles, information technology, transformer replacements, equipment facilities, and the relocation of plant. Aging infrastructure relates to reliability and the replacement of overhead lines, plant substations, underground cable replacement, and equipment failures. Load growth and other includes requests for new business and capacity additions on distribution lines and substation additions and expansions.

For the natural gas distribution business, basic business addresses daily operational needs including meters, pipe relocations due to public works projects, vehicles, and tools. Aging infrastructure projects seek to improve the reliability of the system through enhancements related to cast iron and bare steel replacement of main and services, corrosion mediation, and station upgrades. Load growth and other reflects growth in existing service territories including new developments, installation of services, and expansion.

For the water distribution business, basic business addresses daily operational needs including periodic meter replacement, water main relocation, facility maintenance, and tools. Aging infrastructure relates to reliability and the replacement of water mains, regulators, storage tanks, pumping stations, wellfields, reservoirs, and treatment facilities. Load growth and other reflects growth in our service territory, including improvements of acquisitions, installation of new services, and interconnections of systems.

*Projected Capital Expenditures:* A summary of the projected capital expenditures for the regulated companies' electric transmission and for the total electric distribution, natural gas distribution and water distribution for 2024 through 2028, including information technology and facilities upgrades and enhancements on behalf of the regulated companies, is as follows:

| (Millions of Dollars)                              | Years        |              |              |              |              |                   |
|--|--------------|--------------|--------------|--------------|--------------|-------------------|
|  | 2024         | 2025         | 2026         | 2027         | 2028         | 2024 - 2028 Total |
| CL&P Transmission                                  | \$ 393       | \$ 332       | \$ 255       | \$ 279       | \$ 194       | \$ 1,453          |

| Total  | \$ 4,647     | \$ 4,601     | \$ 4,687     | \$ 4,697     | \$ 4,485     | \$ 23,117         |

The projections do not include investments related to offshore wind projects. Actual capital expenditures could vary from the projected amounts for the companies and years above.

*Offshore Wind Business:* Eversource's offshore wind business includes 50 percent ownership interests in wind partnerships, which collectively hold the Revolution Wind, South Fork Wind and Sunrise Wind projects, and a tax equity investment in South Fork Wind. The offshore wind projects are being developed and constructed through joint and equal partnerships with Ørsted.

As of December 31, 2023 and 2022, Eversource's total equity investment balance in its offshore wind business was \$515.5 million and \$1.95 billion, respectively.

*Expected Sales of Offshore Wind Investments:* On May 25, 2023, Eversource announced that it had completed a strategic review of its offshore wind investments and determined that it would pursue the sale of its offshore wind investments. On September 7, 2023, Eversource completed the sale of its 50 percent interest in an uncommitted lease area consisting of approximately 175,000 developable acres located 25 miles off the south coast of Massachusetts to Ørsted for \$625 million in an all-cash transaction.

In September of 2023, Eversource made a contribution of \$528 million using the proceeds from the lease area sale to invest in a tax equity interest for South Fork Wind. South Fork Wind was restructured as a tax equity investment, with Eversource purchasing 100 percent ownership of a new Class A tax equity membership interest. As a result of this investment, Eversource expects to receive investment tax credits after the turbines are placed in service for South Fork Wind and meet the requirements to qualify for the ITC. These credits will be utilized to reduce Eversource's federal tax liability or generate tax refunds over the next 24 months. All of South Fork Wind's twelve turbines are expected to be installed and placed into service by the end of March 2024.

On January 24, 2024, Ørsted signed an agreement with Eversource to acquire Eversource's 50 percent share of Sunrise Wind. The sale is subject to the successful selection of Sunrise Wind in the ongoing New York fourth solicitation for offshore wind capacity, signing of an OREC contract with NYSERDA, finalization of sale agreements, receipt of final federal construction permits, and relevant regulatory approvals. If Sunrise Wind is not successful in the solicitation, then the existing OREC contract for Sunrise Wind will be cancelled according to the state's requirements, and Eversource and Ørsted's joint venture for Sunrise Wind will remain in place. In that scenario, Ørsted and Eversource would then assess their options in determining the best path forward for Sunrise Wind and its assets, which include the BOEM offshore lease area. If Sunrise Wind's revised bid is successful in the new solicitation, Sunrise Wind would have 90 days to negotiate a new OREC agreement at the re-bid price. In a successful re-bid, Ørsted would become the sole owner of Sunrise Wind, while Eversource would remain contracted to lead the project's onshore construction. If Sunrise Wind is successful in the re-bid, Ørsted would pay Eversource 50 percent of the negotiated purchase price upon closing the sale transaction, with the remaining 50 percent paid when onshore construction is completed and certain other milestones are achieved. On January 25, 2024, Eversource and Ørsted submitted a new proposal for Sunrise Wind in the New York fourth offshore wind solicitation.

On February 13, 2024, Eversource announced that it has executed an agreement to sell its existing 50 percent interests in the South Fork Wind and Revolution Wind projects to Global Infrastructure Partners (GIP). As part of this transaction, Eversource expects to receive approximately \$1.1 billion of cash proceeds upon closing, which includes the sales value related to the 10 percent energy community ITC adder of approximately \$170 million related to Revolution Wind, and to exit these projects while retaining certain cost sharing obligations for the construction of Revolution Wind. The purchase price is subject to future post-closing adjustment payments based on, among other things, the progress, timing and expense of construction at each project. The cost sharing obligations provide that Eversource would share equally with GIP in GIP's funding obligations for up to approximately \$240 million of incremental capital expenditure overruns incurred during the construction phase for the Revolution Wind project, after which GIP's obligations for any additional capital expenditure overruns would be shared equally by Eversource and Ørsted. Additionally, Eversource's financial exposure will be adjusted by certain purchase price adjustments to be made following commercial operation of the Revolution Wind project and closing of South Fork as a result of final project economics, which includes Eversource's obligation to maintain GIP's internal rate of return for each project as specified in the agreement. Eversource currently expects that South Fork Wind will reach full commercial operation prior to closing of the sale with GIP and Eversource does not expect any material cost sharing or other purchase price adjustment payments for South Fork Wind.

Factors that could result in Eversource's total net proceeds from the transaction to be lower or higher include Revolution Wind's eligibility for federal investment tax credits at other than the anticipated 40 percent level; the ultimate cost of construction and extent of cost overruns for Revolution Wind; delays in constructing Revolution Wind, which would impact the economics associated with the purchase price adjustment; and a benefit due to Eversource if there are lower operation costs or higher availability of the projects through the period that is four years following the commercial operation date of the Revolution Wind project.

Closing a transaction with GIP would be subject to customary conditions, including certain regulatory approvals under the Hart Scott Rodino Act and by the New York Public Service Commission and the FERC, as well as other conditions, among which is the completion and execution of the partnership agreements between GIP and Ørsted that will govern GIP's new ownership interest in those projects following Eversource's divestiture. Closing of the transaction is currently expected to occur in mid-2024. If closing of the sale is delayed, additional capital contributions made by Eversource would be recovered in the sales price. Under the agreement, Eversource's existing credit support obligations are expected to roll off for each project around the time that each project completes its expected capital spend.

*Impairment:* Equity method investments are assessed for impairment when conditions exist as of the balance sheet date that indicate that the fair value of the investment may be less than book value. Eversource continually monitors and evaluates its equity method investments to determine if there are indicators of an other-than-temporary impairment. If the decline in value is considered to be other-than-temporary, the investment is written down to its estimated fair value, which establishes a new cost basis in the investment. Subsequent declines or recoveries after the reporting date are not considered in the impairment recognized. Investments that are other-than-temporarily impaired and written down to their estimated fair value cannot subsequently be written back up for increases in estimated fair value. Impairment evaluations involve a significant degree of judgment and estimation, including identifying circumstances that indicate an impairment may exist at the equity method investment level, selecting discount rates used to determine fair values, and developing an estimate of discounted future cash flows expected from investment operations or the sale of the investment.

In connection with the process to divest its offshore wind business, Eversource identified indicators for impairment in both the second and fourth quarters of 2023. In each impairment assessment, Eversource evaluated its investments and determined that the carrying value of the equity method offshore wind investments exceeded the fair value of the investments and that the decline in fair value was other-than-temporary. The completion of the strategic review in the second quarter of 2023 resulted in Eversource recording a pre-tax other-than-temporary impairment charge of \$401 million (\$331 million after-tax) to reflect the investment at estimated fair value based on the expected sales price at that time. This established a new cost basis in the investments. Negative developments in the fourth quarter of 2023, including a lower expected sales price, additional projected construction cost increases, and the October 2023 OREC pricing denial for Sunrise Wind, resulted in Eversource conducting an impairment evaluation and recognizing an additional pre-tax other-than-temporary impairment charge of \$1.77 billion (\$1.62 billion after-tax) and establishing a new cost basis in the investments as of December 31, 2023. The Eversource statement of income reflects a total pre-tax other-than-temporary impairment charge of \$2.17 billion (\$1.95 billion after-tax) in its offshore wind investments for the year ended 2023.

The impairment evaluations involved judgments in developing the estimates and timing of the future cash flows arising from the expected sales price of Eversource's 50 percent interest in the wind projects, including expected sales value from investment tax credit adder amounts, less estimated costs to sell, and uncertainties related to the Sunrise Wind re-bid process in New York's offshore wind solicitation. Additional assumptions in the fourth quarter assessment included revised projected construction costs and estimated project cost overruns, estimated termination costs, salvage values of Sunrise Wind assets, and the value of the tax equity ownership interest. The assumptions used in the discounted cash flow analyses are subject to inherent uncertainties and subjectivity. The use of different assumptions, estimates, or judgments with respect to the estimation of future cash flows could materially change the impairment charges. The impairment evaluations were based on best information available at the impairment assessment dates. New information from events or circumstances arising after the balance sheet date, such as the January 25, 2024 re-bid of Sunrise Wind in the New York solicitation, are not included in the December 31, 2023 impairment evaluation. All significant inputs into the impairment evaluations were Level 3 fair value measurements.

The expected cash flows arising from the anticipated sales are a significant input in the impairment evaluation. In the fourth quarter of 2023, project construction forecasts were updated, and these new forecasts reflected additional expenditures for construction and scheduling related pressures, including the availability and increased cost of installation vessels and supply chain cost increases related to foundation fabrication. In determining the current fair value of the investments, these updated projections exceeded the previously estimated projections for construction expenditures, which resulted in a revised sales price that was significantly lower than the previous bid value. Another significant assumption in the impairment evaluation includes the probability of payment of future cost overruns on the three wind projects through each project's respective commercial operation date, which would not be recovered in the expected sales price. This assumption was based on construction projections updated in the fourth quarter of 2023 exceeding prior estimates. An increase in expected cost overruns could result in a significant impairment in a future period.

Another key assumption in the impairment model of our offshore wind investments was investment tax credit ("ITC") adders that were included in the Inflation Reduction Act and were a separate part of the sales price value offered by GIP. An ITC adder is an additional 10 percent of credit value for ITC eligible costs and include two distinct qualifications related to either using domestic sourced materials (domestic content) or construction of an onshore substation in a designated community (energy community). Similar to the base ITC of 30 percent of the eligible costs, any ITC adders generated would be used to reduce an owner's federal tax liability and could be used to receive tax refunds from prior years as well. Management believes there is a high likelihood that the 10 percent energy community ITC adder is realizable, and that ITC adder would amount to approximately \$170 million of additional sales value related to Revolution Wind and that it would qualify for the ITC adder after it reaches commercial operation in 2025. Although management believes the ITC adder value is realizable, there is some uncertainty at this time as to whether or not those ITC adders can be achieved, and management continues to evaluate the project's qualifications and to monitor guidance issued by the United States Treasury Department. A change in the expected value or qualification of ITC adders could result in a significant impairment in a future period.

Another fourth quarter 2023 development included in the impairment evaluation is the key judgment regarding the probability of future cash inflows and outflows associated with the sale or abandonment of the Sunrise Wind project and the expected outcome of the New York fourth offshore wind solicitation in 2024. In June 2023, Sunrise Wind filed a petition with the New York State Public Service Commission for an order authorizing NYSERDA to amend the Sunrise Wind OREC contract to increase the contract price to cover increased costs and inflation. At that time, management expected the contract repricing would be successful given NYSERDA's public support for pricing adjustments. On October 12, 2023, the New York State Public Service Commission denied this petition. Subsequent to the denial, on November 30, 2023, the general terms of an expedited offshore wind renewable energy solicitation in New York were released. A primary condition for Sunrise Wind to participate in this new solicitation was to agree to terminate its existing OREC agreement. As of December 31, 2023, Eversource and Ørsted were considering whether to submit a new bid for Sunrise Wind, the price at which a new bid would be made, and the probability of success in the new bidding process. The December 31, 2023 impairment evaluation included management's judgment of the likelihood of possible future scenarios that included the Sunrise Wind project continuing with its existing OREC contract, the project re-bidding and being selected in the new solicitation, the project re-bidding and not being selected, or the project not moving forward. The unfavorable development of the October 2023 denial of the OREC pricing petition, management's assessment of the likelihood of success in the competitive New York re-bidding process, and the increased costs to build the project, have resulted in management's assumption that the Sunrise Wind project will ultimately be abandoned, and therefore, no sales value was modeled in the impairment evaluation. Additionally, in the abandonment assumption, management has assumed the loss of contingent sales value associated with any related ITC adders and has estimated future cash outflows for Eversource's share of cancellation costs required under Sunrise Wind's supplier contracts, partially offset by expected salvage value and expected cost overruns not incurred in the case of abandonment that are included in the fourth quarter 2023 impairment charge. An increase in expected cancellation costs could result in a significant impairment in a future period.

A summary of the significant estimates and assumptions included in the 2023 impairment charges is as follows:

| <i>(Millions of Dollars)</i>  | Second Quarter<br>2023 | Fourth Quarter<br>2023 | Total    |
|---|------------------------|------------------------|----------|
| Lower expected sales proceeds across all three wind projects  | \$ 401                 | \$ 525                 | \$ 926   |
| Expected cost overruns not recovered in the sales price   | —                      | 441                    | 441      |
| Loss of sales value from the sale price offered by GIP, including loss of ITC adders value, cancellation costs and other impacts assuming Sunrise Wind project is abandoned | —                      | 800                    | 800      |
| Impairment Charges, pre-tax   | 401                    | 1,766                  | 2,167    |
| Tax Benefit   | (70)                   | (144)                  | (214)    |
| Impairment Charges, after-tax   | \$ 331                 | \$ 1,622               | \$ 1,953 |

A summary of the carrying value by investee and by project as of December 31, 2023 is as follows:

| <i>(Millions of Dollars)</i>                                     | Investments Expected to be Disposed of |                 |                                   | Investment to be Held                    |          | Total Offshore<br>Wind Investments |
|--|--|-----------------|-----------------------------------|--|----------|------------------------------------|
|  | North East Offshore                    |                 | South Fork Class B<br>Member, LLC | South Fork Wind<br>Holdings, LLC Class A |          |                                    |
|  | Sunrise Wind                           | Revolution Wind |                                   |  |          |                                    |
| Carrying Value as of December 31, 2023, before Impairment Charge | \$ 699                                 | \$ 799          | \$ 299                            | \$ 485                                   | \$ 2,282 |                                    |
| Fourth Quarter 2023 Impairment Charge                            | (1,218)                                | (544)           | —                                 | (4)                                      | (1,766)  |                                    |
| Carrying Value as of December 31, 2023                           | \$ (519)                               | \$ 255          | \$ 299                            | \$ 481                                   | \$ 516   |                                    |

Management will continue to monitor and evaluate all facts and circumstances in the offshore wind sales process and the impact on its investment balance. Adverse changes in facts and circumstances of estimates and timing of future cash flows and the factors described above could result in the recognition of additional, significant impairment charges that could be material to the financial statements.

The impairment charge was a non-cash charge and did not impact Eversource’s cash position. Eversource will continue to make future cash expenditures for required cash contributions to its offshore wind investments up to the time of disposition of each of the offshore wind projects. Capital contributions are expected until the sales are completed and changes in the timing and amounts of these contributions would be adjusted in the sales prices and therefore not result in an additional impairment charge. Proceeds from the transactions will be used to pay off parent company debt. Eversource’s offshore wind investments do not meet the criteria to qualify for presentation as a discontinued operation.

Contracts, Permitting and Construction of Offshore Wind Projects: The following table provides a summary of the Eversource and Ørsted major projects with announced contracts:

| Wind Project    | State Servicing | Size (MW) | Term (Years) | Price per MWh     | Pricing Terms                              | Contract Status |
|-----------------|-----------------|-----------|--------------|-------------------|--|-----------------|
| Revolution Wind | Rhode Island    | 400       | 20           | \$98.43           | Fixed price contract; no price escalation  | Approved        |
| Revolution Wind | Connecticut     | 304       | 20           | \$98.43 - \$99.50 | Fixed price contracts; no price escalation | Approved        |
| South Fork Wind | New York (LIPA) | 90        | 20           | \$160.33          | 2 percent average price escalation         | Approved        |
| South Fork Wind | New York (LIPA) | 40        | 20           | \$86.25           | 2 percent average price escalation         | Approved        |

The offshore wind projects require receipt of federal, state and local approvals necessary to construct and operate the projects. The federal permitting process is led by BOEM, and state approvals are required from New York, Rhode Island and Massachusetts. South Fork Wind and Revolution Wind have received all required approvals to start construction. Significant delays in the siting and permitting process resulting from the timeline for obtaining approval from BOEM and the state and local agencies could adversely impact the timing of Sunrise Wind’s in-service date.

Federal Siting and Permitting Process: The federal siting and permitting process for each of our offshore wind projects commence with the filing of a Construction and Operations Plan (COP) application with BOEM. BOEM provides a review schedule for the project’s COP approval and conducts environmental and technical reviews of the COP. BOEM issues an Environmental Impact Statement (EIS) that assesses the environmental, social, and economic impacts of constructing the project and recommends measures to minimize impacts. The Final EIS will inform BOEM in deciding whether to approve the project or to approve with modifications and BOEM will then issue its Record of Decision. BOEM issues its final approval of the COP following the Record of Decision.

Revolution Wind and Sunrise Wind filed their COP applications with BOEM in March 2020 and September 2020, respectively. For the Revolution Wind project, BOEM released its Draft EIS on September 2, 2022 and its Final EIS on July 17, 2023. On August 21, 2023, BOEM issued its Record of Decision, which concluded BOEM’s environmental review of the project and identified the recommended configuration. Final approval of the Revolution Wind project was received on November 20, 2023. For the Sunrise Wind project, BOEM released its Draft EIS on December 16, 2022 and its Final EIS on December 15, 2023. The Record of Decision is expected in the first quarter of 2024 and final approval of Sunrise Wind is expected in the second quarter of 2024.

South Fork Wind, Revolution Wind and Sunrise Wind are each designated as a “Covered Project” pursuant to Title 41 of the Fixing America’s Surface Transportation Act (FAST41) and a Major Infrastructure Project under Section 3(e) of Executive Order 13807, which provides greater federal attention on meeting the projects’ permitting timelines.

State and Local Siting and Permitting Process: State permitting applications in Rhode Island for Revolution Wind and in New York for Sunrise Wind were filed in December 2020. On July 8, 2022, the Rhode Island Energy Facilities Siting Board issued a Final Decision and Order approving the Revolution Wind project and granting a license to construct and operate.

On November 17, 2022, the New York Public Service Commission approved an order adopting a Joint Proposal filed by Sunrise Wind and granting a Certificate of Environmental Compatibility and Public Need. On November 18, 2022, Sunrise Wind filed its Phase 1 Environmental Management and Construction Plan (EM&CP) with the New York Public Service Commission, which details the plans on limited onshore construction activities subject to state and local jurisdiction. On March 27, 2023, Sunrise Wind filed its EM&CP for Phase 2, which covers the remainder of the project components. On June 22, 2023, Sunrise Wind received approval of the Phase 1 EM&CP. On July 13, 2023, the New York State Public Service Commission approved Sunrise Wind’s notice for authorization to proceed with construction for Phase 1. On December 18, 2023, Sunrise Wind received approval of the Phase 2 EM&CP.

On November 9, 2022, the Towns of Brookhaven and Suffolk County executed the easements and other real estate rights necessary to construct the Sunrise Wind project. On November 28, 2022, the Town of North Kingstown and the Quonset Development Corporation approved Revolution Wind’s real estate PILOT terms and the personal property PILOT agreement necessary to construct the Revolution Wind project.

Construction Process: South Fork Wind received all required approvals to start construction and the project entered the construction phase in early 2022. All major onshore construction activities, including the project’s underground onshore transmission line and the onshore interconnection facility located in East Hampton, New York are complete. Offshore construction activities began in the fourth quarter of 2022, and installation of the subsea transmission cable, the monopile foundations and offshore substation was completed in 2023. Installation of the project’s 11-megawatt wind turbines continued throughout 2023 and four of South Fork Wind’s twelve turbines were placed into service by January 1, 2024, meeting the project commercial operation date requirements under the power purchase agreement with LIPA. All wind turbines are expected to be installed

and placed into service by the end of March 2024. South Fork Wind faces several challenges and appeals of New York State and federal agency approvals, however we believe it is probable we will be able to overcome these challenges.

For Revolution Wind, on October 31, 2023, the joint venture made its final investment decision to advance to full onshore and offshore construction and installation, and major construction began in the fourth quarter of 2023 upon receipt of all necessary federal, state and local approvals. For Sunrise Wind, once all necessary federal, state and local approvals are received and the joint venture has made its final investment decision, informed in part by the outcome of the New York fourth solicitation, then major construction is expected to begin. Sunrise Wind has started limited onshore construction activities.

Projected In-Service Dates: We expect the South Fork Wind project to be in-service by the end of March 2024 and the Revolution Wind project to be in-service in late 2025. For Sunrise Wind, based on the updated BOEM permit schedule outlining when BOEM will complete its review of the COP, we currently expect an in-service date in 2026.

#### FERC Regulatory Matters

*FERC ROE Complaints:* Four separate complaints were filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively, the Complainants). In each of the first three complaints, filed on October 1, 2011, December 27, 2012, and July 31, 2014, respectively, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15-month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE billed of 10.57 percent and the maximum ROE for transmission incentive (incentive cap) of 11.74 percent, asserting that these ROEs were unjust and unreasonable.

The ROE originally billed during the period October 1, 2011 (beginning of the first complaint period) through October 15, 2014 consisted of a base ROE of 11.14 percent and incentives up to 13.1 percent. On October 16, 2014, FERC issued Opinion No. 531-A and set the base ROE at 10.57 percent and the incentive cap at 11.74 percent for the first complaint period. This was also effective for all prospective billings to customers beginning October 16, 2014. This FERC order was vacated on April 14, 2017 by the U.S. Court of Appeals for the D.C. Circuit (the Court).

All amounts associated with the first complaint period have been refunded. Eversource has recorded a reserve of \$39.1 million (pre-tax and excluding interest) for the second complaint period as of both December 31, 2023 and 2022. This reserve represents the difference between the billed rates during the second complaint period and a 10.57 percent base ROE and 11.74 percent incentive cap. The reserve consisted of \$21.4 million for CL&P, \$14.6 million for NSTAR Electric and \$3.1 million for PSNH as of both December 31, 2023 and 2022.

On October 16, 2018, FERC issued an order on all four complaints describing how it intends to address the issues that were remanded by the Court. FERC proposed a new framework to determine (1) whether an existing ROE is unjust and unreasonable and, if so, (2) how to calculate a replacement ROE. Initial briefs were filed by the NETOs, Complainants and FERC Trial Staff on January 11, 2019 and reply briefs were filed on March 8, 2019. The NETOs' brief was supportive of the overall ROE methodology determined in the October 16, 2018 order provided the FERC does not change the proposed methodology or alter its implementation in a manner that has a material impact on the results.

The FERC order included illustrative calculations for the first complaint using FERC's proposed frameworks with financial data from that complaint. Those illustrative calculations indicated that for the first complaint period, for the NETOs, which FERC concludes are of average financial risk, the preliminary just and reasonable base ROE is 10.41 percent and the preliminary incentive cap on total ROE is 13.08 percent. If the results of the illustrative calculations were included in a final FERC order for each of the complaint periods, then a 10.41 percent base ROE and a 13.08 percent incentive cap would not have a significant impact on our financial statements for all of the complaint periods. These preliminary calculations are not binding and do not represent what we believe to be the most likely outcome of a final FERC order.

On November 21, 2019, FERC issued Opinion No. 569 affecting the two pending transmission ROE complaints against the Midcontinent ISO (MISO) transmission owners, in which FERC adopted a new methodology for determining base ROEs. Various parties sought rehearing. On December 23, 2019, the NETOs filed supplementary materials in the NETOs' four pending cases to respond to this new methodology because of the uncertainty of the applicability to the NETOs' cases. On May 21, 2020, the FERC issued its order in Opinion No. 569-A on the rehearing of the MISO transmission owners' cases, in which FERC again changed its methodology for determining the MISO transmission owners' base ROEs. On November 19, 2020, the FERC issued Opinion No. 569-B denying rehearing of Opinion No. 569-A and reaffirmed the methodology previously adopted in Opinion No. 569-A. The new methodology differs significantly from the methodology proposed by FERC in its October 16, 2018 order to determine the NETOs' base ROEs in its four pending cases. FERC Opinion Nos. 569-A and 569-B were appealed to the Court. On August 9, 2022, the Court issued its decision vacating MISO ROE FERC Opinion Nos. 569, 569-A and 569-B and remanded to FERC to reopen the proceedings. The Court found that FERC's development of the new return methodology was arbitrary and capricious due to FERC's failure to offer a reasonable explanation for its decision to reintroduce the risk-premium financial model in its new methodology for calculating a just and reasonable return. At this time, Eversource cannot predict how and when FERC will address the Court's findings on the remand of the MISO FERC opinions or any potential associated impact on the NETOs' four pending ROE complaint cases.

Given the significant uncertainty regarding the applicability of the FERC opinions in the MISO transmission owners' two complaint cases to the NETOs' pending four complaint cases, Eversource concluded that there is no reasonable basis for a change to the reserve or recognized ROEs for any of the complaint periods at this time. As well, Eversource cannot reasonably estimate a range of loss for any of the four complaint proceedings at this time. Eversource, CL&P, NSTAR Electric and PSNH currently record revenues at the 10.57 percent base ROE and incentive cap at 11.74 percent established in the October 16, 2014 FERC order.

A change of 10 basis points to the base ROE used to establish the reserves would impact Eversource's after-tax earnings by an average of approximately \$3 million for each of the four 15-month complaint periods. Prospectively from the date of a final FERC order implementing a new base ROE, based off of estimated 2023 rate base, a change of 10 basis points to the base ROE would impact Eversource's future annual after-tax earnings by approximately \$5.5 million per year, and will increase slightly over time as we continue to invest in our transmission infrastructure.

*FERC Notice of Proposed Rulemaking on Transmission Incentives:* On March 20, 2020, FERC issued a Notice of Proposed Rulemaking (NOPR) on transmission incentives. The NOPR intends to revise FERC's electric transmission incentive policies to reflect competing uses of transmission due to generation resource mix, technological innovation and shifts in load patterns. FERC proposes to grant transmission incentives based on measurable project economics and reliability benefits to consumers rather than its current project risks and challenges framework. On July 1, 2020, Eversource filed comments generally supporting the NOPR.

On April 15, 2021, FERC issued a Supplemental NOPR that proposes to eliminate the existing 50 basis point return on equity for utilities that have been participating in a regional transmission organization (RTO ROE incentive) for more than three years. On June 25, 2021, the NETOs jointly filed comments strongly opposing FERC's proposal. On July 26, 2021, the NETOs filed Supplemental NOPR reply comments responding to various parties advocating for the elimination of the RTO Adder. If FERC issues a final order eliminating the RTO ROE incentive as proposed in the Supplemental NOPR, the estimated annual impact (using 2023 estimated rate base) on Eversource's after-tax earnings is approximately \$19.5 million. The Supplemental NOPR contemplates an effective date 30 days from the final order.

At this time, Eversource cannot predict the ultimate outcome of these proceedings, including possible appellate review, and the resulting impact on its transmission incentives.

#### Regulatory Developments and Rate Matters

*Electric, Natural Gas and Water Utility Retail Tariff Rates:* Each Eversource utility subsidiary is subject to the regulatory jurisdiction of the state in which it operates: CL&P, Yankee Gas and Aquarion operate in Connecticut and are subject to PURA regulation; NSTAR Electric, NSTAR Gas, EGMA and Aquarion operate in Massachusetts and are subject to DPU regulation; and PSNH and Aquarion operate in New Hampshire and are subject to NHPUC regulation. The regulated companies' distribution rates are set by their respective state regulatory commissions, and their tariffs include mechanisms for periodically adjusting their rates for the recovery of specific incurred costs.

Base Distribution Rates: In Connecticut, electric, natural gas and water utilities serving more than seventy-five thousand customers are required to file a distribution rate case within four years of the last rate case. PURA can elect to convene a general rate hearing at an interval of less than four years unless prohibited from doing so by an agency decision or other law. CL&P's and Yankee Gas' base distribution rates were each established in 2018 PURA-approved rate case settlement agreements. On October 27, 2021, PURA approved a settlement agreement for CL&P that included a current base distribution rate freeze until no earlier than January 1, 2024. The approval of the settlement agreement satisfied the Connecticut statute of rate review requirements that requires electric utilities to file a distribution rate case within four years of the last rate case.

On March 15, 2023, PURA issued a final decision that rejected Aquarion Water Company of Connecticut's (AWC-CT) application with PURA to amend its existing rate schedules. AWC-CT filed an appeal on the decision and on May 25, 2023, the State of Connecticut Superior Court granted a permanent stay of certain orders affecting base rates, which will keep existing rates in place until the appeal is completed. For further information, see "Regulatory Developments and Rate Matters - Connecticut," below.

In Massachusetts, electric distribution companies are required to file distribution rate schedules every five years, and natural gas local distribution companies to file distribution rate schedules every 10 years, and those companies are limited to one settlement agreement in any 10-year period. NSTAR Electric's base distribution rates were established in a November 2022 DPU-approved rate case. NSTAR Gas' base distribution rates were established in an October 2020 DPU-approved rate case. EGMA's base distribution rates were established in an October 2020 DPU-approved rate settlement agreement. Aquarion is not required to initiate a rate review with the DPU. Aquarion's base distribution rates were established in a 2018 DPU-approved rate case.

In New Hampshire, PSNH's base distribution rates were established in a December 2020 NHPUC-approved rate case settlement agreement. Aquarion's base distribution rates were established in a July 2022 NHPUC-approved rate case settlement agreement, with a single step adjustment approved on January 19, 2023. Rates were effective March 1, 2023.

Rate Reconciling Mechanisms: The Eversource electric distribution companies obtain and resell power to retail customers who choose not to buy energy from a competitive energy supplier. CL&P, NSTAR Electric and PSNH enter into full requirements energy supply procurement contracts for its customers that choose to purchase power from the electric distribution company (standard offer, basic service or default energy service, respectively). The natural gas distribution companies procure natural gas for firm and seasonal customers. These energy supply and natural gas supply procurement costs are recovered from customers in supply rates that are approved by the respective state regulatory commission. The rates are reset periodically (every six months for electric residential customers) and are fully reconciled to their costs. New energy supply rates for residential customers are established effective July 1st at CL&P and NSTAR Electric and effective August 1st at PSNH. Each electric and natural gas distribution company fully recovers its energy supply costs through approved regulatory rate mechanisms on a timely basis and, therefore, such costs have no impact on earnings. Increases or decreases in energy supply retail rates result in corresponding fluctuations in both energy supply procurement revenues and purchased power or purchased natural gas expenses on the statements of income.

The electric and natural gas distribution companies also recover certain other costs in retail rates on a fully reconciling basis through regulatory commission-approved cost tracking mechanisms and, therefore, recovery of these costs has no impact on earnings. Costs recovered through cost tracking mechanisms include, among others, electric retail transmission charges, energy efficiency program costs, electric restructuring and stranded cost recovery revenues (including securitized RRB charges), certain capital tracking mechanisms for infrastructure improvements, and additionally for the Massachusetts utilities, pension and PBOP benefits, net metering for distributed generation, and solar-related programs. The reconciliation filings compare the total actual costs allowed to revenue requirements related to these services and the difference between the costs incurred (or the rate recovery allowed) and the actual costs allowed is deferred and included, to be either recovered or refunded, in future customer rates. These cost tracking mechanisms also include certain incentives earned, return on capital tracking mechanisms, and carrying charges that are billed in rates to customers, which do impact earnings.

*Connecticut:*

CL&P Performance Based Rate Making: On May 26, 2021, in accordance with an October 2020 Connecticut law, PURA opened a proceeding to begin to evaluate and eventually implement performance based regulation (PBR) for electric distribution companies. PURA is conducting the proceeding in two phases. On January 25, 2023, PURA staff issued a proposal outlining a suggested portfolio of PBR elements for further exploration and potential implementation in the second phase of the proceeding. On April 26, 2023, PURA issued a final decision on the first phase and identified various objectives to guide PBR development and evaluate adoption of a PBR framework. The decision commenced Phase 2 by initiating three reopener dockets focused on revenue adjustment mechanisms, performance metrics and integrated distribution system planning with final decisions expected in 2025.

On November 16, 2023, PURA issued a straw proposal in the first reopener that focused on revenue adjustment mechanisms. The proposal outlines potential additions and reforms to the current revenue adjustment mechanisms, such as multi-year rate plans, earnings sharing mechanisms and the revenue decoupling mechanism, which would apply at the time of CL&P's next distribution rate case. The straw proposal is not authoritative and technical sessions are continuing prior to a final decision. PURA is expected to issue a straw proposal in the second reopener focusing on performance incentive mechanisms (PIMs) in the first quarter of 2024. The three reopener dockets continue to progress through the Phase 2 process. We continue to monitor developments in this proceeding, and at this time, we cannot predict the ultimate outcome of this proceeding and the resulting impact to CL&P.

CL&P Storm Filing: On December 22, 2023, CL&P initiated a docket seeking a prudency review of approximately \$634 million of catastrophic storm costs for twenty-four weather events from January 1, 2018 to December 31, 2021. In the filing, CL&P requested PURA establish a rate to collect \$50 million annually from customers from the date of the final decision in this proceeding. This rate would be effective until the next distribution rate case and would replenish the under-collected storm reserve and reduce future carrying charges for customers.

CL&P Advanced Metering Infrastructure Filing: On July 31, 2020, CL&P submitted to PURA its proposed \$512 million Advanced Metering Infrastructure investment and implementation plan. On August 17, 2021, PURA issued a Notice of Request for an Amended EDC Advanced Metering Infrastructure Proposal. On November 8, 2021, CL&P submitted an Amended Proposal in response to this request with an updated schedule for the years 2022 through 2028, which included additional information as required by PURA. As required, the plan includes a full deployment of advanced metering functionality and a composite business case in support of the Advanced Metering Infrastructure plan. On January 3, 2024, PURA issued a final decision regarding CL&P's Advanced Metering Infrastructure investment and implementation plan, which CL&P most recently estimated at \$766.4 million for capital costs and one-time operating expenses. In CL&P's view, the final decision does not provide a reasonable path for cost recovery and delays implementation by a year. In addition, the final decision modifies the prudence standard for recovery of costs expended on the project, improperly linking recovery to outcomes not known at the outset of the project. On January 18, 2024, CL&P submitted a motion for reconsideration to PURA asking that the agency modify these aspects of the decision.

Termination of Park City Wind's Power Purchase Agreement with CL&P: On October 2, 2023, Park City Wind LLC and CL&P signed an agreement to terminate the Park City Wind offshore wind generation PPA, at the request of Park City Wind LLC. The termination agreement was effective on October 13, 2023, the date of PURA approval. In October 2023, Park City Wind LLC paid a termination payment of \$12.9 million to CL&P resulting from the termination of the PPA, which CL&P will return to customers.

Aquarion Water Company of Connecticut Distribution Rate Case: On August 29, 2022, Aquarion Water Company of Connecticut (AWC-CT) filed an application with PURA to amend its existing rate schedules to address an operating revenue deficiency. AWC-CT's rate application requested approval of rate increases of \$27.5 million, an additional \$13.6 million, and an additional \$8.8 million, effective March 15, 2023, 2024, and 2025, respectively. On March 15, 2023, PURA issued a final decision that rejected this request. In this decision, PURA ordered a base distribution rate decrease of \$2.0 million effective March 15, 2023. The decision allows an authorized regulatory ROE of 8.70 percent. On March 30, 2023, AWC-CT filed an appeal on the decision and requested a stay of the decision with the State of Connecticut Superior Court. On April 5, 2023, the Court temporarily granted AWC-CT's request to stay and on May 25, 2023 granted a permanent stay of certain orders affecting base rates, which will keep existing rates in place until the appeal is completed. The stay included the condition that AWC-CT place any revenue received from customers above the rates and amounts authorized in the March 15, 2023 decision in a separate, interest bearing account until further order. A hearing on the merits of the appeal was held on January 11, 2024. A decision from the State of Connecticut Superior Court is pending.

*Massachusetts:*

NSTAR Electric Distribution Rates: On November 30, 2022, the DPU issued its decision in the NSTAR Electric distribution rate case and approved a base distribution rate increase of \$64 million effective January 1, 2023.

NSTAR Electric's PBR mechanism allows for an annual adjustment to base distribution rates for inflation, exogenous events and future capital additions based on a historical five-year average of total capital additions. NSTAR Electric submitted its first annual PBR Adjustment filing on September 15, 2023 and on December 26, 2023, the DPU approved a \$104.9 million increase to base distribution rates effective January 1, 2024. The base distribution rate increase was comprised of a \$50.6 million inflation-based adjustment and a \$54.3 million K-bar adjustment for capital additions based on the difference between the historical five-year average of total capital additions and the base capital revenue requirement.

NSTAR Electric's Electric Sector Modernization Plan (ESMP) Filing: Massachusetts state law requires the electric distribution companies to file a comprehensive distribution system plan by January 29, 2024, to proactively upgrade the distribution system (and, where applicable, the associated transmission system) to: (i) improve grid reliability, communications and resiliency; (ii) enable increased, timely adoption of renewable energy and distributed energy resources; (iii) promote energy storage and electrification technologies necessary to decarbonize the environment and economy; (iv) prepare for future climate-driven impacts on the transmission and distribution systems; (v) accommodate increased transportation electrification, increased building electrification and other potential future demands on distribution and, where applicable, the transmission system; and (vi) minimize or mitigate impacts on Massachusetts ratepayers, thereby helping the state realize its statewide greenhouse gas emissions limits and sublimits under the law. On January 29, 2024, NSTAR Electric filed its ESMP with the DPU. NSTAR Electric's plan meets these requirements by providing a comprehensive view of all the investments required to build a safer, more reliable, more resilient electric distribution system taking into account the needs of environmental justice communities. For the five-year period from 2025 through 2029, the proposed incremental capital investment is \$608 million and the incremental expense amount is \$211 million. The DPU must approve, approve with modification, or reject the ESMP filing within seven months after filing.

Termination of SouthCoast Wind's Power Purchase Agreements with NSTAR Electric: On August 28, 2023, SouthCoast Wind Energy LLC and NSTAR Electric signed agreements to terminate three SouthCoast Wind offshore wind generation PPAs, at the request of SouthCoast Wind Energy LLC. The termination agreements were effective on September 29, 2023, the date of DPU approval. In October 2023, SouthCoast Wind Energy, LLC paid a termination payment totaling \$32.5 million to NSTAR Electric resulting from the termination of the PPAs, which NSTAR Electric will return to customers.

Termination of Commonwealth Wind's Power Purchase Agreement with NSTAR Electric: On July 13, 2023, Commonwealth Wind, LLC and NSTAR Electric signed an agreement to terminate the Commonwealth Wind offshore wind generation PPA, at the request of Commonwealth Wind, LLC. The termination agreement was effective on August 23, 2023, the date of DPU approval. In October 2023, Commonwealth Wind, LLC paid a termination payment of \$25.9 million to NSTAR Electric, which NSTAR Electric will return to customers.

NSTAR Gas Distribution Rates: NSTAR Gas' PBR mechanism allows for an annual adjustment to base distribution rates for inflation and exogenous events. NSTAR Gas submitted its third annual PBR Adjustment filing on September 15, 2023 and on October 30, 2023, the DPU approved a \$25.4 million increase to base distribution rates, of which, \$15.5 million was associated with a base rate adjustment and the remainder for a prior period exogenous cost adjustment, for effect on November 1, 2023.

#### *New Hampshire:*

PSNH Pole Acquisition Approval: On November 18, 2022, the NHPUC issued a decision that approved a proposed purchase agreement between PSNH and Consolidated Communications, in which, PSNH would acquire both jointly-owned and solely-owned poles and pole assets. The NHPUC also authorized PSNH to recover certain expenses associated with the operation and maintenance of the transferred poles, pole inspections, and vegetation management expenses through a new cost recovery mechanism, the PPAM, subject to consummation of the purchase agreement. The purchase agreement was finalized on May 1, 2023 for a purchase price of \$23.3 million. Upon consummation of the purchase agreement, PSNH established a regulatory asset of \$16.9 million for operation and maintenance expenses and vegetation management expenses associated with the purchased poles incurred from February 10, 2021 through April 30, 2023 that PSNH is authorized to collect through the PPAM regulatory tracking mechanism. The establishment of the PPAM regulatory asset resulted in a pre-tax benefit recorded in Amortization expense on the PSNH statement of income in 2023.

PSNH Energy Efficiency Plan: On February 24, 2022, a state law was enacted that directed that the joint utility energy efficiency plan and programming framework in effect on January 1, 2021 be utilized going forward, including utility performance incentive payments, lost base revenue calculations, and Evaluation, Measurement, and Verification process. Additionally, the law established a process for future plan proposals, including the 2024 through 2026 triennial plan, and includes a mechanism for future rate increases based on the consumer price index.

On November 30, 2023, the NHPUC approved a three-year joint utility energy efficiency plan for 2024 through 2026, of which, \$158 million is the PSNH program budget over the next three years. Additionally, on December 22, 2023, the NHPUC approved the annual LBR rate for 2024, allowing PSNH to recover approximately \$14 million in revenue that would have been collected if not for the implementation of energy efficiency measures.

#### Legislative and Policy Matters

*Connecticut:* On June 29, 2023, Connecticut enacted Public Act No. 23-102 (Substitute Senate Bill No. 7) (the Act) that encompasses 40 sections. The Act prohibits recovery in retail rates of certain costs incurred by utilities, including costs for consultants and outside counsel for rate cases, membership dues, and lobbying. None of the rate-setting provisions will result in an immediate change to rates, as all will require some future process, primarily a general distribution rate proceeding before PURA.

The Act also makes prospective adjustments to the timing and procedures used in the retail rate setting process, including (1) requiring additional procedural steps to be satisfied for proposed settlements of cases; (2) increasing the deadline to issue a final decision on an application from a water company to amend base rates from 200 days to 270 days; (3) authorizing PURA to elect to evaluate if rates should be reduced on an interim basis if a utility earns an ROE that exceeds its authorized ROE by 50 basis points over a rolling 12-month period ending with the two most recent consecutive financial quarters (instead of the current standard of 100 basis points); and (4) authorizing PURA to elect to convene a general rate hearing at an interval of less than four years unless prohibited from doing so by an agency decision or other law. The Act is prospective, not retroactive and therefore, does not change obligations or rate provisions established by settlements implemented prior to the Act.

The Act also prohibits CL&P's electric system improvements (ESI) capital tracking mechanism from being reauthorized in the next general distribution proceeding. The ESI will therefore remain in place until base distribution rates are adjusted in CL&P's next general distribution rate proceeding. The Act also excludes storms and other emergencies affecting 70 percent or more of an electric distribution company's customers from the 2020 law requiring credits for residential customers who are without power for 96 or more consecutive hours.

Lastly, the Act was amended by Public Act No. 23-204 (House Bill No. 6941) to require the Governor to designate the chairperson of PURA from among the sitting commissioners by June 30, 2023 and every two years thereafter; and to delete the changes in Section 21 of the Act to the duties and powers of PURA commissioners. Designation of the chairperson does not constitute a renomination for a full commission term, as otherwise provided by law.

#### Critical Accounting Policies

The preparation of financial statements in conformity with GAAP requires management to make estimates, assumptions and, at times, difficult, subjective or complex judgments. Changes in these estimates, assumptions and judgments, in and of themselves, could materially impact our financial position, results of operations or cash flows. Our management discusses with the Audit Committee of our Board of Trustees significant matters relating to critical accounting policies. Our critical accounting policies are discussed below. See the combined notes to our financial statements for further information concerning the accounting policies, estimates and assumptions used in the preparation of our financial statements.

*Regulatory Accounting:* Our regulated companies are subject to rate regulation that is based on cost recovery and meets the criteria for application of accounting guidance for rate-regulated operations, which considers the effect of regulation on the timing of the recognition of certain revenues and expenses. The regulated companies' financial statements reflect the effects of the rate-making process. The rates charged to the customers of our regulated companies are designed to collect each company's costs to provide service, plus a return on investment.

We believe that the operations of each of our regulated companies currently satisfy the criteria for application of regulatory accounting. If events or circumstances should change in a future period so that those criteria are no longer satisfied, we would be required to eliminate any associated regulatory assets and liabilities and the impact would be recognized in the statement of income and may result in a material adverse effect on results of operations and financial condition.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. In some cases, we record regulatory assets before approval for recovery has been received from the applicable regulatory commission. We must use judgment to conclude that costs deferred as regulatory assets are probable of future recovery. We base our conclusion on certain factors, including, but not limited to, regulatory precedent.

Regulatory liabilities represent either revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers. We make judgments regarding the future outcome of regulatory proceedings that involve potential future refund to customers and record liabilities for these loss contingencies when probable and reasonably estimable based upon available information. Regulatory liabilities are recorded at the best estimate, or at a low end of the range of possible loss. The amount recorded may differ from when the uncertainty is resolved. Such differences could have a significant impact on our financial statements.

We continually assess whether the regulatory assets and liabilities continue to meet the criteria for probable future recovery or refund. This assessment includes consideration of recent orders issued by regulatory commissions, the passage of new legislation, historical regulatory treatment for similar costs in each of our jurisdictions, discussions with legal counsel, the status of any appeals of regulatory decisions, and changes in applicable regulatory and political environments. We believe that we will continue to be able to defer and recover prudently incurred costs, including additional storm costs, based on the legal and regulatory framework.

We use judgment when recording regulatory assets and liabilities; however, regulatory commissions can reach different conclusions about the recovery of costs, and those conclusions could have a material impact on our financial statements. The ultimate outcome of regulatory rate proceedings could have a significant effect on our ability to recover costs or earn an adequate return. Established rates are also often subject to subsequent prudency reviews by state regulators, whereby various portions of rates could be adjusted, subject to refund or disallowed. Storm restoration and pre-staging costs are subject to prudency reviews from our regulators. We have \$1.75 billion of deferred storm costs that either have yet to be filed with the applicable regulatory commission, are pending regulatory approval, or are subject to prudency review as of December 31, 2023. Tropical Storm Isaias resulted in deferred storm restoration costs of approximately \$232 million at CL&P as of December 31, 2023. While it is possible that some amount of the Tropical Storm Isaias costs may be disallowed by PURA, any such amount cannot be estimated at this time. We believe that our storm restoration costs were prudently incurred, meet the criteria for cost recovery and are probable of recovery.

We believe it is probable that each of our regulated companies will recover its respective investments in long-lived assets and the regulatory assets that have been recorded. If we determine that we can no longer apply the accounting guidance applicable to rate-regulated enterprises, or that we cannot conclude it is probable that costs will be recovered from customers in future rates, the applicable costs would be charged to net income in the period in which the determination is made.

*Pension, SERP and PBOP:* We sponsor Pension, SERP and PBOP Plans to provide retirement benefits to our employees. Plan assets and the benefit obligation are presented on a net basis and we recognize the overfunded or underfunded status of the plans as an asset or liability on the balance sheet. These amounts are remeasured annually using a December 31st measurement date. For each of these plans, several significant assumptions are used to determine the projected benefit obligation, funded status and net periodic benefit expense/income. These assumptions include the expected long-term rate of return on plan assets, discount rate, compensation/progression rate and mortality and retirement assumptions. We evaluate these assumptions annually and adjust them as necessary. Changes in these assumptions could have a material impact on our financial position, results of operations or cash flows.

Expected Long-Term Rate of Return on Plan Assets Assumption: In developing the expected long-term rate of return, we consider historical and expected returns, as well as input from our consultants. Our expected long-term rate of return on assets is based on assumptions regarding target asset allocations and corresponding expected rates of return for each asset class. We routinely review the actual asset allocations and periodically rebalance the investments to the targeted asset allocations. For the year ended December 31, 2023, our expected long-term rate-of-return assumption used to determine our pension and PBOP expense was 8.25 percent for the Eversource Service Pension and PBOP plans. For the forecasted 2024 pension and PBOP expense, an expected long-term rate of return of 8.25 percent for the Eversource Service Pension and PBOP plans will be used reflecting our target asset allocations.

Discount Rate Assumptions: Payment obligations related to the Pension, SERP and PBOP Plans are discounted at interest rates applicable to the expected timing of each plan's cash flows. The discount rate that was utilized in determining the pension, SERP and PBOP obligations was based on a yield-curve approach. This approach utilizes a population of bonds with an average rating of AA based on bond ratings by Moody's, S&P and Fitch, and uses bonds with above median yields within that population. As of December 31, 2023, the discount rates used to determine the funded status were within a range of 4.9 percent to 5.0 percent for the Pension and SERP Plans, and 5.0 percent to 5.2 percent for the PBOP Plans. As of December 31, 2022, the discount rates used were within a range of 5.1 percent to 5.2 percent for the Pension and SERP Plans, and 5.2 percent for the PBOP Plans. The decrease in the discount rates used to calculate the funded status resulted in an increase to the Pension and SERP Plans' projected benefit obligation of \$98.9 million and an increase to the PBOP Plans' projected benefit obligation of \$12.0 million as of December 31, 2023.

The Company uses the spot rate methodology for the service and interest cost components of Pension, SERP and PBOP expense because it provides a relatively precise measurement by matching projected cash flows to the corresponding spot rates on the yield curve. The discount rates used to estimate the 2023 expense were within a range of 4.9 percent to 5.3 percent for the Pension and SERP Plans, and within a range of 5.1 percent to 5.4 percent for the PBOP Plans.

Mortality Assumptions: Assumptions as to mortality of the participants in our Pension, SERP and PBOP Plans are a key estimate in measuring the expected payments a participant may receive over their lifetime and the corresponding plan liability we need to record. The mortality assumption is composed of a base table that represents the current expectation of life expectancy of the population adjusted by an improvement scale that attempts to anticipate future improvements in life expectancy. In 2023, our mortality assumption utilized the Society of Actuaries base mortality tables (Pri-2012), adjusted to reflect Eversource's own mortality experience, and projected generationally using the MP-2021 improvement scale.

Compensation/Progression Rate Assumptions: This assumption reflects the expected long-term salary growth rate, including consideration of the levels of increases built into collective bargaining agreements, and impacts the estimated benefits that Pension and SERP Plan participants will receive in the future. As of December 31, 2023 and 2022, the compensation/progression rates used to determine the funded status were within a range of 3.5 percent to 4.0 percent.

Health Care Cost Assumptions: The Eversource Service PBOP Plan is not subject to health care cost trends. As of December 31, 2023, for the Aquarion PBOP Plan, the health care trend rate used to determine the funded status for pre-65 retirees is 6.75 percent, with an ultimate rate of 5 percent in 2031, and for post-65 retirees, the health care trend rate and ultimate rate is 3.5 percent.

Actuarial Gains and Losses: Actuarial gains and losses represent the differences between actuarial assumptions and actual information or updated assumptions. Unamortized actuarial gains or losses arising at the December 31st measurement date are primarily from differences in actual investment performance compared to our expected return and changes in the discount rate assumption. The Eversource Service Pension and PBOP Plans use the corridor approach to determine the amount of gain or loss to amortize into net periodic benefit expense/income. The corridor approach defers all actuarial gains and losses arising at remeasurement and the net unrecognized actuarial gain or loss balance is amortized as a component of expense if, as of the beginning of the year, that net gain or loss exceeds 10 percent of the greater of the market value of the plan's assets or the projected benefit obligation. The amount of net unrecognized actuarial gain or loss in excess of the 10 percent corridor is amortized to expense over the estimated average future employee service period. For the Eversource Service Pension Plan, the net actuarial gain or loss is amortized as a component of expense over the estimated average future employee service period of seven years. For the Eversource Service PBOP Plan, the net unrecognized actuarial gain or loss was within the 10 percent corridor and therefore there was no amortization to expense during 2023.

A decrease in the discount rate used to determine our pension funded status would increase our projected benefit obligation at December 31st, resulting in a higher unamortized actuarial loss to be recognized in future years' pension expense, subject to exceeding the 10 percent corridor. A decrease in the discount rate at December 31st would also result in a decrease in the interest cost component and an increase in the service cost component of the subsequent year's benefit plan expense.

The calculated expected return on plan assets is compared to the actual return or loss on plan assets at the end of each year to determine the investment gains or losses to be immediately reflected in unamortized actuarial gains and losses. An underperformance of our pension plan investment returns relative to the expected returns would increase our pension liability at December 31st, resulting in a higher unamortized actuarial loss to be recognized in future years' pension expense, subject to exceeding the 10 percent corridor, and a lower expected return on assets component of pension expense in future years' pension expense.

**Net Periodic Benefit Expense/Income:** Pension, SERP and PBOP expense/income is determined by our actuaries and consists of service cost and prior service cost/credit, interest cost based on the discounting of the obligations, amortization of actuarial gains and losses, and the expected return on plan assets. For the Pension and SERP Plans, pre-tax net periodic benefit income was \$108.4 million and \$181.6 million for the years ended December 31, 2023 and 2022, respectively, and there was pre-tax net periodic benefit expense of \$23.6 million for the year ended December 31, 2021. For the PBOP Plans, pre-tax net periodic benefit income was \$57.3 million, \$79.8 million and \$60.5 million for the years ended December 31, 2023, 2022 and 2021, respectively.

The change in pension, SERP and PBOP expense/income arising from the annual remeasurement does not fully impact earnings. Our Massachusetts utilities recover qualified pension and PBOP expenses related to their distribution operations through a rate reconciling mechanism that fully tracks the change in net pension and PBOP expenses each year, therefore the change in their pension and PBOP expense does not impact earnings. Our electric transmission companies' rates provide for an annual true-up of estimated to actual costs, which include pension expenses, therefore the change in their pension expense does not impact earnings. Any differences between the fixed level of PBOP expense included in our formula rate and the PBOP expense calculated in accordance with authoritative accounting guidance is accumulated as a regulatory asset or liability, and is expected, over time, to be recovered from or returned to customers. Additionally, the portion of our pension and PBOP expense that relates to company labor devoted to capital projects is capitalized on the balance sheet instead of being charged to expense.

**Forecasted Expense/Income and Expected Contributions:** We estimate that net periodic benefit income in 2024 for the Pension and SERP Plans will be approximately \$90 million and for the PBOP Plans will be approximately \$65 million. The decrease in pension income from 2023 to 2024 is driven primarily by higher amortization of actuarial loss due to unrecognized actuarial loss arising in 2023, partially offset by the absence in 2024 of a 2023 SERP settlement charge and a decrease in the interest cost component due to a lower discount rate. The increase in PBOP income from 2023 to 2024 is driven primarily by favorable expected return on assets due to a higher asset balance and a decrease in the interest cost component due to a lower discount rate. For the PBOP Plans, there is no amortization of actuarial loss in 2024. Pension, SERP and PBOP expense/income for subsequent years will depend on future investment performance, changes in future discount rates and other assumptions, and various other factors related to the populations participating in the plans.

Our policy is to fund the Pension Plans annually in an amount at least equal to the amount that will satisfy all federal funding requirements. Based on the current status of the Pension Plans and federal pension funding requirements, there is no minimum funding requirement for our Eversource Service Pension Plan in 2024 and we do not expect to make pension contributions in 2024. It is our policy to fund the PBOP Plans annually through tax deductible contributions to external trusts. We do not expect to make any contributions to the Eversource Service PBOP Plan in 2024.

**Sensitivity Analysis:** The following table illustrates the hypothetical effect on reported annual net periodic benefit income as a result of a change in the following assumptions by 50 basis points:

| (Millions of Dollars)                   | Pension Plans (excluding SERP Plans) |         | PBOP Plans                       |        |
|---|--------------------------------------|---------|----------------------------------|--------|
|   | Decrease in Plan Income              |         | Decrease in Plan Income          |        |
|   | For the Years Ended December 31,     |         | For the Years Ended December 31, |        |
| Eversource                              | 2023                                 | 2022    | 2023                             | 2022   |
| Lower expected long-term rate of return | \$ 29.1                              | \$ 32.5 | \$ 0.2                           | \$ 5.6 |
| Lower discount rate                     | 24.7                                 | 32.6    | 4.7                              | 1.7    |
| Higher compensation rate                | 8.1                                  | 7.6     | N/A                              | N/A    |

**Goodwill:** We recorded goodwill on our balance sheet associated with previous mergers and acquisitions, all of which totaled \$4.53 billion as of December 31, 2023. We have identified our reporting units for purposes of allocating and testing goodwill as Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution. Electric Distribution and Electric Transmission reporting units include carrying values for the respective components of CL&P, NSTAR Electric and PSNH. The Natural Gas Distribution reporting unit includes the carrying values of NSTAR Gas, Yankee Gas and EGMA. The Water Distribution reporting unit includes the Aquarion water utility businesses. As of December 31, 2023, goodwill was allocated to the reporting units as follows: \$2.54 billion to Electric Distribution, \$577 million to Electric Transmission, \$451 million to Natural Gas Distribution and \$961 million to Water Distribution.

We are required to test goodwill balances for impairment at least annually by considering the fair values of the reporting units, which requires us to use estimates and judgments. Additionally, we monitor all relevant events and circumstances during the year to determine if an interim impairment test is required. We have selected October 1st of each year as the annual goodwill impairment test date. Goodwill impairment is deemed to exist if the carrying amount of a reporting unit exceeds its estimated fair value. If goodwill were deemed to be impaired, it would be written down in the current period to the extent of the impairment.

In assessing goodwill for impairment, an entity is permitted to first assess qualitatively whether it is more likely than not that goodwill impairment exists as of the annual impairment test date. A quantitative impairment test is required only if it is concluded that it is more likely than not that a reporting unit's fair value is less than its carrying amount.

We performed an impairment assessment of goodwill as of October 1, 2023 for the Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution reporting units. Our qualitative assessment included an evaluation of multiple factors that impact the fair value of the reporting units, including general, macroeconomic and market conditions, and entity-specific assumptions that affect the future cash flows of the reporting units. Key considerations include discount rates, utility sector market performance and merger transaction multiples, the Company's share price and credit ratings, analyst reports, financial performance, cost and risk factors, internal estimates and projections of future cash flows and net income, long-term strategy, the timing and outcome of rate cases, and recent regulatory and legislative proceedings.

The 2023 goodwill impairment assessment resulted in a conclusion that goodwill is not impaired. We believe that the fair value of the reporting units was substantially in excess of carrying value. Adverse regulatory actions, changes in the regulatory and political environment, or changes in significant assumptions could potentially result in future goodwill impairment indicators.

*Long-Lived Assets:* Impairment evaluations of long-lived assets, including property, plant and equipment and other assets, involve a significant degree of estimation and judgment, including identifying circumstances that indicate an impairment may exist. An impairment analysis is required when events or changes in circumstances indicate that the carrying value of a long-lived asset may not be recoverable. Indicators of potential impairment include a deteriorating business climate, unfavorable regulatory action, decline in value that is other than temporary in nature, plans to dispose of a long-lived asset significantly before the end of its useful life, and accumulation of costs that are in excess of amounts allowed for recovery. The review of long-lived assets for impairment utilizes significant assumptions about operating strategies and external developments, including assessment of current and projected market conditions that can impact future cash flows. If indicators are present for a long-lived asset or asset group, a comparison of the undiscounted expected future cash flows to the carrying value is performed. No impairments occurred during the year 2023.

*Equity Method Investments:* Investments in affiliates where we have the ability to exercise significant influence, but not control, over an investee are initially recognized as an equity method investment at cost. Any differences between the cost of an investment and the amount of underlying equity in net assets of an investee are considered basis differences and are determined based upon the estimated fair values of the investee's identifiable assets and liabilities.

Equity method investments are assessed for impairment when conditions exist as of the balance sheet date that indicate that the fair value of the investment may be less than book value. Eversource continually monitors and evaluates its equity method investments to determine if there are indicators of an other-than-temporary impairment. If the decline in value is considered to be other-than-temporary, the investment is written down to its estimated fair value, which establishes a new cost basis in the investment. Subsequent declines or recoveries after the reporting date are not considered in the impairment recognized. Investments that are other-than-temporarily impaired and written down to their estimated fair value cannot subsequently be written back up for increases in estimated fair value. Impairment evaluations involve a significant degree of judgment and estimation, including identifying circumstances that indicate an impairment may exist at the equity method investment level, selecting discount rates used to determine fair values, and developing an estimate of discounted future cash flows expected from investment operations or the sale of the investment.

In connection with the process to divest its offshore wind business, Eversource identified indicators for impairment in both the second and fourth quarters of 2023. In each impairment assessment, Eversource evaluated its investments and determined that the carrying value of the equity method offshore wind investments exceeded the fair value of the investments and that the decline was other-than-temporary. The impairment evaluations involved judgments in developing the estimate and timing of future cash flows, including key judgments in determining the most likely outcome of the projects, the likelihood of realization of investment tax credit adders, and the likelihood of future spending amounts and cost overruns, as well as potential cancellation costs and salvage values of Sunrise Wind assets. The assumptions used in the discounted cash flow analyses are subject to inherent uncertainties and subjectivity. The use of different assumptions, estimates, or judgments with respect to the estimation of future cash flows could materially change the impairment charges. The impairment evaluations were based on best information available at the impairment assessment date.

Management will continue to monitor and evaluate all facts and circumstances in the offshore wind sales process and the impact on its investment balance. Adverse changes in facts and circumstances of estimates and timing of future cash flows and the factors described above could result in the recognition of additional, significant impairment charges and could be material to the financial statements. See Note 6, "Investments in Unconsolidated Affiliates," to the financial statements for further information on the impairments to Eversource's offshore wind equity method investments carrying value.

*Income Taxes:* Income tax expense is estimated for each of the jurisdictions in which we operate and is recorded each quarter using an estimated annualized effective tax rate. This process to record income tax expense involves estimating current and deferred income tax expense or benefit and the impact of temporary differences resulting from differing treatment of items for financial reporting and income tax return reporting purposes. Such differences are the result of timing of the deduction for expenses, as well as any impact of permanent differences, or other items that directly impact income tax expense as a result of regulatory activity (flow-through items). The temporary differences and flow-through items result in deferred tax assets and liabilities that are included in the balance sheets.

We also account for uncertainty in income taxes, which applies to all income tax positions previously filed in a tax return and income tax positions expected to be taken in a future tax return that have been reflected on our balance sheets. The determination of whether a tax position meets the recognition threshold under applicable accounting guidance is based on facts and circumstances available to us.

The interpretation of tax laws and associated regulations involves uncertainty since tax authorities may interpret the laws differently. Ultimate resolution or clarification of income tax matters may result in favorable or unfavorable impacts to net income and cash flows, and adjustments to tax-related assets and liabilities could be material.

Significant management judgment is required in determining the provision for income taxes, primarily due to the uncertainty related to tax positions taken, as well as deferred tax assets and liabilities and valuation allowances. We evaluate the probability of realizing deferred tax assets by reviewing a forecast of future taxable income and our intent and ability to implement tax planning strategies, if necessary, to realize deferred tax assets. We also assess negative evidence, such as the expiration of historical operating loss or tax credit carryforwards, that could indicate the inability to realize the deferred tax assets. Valuation allowances are provided to reduce deferred tax assets to the amount that will more likely than not be realized in future periods. This requires management to make judgments and estimates regarding the amount and timing of the reversal of taxable temporary differences, expected future taxable income, and the impact of tax planning strategies.

Actual income taxes could vary from estimated amounts due to the future impacts of various items, including future changes in income tax laws, not realizing expected tax planning strategy amounts, as well as results of audits and examinations of filed tax returns by taxing authorities.

*Accounting for Environmental Reserves:* Environmental reserves are accrued when assessments indicate it is probable that a liability has been incurred and an amount can be reasonably estimated. Increases to estimates of environmental liabilities could have an adverse impact on earnings. We estimate these liabilities based on findings through various phases of the assessment, considering the most likely action plan from a variety of available remediation options (ranging from no action required to full site remediation and long-term monitoring), current site information from our site assessments, remediation estimates from third party engineering and remediation contractors, and our prior experience in remediating contaminated sites. If a most likely action plan cannot yet be determined, we estimate the liability based on the low end of a range of possible action plans. A significant portion of our environmental sites and reserve amounts relate to former MGP sites that were operated several decades ago and manufactured natural gas from coal and other processes, which resulted in certain by-products remaining in the environment that may pose a potential risk to human health and the environment, for which we may have potential liability. Estimates are based on the expected remediation plan. Our estimates are subject to revision in future periods based on actual costs or new information from other sources, including the level of contamination at the site, the extent of our responsibility or the extent of remediation required, recently enacted laws and regulations or a change in cost estimates.

*Fair Value Measurements:* We follow fair value measurement guidance that defines fair value as the price that would be received for the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). We have applied this guidance to our Company's derivative contracts that are not elected or designated as "normal purchases" or "normal sales," to marketable securities held in trusts, and to our investments in our Pension and PBOP Plans. Fair value measurements are also incorporated into the accounting for goodwill, long-lived assets, equity method investments, AROs, and in the valuation of business combinations and asset acquisitions. The fair value measurement guidance was also applied in estimating the fair value of preferred stock, long-term debt and RRBs.

Changes in fair value of our derivative contracts are recorded as Regulatory Assets or Liabilities, as we recover the costs of these contracts in rates charged to customers. These valuations are sensitive to the prices of energy-related products in future years and assumptions made.

We use quoted market prices when available to determine the fair value of financial instruments. When quoted prices in active markets for the same or similar instruments are not available, we value derivative contracts using models that incorporate both observable and unobservable inputs. Discounted cash flow valuations incorporate estimates of premiums or discounts, reflecting risk-adjusted profit that would be required by a market participant to arrive at an exit price, using available historical market transaction information. Valuations of derivative contracts also reflect our estimates of nonperformance risk, including credit risk.

## RESULTS OF OPERATIONS – EVERSOURCE ENERGY AND SUBSIDIARIES

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for Eversource for the years ended December 31, 2023 and 2022 included in this Annual Report on Form 10-K:

| (Millions of Dollars)                                   | For the Years Ended December 31, |             |                     |
|---|----------------------------------|-------------|---------------------|
|   | 2023                             | 2022        | Increase/(Decrease) |
| Operating Revenues                                      | \$ 11,910.7                      | \$ 12,289.3 | \$ (378.6)          |
| Operating Expenses:                                     |                                  |             |                     |
| Purchased Power, Purchased Natural Gas and Transmission | 5,168.2                          | 5,014.1     | 154.1               |
| Operations and Maintenance                              | 1,895.7                          | 1,865.3     | 30.4                |
| Depreciation  | 1,305.8                          | 1,194.2     | 111.6               |
| Amortization  | (490.1)                          | 448.9       | (939.0)             |
| Energy Efficiency Programs                              | 691.4                            | 658.0       | 33.4                |
| Taxes Other Than Income Taxes                           | 940.4                            | 910.6       | 29.8                |
| Total Operating Expenses                                | 9,511.4                          | 10,091.1    | (579.7)             |
| Operating Income  | 2,399.3                          | 2,198.2     | 201.1               |
| Interest Expense  | 855.4                            | 678.3       | 177.1               |
| Impairments of Offshore Wind Investments                | 2,167.0                          | —           | 2,167.0             |
| Other Income, Net                                       | 348.1                            | 346.1       | 2.0                 |
| (Loss)/Income Before Income Tax Expense                 | (275.0)                          | 1,866.0     | (2,141.0)           |
| Income Tax Expense                                      | 159.7                            | 453.6       | (293.9)             |
| Net (Loss)/Income                                       | (434.7)                          | 1,412.4     | (1,847.1)           |
| Net Income Attributable to Noncontrolling Interests     | 7.5                              | 7.5         | —                   |
| Net (Loss)/Income Attributable to Common Shareholders   | \$ (442.2)                       | \$ 1,404.9  | \$ (1,847.1)        |

### Operating Revenues

**Sales Volumes:** A summary of our retail electric GWh sales volumes, our firm natural gas MMcf sales volumes, and our water MG sales volumes, and percentage changes, is as follows:

|                     | Electric            |        |                     | Firm Natural Gas     |         |                     | Water              |        |                     |
|---------------------|---------------------|--------|---------------------|----------------------|---------|---------------------|--------------------|--------|---------------------|
|                     | Sales Volumes (GWh) |        | Percentage Decrease | Sales Volumes (MMcf) |         | Percentage Decrease | Sales Volumes (MG) |        | Percentage Decrease |
|                     | 2023                | 2022   |                     | 2023                 | 2022    |                     | 2023               | 2022   |                     |
| Traditional         | 7,590               | 7,764  | (2.2)%              | —                    | —       | — %                 | 1,488              | 1,857  | (19.9)%             |
| Decoupled           | 41,978              | 43,493 | (3.5)%              | 142,328              | 152,291 | (6.5)%              | 23,129             | 23,154 | (0.1)%              |
| Total Sales Volumes | 49,568              | 51,257 | (3.3)%              | 142,328              | 152,291 | (6.5)%              | 24,617             | 25,011 | (1.6)%              |

Weather, fluctuations in energy supply rates, conservation measures (including utility-sponsored energy efficiency programs), and economic conditions affect customer energy usage and water consumption. Industrial sales volumes are less sensitive to temperature variations than residential and commercial sales volumes. In our service territories, weather impacts both electric and water sales volumes during the summer and both electric and natural gas sales volumes during the winter; however, natural gas sales volumes are more sensitive to temperature variations than electric sales volumes. Customer heating or cooling usage may not directly correlate with historical levels or with the level of degree-days that occur.

Fluctuations in retail electric sales volumes at PSNH impact earnings ("Traditional" in the table above). For CL&P, NSTAR Electric, NSTAR Gas, EGMA, Yankee Gas, and our Connecticut water distribution business, fluctuations in retail sales volumes do not materially impact earnings due to their respective regulatory commission-approved distribution revenue decoupling mechanisms ("Decoupled" in the table above). These distribution revenues are decoupled from their customer sales volumes, which breaks the relationship between sales volumes and revenues recognized.

**Operating Revenues:** The variance in Operating Revenues by segment in 2023, as compared to 2022, is as follows:

| (Millions of Dollars)    | Increase/(Decrease) |
|--------------------------|---------------------|
| Electric Distribution    | \$ (431.8)          |
| Natural Gas Distribution | 6.1                 |
| Electric Transmission    | 107.2               |
| Water Distribution       | 10.0                |
| Other                    | 201.1               |
| Eliminations             | (271.2)             |
| Total Operating Revenues | \$ (378.6)          |

*Electric and Natural Gas Distribution Revenues:*

Base Distribution Revenues:

- Base electric distribution revenues increased \$36.6 million due primarily to a base distribution rate increase at NSTAR Electric effective January 1, 2023.
- Base natural gas distribution revenues increased \$18.5 million due primarily to base distribution rate increases effective November 1, 2023 and November 1, 2022 at NSTAR Gas and effective November 1, 2022 at EGMA.

Tracked Distribution Revenues: Tracked distribution revenues consist of certain costs that are recovered from customers in retail rates through regulatory commission-approved cost tracking mechanisms and therefore, recovery of these costs has no impact on earnings. Revenues from certain of these cost tracking mechanisms also include certain incentives earned, return on capital tracking mechanisms, and carrying charges that are billed in rates to customers, which do impact earnings. Costs recovered through cost tracking mechanisms include, among others, energy supply and natural gas supply procurement and other energy-related costs, electric retail transmission charges, energy efficiency program costs, electric restructuring and stranded cost recovery revenues (including securitized RRB charges), certain capital tracking mechanisms for infrastructure improvements, and additionally for the Massachusetts utilities, pension and PBOP benefits, net metering for distributed generation, and solar-related programs. Tracked revenues also include wholesale market sales transactions, such as sales of energy and energy-related products into the ISO-NE wholesale electricity market, sales of natural gas to third party marketers, and the sale of RECs to various counterparties.

Customers have the choice to purchase electricity from each Eversource electric utility or from a competitive third party supplier. For customers who have contracted separately with these competitive suppliers, revenue is not recorded for the sale of the electricity commodity, as the utility is acting as an agent on behalf of the third party supplier. For customers that choose to purchase electric generation from CL&P, NSTAR Electric or PSNH, each purchases power on behalf of, and is permitted to recover the related energy supply cost without mark-up from, its customers, and records offsetting amounts in revenues and purchased power related to this energy supply procurement. CL&P, NSTAR Electric and PSNH each remain as the distribution service provider for all customers and charge a regulated rate for distribution delivery service recorded in revenues. Certain eligible natural gas customers may elect to purchase natural gas from each Eversource natural gas utility or may contract separately with a gas supply operator. Revenue is not recorded for the sale of the natural gas commodity to customers who have contracted separately with these operators, only the delivery to a customer, as the utility is acting as an agent on behalf of the gas supply operator.

Tracked distribution revenues increased/(decreased) in 2023, as compared to 2022, due primarily to the following:

| <i>(Millions of Dollars)</i>           | <u>Electric Distribution</u> | <u>Natural Gas Distribution</u> |
|--|------------------------------|---------------------------------|
| Retail Tariff Tracked Revenues:        |                              |                                 |
| Energy supply procurement              | \$ 506.4                     | \$ (153.5)                      |
| CL&P FMCC                              | (330.1)                      | —                               |
| Retail transmission                    | (80.9)                       | —                               |
| Energy efficiency                      | 2.3                          | 38.1                            |
| Other distribution tracking mechanisms | (11.4)                       | 36.7                            |
| Wholesale Market Sales Revenue         | (565.9)                      | 65.9                            |

The increase in energy supply procurement within electric distribution was driven by higher average prices, partially offset by lower average supply-related sales volumes. The decrease in energy supply procurement within natural gas distribution was driven by lower average prices and lower average supply-related sales volumes. Fluctuations in retail transmission revenues are driven by the recovery of the costs of our wholesale transmission business, such as those billed by ISO-NE and Local and Regional Network Service charges. For further information, see "*Purchased Power, Purchased Natural Gas and Transmission*" expense below.

The decrease in CL&P's FMCC revenues was driven by a decrease in the retail Non-Bypassable Federally Mandated Congestion Charge (NBFMCC) rate, which reflects the impact of returning net benefits of higher wholesale market sales received in the ISO-NE market for long-term state approved energy contracts at CL&P, which are then credited back to customers through the retail NBFMCC rate. CL&P's average NBFMCC rate in effect from January 1, 2022 through April 30, 2022 was \$0.01423 per kWh and from May 1 through August 31, 2022 was \$0.01251 per kWh. As a result of the CL&P RAM proceeding in Docket No. 22-01-03, CL&P reduced the average NBFMCC rate effective September 1, 2022 from \$0.01251 per kWh to \$0.00000 per kWh. As part of a November 2022 rate relief plan, CL&P further reduced the average NBFMCC rate effective January 1, 2023 to a credit of \$0.01524 per kWh. These rate reductions returned to customers the net revenues generated by long-term state-approved energy contracts with the Millstone and Seabrook nuclear power plants. The average NBFMCC rate changed to \$0.00000 per kWh effective July 1, 2023. As a result of the 2023 CL&P RAM decision, the average NBFMCC rate changed to \$0.00293 per kWh effective September 1, 2023.

The decrease in electric distribution wholesale market sales revenue was due primarily to lower average electricity market prices received for wholesale sales at CL&P, NSTAR Electric and PSNH. ISO-NE average market prices received for CL&P's wholesale sales decreased to an average price of \$36.60 per MWh in 2023, as compared to \$82.88 per MWh in 2022, driven primarily by lower natural gas prices in New England. Volumes sold into the market were primarily from the sale of output generated by the Millstone PPA and Seabrook PPA that CL&P entered into in 2019, as required by regulation. CL&P sells the energy purchased from Millstone and Seabrook into the wholesale market and uses the proceeds from the energy sales to offset the contract costs. The net sales or net cost amount is refunded to, or recovered from, customers in the non-bypassable component of the CL&P FMCC rate.

*Electric Transmission Revenues:* Electric transmission revenues increased \$107.2 million due primarily to a higher transmission rate base as a result of our continued investment in our transmission infrastructure.

*Other Revenues and Eliminations:* Other revenues primarily include the revenues of Eversource's service company, most of which are eliminated in consolidation. Eliminations are also primarily related to the Eversource electric transmission revenues that are derived from ISO-NE regional transmission charges to the distribution businesses of CL&P, NSTAR Electric and PSNH that recover the costs of the wholesale transmission business in rates charged to their customers.

**Purchased Power, Purchased Natural Gas and Transmission** expense includes costs associated with providing electric generation service supply and natural gas to all customers who have not migrated to third party suppliers, the cost of energy purchase contracts entered into as required by regulation, and transmission costs. These electric and natural gas supply procurement costs, other energy-related costs, and transmission costs are recovered from customers in rates through commission-approved cost tracking mechanisms, which have no impact on earnings (tracked costs). The variance in Purchased Power, Purchased Natural Gas and Transmission expense in 2023, as compared to 2022, is due primarily to the following:

| <i>(Millions of Dollars)</i>                                  | <b>Increase/(Decrease)</b> |
|---|----------------------------|
| Energy supply procurement costs                               | \$ 495.3                   |
| Other electric distribution costs                             | (68.7)                     |
| Natural gas supply costs                                      | (113.9)                    |
| Transmission costs  | (87.1)                     |
| Eliminations  | (71.5)                     |
| Total Purchased Power, Purchased Natural Gas and Transmission | \$ 154.1                   |

The variance in energy supply procurement costs is offset in Operating Revenues (tracked energy supply procurement revenues). The decrease in other electric distributions costs was primarily the result of a decrease in long-term renewable contract costs and lower net metering costs at NSTAR Electric, partially offset by higher long-term contractual energy-related costs at CL&P that are recovered in the non-bypassable component of the FMCC mechanism, and by higher net metering costs at PSNH.

Costs at the natural gas distribution segment relate to supply procurement costs for retail customers. Total natural gas costs decreased due primarily to lower average prices and lower average purchased supply volumes, partially offset by an increase in the retail cost deferral.

The decrease in transmission costs was primarily the result of a decrease in the retail transmission cost deferral, which reflects the actual cost of transmission service compared to estimated amounts billed to customers and a decrease in costs billed by ISO-NE that support regional grid investments. These decreases were partially offset by an increase in Local Network Service charges, which reflect the cost of transmission service provided by Eversource over our local transmission network.

**Operations and Maintenance** expense includes tracked costs and costs that are part of base electric, natural gas and water distribution rates with changes impacting earnings (non-tracked costs). The variance in Operations and Maintenance expense in 2023, as compared to 2022, is due primarily to the following:

| <i>(Millions of Dollars)</i>  | <u>Increase/(Decrease)</u> |
|---|----------------------------|
| Base Electric Distribution (Non-Tracked Costs):   |                            |
| Shared corporate costs (including IT system depreciation at Eversource Service)   | \$ 41.4                    |
| Storm costs   | 13.3                       |
| Uncollectible expense   | 5.1                        |
| General costs (including vendor services in corporate areas, insurance, fees and assessments)   | 4.7                        |
| Absence in 2023 of energy assistance program as part of CL&P rate relief plan   | (10.0)                     |
| Employee-related expenses, including labor and benefits   | (9.2)                      |
| Operations-related expenses (including vegetation management, vendor services and vehicles)   | (7.8)                      |
| Total Base Electric Distribution (Non-Tracked Costs)  | 37.5                       |
| Tracked Electric Costs (Electric Distribution and Electric Transmission) - Increase due primarily to higher uncollectible expense and higher funding of NSTAR Electric storm reserve as part of January 1, 2023 rate change, partially offset by lower pension tracking mechanism at NSTAR Electric | 44.7                       |
| Total Electric Distribution and Electric Transmission   | 82.2                       |
| Natural Gas Distribution:   |                            |
| Base (Non-Tracked Costs) - Increase due primarily to higher uncollectible expense and shared corporate costs, partially offset by lower employee-related expenses   | 6.5                        |
| Tracked Costs   | (0.1)                      |
| Total Natural Gas Distribution  | 6.4                        |
| Water Distribution  |                            |
|   | 4.8                        |
| Parent and Other Companies and Eliminations:  |                            |
| Eversource Parent and Other Companies - other operations and maintenance  | 158.8                      |
| Transaction and Transition Costs  | (17.8)                     |
| Eliminations  | (204.0)                    |
| Total Operations and Maintenance  | \$ 30.4                    |

**Depreciation** expense increased due primarily to higher net plant in service balances, partially offset by a decrease in approved depreciation rates as part of the rate case decision effective January 1, 2023 at NSTAR Electric.

**Amortization** expense includes the deferral of energy-related costs and other costs that are included in certain regulatory commission-approved cost tracking mechanisms. This deferral adjusts expense to match the corresponding revenues compared to the actual costs incurred. These costs are recovered from customers in rates and have no impact on earnings. Amortization expense also includes the amortization of certain costs as those costs are collected in rates.

Amortization decreased due primarily to the deferral adjustment of energy-related and other tracked costs at CL&P (included in the non-bypassable component of the FMCC mechanism), NSTAR Electric and PSNH, which can fluctuate from period to period based on the timing of costs incurred and related rate changes to recover these costs. The decrease in the CL&P FMCC mechanism was driven primarily by the November 2022 rate relief plan, which reduced the non-bypassable FMCC rate effective January 1, 2023. The reduction in the CL&P non-bypassable FMCC retail rate decreased the regulatory over-recovery balance and created an under-recovery balance as of December 31, 2023, which resulted in a decrease to amortization expense of \$802.3 million. The decrease was also driven by the impact of a new regulatory tracking mechanism at PSNH that allows for the recovery of operating expenses associated with poles acquired from Consolidated Communications on May 1, 2023. The establishment of the PPAM regulatory asset resulted in a pre-tax benefit of \$16.9 million recorded in Amortization expense on the statement of income in 2023.

The decrease was partially offset by the amortization of historical exogenous property taxes that were approved for recovery effective January 1, 2023 at NSTAR Electric and effective November 1, 2022 at NSTAR Gas and EGMA, and an unfavorable regulatory adjustment resulting from NSTAR Gas' GSEP reconciliation filing that resulted in an increase to amortization expense of \$9.0 million recorded in 2023.

**Energy Efficiency Programs** expense increased due primarily to the deferral adjustment and the timing of the recovery of energy efficiency costs at NSTAR Gas and EGMA, partially offset by a decrease at NSTAR Electric. The deferral adjustment reflects the actual costs of energy efficiency programs compared to the amounts billed to customers. The costs for the majority of the state energy policy initiatives and expanded energy efficiency programs are recovered from customers in rates and have no impact on earnings.

**Taxes Other Than Income Taxes** expense increased due primarily to higher employment-related taxes based on the timing of payroll pay periods, higher property taxes as a result of higher assessments and higher utility plant balances, and higher Connecticut gross earnings taxes.

**Interest Expense** increased due primarily to an increase in interest on long-term debt as a result of new debt issuances (\$200.3 million), an increase in interest on short-term notes payable (\$43.8 million), higher amortization of debt discounts and premiums, net (\$2.7 million), and an increase in interest expense on regulatory deferrals (\$1.3 million), partially offset by an increase in capitalized AFUDC related to debt funds and other capitalized interest (\$63.1 million), and a decrease in RRB interest expense (\$1.3 million).

**Impairments of Offshore Wind Investments** relates to impairment charges in the second and fourth quarters of 2023 associated with Eversource's offshore wind equity method investments resulting from the expected sale of the 50 percent interests in three jointly-owned offshore wind projects. See "Business Development and Capital Expenditures – Offshore Wind Business" included in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

**Other Income, Net** increased due primarily to an increase in interest income primarily from regulatory deferrals (\$43.7 million) and an increase in capitalized AFUDC related to equity funds (\$30.8 million), partially offset by a decrease related to pension, SERP and PBOP non-service income components (\$86.9 million), a loss on the disposition of land in 2023 compared to gains on the sales of property in 2022 (\$9.0 million), a decrease in equity in earnings related to Eversource's equity method investments (\$7.4 million), and investment losses in 2023 compared to investment income in 2022 driven by market volatility (\$6.8 million). Other Income, Net also increased due to a benefit in 2023 from the liquidation of Eversource's equity method investment in a renewable energy fund in excess of its carrying value, partially offset by a charitable contribution made with a portion of the proceeds from the liquidation in 2023.

**Income Tax Expense** decreased due primarily to lower pre-tax earnings (\$449.6 million), lower state taxes (\$3.4 million), a decrease in items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$7.4 million), an increase in amortization of EDIT (\$2.4 million), and lower return to provision adjustments (\$66.7 million), partially offset by lower share-based payment excess tax benefits (\$2.6 million), and an increase in reserves (\$233.0 million) primarily related to the impairment of Eversource's offshore wind investment valuation allowance reserve of \$224.0 million and \$8.8 million relating to an uncertain tax position.

**RESULTS OF OPERATIONS –  
THE CONNECTICUT LIGHT AND POWER COMPANY  
NSTAR ELECTRIC COMPANY AND SUBSIDIARY  
PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARIES**

The following provides the amounts and variances in operating revenues and expense line items in the statements of income for CL&P, NSTAR Electric and PSNH for the years ended December 31, 2023 and 2022 included in this Annual Report on Form 10-K:

| (Millions of Dollars)                                   | For the Years Ended December 31, |            |                         |                |            |                         |            |            |                         |
|---|----------------------------------|------------|-------------------------|----------------|------------|-------------------------|------------|------------|-------------------------|
|   | CL&P                             |            |                         | NSTAR Electric |            |                         | PSNH       |            |                         |
|   | 2023                             | 2022       | Increase/<br>(Decrease) | 2023           | 2022       | Increase/<br>(Decrease) | 2023       | 2022       | Increase/<br>(Decrease) |
| Operating Revenues                                      | \$ 4,578.8                       | \$ 4,817.7 | \$ (238.9)              | \$ 3,515.5     | \$ 3,583.1 | \$ (67.6)               | \$ 1,447.9 | \$ 1,474.8 | \$ (26.9)               |
| Operating Expenses:                                     |                                  |            |                         |                |            |                         |            |            |                         |
| Purchased Power and Transmission                        | 2,612.9                          | 2,110.3    | 502.6                   | 1,154.0        | 1,264.8    | (110.8)                 | 605.0      | 665.5      | (60.5)                  |
| Operations and Maintenance                              | 733.3                            | 707.2      | 26.1                    | 668.5          | 640.8      | 27.7                    | 284.4      | 256.0      | 28.4                    |
| Depreciation  | 376.9                            | 355.5      | 21.4                    | 372.6          | 362.0      | 10.6                    | 140.4      | 128.0      | 12.4                    |
| Amortization of Regulatory<br>(Liabilities)/Assets, Net | (500.3)                          | 335.6      | (835.9)                 | 16.1           | 83.9       | (67.8)                  | (16.3)     | 42.9       | (59.2)                  |
| Energy Efficiency Programs                              | 133.5                            | 134.2      | (0.7)                   | 325.6          | 332.3      | (6.7)                   | 39.6       | 37.4       | 2.2                     |
| Taxes Other Than Income Taxes                           | 401.1                            | 384.7      | 16.4                    | 256.1          | 246.7      | 9.4                     | 93.9       | 95.3       | (1.4)                   |
| Total Operating Expenses                                | 3,757.4                          | 4,027.5    | (270.1)                 | 2,792.9        | 2,930.5    | (137.6)                 | 1,147.0    | 1,225.1    | (78.1)                  |
| Operating Income  | 821.4                            | 790.2      | 31.2                    | 722.6          | 652.6      | 70.0                    | 300.9      | 249.7      | 51.2                    |
| Interest Expense  | 193.4                            | 169.4      | 24.0                    | 189.2          | 162.9      | 26.3                    | 72.8       | 59.5       | 13.3                    |
| Other Income, Net                                       | 61.6                             | 83.3       | (21.7)                  | 164.1          | 142.7      | 21.4                    | 26.6       | 32.7       | (6.1)                   |
| Income Before Income Tax Expense                        | 689.6                            | 704.1      | (14.5)                  | 697.5          | 632.4      | 65.1                    | 254.7      | 222.9      | 31.8                    |
| Income Tax Expense                                      | 170.9                            | 171.2      | (0.3)                   | 153.0          | 140.0      | 13.0                    | 59.0       | 51.3       | 7.7                     |
| Net Income  | \$ 518.7                         | \$ 532.9   | \$ (14.2)               | \$ 544.5       | \$ 492.4   | \$ 52.1                 | \$ 195.7   | \$ 171.6   | \$ 24.1                 |

**Operating Revenues**

**Sales Volumes:** A summary of our retail electric GWh sales volumes is as follows:

|                | For the Years Ended December 31, |        |          |                        |
|----------------|----------------------------------|--------|----------|------------------------|
|                | 2023                             | 2022   | Decrease | Percentage<br>Decrease |
| CL&P           | 19,577                           | 20,560 | (983)    | (4.8)%                 |
| NSTAR Electric | 22,401                           | 22,933 | (532)    | (2.3)%                 |
| PSNH           | 7,590                            | 7,764  | (174)    | (2.2)%                 |

Fluctuations in retail electric sales volumes at PSNH impact earnings. For CL&P and NSTAR Electric, fluctuations in retail electric sales volumes do not impact earnings due to their respective regulatory commission-approved distribution revenue decoupling mechanisms.

**Operating Revenues:** Operating Revenues, which consist of base distribution revenues and tracked revenues further described below, decreased \$238.9 million at CL&P, \$67.6 million at NSTAR Electric, and \$26.9 million at PSNH in 2023, as compared to 2022.

**Base Distribution Revenues:**

- CL&P's distribution revenues were flat.
- NSTAR Electric's distribution revenues increased \$37.4 million due primarily to a base distribution rate increase effective January 1, 2023.
- PSNH's distribution revenues decreased \$0.8 million due primarily to a decrease in sales volumes as a result of milder weather in 2023 compared to 2022, partially offset by a base distribution rate increase effective August 1, 2022.

**Tracked Distribution Revenues:** Tracked distribution revenues consist of certain costs that are recovered from customers in retail rates through regulatory commission-approved cost tracking mechanisms and therefore, recovery of these costs has no impact on earnings. Revenues from certain of these cost tracking mechanisms also include certain incentives earned, return on capital tracking mechanisms, and carrying charges that are billed in rates to customers, which do impact earnings. Costs recovered through cost tracking mechanisms include, among others, energy supply procurement and other energy-related costs, retail transmission charges, energy efficiency program costs, electric restructuring and stranded cost recovery revenues (including securitized RRB charges), certain capital tracking mechanisms for infrastructure improvements, and additionally for NSTAR Electric, pension and PBOP benefits, net metering for distributed generation, and solar-related programs. Tracked revenues also include wholesale market sales transactions, such as sales of energy and energy-related products into the ISO-NE wholesale electricity market and the sale of RECs to various counterparties.

Customers have the choice to purchase electricity from each Eversource electric utility or from a competitive third party supplier. For customers who have contracted separately with these competitive suppliers, revenue is not recorded for the sale of the electricity commodity, as the utility is acting as an agent on behalf of the third party supplier. For customers that choose to purchase electric generation from CL&P, NSTAR Electric or PSNH, each purchases power on behalf of, and is permitted to recover the related energy supply cost without mark-up from, its customers, and records offsetting amounts in revenues and purchased power related to this energy supply procurement. CL&P, NSTAR Electric and PSNH each remain as the distribution service provider for all customers and charge a regulated rate for distribution delivery service recorded in revenues.

The variance in tracked distribution revenues in 2023, as compared to 2022, is due primarily to the following:

| <i>(Millions of Dollars)</i>           | CL&P     | NSTAR Electric | PSNH      |
|--|----------|----------------|-----------|
| Retail Tariff Tracked Revenues:        |          |                |           |
| Energy supply procurement              | \$ 442.8 | \$ 119.8       | \$ (56.2) |
| CL&P FMCC                              | (330.1)  | —              | —         |
| Retail transmission                    | 40.4     | (100.7)        | (20.6)    |
| Other distribution tracking mechanisms | 22.0     | (61.6)         | 30.5      |
| Wholesale Market Sales Revenue         | (444.6)  | (83.2)         | (38.1)    |

The increase in energy supply procurement at CL&P and NSTAR Electric was driven by higher average prices, partially offset by lower average supply-related sales volumes. The decrease in energy supply procurement at PSNH was driven by lower average supply-related sales volumes, partially offset by higher average prices. Fluctuations in retail transmission revenues are driven by the recovery of the costs of our wholesale transmission business, such as those billed by ISO-NE and Local and Regional Network Service charges. For further information, see "*Purchased Power and Transmission*" expense below.

The decrease in CL&P's FMCC revenues was driven by a decrease in the retail Non-Bypassable Federally Mandated Congestion Charge (NBFMCC) rate, which reflects the impact of returning net benefits of higher wholesale market sales received in the ISO-NE market for long-term state approved energy contracts at CL&P, which are then credited back to customers through the retail NBFMCC rate. CL&P's average NBFMCC rate in effect from January 1, 2022 through April 30, 2022 was \$0.01423 per kWh and from May 1 through August 31, 2022 was \$0.01251 per kWh. As a result of the CL&P RAM proceeding in Docket No. 22-01-03, CL&P reduced the average NBFMCC rate effective September 1, 2022 from \$0.01251 per kWh to \$0.00000 per kWh. As part of a November 2022 rate relief plan, CL&P further reduced the average NBFMCC rate effective January 1, 2023 to a credit of \$0.01524 per kWh. These rate reductions returned to customers the net revenues generated by long-term state-approved energy contracts with the Millstone and Seabrook nuclear power plants. The average NBFMCC rate changed to \$0.00000 per kWh effective July 1, 2023. As a result of the 2023 CL&P RAM decision, the average NBFMCC rate changed to \$0.00293 per kWh effective September 1, 2023.

The decrease in wholesale market sales revenue was due primarily to lower average electricity market prices received for wholesale sales at CL&P, NSTAR Electric and PSNH. ISO-NE average market prices received for CL&P's wholesale sales decreased to an average price of \$36.60 per MWh in 2023, as compared to \$82.88 per MWh in 2022, driven primarily by lower natural gas prices in New England. CL&P's volumes sold into the market were primarily from the sale of output generated by the Millstone PPA and Seabrook PPA that CL&P entered into in 2019, as required by regulation. CL&P sells the energy purchased from Millstone and Seabrook into the wholesale market and uses the proceeds from the energy sales to offset the contract costs. The net sales or net cost amount is refunded to, or recovered from, customers in the non-bypassable component of the CL&P FMCC rate.

**Transmission Revenues:** Transmission revenues increased \$21.9 million at CL&P, \$36.1 million at NSTAR Electric and \$49.2 million at PSNH due primarily to a higher transmission rate base as a result of our continued investment in our transmission infrastructure.

**Eliminations:** Eliminations are primarily related to the Eversource electric transmission revenues that are derived from ISO-NE regional transmission charges to the distribution businesses of CL&P, NSTAR Electric and PSNH that recover the costs of the wholesale transmission business in rates charged to their customers. The impact of eliminations increased revenues by \$8.6 million at CL&P and \$2.9 million at PSNH and decreased revenues by \$18.2 million at NSTAR Electric.

**Purchased Power and Transmission** expense includes costs associated with providing electric generation service supply to all customers who have not migrated to third party suppliers, the cost of energy purchase contracts entered into as required by regulation, and transmission costs. These energy supply procurement, other energy-related costs, and transmission costs are recovered from customers in rates through commission-approved cost tracking mechanisms, which have no impact on earnings (tracked costs). The variance in Purchased Power and Transmission expense in 2023, as compared to 2022, is due primarily to the following:

| <i>(Millions of Dollars)</i>                  | CL&P            | NSTAR Electric    | PSNH             |
|---|-----------------|-------------------|------------------|
| Energy supply procurement costs               | \$ 437.2        | \$ 117.6          | \$ (59.5)        |
| Other electric distribution costs             | 22.6            | (109.6)           | 18.3             |
| Transmission costs                            | 35.7            | (100.8)           | (22.0)           |
| Eliminations                                  | 7.1             | (18.0)            | 2.7              |
| <b>Total Purchased Power and Transmission</b> | <b>\$ 502.6</b> | <b>\$ (110.8)</b> | <b>\$ (60.5)</b> |

The variance in energy supply procurement costs is offset in Operating Revenues (tracked energy supply procurement revenues). The variance in other electric distribution costs at CL&P is due to higher long-term contractual energy-related costs that are recovered in the non-bypassable component of the FMCC mechanism, at NSTAR Electric is due to a decrease in long-term renewable contract costs and lower net metering costs, and at PSNH is due primarily to higher net metering costs.

Included in transmission costs are charges that recover the cost of transporting electricity over high-voltage lines from generation facilities to substations, including costs allocated by ISO-NE to maintain the wholesale electric market.

- The increase in transmission costs at CL&P was due primarily to an increase in Local Network Service charges, which reflect the cost of transmission service provided by Eversource over our local transmission network, and an increase resulting from the retail transmission cost deferral, which reflects the actual costs of transmission service compared to estimated amounts billed to customers. These increases were partially offset by a decrease in costs billed by ISO-NE that support regional grid investments.
- The decrease in transmission costs at NSTAR Electric and PSNH was due primarily to a decrease resulting from the retail transmission cost deferral and a decrease in costs billed by ISO-NE. These decreases were partially offset by an increase in Local Network Service charges.

**Operations and Maintenance** expense includes tracked costs and costs that are part of base distribution rates with changes impacting earnings (non-tracked costs). The variance in Operations and Maintenance expense in 2023, as compared to 2022, is due primarily to the following:

| <i>(Millions of Dollars)</i>  | CL&P           | NSTAR Electric | PSNH           |
|---|----------------|----------------|----------------|
| <b>Base Electric Distribution (Non-Tracked Costs):</b>  |                |                |                |
| Shared corporate costs (including IT system depreciation at Eversource Service)               | \$ 14.2        | \$ 22.5        | \$ 4.7         |
| Storm costs   | 17.4           | (0.8)          | (3.3)          |
| General costs (including vendor services in corporate areas, insurance, fees and assessments) | 6.6            | 0.2            | (2.1)          |
| Absence in 2023 of energy assistance program as part of CL&P rate relief plan                 | (10.0)         | —              | —              |
| Employee-related expenses, including labor and benefits                                       | (5.3)          | (5.2)          | 1.3            |
| Operations-related expenses (including vegetation management, vendor services and vehicles)   | (4.7)          | 3.3            | (6.4)          |
| Uncollectible expense   | (4.5)          | 4.5            | 5.1            |
| <b>Total Base Electric Distribution (Non-Tracked Costs)</b>                                   | <b>13.7</b>    | <b>24.5</b>    | <b>(0.7)</b>   |
| <b>Total Tracked Costs</b>  | <b>12.4</b>    | <b>3.2</b>     | <b>29.1</b>    |
| <b>Total Operations and Maintenance</b>   | <b>\$ 26.1</b> | <b>\$ 27.7</b> | <b>\$ 28.4</b> |

**Depreciation** expense increased for CL&P, NSTAR Electric and PSNH due to higher net plant in service balances. The increase at NSTAR Electric was partially offset by a decrease in approved depreciation rates as part of the rate case decision effective January 1, 2023.

**Amortization of Regulatory (Liabilities)/Assets, Net** expense includes the deferral of energy-related costs and other costs that are included in certain regulatory commission-approved cost tracking mechanisms. This deferral adjusts expense to match the corresponding revenues compared to the actual costs incurred. These costs are recovered from customers in rates and have no impact on earnings. Amortization expense also includes the amortization of certain costs as those costs are collected in rates. The variance in Amortization of Regulatory (Liabilities)/Assets, Net is due primarily to the following:

- The decrease at CL&P was due primarily to the deferral adjustment of energy-related and other tracked costs that are included in the non-bypassable component of the FMCC mechanism, which can fluctuate from period to period based on the timing of costs incurred and related rate changes to recover these costs. The decrease in the FMCC mechanism was driven primarily by the CL&P November 2022 rate relief plan, which reduced the non-bypassable FMCC rate effective January 1, 2023. The reduction in the CL&P non-

bypassable FMCC retail rate decreased the regulatory over-recovery balance and created an under-recovery balance as of December 31, 2023, which resulted in a decrease to amortization expense of \$802.3 million.

- The decrease at NSTAR Electric was due to the deferral adjustment of energy-related costs and other tracked costs, partially offset by an increase due to the amortization of historical exogenous property taxes that were approved for recovery effective January 1, 2023 in the November 2022 NSTAR Electric distribution rate case decision.
- The decrease at PSNH was due to the deferral adjustment of energy-related and other tracked costs, as well as the impact of a new regulatory tracking mechanism at PSNH that allows for the recovery of operating expenses associated with poles acquired from Consolidated Communications on May 1, 2023. The establishment of the PPAM regulatory asset resulted in a pre-tax benefit of \$16.9 million recorded in Amortization expense on the PSNH statement of income in 2023.

**Energy Efficiency Programs** expense includes costs of various state energy policy initiatives and expanded energy efficiency programs that are recovered from customers in rates, most of which have no impact on earnings. The variance in Energy Efficiency Programs expense is due primarily to the following:

- The decrease at NSTAR Electric was due to the deferral adjustment, which reflects the actual costs of energy efficiency programs compared to the amounts billed to customers, and the timing of the recovery of energy efficiency costs.
- The increase at PSNH was due to the deferral adjustment and the timing of the recovery of energy efficiency costs.

**Taxes Other Than Income Taxes** - the variance is due primarily to the following:

- The increase at CL&P was related to higher Connecticut gross earnings taxes, higher employment-related taxes based on the timing of payroll pay periods, and higher property taxes as a result of higher utility plant balances.
- The increase at NSTAR Electric was due to higher property taxes as a result of higher assessments and higher utility plant balances and higher employment-related taxes based on the timing of payroll pay periods.
- The decrease at PSNH was due to lower property taxes as a result of lower assessments accompanied by lower mill rates, partially offset by an increase due to higher employment-related taxes based on the timing of payroll pay periods.

**Interest Expense** - the variance is due primarily to the following:

- The increase at CL&P was due to higher interest on long-term debt (\$23.2 million) and higher interest on short-term notes payable (\$9.5 million), partially offset by a decrease in interest expense on regulatory deferrals (\$4.6 million), an increase in capitalized AFUDC related to debt funds (\$2.9 million), and lower amortization of debt discounts and premiums, net (\$0.3 million).
- The increase at NSTAR Electric was due primarily to higher interest on long-term debt (\$16.0 million), higher interest on short-term notes payable (\$10.1 million), and an increase in interest expense on regulatory deferrals (\$8.0 million), partially offset by an increase in capitalized AFUDC related to debt funds (\$6.5 million).
- The increase at PSNH was due primarily to higher interest on long-term debt (\$17.4 million) and higher interest on short-term notes payable (\$5.4 million), partially offset by an increase in capitalized AFUDC related to debt funds (\$4.7 million), a decrease in interest expense on regulatory deferrals (\$3.7 million), and a decrease in RRB interest expense (\$1.3 million).

**Other Income, Net** - the variance is due primarily to the following:

- The decrease at CL&P was due primarily to a decrease related to pension, SERP and PBOP non-service income components (\$29.5 million) and an increase in investment losses driven by market volatility (\$1.1 million), partially offset by an increase in capitalized AFUDC related to equity funds (\$6.4 million) and an increase in interest income primarily on regulatory deferrals (\$2.5 million).
- The increase at NSTAR Electric was due primarily to an increase in interest income primarily on regulatory deferrals (\$29.9 million) and an increase in capitalized AFUDC related to equity funds (\$21.1 million), partially offset by a decrease related to pension, SERP and PBOP non-service income components (\$28.1 million) and investment losses in 2023 compared to investment income in 2022 driven by market volatility (\$1.4 million).
- The decrease at PSNH was due primarily to a decrease related to pension, SERP and PBOP non-service income components (\$10.6 million) and investment losses in 2023 compared to investment income in 2022 driven by market volatility (\$0.9 million), partially offset by an increase in capitalized AFUDC related to equity funds (\$2.9 million) and an increase in interest income primarily on regulatory deferrals (\$2.2 million).

**Income Tax Expense** - the variance is due primarily to the following:

- The decrease at CL&P was due primarily to lower pre-tax earnings (\$3.0 million), lower state taxes (\$3.0 million), an increase in amortization of EDIT (\$1.3 million), and a decrease in items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$1.4 million), partially offset by higher return to provision adjustments (\$7.3 million), lower share-based payment excess tax benefits (\$0.9 million), and an increase in valuation allowances (\$0.2 million).
- The increase at NSTAR Electric was due primarily to higher pre-tax earnings (\$13.7 million), higher state taxes (\$1.6 million), lower share-based payment excess tax benefits (\$1.0 million), and a decrease in amortization of EDIT (\$0.8 million), partially offset by a decrease in items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$4.1 million).

- The increase at PSNH was due primarily to higher pre-tax earnings (\$6.7 million), higher state taxes (\$1.6 million), and a decrease in amortization of EDIT (\$0.9 million), partially offset by a decrease in items that impact our tax rate as a result of regulatory treatment (flow-through items) and permanent differences (\$1.0 million), and lower return to provision adjustments (\$0.5 million).

#### EARNINGS SUMMARY

CL&P's earnings decreased \$14.2 million in 2023, as compared to 2022, due primarily to higher operations and maintenance expense, higher interest expense, higher depreciation expense, lower pension income, a higher effective tax rate, and higher property and other tax expense. The earnings decrease was partially offset by higher earnings from its capital tracking mechanism due to increased electric system improvements.

NSTAR Electric's earnings increased \$52.1 million in 2023, as compared to 2022, due primarily to higher revenues as a result of the base distribution rate increase effective January 1, 2023, an increase in transmission earnings driven by a higher transmission rate base, an increase in interest income primarily on regulatory deferrals, and higher AFUDC equity income. The earnings increase was partially offset by higher operations and maintenance expense, higher property and other tax expense, higher interest expense, and higher depreciation expense.

PSNH's earnings increased \$24.1 million in 2023, as compared to 2022, due primarily to an increase in transmission earnings driven by a higher transmission rate base and the impact of a new regulatory tracking mechanism at PSNH that allows for the recovery of previously incurred operating expenses associated with poles acquired on May 1, 2023. The earnings increase was partially offset by higher interest expense, higher depreciation expense, and lower pension income.

#### LIQUIDITY

*Cash Flows:* CL&P had cash flows provided by operating activities of \$449.6 million in 2023, as compared to \$869.6 million in 2022. The decrease in operating cash flows was due primarily to an increase in regulatory under-recoveries driven primarily by the timing of collections for the non-bypassable FMCC, the SBC and other regulatory tracking mechanisms, the timing of cash payments made on our accounts payable, and an \$8.9 million increase in cost of removal expenditures. In 2023, CL&P increased the flow back to customers of net revenues generated by long-term state-approved energy contracts by providing these credits to customers through the non-bypassable FMCC retail rate. The reduction in the non-bypassable FMCC retail rate decreased the regulatory over-recovery balance and created an under-recovery balance as of December 31, 2023, which resulted in a decrease to amortization expense of \$802.3 million in 2023, as compared to 2022, and is presented as a cash outflow in Amortization of Regulatory (Liabilities)/Assets on the statement of cash flows. The impacts of regulatory collections are included in both Regulatory Recoveries and Amortization of Regulatory (Liabilities)/Assets on the statements of cash flows. These unfavorable impacts were partially offset by a \$161.7 million increase in operating cash flows due to income tax refunds received in 2023 compared to income tax payments in 2022, the timing of cash collections on our accounts receivable, the absence in 2023 of \$72.0 million of customer credits distributed in 2022 as a result of the October 2021 settlement agreement and the 2021 storm performance penalty for CL&P's response to Tropical Storm Isaias, a \$32.4 million decrease in cash payments to vendors for storm costs, and the timing of other working capital items.

NSTAR Electric had cash flows provided by operating activities of \$713.6 million in 2023, as compared to \$771.5 million in 2022. The decrease in operating cash flows was due primarily to an increase in regulatory under-recoveries driven by the timing of collections for regulatory tracking mechanisms including transmission and net metering, the timing of other working capital items, the timing of cash collections on our accounts receivable, an \$11.0 million increase in cost of removal expenditures, and a \$7.5 million increase in income tax payments made. The impacts of regulatory collections are included in both Regulatory Recoveries and Amortization of Regulatory Assets on the statements of cash flows. These unfavorable impacts were partially offset by the absence in 2023 of \$76.3 million of payments in 2022 related to withheld property taxes, a \$59.1 million decrease in cash payments to vendors for storm costs, the absence in 2023 of pension contributions of \$15.0 million made in 2022, and the timing of cash payments made on our accounts payable.

PSNH had cash flows provided by operating activities of \$32.0 million in 2023, as compared to \$361.5 million in 2022. The decrease in operating cash flows was due primarily to an increase in regulatory under-recoveries driven by the timing of collections for regulatory tracking mechanisms including energy supply, stranded costs, retail transmission and wholesale transmission, the timing of cash payments made on our accounts payable, a \$118.2 million increase in cash payments to vendors for storm costs, and the timing of other working capital items. The impacts of regulatory collections are included in both Regulatory Recoveries and Amortization of Regulatory (Liabilities)/Assets on the statements of cash flows. These unfavorable impacts were partially offset by a \$118.2 million increase in operating cash flows due to income tax refunds received in 2023 compared to income tax payments in 2022, and the timing of cash collections on our accounts receivable.

For further information on CL&P's, NSTAR Electric's and PSNH's liquidity and capital resources, see "Liquidity" and "Business Development and Capital Expenditures" included in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

## Item 7A. Quantitative and Qualitative Disclosures about Market Risk

### Market Risk Information

*Commodity Price Risk Management:* Our regulated companies enter into energy contracts to serve our customers, and the economic impacts of those contracts are passed on to our customers. Accordingly, the regulated companies have no exposure to loss of future earnings or fair values due to these market risk-sensitive instruments. Eversource's Energy Supply Risk Committee, comprised of senior officers, reviews and approves all large-scale energy related transactions entered into by its regulated companies.

### Other Risk Management Activities

We have an Enterprise Risk Management (ERM) program for identifying the principal risks of the Company. Our ERM program involves the application of a well-defined, enterprise-wide methodology designed to allow our Risk Committee, comprised of our senior officers of the Company, to identify, categorize, prioritize, and mitigate the principal risks to the Company. The ERM program is integrated with other assurance functions throughout the Company including Compliance, Auditing, and Insurance to ensure appropriate coverage of risks that could impact the Company. In addition to known risks, ERM identifies emerging risks to the Company, through participation in industry groups, discussions with management and in consultation with outside advisers. Our management then analyzes risks to determine materiality, likelihood and impact, and develops mitigation strategies. Management broadly considers our business model, the utility industry, the global economy, climate change, sustainability and the current environment to identify risks. The Finance Committee of the Board of Trustees is responsible for oversight of the Company's ERM program and enterprise-wide risks as well as specific risks associated with insurance, credit, financing, investments, pensions and overall system security including cyber security. The findings of the ERM process are periodically discussed with the Finance Committee of our Board of Trustees, as well as with other Board Committees or the full Board of Trustees, as appropriate, including reporting on how these issues are being measured and managed. However, there can be no assurances that the ERM process will identify or manage every risk or event that could impact our financial position, results of operations or cash flows.

*Interest Rate Risk Management:* Interest rate risk is associated with changes in interest rates for our outstanding long-term debt. Our interest rate risk is significantly reduced as typically all or most of our debt financings have fixed interest rates. As of December 31, 2023, all of our long-term debt was at a fixed interest rate.

*Credit Risk Management:* Credit risk relates to the risk of loss that we would incur as a result of non-performance by counterparties pursuant to the terms of our contractual obligations. We serve a wide variety of customers and transact with suppliers that include IPPs, industrial companies, natural gas and electric utilities, oil and natural gas producers, financial institutions, and other energy marketers. Margin accounts exist within this diverse group, and we realize interest receipts and payments related to balances outstanding in these margin accounts. This wide customer and supplier mix generates a need for a variety of contractual structures, products and terms that, in turn, require us to manage the portfolio of market risk inherent in those transactions in a manner consistent with the parameters established by our risk management process.

Our regulated companies are subject to credit risk from certain long-term or high-volume supply contracts with energy marketing companies. Our regulated companies manage the credit risk with these counterparties in accordance with established credit risk practices and monitor contracting risks, including credit risk. As of December 31, 2023, our regulated companies held collateral (letters of credit or cash) of \$32.0 million from counterparties related to our standard service contracts. As of December 31, 2023, Eversource had \$28.7 million of cash posted with ISO-NE related to energy transactions.

If the respective unsecured debt ratings of Eversource or its subsidiaries were reduced to below investment grade by either Moody's, S&P or Fitch, certain of Eversource's contracts would require additional collateral in the form of cash or letters of credit to be provided to counterparties and independent system operators. Eversource would have been and remains able to provide that collateral.

## **Management's Report on Internal Controls Over Financial Reporting**

### **Eversource Energy**

Management is responsible for the preparation, integrity, and fair presentation of the accompanying consolidated financial statements of Eversource Energy and subsidiaries (Eversource or the Company) and of other sections of this annual report. Eversource's internal controls over financial reporting were audited by Deloitte & Touche LLP.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment.

Under the supervision and with the participation of the principal executive officer and principal financial officer, Eversource conducted an evaluation of the effectiveness of internal controls over financial reporting based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting were effective as of December 31, 2023.

February 14, 2024

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Trustees and Shareholders of Eversource Energy:

### Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Eversource Energy and subsidiaries (the “Company”) as of December 31, 2023, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2023, of the Company and our report dated February 14, 2024, expressed an unqualified opinion on those financial statements.

### Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Controls Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

### Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Trustees and Shareholders of Eversource Energy:

### Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Eversource Energy and subsidiaries (the “Company”) as of December 31, 2023 and 2022, the related consolidated statements of income, comprehensive income, common shareholders’ equity, and cash flows, for each of the three years in the period ended December 31, 2023, and the related notes and the schedules listed in the Index at Item 15 of Part IV (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company’s internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 14, 2024, expressed an unqualified opinion on the Company’s internal control over financial reporting.

### Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

### Critical Audit Matter

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

#### ***Regulatory Accounting - Impact of Rate Regulation on the Financial Statements - Refer to Note 2 to the Financial Statements***

##### *Critical Audit Matter Description*

The Company’s utility companies are subject to rate regulation by the Federal Energy Regulatory Commission and by their respective state public utility authorities in Connecticut, Massachusetts, or New Hampshire (the “Commissions”). The rate regulation by these Commissions is based on cost recovery. The regulated companies’ financial statements reflect the effects of the rate-making process. The rates charged to the customers of the Company’s regulated companies are designed to collect each company’s cost to provide service, plus a return on investment.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. In some cases, the Company records regulatory assets before approval for recovery has been received from the applicable regulatory commission. The Company must use judgment to conclude that costs deferred as regulatory assets are probable of future recovery. The Company bases its conclusion on certain factors, including, but not limited to, regulatory precedent. Regulatory liabilities represent either revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers.

The Company uses judgment when recording regulatory assets and liabilities; however, regulatory commissions can reach different conclusions about the recovery of costs, and those conclusions could have a material impact on the Company’s financial statements. Management believes it is probable that each of the regulated companies will recover its respective investment in long-lived assets, including regulatory assets. If management were to determine that it could no longer apply the accounting guidance applicable to rate-regulated enterprises to any of the regulated companies’ operations, or if management could not conclude it is probable that costs would be recovered from customers in future rates, the costs would be charged to net income in the period in which the determination is made.

Accounting for the economics of rate-regulation impacts multiple financial statement line items and disclosures, such as regulated property, plant, and equipment, regulatory assets and liabilities, operating revenues, depreciation expense and amortization of regulatory assets. While management has indicated it expects to recover costs from customers through regulated rates, there is a risk that the Commissions will not approve full recovery of such costs or full recovery of all amounts invested in the utility business and a reasonable return on that investment. We identified the impact of rate-regulation as a critical audit matter due to the significant judgments made by management to support its assertions about impact of future regulatory orders on the financial statements. Management judgments include assessing the probability of recovery in future rates of incurred costs and of a refund to customers. Given that management's accounting judgments are based on assumptions about the outcome of future decisions by the Commissions, auditing these judgments requires specialized knowledge of accounting for rate regulation and the rate setting process due to its inherent complexities.

*How the Critical Audit Matter Was Addressed in the Audit*

Our audit procedures related to the uncertainty of future decisions by the Commissions included the following, among others:

- We tested the effectiveness of management's controls over the evaluation of the likelihood of (1) the recovery in future rates of costs incurred as property, plant, and equipment and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We tested the effectiveness of management's controls over the initial recognition of amounts as property, plant, and equipment; regulatory assets or liabilities; and the monitoring and evaluation of regulatory developments that may affect the likelihood of recovering costs in future rates, a refund, or a future reduction in rates.
- We evaluated the Company's disclosures related to the applicability and impacts of rate regulation, including the balances recorded and regulatory developments disclosed in the financial statements.
- We read relevant regulatory orders issued by the Commissions for the Company and other public utilities, regulatory statutes, interpretations, procedural memorandums, filings made by intervenors, and other publicly available information to assess the likelihood of recovery in future rates or of a future refund or reduction in rates based on precedents of the Commissions' treatment of similar costs under similar circumstances. We evaluated the external information and compared it to management's recorded regulatory asset and liability balances for completeness.
- For regulatory matters in process, we inspected the Company's filings with the Commissions and the filings with the Commissions by intervenors that may impact the Company's future rates, for any evidence that might contradict management's assertions.
- We made inquiries of management, including legal counsel, and obtained the regulatory orders and analysis from management that support the probability of recovery, refund, or future reductions in rates for regulatory assets and liabilities to assess management's assertion that amounts are probable of recovery, refund, or a future reduction in rates.

***Investments in Unconsolidated Affiliates – Impact of Offshore Wind Impairment and Offshore Wind Divestiture - Refer to Note 6 to the Financial Statements***

*Critical Audit Matter Description*

Eversource's offshore wind business includes 50 percent ownership interests in each of North East Offshore and South Fork Class B Member, LLC, which collectively hold three offshore wind projects. North East Offshore holds the Revolution Wind project and the Sunrise Wind project. South Fork Class B Member, LLC holds the South Fork Wind project. Eversource's offshore wind business also includes a noncontrolling tax equity investment in South Fork Wind through a 100 percent ownership in South Fork Wind Holdings, LLC Class A shares. The offshore wind projects are being developed and constructed through joint and equal partnerships with Ørsted.

In the second quarter of 2023, the Company announced that it had completed the strategic review of its offshore wind investments and determined that it would continue to pursue the sale of its offshore wind investments. The Company also entered into a purchase and sale agreement with Ørsted for its 50% interest in an uncommitted lease area and committed to provide tax equity for the South Fork Wind project through a new tax equity ownership interest. In connection with the conclusion of the strategic review, Eversource evaluated its aggregate investment in the projects, uncommitted lease area, and other related capitalized costs and determined that the carrying value of the equity method offshore wind investment exceeded the fair value of the investment and that the decline was other-than-temporary. The estimate of fair value was based on the expected sale price of the Company's 50 percent interest in the three contracted projects based on the most recent bid value, the sale price of the uncommitted lease area included in the purchase and sale agreement, expected investment tax credits and potential investment tax credit adder amounts, the value of the tax equity ownership interest, and the expectation of a successful repricing of the Sunrise Wind Offshore Renewable Energy Credit ("OREC") contract. As a result, the Company recognized an other-than temporary impairment charge in the second quarter of 2023.

In the fourth quarter of 2023, The New York State Public Service Commission denied Sunrise Wind's petition to amend its OREC contract to increase the contract price to cover increased costs and inflation. Also during the fourth quarter, project construction forecasts were updated, and these new forecasts reflected additional expenditures for construction and scheduling related pressures, including the availability and increased cost of installation vessels and supply chain cost increases related to foundation fabrication. In determining the current fair value of the investments, these updated projections exceeded the previously estimated projections for construction expenditures, which resulted in a revised sales price that is now significantly lower than the previous bid value. Accordingly, the Company also recognized an other-than temporary impairment charge in the fourth quarter of 2023.

We identified the evaluation of other-than-temporary impairment charge for the offshore wind investment as a critical audit matter. It involves a significant degree of judgment and estimation, including identifying circumstances that indicate an impairment may exist at the equity method investment level, selecting discount rates used to determine fair values, and developing an estimate of discounted future cash flows expected from

investment operations or the sale of the investment. This required a high degree of auditor judgment and an increased extent of effort when performing audit procedures to evaluate the reasonableness of management's estimates and assumptions related to the price and the discount rate used in the discounted future cash flow method.

*How the Critical Audit Matter Was Addressed in the Audit*

Our audit procedures related to the discount rate used to determine fair market values and the estimates of discounted future cash flows expected from the sale of the investment.

- We tested the effectiveness of management's controls over impairment considerations including the aggregate investment in the projects, the sale price of the uncommitted lease area, and other related capitalized costs, as well as the discounted cash flow analysis for the offshore wind investments. We tested the effectiveness of management's controls over the initial recognition of the impairment charge.
- We evaluated the Company's disclosures related to the impairment charges disclosed in the financial statements.
- We evaluated the assumptions utilized within the discounted cash flow model used in the Company's impairment analysis.
- We made inquiries of management and evaluated the full impairment analysis from management that supported the other-than-temporary impairment charge in accordance with ASC 323-10-35-32A "Equity Method and Joint Ventures – Subsequent Measurement".

## **Management's Report on Internal Controls Over Financial Reporting**

### **The Connecticut Light and Power Company**

Management is responsible for the preparation, integrity, and fair presentation of the accompanying financial statements of The Connecticut Light and Power Company (CL&P or the Company) and of other sections of this annual report.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment.

Under the supervision and with the participation of the principal executive officer and principal financial officer, CL&P conducted an evaluation of the effectiveness of internal controls over financial reporting based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting were effective as of December 31, 2023.

February 14, 2024

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholder of The Connecticut Light and Power Company:

### Opinion on the Financial Statements

We have audited the accompanying balance sheets of The Connecticut Light and Power Company (the "Company") as of December 31, 2023 and 2022, the related statements of income, comprehensive income, common stockholder's equity, and cash flows, for each of the three years in the period ended December 31, 2023, and the related notes and the schedule listed in the Index at Item 15 of Part IV (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America.

### Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

### Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

#### ***Regulatory Accounting - Impact of Rate Regulation on the Financial Statements - Refer to Note 2 to the Financial Statements***

##### *Critical Audit Matter Description*

The Company is subject to rate regulation by the Federal Energy Regulatory Commission and the state public utility authority in Connecticut (the "Commissions"). The rate regulation by these Commissions is based on cost recovery. The Company's financial statements reflect the effects of the rate-making process. The rates charged to the customers are designed to collect the Company's cost to provide service, plus a return on investment.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. In some cases, the Company records regulatory assets before approval for recovery has been received from the applicable regulatory commission. The Company must use judgment to conclude that costs deferred as regulatory assets are probable of future recovery. The Company bases its conclusion on certain factors, including, but not limited to, regulatory precedent. Regulatory liabilities represent either revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers.

The Company uses judgment when recording regulatory assets and liabilities; however, regulatory commissions can reach different conclusions about the recovery of costs, and those conclusions could have a material impact on the Company's financial statements. Management believes it is probable that the Company will recover its investment in long-lived assets, including regulatory assets. If management were to determine that it could no longer apply the accounting guidance applicable to rate-regulated enterprises to the Company's operations, or if management could not conclude it is probable that costs would be recovered from customers in future rates, the costs would be charged to net income in the period in which the determination is made.

Accounting for the economics of rate-regulation impacts multiple financial statement line items and disclosures, such as regulated property, plant, and equipment, regulatory assets and liabilities, operating revenues, depreciation expense and amortization of regulatory assets. While management has indicated it expects to recover costs from customers through regulated rates, there is a risk that the Commissions will not approve full recovery of such costs or full recovery of all amounts invested in the Company and a reasonable return on that investment. We identified the impact of rate-regulation as a critical audit matter due to the significant judgments made by management to support its assertions about impact of future regulatory orders on the financial statements. Management judgments include assessing the probability of recovery in future rates of incurred costs and of a refund to customers. Given that management's accounting judgments are based on assumptions about the outcome of future decisions by the Commissions, auditing these judgments requires specialized knowledge of accounting for rate regulation and the rate setting process due to its inherent complexities.

*How the Critical Audit Matter Was Addressed in the Audit*

Our audit procedures related to the uncertainty of future decisions by the Commissions included the following, among others:

- We tested the effectiveness of management's controls over the evaluation of the likelihood of (1) the recovery in future rates of costs incurred as property, plant, and equipment and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We tested the effectiveness of management's controls over the initial recognition of amounts as property, plant, and equipment; regulatory assets or liabilities; and the monitoring and evaluation of regulatory developments that may affect the likelihood of recovering costs in future rates, a refund, or a future reduction in rates.
- We evaluated the Company's disclosures related to the applicability and impacts of rate regulation, including the balances recorded and regulatory developments disclosed in the financial statements.
- We read relevant regulatory orders issued by the Commissions for the Company and other public utilities, regulatory statutes, interpretations, procedural memorandums, filings made by intervenors, and other publicly available information to assess the likelihood of recovery in future rates or of a future refund or reduction in rates based on precedents of the Commissions' treatment of similar costs under similar circumstances. We evaluated the external information and compared it to management's recorded regulatory asset and liability balances for completeness.
- For regulatory matters in process, we inspected the Company's filings with the Commissions and the filings with the Commissions by intervenors that may impact the Company's future rates, for any evidence that might contradict management's assertions.
- We made inquiries of management, including legal counsel, and obtained the regulatory orders and analysis from management that support the probability of recovery, refund, or future reductions in rates for regulatory assets and liabilities to assess management's assertion that amounts are probable of recovery, refund, or a future reduction in rates.

/s/ Deloitte & Touche LLP

Hartford, Connecticut

## **Management's Report on Internal Controls Over Financial Reporting**

### **NSTAR Electric Company**

Management is responsible for the preparation, integrity, and fair presentation of the accompanying consolidated financial statements of NSTAR Electric Company and subsidiary (NSTAR Electric or the Company) and of other sections of this annual report.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment.

Under the supervision and with the participation of the principal executive officer and principal financial officer, NSTAR Electric conducted an evaluation of the effectiveness of internal controls over financial reporting based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting were effective as of December 31, 2023.

February 14, 2024

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholder of NSTAR Electric Company:

### Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of NSTAR Electric Company and subsidiary (the “Company”) as of December 31, 2023 and 2022, the related consolidated statements of income, comprehensive income, common stockholder’s equity, and cash flows, for each of the three years in the period ended December 31, 2023, and the related notes and the schedule listed in the Index at Item 15 of Part IV (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America.

### Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

### Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

#### ***Regulatory Accounting - Impact of Rate Regulation on the Financial Statements - Refer to Note 2 to the Financial Statements***

##### *Critical Audit Matter Description*

The Company is subject to rate regulation by the Federal Energy Regulatory Commission and the state public utility authority in Massachusetts (the “Commissions”). The rate regulation by these Commissions is based on cost recovery. The Company’s financial statements reflect the effects of the rate-making process. The rates charged to the customers are designed to collect the Company’s cost to provide service, plus a return on investment.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. In some cases, the Company records regulatory assets before approval for recovery has been received from the applicable regulatory commission. The Company must use judgment to conclude that costs deferred as regulatory assets are probable of future recovery. The Company bases its conclusion on certain factors, including, but not limited to, regulatory precedent. Regulatory liabilities represent either revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers.

The Company uses judgment when recording regulatory assets and liabilities; however, regulatory commissions can reach different conclusions about the recovery of costs, and those conclusions could have a material impact on the Company’s financial statements. Management believes it is probable that the Company will recover its investment in long-lived assets, including regulatory assets. If management were to determine that it could no longer apply the accounting guidance applicable to rate-regulated enterprises to the Company’s operations, or if management could not conclude it is probable that costs would be recovered from customers in future rates, the costs would be charged to net income in the period in which the determination is made.

Accounting for the economics of rate-regulation impacts multiple financial statement line items and disclosures, such as regulated property, plant, and equipment, regulatory assets and liabilities, operating revenues, depreciation expense and amortization of regulatory assets. While management has indicated it expects to recover costs from customers through regulated rates, there is a risk that the Commissions will not approve full recovery of such costs or full recovery of all amounts invested in the Company and a reasonable return on that investment. We identified the impact of rate-regulation as a critical audit matter due to the significant judgments made by management to support its assertions about impact of future regulatory orders on the financial statements. Management judgments include assessing the probability of recovery in future rates of incurred costs and of a refund to customers. Given that management's accounting judgments are based on assumptions about the outcome of future decisions by the Commissions, auditing these judgments requires specialized knowledge of accounting for rate regulation and the rate setting process due to its inherent complexities.

*How the Critical Audit Matter Was Addressed in the Audit*

Our audit procedures related to the uncertainty of future decisions by the Commissions included the following, among others:

- We tested the effectiveness of management's controls over the evaluation of the likelihood of (1) the recovery in future rates of costs incurred as property, plant, and equipment and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We tested the effectiveness of management's controls over the initial recognition of amounts as property, plant, and equipment; regulatory assets or liabilities; and the monitoring and evaluation of regulatory developments that may affect the likelihood of recovering costs in future rates, a refund, or a future reduction in rates.
- We evaluated the Company's disclosures related to the applicability and impacts of rate regulation, including the balances recorded and regulatory developments disclosed in the financial statements.
- We read relevant regulatory orders issued by the Commissions for the Company and other public utilities, regulatory statutes, interpretations, procedural memorandums, filings made by intervenors, and other publicly available information to assess the likelihood of recovery in future rates or of a future refund or reduction in rates based on precedents of the Commissions' treatment of similar costs under similar circumstances. We evaluated the external information and compared it to management's recorded regulatory asset and liability balances for completeness.
- For regulatory matters in process, we inspected the Company's filings with the Commissions and the filings with the Commissions by intervenors that may impact the Company's future rates, for any evidence that might contradict management's assertions.
- We made inquiries of management, including legal counsel, and obtained the regulatory orders and analysis from management that support the probability of recovery, refund, or future reductions in rates for regulatory assets and liabilities to assess management's assertion that amounts are probable of recovery, refund, or a future reduction in rates.

/s/ Deloitte & Touche LLP

Hartford, Connecticut

## **Management's Report on Internal Controls Over Financial Reporting**

### **Public Service Company of New Hampshire**

Management is responsible for the preparation, integrity, and fair presentation of the accompanying consolidated financial statements of Public Service Company of New Hampshire and subsidiaries (PSNH or the Company) and of other sections of this annual report.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment.

Under the supervision and with the participation of the principal executive officer and principal financial officer, PSNH conducted an evaluation of the effectiveness of internal controls over financial reporting based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting were effective as of December 31, 2023.

February 14, 2024

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholder of Public Service Company of New Hampshire:

### Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Public Service Company of New Hampshire and subsidiaries (the "Company") as of December 31, 2023 and 2022, the related consolidated statements of income, comprehensive income, common stockholder's equity, and cash flows, for each of the three years in the period ended December 31, 2023, and the related notes and the schedule listed in the Index at Item 15 of Part IV (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America.

### Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

### Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

#### *Regulatory Accounting - Impact of Rate Regulation on the Financial Statements - Refer to Note 2 to the Financial Statements*

##### *Critical Audit Matter Description*

The Company is subject to rate regulation by the Federal Energy Regulatory Commission and the state public utility authority in New Hampshire (the "Commissions"). The rate regulation by these Commissions is based on cost recovery. The Company's financial statements reflect the effects of the rate-making process. The rates charged to the customers are designed to collect the Company's cost to provide service, plus a return on investment.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. In some cases, the Company records regulatory assets before approval for recovery has been received from the applicable regulatory commission. The Company must use judgment to conclude that costs deferred as regulatory assets are probable of future recovery. The Company bases its conclusion on certain factors, including, but not limited to, regulatory precedent. Regulatory liabilities represent either revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers.

The Company uses judgment when recording regulatory assets and liabilities; however, regulatory commissions can reach different conclusions about the recovery of costs, and those conclusions could have a material impact on the Company's financial statements. Management believes it is probable that the Company will recover its investment in long-lived assets, including regulatory assets. If management were to determine that it could no longer apply the accounting guidance applicable to rate-regulated enterprises to the Company's operations, or if management could not conclude it is probable that costs would be recovered from customers in future rates, the costs would be charged to net income in the period in which the determination is made.

Accounting for the economics of rate-regulation impacts multiple financial statement line items and disclosures, such as regulated property, plant, and equipment, regulatory assets and liabilities, operating revenues, depreciation expense and amortization of regulatory assets. While management has indicated it expects to recover costs from customers through regulated rates, there is a risk that the Commissions will not approve full recovery of such costs or full recovery of all amounts invested in the Company and a reasonable return on that investment. We identified the impact of rate-regulation as a critical audit matter due to the significant judgments made by management to support its assertions about impact of future regulatory orders on the financial statements. Management judgments include assessing the probability of recovery in future rates of incurred costs and of a refund to customers. Given that management's accounting judgments are based on assumptions about the outcome of future decisions by the Commissions, auditing these judgments requires specialized knowledge of accounting for rate regulation and the rate setting process due to its inherent complexities.

*How the Critical Audit Matter Was Addressed in the Audit*

Our audit procedures related to the uncertainty of future decisions by the Commissions included the following, among others:

- We tested the effectiveness of management's controls over the evaluation of the likelihood of (1) the recovery in future rates of costs incurred as property, plant, and equipment and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We tested the effectiveness of management's controls over the initial recognition of amounts as property, plant, and equipment; regulatory assets or liabilities; and the monitoring and evaluation of regulatory developments that may affect the likelihood of recovering costs in future rates, a refund, or a future reduction in rates.
- We evaluated the Company's disclosures related to the applicability and impacts of rate regulation, including the balances recorded and regulatory developments disclosed in the financial statements.
- We read relevant regulatory orders issued by the Commissions for the Company and other public utilities, regulatory statutes, interpretations, procedural memorandums, filings made by intervenors, and other publicly available information to assess the likelihood of recovery in future rates or of a future refund or reduction in rates based on precedents of the Commissions' treatment of similar costs under similar circumstances. We evaluated the external information and compared it to management's recorded regulatory asset and liability balances for completeness.
- For regulatory matters in process, we inspected the Company's filings with the Commissions and the filings with the Commissions by intervenors that may impact the Company's future rates, for any evidence that might contradict management's assertions.
- We made inquiries of management, including legal counsel, and obtained the regulatory orders and analysis from management that support the probability of recovery, refund, or future reductions in rates for regulatory assets and liabilities to assess management's assertion that amounts are probable of recovery, refund, or a future reduction in rates.

The accompanying notes are an integral part of these consolidated financial statements.

**EVERSOURCE ENERGY AND SUBSIDIARIES**  
**THE CONNECTICUT LIGHT AND POWER COMPANY**  
**NSTAR ELECTRIC COMPANY AND SUBSIDIARY**  
**PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE AND SUBSIDIARIES**  
  
**COMBINED NOTES TO FINANCIAL STATEMENTS**

Refer to the Glossary of Terms included in this combined Annual Report on Form 10-K for abbreviations and acronyms used throughout the combined notes to the financial statements.

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**A. About Eversource, CL&P, NSTAR Electric and PSNH**

Eversource Energy is a public utility holding company primarily engaged, through its wholly-owned regulated utility subsidiaries, in the energy delivery business. Eversource Energy's wholly-owned regulated utility subsidiaries consist of CL&P, NSTAR Electric and PSNH (electric utilities), Yankee Gas, NSTAR Gas and EGMA (natural gas utilities), and Aquarion (water utilities). Eversource provides energy delivery and/or water service to approximately 4.4 million electric, natural gas and water customers through twelve regulated utilities in Connecticut, Massachusetts and New Hampshire.

Eversource, CL&P, NSTAR Electric and PSNH are reporting companies under the Securities Exchange Act of 1934. Eversource Energy is a public utility holding company under the Public Utility Holding Company Act of 2005. Arrangements among the regulated electric companies and other Eversource companies, outside agencies and other utilities covering interconnections, interchange of electric power and sales of utility property are subject to regulation by the FERC. Eversource's regulated companies are subject to regulation of rates, accounting and other matters by the FERC and/or applicable state regulatory commissions (the PURA for CL&P, Yankee Gas and Aquarion, the DPU for NSTAR Electric, NSTAR Gas, EGMA and Aquarion, and the NHPUC for PSNH and Aquarion).

CL&P, NSTAR Electric and PSNH furnish franchised retail electric service in Connecticut, Massachusetts and New Hampshire, respectively. NSTAR Gas and EGMA are engaged in the distribution and sale of natural gas to customers within Massachusetts and Yankee Gas is engaged in the distribution and sale of natural gas to customers within Connecticut. Aquarion is engaged in the collection, treatment and distribution of water in Connecticut, Massachusetts and New Hampshire. CL&P, NSTAR Electric and PSNH's results include the operations of their respective distribution and transmission businesses. The distribution business also includes the results of NSTAR Electric's solar power facilities.

Eversource Service, Eversource's service company, and several wholly-owned real estate subsidiaries of Eversource, provide support services to Eversource, including its regulated companies.

**B. Basis of Presentation**

The consolidated financial statements of Eversource, NSTAR Electric and PSNH include the accounts of each of their respective subsidiaries. Intercompany transactions have been eliminated in consolidation. The accompanying consolidated financial statements of Eversource, NSTAR Electric and PSNH and the financial statements of CL&P are herein collectively referred to as the "financial statements."

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

CYAPC and YAEC are inactive regional nuclear power companies engaged in the long-term storage of their spent nuclear fuel. Eversource consolidates the operations of CYAPC and YAEC because CL&P's, NSTAR Electric's and PSNH's combined ownership and voting interests in each of these entities is greater than 50 percent. Intercompany transactions between CL&P, NSTAR Electric, PSNH and the CYAPC and YAEC companies have been eliminated in consolidation of the Eversource financial statements.

Eversource holds several equity ownership interests that are not consolidated and are accounted for under the equity method, including 50 percent ownership interests in three offshore wind projects and a tax equity investment in one of the projects. See Note 6, "Investments in Unconsolidated Affiliates," for further information on Eversource's equity method investments and impairment charges recorded in 2023 to the offshore wind investments carrying value.

In accordance with accounting guidance on noncontrolling interests in consolidated financial statements, the Preferred Stock of CL&P and the Preferred Stock of NSTAR Electric, which are not owned by Eversource or its consolidated subsidiaries and are not subject to mandatory redemption, have been presented as noncontrolling interests in the financial statements of Eversource. The Preferred Stock of CL&P and the Preferred Stock of NSTAR Electric are considered to be temporary equity and have been classified between liabilities and permanent shareholders' equity on the balance sheets of Eversource, CL&P and NSTAR Electric due to a provision in the preferred stock agreements of both CL&P and NSTAR Electric that grant preferred stockholders the right to elect a majority of the CL&P and NSTAR Electric Boards of Directors, respectively, should certain conditions exist, such as if preferred dividends are in arrears for a specified amount of time. The Net Income reported in the statements of income and cash flows represents net income prior to apportionment to noncontrolling interests, which is represented by dividends on preferred stock of CL&P and NSTAR Electric.

Eversource's utility subsidiaries' electric, natural gas and water distribution and transmission businesses are subject to rate-regulation that is based on cost recovery and meets the criteria for application of accounting guidance for entities with rate-regulated operations, which considers the effect of regulation on the differences in the timing of the recognition of certain revenues and expenses from those of other businesses and industries. See Note 2, "Regulatory Accounting," for further information.

As of December 31, 2023 and 2022, Eversource's carrying amount of goodwill was \$4.53 billion and \$4.52 billion, respectively. Eversource performs an assessment for possible impairment of its goodwill at least annually. Eversource completed its annual goodwill impairment assessment for each of its reporting units as of October 1, 2023 and determined that no impairment exists. See Note 24, "Goodwill," for further information.

Certain reclassifications of prior year data were made in the accompanying financial statements to conform to the current year presentation.

**C. Cash and Cash Equivalents**

Cash includes cash on hand. At the end of each reporting period, any overdraft amounts are reclassified from Cash to Accounts Payable on the balance sheets. Cash Equivalents include short-term cash investments that are highly liquid in nature and have original maturities of three months or less.

**D. Allowance for Uncollectible Accounts**

Receivables, Net on the balance sheets primarily includes trade receivables from retail customers and customers related to wholesale transmission contracts, wholesale market sales, sales of RECs, and property rentals. Receivables, Net also includes customer receivables for the purchase of electricity from a competitive third party supplier, the current portion of customer energy efficiency loans, property damage receivables and other miscellaneous receivables. There is no material concentration of receivables.

Receivables are recorded at amortized cost, net of a credit loss provision (or allowance for uncollectible accounts). The current expected credit loss (CECL) model is applied to receivables for purposes of calculating the allowance for uncollectible accounts. This model is based on expected losses and results in the recognition of estimated expected credit losses, including uncollectible amounts for both billed and unbilled revenues, over the life of the receivable at the time a receivable is recorded.

The allowance for uncollectible accounts is determined based upon a variety of judgments and factors, including an aging-based quantitative assessment that applies an estimated uncollectible percentage to each receivable aging category. Factors in determining credit loss include historical collection, write-off experience, analysis of delinquency statistics, and management's assessment of collectability from customers, including current economic conditions, customer payment trends, the impact on customer bills because of energy usage trends and changes in rates, flexible payment plans and financial hardship arrearage management programs offered to customers, reasonable forecasts, and expectations of future collectability and collection efforts. Management continuously assesses the collectability of receivables and adjusts estimates based on actual experience and future expectations based on economic conditions, collection efforts and other factors. Management also monitors the aging analysis of receivables to determine if there are changes in the collections of accounts receivable. Receivable balances are written off against the allowance for uncollectible accounts when the customer accounts are no longer in service and these balances are deemed to be uncollectible. Management concluded that the reserve balance as of December 31, 2023 adequately reflected the collection risk and net realizable value for its receivables.

The PURA allows CL&P and Yankee Gas to accelerate the recovery of accounts receivable balances attributable to qualified customers under financial or medical duress (uncollectible hardship accounts receivable) outstanding for greater than 180 days and 90 days, respectively. The DPU allows NSTAR Electric, NSTAR Gas and EGMA to recover in rates amounts associated with certain uncollectible hardship accounts receivable. These uncollectible hardship customer account balances are included in Regulatory Assets or Other Long-Term Assets on the balance sheets. Hardship customers are protected from shut-off in certain circumstances, and historical collection experience has reflected a higher default risk as compared to the rest of the receivable population. Management uses a higher credit risk profile for this pool of trade receivables as compared to non-hardship receivables. The allowance for uncollectible hardship accounts is included in the total uncollectible allowance balance.

The total allowance for uncollectible accounts is included in Receivables, Net on the balance sheets. The activity in the allowance for uncollectible accounts by portfolio segment is as follows:

| (Millions of Dollars)                       | Eversource        |   |                 | CL&P              |   |                 | NSTAR Electric    |   |                 | PSNH                           |
|---|-------------------|---|-----------------|-------------------|---|-----------------|-------------------|---|-----------------|--------------------------------|

| Balance as of December 31, 2023             | \$ 366.8          | \$ 187.7                                    | \$ 554.5        | \$ 259.7          | \$ 36.3                                     | \$ 296.0        | \$ 43.6           | \$ 53.4                                     | \$ 97.0         | \$ 14.3                        |

<sup>(1)</sup> These expected credit losses are deferred as regulatory costs on the balance sheets, as these amounts are ultimately recovered in rates. Amounts include uncollectible costs for hardship accounts and other customer receivables, including uncollectible amounts related to uncollectible energy supply costs and COVID-19. The increase in the allowance for uncollectible hardship accounts in both 2023 and 2022 at Eversource and CL&P primarily relates to increased customer enrollment in disconnection prevention programs in Connecticut.

<sup>(2)</sup> In connection with PSNH's pole purchase agreement on May 1, 2023, the purchase price included the forgiveness of previously reserved receivables for reimbursement of operation and maintenance and vegetation management costs.

#### E. Transfer of Energy Efficiency Loans

CL&P transferred a portion of its energy efficiency customer loan portfolio to outside lenders in order to make additional loans to customers. CL&P remains the servicer of the loans and will transmit customer payments to the lenders, with a maximum amount outstanding under this program of \$55 million. The amounts of the loans are included in Receivables, Net and Other Long-Term Assets, and are offset by Other Current Liabilities and Other Long-Term Liabilities on CL&P's balance sheet. The current and long-term portions totaled \$8.5 million and \$14.5 million, respectively, as of December 31, 2023, and \$9.1 million and \$13.0 million, respectively, as of December 31, 2022.

#### F. Materials, Supplies, Natural Gas and REC Inventory

Materials, Supplies, Natural Gas and REC Inventory include materials and supplies purchased primarily for construction or operation and maintenance purposes, natural gas purchased for delivery to customers, and RECs. Inventory is valued at the lower of cost or net realizable value. RECs are purchased from suppliers of renewable sources of generation and are used to meet state mandated Renewable Portfolio Standards requirements. The carrying amounts of materials and supplies, natural gas inventory, and RECs, which are included in Current Assets on the balance sheets, were as follows:

| (Millions of Dollars)  | As of December 31, |          |                |         |            |         |                |         |

#### G. Fair Value Measurements

Fair value measurement guidance is applied to derivative contracts that are not elected or designated as "normal purchases" or "normal sales" (normal) and to marketable securities held in trusts. Fair value measurement guidance is also applied to valuations of the investments used to calculate the funded status of pension and PBOP plans, the nonrecurring fair value measurements of nonfinancial assets such as goodwill, long-lived assets, equity method investments, AROs, and in the valuation of business combinations and asset acquisitions. The fair value measurement guidance was also applied in estimating the fair value of preferred stock, long-term debt and RRBs.

*Fair Value Hierarchy:* In measuring fair value, Eversource uses observable market data when available in order to minimize the use of unobservable inputs. Inputs used in fair value measurements are categorized into three fair value hierarchy levels for disclosure purposes. The entire fair value measurement is categorized based on the lowest level of input that is significant to the fair value measurement. Eversource evaluates the classification of assets and liabilities measured at fair value on a quarterly basis.

The levels of the fair value hierarchy are described below:

Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 - Inputs are quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations in which all significant inputs are observable.

Level 3 - Quoted market prices are not available. Fair value is derived from valuation techniques in which one or more significant inputs or assumptions are unobservable. Where possible, valuation techniques incorporate observable market inputs that can be validated to external sources such as industry exchanges, including prices of energy and energy-related products.

Uncategorized - Investments that are measured at net asset value are not categorized within the fair value hierarchy.

*Determination of Fair Value:* The valuation techniques and inputs used in Eversource's fair value measurements are described in Note 4, "Derivative Instruments," Note 5, "Marketable Securities," Note 6, "Investments in Unconsolidated Affiliates," Note 7, "Asset Retirement Obligations," Note 11A, "Employee Benefits – Pension Benefits and Postretirement Benefits Other Than Pension," Note 15, "Fair Value of Financial Instruments," and Note 24, "Goodwill," to the financial statements.

#### **H. Derivative Accounting**

Many of the electric and natural gas companies' contracts for the purchase and sale of energy or energy-related products are derivatives. The accounting treatment for energy contracts entered into varies and depends on the intended use of the particular contract and on whether or not the contract is a derivative.

The application of derivative accounting is complex and requires management judgment in the following respects: identification of derivatives and embedded derivatives, election and designation of a contract as normal, and determination of the fair value of derivative contracts. All of these judgments can have a significant impact on the financial statements. The judgment applied in the election of a contract as normal (and resulting accrual accounting) includes the conclusion that it is probable at the inception of the contract and throughout its term that it will result in physical delivery of the underlying product and that the quantities will be used or sold by the business in the normal course of business. If facts and circumstances change and management can no longer support this conclusion, then a contract cannot be considered normal, accrual accounting is terminated, and fair value accounting is applied prospectively.

The fair value of derivative contracts is based upon the contract terms and conditions and the underlying market price or fair value per unit. When quantities are not specified in the contract, the Company determines whether the contract has a determinable quantity by using amounts referenced in default provisions and other relevant sections of the contract. The fair value of derivative assets and liabilities with the same counterparty are offset and recorded as a net derivative asset or liability on the balance sheets.

Regulatory assets or regulatory liabilities are recorded to offset the fair values of these derivative contracts related to energy and energy-related products, as contract settlements are recovered from, or refunded to, customers in future rates. All changes in the fair value of these derivative contracts are recorded as regulatory assets or liabilities and do not impact net income.

For further information regarding derivative contracts, see Note 4, "Derivative Instruments," to the financial statements.

#### **I. Operating Expenses**

The cost of natural gas included in Purchased Power, Purchased Natural Gas and Transmission on the statements of income were as follows:

| (Millions of Dollars)            | For the Years Ended December 31, |            |          |
|----------------------------------|----------------------------------|------------|----------|
|                                  | 2023                             | 2022       | 2021     |
| Eversource - Cost of Natural Gas | \$ 792.2                         | \$ 1,010.2 | \$ 718.6 |

#### **J. Allowance for Funds Used During Construction**

AFUDC represents the cost of borrowed and equity funds used to finance construction and is included in the cost of the electric, natural gas and water companies' utility plant on the balance sheet. The portion of AFUDC attributable to borrowed funds is recorded as a reduction of Interest Expense, and the AFUDC related to equity funds is recorded as Other Income, Net on the statements of income. AFUDC costs are recovered from customers over the service life of the related plant in the form of increased revenue collected as a result of higher depreciation expense.

The average AFUDC rate is based on a FERC-prescribed formula using the cost of a company's short-term financings and capitalization (preferred stock, long-term debt and common equity), as appropriate. The average rate is applied to average eligible CWIP amounts to calculate AFUDC.

AFUDC costs and the weighted-average AFUDC rates were as follows:

| Eversource<br>(Millions of Dollars, except percentages) | For the Years Ended December 31, |         |         |
|---|----------------------------------|---------|---------|
|   | 2023                             | 2022    | 2021    |
| Borrowed Funds  | \$ 44.6                          | \$ 21.8 | \$ 18.4 |

| Interest Income  | 9.0                              | 60.6           | 5.3     | 6.5     | 30.7           | 3.1     | 5.9     | 13.4           | 2.4     |
| Other  | 0.1                              | 0.6            | 0.4     | 0.1     | 0.7            | 0.1     | 0.1     | 0.7            | 0.2     |
| Total Other Income, Net  | \$ 61.6                          | \$ 164.1       | \$ 26.6 | \$ 83.3 | \$ 142.7       | \$ 32.7 | \$ 30.2 | \$ 74.8        | \$ 14.6 |

<sup>(1)</sup> See Note 11A, "Employee Benefits – Pension Benefits and Postretirement Benefits Other Than Pension," for the components of net periodic benefit income/expense for the Pension, SERP and PBOP Plans. The non-service related components of pension, SERP and PBOP benefit income/expense, after capitalization or deferral, are presented as non-operating income and recorded in Other Income, Net on the statements of income.

<sup>(2)</sup> Eversource's equity method investment in a renewable energy fund was liquidated in March 2023. Liquidation proceeds in excess of the carrying value were recorded in 2023 within Other in the table above. See Note 6, "Investments in Unconsolidated Affiliates," for further information. For the years ended December 31, 2022 and 2021, pre-tax income of \$12.2 million and \$2.1 million, respectively, associated with this investment was included in Equity in Earnings of Unconsolidated Affiliates within Other Income, Net in the table above.

**L. Other Taxes**

Eversource's companies that serve customers in Connecticut collect gross receipts taxes levied by the state of Connecticut from their customers. These gross receipts taxes are recorded separately with collections in Operating Revenues and with payments in Taxes Other Than Income Taxes on the statements of income as follows:

| Eversource<br>(Millions of Dollars) | For the Years Ended December 31, |          |          |
|-------------------------------------|----------------------------------|----------|----------|
|                                     | 2023                             | 2022     | 2021     |
| Eversource                          | \$ 202.9                         | \$ 194.7 | \$ 181.9 |
| CL&P                                | 174.9                            | 166.1    | 158.1    |

As agents for state and local governments, Eversource's companies that serve customers in Connecticut and Massachusetts collect certain sales taxes that are recorded on a net basis with no impact on the statements of income.

**M. Supplemental Cash Flow Information**

| Other Long-Term Assets   | 17.3               | —       | —              | 3.2     | 19.6       | —       | —              | 3.2     |
| Cash, Cash Equivalents and Restricted Cash as reported on the Statements of Cash Flows | \$ 166.4           | \$ 12.2 | \$ 22.8        | \$ 35.0 | \$ 521.8   | \$ 20.3 | \$ 345.3       | \$ 36.8 |

Special Deposits represent cash collections related to the PSNH RRB customer charges that are held in trust, required ISO-NE cash deposits, cash held in escrow accounts, and CYAPC and YAEC cash balances. Special Deposits are included in Current Assets on the balance sheets. As of both December 31, 2023 and December 31, 2022, restricted cash included in Marketable Securities represented money market funds held in restricted trusts to fund CYAPC and YAEC's spent nuclear fuel storage obligations. As of December 31, 2022, restricted cash included in Marketable Securities also included money market funds held in trusts to fund certain non-qualified executive benefits.

Eversource's restricted cash includes an Energy Relief Fund for energy efficiency and clean energy measures in the Merrimack Valley established under the terms of the EGMA 2020 settlement agreement. This restricted cash held in escrow accounts included \$20.0 million recorded as short-term in Special Deposits as of both December 31, 2023 and December 31, 2022, and \$14.1 million and \$15.9 million recorded in Other Long-Term Assets on the balance sheets as of December 31, 2023 and December 31, 2022, respectively.

**N. Related Parties**

Eversource Service, Eversource's service company, provides centralized accounting, administrative, engineering, financial, information technology, legal, operational, planning, purchasing, tax, and other services to Eversource's companies. The Rocky River Realty Company and Properties, Inc., two other Eversource subsidiaries, construct, acquire or lease some of the property and facilities used by Eversource's companies.

As of December 31, 2022, CL&P, NSTAR Electric and PSNH had long-term receivables from Eversource Service in the amounts of \$25.0 million, \$5.5 million and \$3.8 million, which were included in Other Long-Term Assets on the balance sheets. These amounts related to the funding of investments held in trust by Eversource Service in connection with certain postretirement benefits for CL&P, NSTAR Electric and PSNH employees and were eliminated in consolidation on the Eversource financial statements. As of December 31, 2023, these intercompany balances were settled.

Included in the CL&P, NSTAR Electric and PSNH balance sheets as of December 31, 2023 and 2022 were Accounts Receivable from Affiliated Companies and Accounts Payable to Affiliated Companies relating to transactions between CL&P, NSTAR Electric and PSNH and other subsidiaries that are wholly-owned by Eversource. These amounts have been eliminated in consolidation on the Eversource financial statements.

The Eversource Energy Foundation is an independent not-for-profit charitable entity and is not included in the consolidated financial statements of Eversource as the Company does not have title to, and cannot receive contributions back from, the Eversource Energy Foundation's assets. Eversource made contributions to the Eversource Energy Foundation of \$20.0 million in 2023 and \$8.0 million in 2022, and did not make any contributions in 2021.

## 2. REGULATORY ACCOUNTING

Eversource's utility companies are subject to rate regulation that is based on cost recovery and meets the criteria for application of accounting guidance for rate-regulated operations, which considers the effect of regulation on the timing of the recognition of certain revenues and expenses. The regulated companies' financial statements reflect the effects of the rate-making process. The rates charged to the customers of Eversource's regulated companies are designed to collect each company's costs to provide service, plus a return on investment.

The application of accounting guidance for rate-regulated enterprises results in recording regulatory assets and liabilities. Regulatory assets represent the deferral of incurred costs that are probable of future recovery in customer rates. Regulatory assets are amortized as the incurred costs are recovered through customer rates. Regulatory liabilities represent either revenues received from customers to fund expected costs that have not yet been incurred or probable future refunds to customers.

Management believes it is probable that each of the regulated companies will recover its respective investments in long-lived assets and the regulatory assets that have been recorded. If management were to determine that it could no longer apply the accounting guidance applicable to rate-regulated enterprises, or if management could not conclude it is probable that costs would be recovered from customers in future rates, the applicable costs would be charged to net income in the period in which the determination is made.

*Regulatory Assets:* The components of regulatory assets were as follows:

|                                   | As of December 31, |            |                |          |            |            |                |          |
|-----------------------------------|--------------------|------------|----------------|----------|------------|------------|----------------|----------|
|                                   | 2023               |            | 2022           |          | 2023       |            | 2022           |          |
| (Millions of Dollars)             | Eversource         | CL&P       | NSTAR Electric | PSNH     | Eversource | CL&P       | NSTAR Electric | PSNH     |
| Storm Costs, Net                  | \$ 1,785.9         | \$ 896.6   | \$ 609.1       | \$ 280.2 | \$ 1,379.1 | \$ 799.3   | \$ 484.4       | \$ 95.4  |
| Regulatory Tracking Mechanisms    | 1,319.2            | 354.5      | 482.9          | 182.2    | 1,075.3    | 216.8      | 391.5          | 73.7     |
| Benefit Costs                     | 1,117.3            | 197.4      | 336.7          | 79.3     | 921.7      | 156.7      | 299.5          | 56.6     |
| Income Taxes, Net                 | 912.4              | 512.6      | 128.6          | 16.4     | 853.3      | 491.1      | 115.6          | 16.0     |
| Securitized Stranded Costs        | 392.5              | —          | —              | 392.5    | 435.7      | —          | —              | 435.7    |
| Goodwill-related                  | 264.1              | —          | 226.7          | —        | 281.0      | —          | 241.2          | —        |
| Asset Retirement Obligations      | 137.9              | 38.5       | 72.3           | 4.7      | 127.9      | 35.9       | 68.2           | 4.4      |
| Derivative Liabilities            | 120.9              | 120.9      | —              | —        | 181.8      | 181.8      | —              | —        |
| Other Regulatory Assets           | 339.0              | 22.7       | 101.6          | 8.0      | 322.5      | 26.2       | 114.0          | 14.4     |
| Total Regulatory Assets           | 6,389.2            | 2,143.2    | 1,957.9        | 963.3    | 5,578.3    | 1,907.8    | 1,714.4        | 696.2    |
| Less: Current Portion             | 1,674.2            | 480.4      | 676.1          | 189.5    | 1,335.5    | 314.1      | 492.8          | 102.2    |
| Total Long-Term Regulatory Assets | \$ 4,715.0         | \$ 1,662.8 | \$ 1,281.8     | \$ 773.8 | \$ 4,242.8 | \$ 1,593.7 | \$ 1,221.6     | \$ 594.0 |

**Storm Costs, Net:** The storm cost deferrals relate to costs incurred for storm events at CL&P, NSTAR Electric and PSNH that each company expects to recover from customers. A storm must meet certain criteria to qualify for deferral and recovery with the criteria specific to each state jurisdiction and utility company. Once a storm qualifies for recovery, all qualifying expenses incurred during storm restoration efforts are deferred and recovered from customers. Costs for storms that do not meet the specific criteria are expensed as incurred. In addition to storm restoration costs, CL&P and PSNH are each allowed to recover pre-staging storm costs. Management believes all storm costs deferred were prudently incurred and meet the criteria for specific cost recovery in Connecticut, Massachusetts and New Hampshire, and that recovery from customers is probable through the applicable regulatory recovery processes. Each electric utility company either recovers a carrying charge on its deferred storm cost regulatory asset balance or the regulatory asset balance is included in rate base.

Multiple tropical and severe storms over the past several years have caused extensive damage to Eversource's electric distribution systems resulting in significant numbers and durations of customer outages, along with significant pre-staging costs. Storms in 2023 that qualified for future recovery resulted in deferred storm restoration costs and pre-staging costs totaling \$542 million at Eversource, including \$178 million at CL&P, \$192 million at NSTAR Electric, and \$172 million at PSNH. Management believes that all of these storm costs were prudently incurred and meet the criteria for specific cost recovery. Of Eversource's total deferred storm costs, \$1.75 billion either have yet to be filed with the applicable regulatory commission, are pending regulatory approval, or are subject to prudence review (including \$975 million at CL&P, \$526 million at NSTAR Electric and \$246 million at PSNH) as of December 31, 2023. These storm cost totals exclude storm funding amounts that are collected in rates, which are recorded as a reduction to the deferred storm cost regulatory asset balance.

CL&P, NSTAR Electric and PSNH are seeking approval of their deferred storm restoration costs through the applicable regulatory recovery process. As part of CL&P's October 1, 2021 settlement agreement, CL&P agreed to freeze its current base distribution rates (including storm costs) until no earlier than January 1, 2024. On December 22, 2023, CL&P initiated a docket seeking a prudence review of approximately \$634 million of catastrophic storm costs for twenty-four weather events from January 1, 2018 to December 31, 2021. In the filing, CL&P requested PURA establish a rate to collect \$50 million annually from customers from the date of the final decision in this proceeding. This rate

would be effective until the next distribution rate case and would replenish the under-collected storm reserve and reduce future carrying charges for customers.

CL&P's storm events include the August 4, 2020 Tropical Storm Isaias, which resulted in deferred storm restoration costs of approximately \$232 million at CL&P as of December 31, 2023. Although in 2021 PURA found that CL&P's performance in its preparation for, and response to, Tropical Storm Isaias fell below applicable performance standards in certain instances, CL&P believes it presented in its 2023 storm filing, credible evidence demonstrating there is no reasonably close causal connection between the alleged sub-standard performance and the storm costs incurred. While it is possible that some amount of storm costs may be disallowed by PURA, any such amount cannot be estimated at this time. CL&P continues to believe that these storm restoration costs associated with Tropical Storm Isaias were prudently incurred and meet the criteria for cost recovery; and as a result, management does not expect the storm cost review by PURA to have a material impact on the financial position or results of operations of CL&P.

**Regulatory Tracking Mechanisms:** The regulated companies' approved rates are designed to recover costs incurred to provide service to customers. The regulated companies recover certain of their costs on a fully-reconciling basis through regulatory commission-approved tracking mechanisms. The differences between the costs incurred (or the rate recovery allowed) and the actual revenues are recorded as regulatory assets (for undercollections) or as regulatory liabilities (for overcollections) to be included in future customer rates each year. Carrying charges are recovered in rates on all material regulatory tracking mechanisms.

The electric and natural gas distribution companies recover, on a fully reconciling basis, the costs associated with the procurement of energy and natural gas supply, electric transmission related costs from FERC-approved transmission tariffs, energy efficiency programs, low income assistance programs, certain uncollectible accounts receivable for hardship customers, restructuring and stranded costs as a result of deregulation (including securitized RRB charges), certain capital tracking mechanisms for infrastructure improvements, and additionally for the Massachusetts utilities, pension and PBOP benefits, net metering for distributed generation, and solar-related programs.

CL&P, NSTAR Electric, Yankee Gas, NSTAR Gas, EGMA and the Aquarion Water Company of Connecticut each have a regulatory commission approved revenue decoupling mechanism. Distribution revenues are decoupled from customer sales volumes, where applicable, which breaks the relationship between sales volumes and revenues. Each company reconciles its annual base distribution rate recovery amount to the pre-established levels of baseline distribution delivery service revenues. Any difference between the allowed level of distribution revenue and the actual amount realized during a 12-month period is adjusted through rates in the following period.

**Benefit Costs:** Deferred benefit costs represent unrecognized actuarial losses and gains and unrecognized prior service costs and credits attributable to Eversource's Pension, SERP and PBOP Plans. The regulated companies record actuarial losses and gains and prior service costs and credits arising at the December 31st remeasurement date of the funded status of the benefit plans as a regulatory asset or regulatory liability in lieu of a charge to Accumulated Other Comprehensive Income/(Loss), reflecting ultimate recovery from customers through rates. The regulatory asset or regulatory liability is amortized with the recognition of actuarial losses and gains and prior service costs and credits to net periodic benefit expense/income over the estimated average future employee service period using the corridor approach. Regulatory accounting is also applied to the portions of Eversource's service company costs that support the regulated companies, as these amounts are also recoverable. As these regulatory assets or regulatory liabilities do not represent a cash outlay for the regulated companies, no carrying charge is recovered from customers. See Note 11A, "Employee Benefits - Pension Benefits and Postretirement Benefits Other Than Pension," for further information on regulatory benefit plan amounts arising and amortized during the year.

Eversource, CL&P, NSTAR Electric, and PSNH recover benefit costs related to their distribution and transmission operations from customers in rates as allowed by their applicable regulatory commissions. NSTAR Electric, NSTAR Gas and EGMA recover qualified pension and PBOP expenses related to their distribution operations through a rate reconciling mechanism that fully tracks the change in net pension and PBOP expenses each year. The electric transmission companies' rates provide for an annual true-up of estimated to actual costs, which include pension and PBOP expenses.

**Income Taxes, Net:** The tax effect of temporary book-tax differences (differences between the periods in which transactions affect income in the financial statements and the periods in which they affect the determination of taxable income, including those differences relating to uncertain tax positions) is accounted for in accordance with the rate-making treatment of the applicable regulatory commissions and accounting guidance for income taxes. Differences in income taxes between the accounting guidance and the rate-making treatment of the applicable regulatory commissions are recorded as regulatory assets. As these assets are offset by deferred income tax liabilities, no carrying charge is collected. The amortization period of these assets varies depending on the nature and/or remaining life of the underlying assets and liabilities. For further information regarding income taxes, see Note 12, "Income Taxes," to the financial statements.

**Securitized Stranded Costs:** In 2018, a subsidiary of PSNH issued \$635.7 million of securitized RRBs to finance PSNH's unrecovered remaining costs associated with the divestiture of its generation assets. Securitized regulatory assets, which are not earning an equity return, are being recovered over the amortization period of the associated RRBs. The PSNH RRBs are expected to be repaid by February 1, 2033. For further information, see Note 10, "Rate Reduction Bonds and Variable Interest Entities," to the financial statements.

**Goodwill-related:** The goodwill regulatory asset originated from a 1999 transaction, and the DPU allowed its recovery in NSTAR Electric and NSTAR Gas rates. This regulatory asset is currently being amortized and recovered from customers in rates without a carrying charge over a 40-year period, and as of December 31, 2023, there were 16 years of amortization remaining.

**Asset Retirement Obligations:** The costs associated with the depreciation of the regulated companies' ARO assets and accretion of the ARO liabilities are recorded as regulatory assets in accordance with regulatory accounting guidance. The regulated companies' ARO assets, regulatory assets, and ARO liabilities offset and are excluded from rate base. These costs are being recovered over the life of the underlying property, plant and equipment.

**Derivative Liabilities:** Regulatory assets are recorded as an offset to derivative liabilities and relate to the fair value of contracts used to purchase energy and energy-related products that will be recovered from customers in future rates. These assets are excluded from rate base and are being recovered as the actual settlements occur over the duration of the contracts. See Note 4, "Derivative Instruments," to the financial statements for further information on these contracts.

**Other Regulatory Assets:** Other Regulatory Assets primarily include environmental remediation costs, certain uncollectible accounts receivable for hardship customers, certain exogenous property taxes and merger-related costs allowed for recovery, contractual obligations associated with the spent nuclear fuel storage costs of the CYAPC, YAEC and MYAPC decommissioned nuclear power facilities, water tank painting costs, losses associated with the reacquisition or redemption of long-term debt, removal costs incurred that exceed amounts collected from customers, and various other items.

**Regulatory Costs in Other Long-Term Assets:** Eversource's regulated companies had \$241.7 million (including \$166.7 million for CL&P, \$21.9 million for NSTAR Electric and \$1.2 million for PSNH) and \$210.8 million (including \$135.9 million for CL&P, \$19.8 million for NSTAR Electric and \$1.0 million for PSNH) of additional regulatory costs not yet specifically approved as of December 31, 2023 and 2022, respectively, that were included in Other Long-Term Assets on the balance sheets. These amounts will be reclassified to Regulatory Assets upon approval by the applicable regulatory agency. Based on regulatory policies or past precedent on similar costs, management believes it is probable that these costs will ultimately be approved and recovered from customers in rates. As of December 31, 2023 and 2022, these regulatory costs included \$82.1 million (including \$64.0 million for CL&P and \$7.3 million for NSTAR Electric) and \$64.0 million (including \$52.8 million for CL&P and \$3.5 million for NSTAR Electric), respectively, of deferred uncollectible hardship costs.

**Equity Return on Regulatory Assets:** For rate-making purposes, the regulated companies recover the carrying costs related to their regulatory assets. For certain regulatory assets, the carrying cost recovered includes an equity return component. This equity return is not recorded on the balance sheets. The equity return for PSNH was \$10.2 million and \$4.1 million as of December 31, 2023 and 2022, respectively. These carrying costs will be recovered from customers in future rates.

**Regulatory Liabilities:** The components of regulatory liabilities were as follows:

| (Millions of Dollars)   | As of December 31, |            |                |          |            |            |                |          |
|---|--------------------|------------|----------------|----------|------------|------------|----------------|----------|
|   | 2023               |            |                |          | 2022       |            |                |          |
|   | Eversource         | CL&P       | NSTAR Electric | PSNH     | Eversource | CL&P       | NSTAR Electric | PSNH     |
| EDIT due to Tax Cuts and Jobs Act of 2017                                   | \$ 2,548.6         | \$ 969.2   | \$ 905.1       | \$ 339.3 | \$ 2,619.3 | \$ 983.6   | \$ 944.3       | \$ 348.6 |

| Benefit Costs   | 51.0               | 0.6        | 22.2           | —        | 55.4       | 0.7        | 31.4           | —        |
| Other Regulatory Liabilities  | 201.9              | 30.4       | 13.9           | 4.6      | 215.9      | 40.6       | 14.5           | 6.5      |
| Total Regulatory Liabilities  | 4,614.7            | 1,418.1    | 1,953.4        | 511.1    | 4,821.1    | 1,599.4    | 1,921.3        | 553.6    |
| Less: Current Portion   | 591.8              | 102.2      | 368.1          | 117.5    | 890.8      | 336.0      | 373.2          | 162.0    |
| Total Long-Term Regulatory Liabilities                                      | \$ 4,022.9         | \$ 1,315.9 | \$ 1,585.3     | \$ 393.6 | \$ 3,930.3 | \$ 1,263.4 | \$ 1,548.1     | \$ 391.6 |

**EDIT due to Tax Cuts and Jobs Act of 2017:** Pursuant to the Tax Cuts and Jobs Act of 2017, Eversource had remeasured its existing deferred federal income tax balances to reflect the decrease in the U.S. federal corporate income tax rate from 35 percent to 21 percent. The remeasurement resulted in provisional regulated excess accumulated deferred income tax (excess ADIT or EDIT) liabilities that will benefit customers in future periods and were recognized as regulatory liabilities on the balance sheet. EDIT liabilities related to property, plant, and equipment are subject to IRS normalization rules and will be returned to customers using the same timing as the remaining useful lives of the underlying assets that gave rise to the ADIT liabilities. Eversource's regulated companies (except for the Connecticut water business) are in the process of refunding the EDIT liabilities to customers based on orders issued by applicable state and federal regulatory commissions.

**Cost of Removal:** Eversource's regulated companies currently recover amounts in rates for future costs of removal of plant assets over the lives of the assets. The estimated cost to remove utility assets from service is recognized as a component of depreciation expense, and the cumulative amount collected from customers but not yet expended is recognized as a regulatory liability. Expended removal costs that exceed amounts collected from customers are recognized as regulatory assets, as they are probable of recovery in future rates.

**Deferred Portion of Non-Service Income Components of Pension, SERP and PBOP:** Regulatory liabilities were recorded for the deferred portion of the non-service related components of net periodic benefit expense/(income) for the Pension, SERP and PBOP Plans. These regulatory liabilities will be amortized over the remaining useful lives of the various classes of utility property, plant and equipment.

AFUDC - Transmission: Regulatory liabilities were recorded by CL&P and NSTAR Electric for AFUDC accrued on certain reliability-related transmission projects to reflect local rate base recovery. These regulatory liabilities will be amortized over the depreciable life of the related transmission assets.

Other Regulatory Liabilities: Other Regulatory Liabilities primarily include EGMA's acquired regulatory liability as a result of the 2020 DPU-approved rate settlement agreement and the CMA asset acquisition on October 9, 2020, and various other items.

FERC ROE Complaints: As of December 31, 2023 and 2022, Eversource has a reserve established for the second ROE complaint period in the pending FERC ROE complaint proceedings, which was recorded as a regulatory liability and is reflected within Regulatory Tracking Mechanisms in the table above. The cumulative pre-tax reserve (excluding interest) as of December 31, 2023 and 2022 totaled \$39.1 million for Eversource (including \$21.4 million for CL&P, \$14.6 million for NSTAR Electric and \$3.1 million for PSNH). See Note 13E, "Commitments and Contingencies – FERC ROE Complaints," for further information on developments in the pending ROE complaint proceedings.

*Regulatory Developments:*

2022 CL&P Rate Relief Plan: On November 28, 2022, Governor Lamont, DEEP, Office of Consumer Counsel, and CL&P jointly developed a rate relief plan for electric customers for the winter peak season of January 1, 2023 through April 30, 2023. On December 16, 2022, PURA approved the rate relief plan. As part of the rate relief plan, CL&P reduced the Non-Bypassable Federally Mandated Congestion Charge (NBFMCC) rate effective January 1, 2023 to provide customers with an average \$10 monthly bill credit from January through April 2023. This rate reduction accelerated the return to customers of net revenues generated by long-term state-approved energy contracts with the Millstone and Seabrook nuclear power plants of approximately \$90 million. The rate relief plan also included instituting a temporary, flat monthly discount for qualifying low-income hardship customers effective January 1, 2023. This flat-rate credit will continue until a new low-income discount rate that was approved by PURA in an October 19, 2022 decision is implemented in 2024. These aspects of the rate relief plan do not impact CL&P's earnings but do impact its future cash flows. Also as part of the rate relief plan, CL&P committed to contribute \$10 million to an energy assistance program for qualifying hardship customers, which was distributed as a bill credit to those customers during 2023. CL&P recorded a current liability of \$10 million on the balance sheet and a charge to expense on the statement of income for the year ended December 31, 2022 associated with the customer assistance program.

2022 NSTAR Electric Distribution Rate Case: On November 30, 2022, the DPU issued its decision in the NSTAR Electric distribution rate case and approved a base distribution rate increase of \$64 million effective January 1, 2023. The DPU approved a renewal of the PBR plan originally authorized in its previous rate case for a five-year term, with a corresponding stay out provision. The PBR plan term has the possibility of a five-year extension. The PBR mechanism allows for an annual adjustment to base distribution rates for inflation and exogenous events. The DPU also allowed for adjustments to the PBR mechanism for the recovery of future capital additions based on a historical five-year average of total capital additions, beginning with the January 1, 2024 PBR adjustment. The decision allows an authorized regulatory ROE of 9.80 percent on a capital structure including 53.2 percent equity.

Among other items, the DPU approved an increase to the annual storm fund contribution collected through base distribution rates from \$10 million to \$31 million, and allowed for the recovery of storm threshold costs of \$1.3 million per storm event subsequent to the eighth storm in a calendar year (six recovered in base rates plus two additional storms). The DPU approved cost recovery of a portion of NSTAR Electric's outstanding storm costs beginning on January 1, 2023 and January 1, 2024, subject to reconciliation from future prudency reviews. In a subsequent compliance filing, the DPU allowed recovery to commence for outstanding storm costs occurring between 2018 and 2022 and interest in a total of \$162.1 million over a five-year period starting January 1, 2023. In addition, NSTAR Electric will begin to recover 2021 exogenous storms and interest in a total of \$220.9 million over a five-year period beginning January 1, 2024. The DPU also approved the recovery of historical exogenous property taxes of \$30.8 million incurred from 2020 through 2022 over a two-year period and \$8.3 million incurred from 2012 through 2015 over a five-year period effective January 1, 2023. As a result of this decision, these deferred property taxes were reclassified from Other Long-Term Assets to Regulatory Assets on the NSTAR Electric December 31, 2022 balance sheet.

2023 NSTAR Electric Distribution Rates: NSTAR Electric submitted its first annual PBR Adjustment filing on September 15, 2023 and on December 26, 2023, the DPU approved a \$104.9 million increase to base distribution rates effective January 1, 2024. The base distribution rate increase was comprised of a \$50.6 million inflation-based adjustment and a \$54.3 million K-bar adjustment for capital additions based on the difference between the historical five-year average of total capital additions and the base capital revenue requirement.

2022 NSTAR Gas Distribution Rates: NSTAR Gas' PBR mechanism allows for an annual adjustment to base distribution rates for inflation and exogenous events. NSTAR Gas submitted its second annual PBR Adjustment filing on September 15, 2022 and on October 31, 2022, the DPU approved a \$21.7 million increase to base distribution rates for effect on November 1, 2022. The increase is inclusive of a \$4.5 million permanent increase related to exogenous property taxes and a \$5.4 million increase related to an October 6, 2021 mitigation plan filing that delayed recovery of a portion of a base distribution rate increase originally scheduled to take effect November 1, 2021. The DPU also approved the recovery of historical exogenous property taxes incurred from November 1, 2020 through October 31, 2022 of \$8.2 million over a two-year period through a separate reconciling mechanism effective November 1, 2022. As a result of this decision, these deferred property taxes were reclassified from Other Long-Term Assets to Regulatory Assets on the Eversource December 31, 2022 balance sheet.

2023 NSTAR Gas Distribution Rates: NSTAR Gas submitted its third annual PBR Adjustment filing on September 15, 2023 and on October 30, 2023, the DPU approved a \$25.4 million increase to base distribution rates, of which, \$15.5 million was associated with a base rate adjustment and the remainder for a prior period exogenous cost adjustment, for effect on November 1, 2023.

**2022 EGMA Distribution Rates:** As established in an October 7, 2020 EGMA Rate Settlement Agreement approved by the DPU, on September 16, 2022 EGMA filed for its second base distribution rate increase and on October 31, 2022, the DPU approved a \$6.7 million increase to base distribution rates and a \$3.3 million increase to the Tax Act Credit Factor for effect on November 1, 2022. The DPU also approved the recovery of historical exogenous property taxes incurred from November 1, 2020 through October 31, 2022 of \$8.6 million over a two-year period through a separate reconciling mechanism effective November 1, 2022. EGMA will request recovery of incremental property taxes incurred after October 31, 2022 in future exogenous filings. As a result of this decision, these deferred property taxes were reclassified from Other Long-Term Assets to Regulatory Assets on the Eversource December 31, 2022 balance sheet.

**2023 PSNH Pole Acquisition Approval:** On November 18, 2022, the NHPUC issued a decision that approved a proposed purchase agreement between PSNH and Consolidated Communications, in which, PSNH would acquire both jointly-owned and solely-owned poles and pole assets. The NHPUC also authorized PSNH to recover certain expenses associated with the operation and maintenance of the transferred poles, pole inspections, and vegetation management expenses through a new cost recovery mechanism, the Pole Plant Adjustment Mechanism (PPAM), subject to consummation of the purchase agreement. The purchase agreement was finalized on May 1, 2023 for a purchase price of \$23.3 million. Upon consummation of the purchase agreement, PSNH established a regulatory asset of \$16.9 million for operation and maintenance expenses and vegetation management expenses associated with the purchased poles incurred from February 10, 2021 through April 30, 2023 that PSNH is authorized to collect through the PPAM regulatory tracking mechanism. The establishment of the PPAM regulatory asset resulted in a pre-tax benefit recorded in Amortization expense on the PSNH statement of income in 2023.

### 3. PROPERTY, PLANT AND EQUIPMENT AND ACCUMULATED DEPRECIATION

Utility property, plant and equipment is recorded at original cost. Original cost includes materials, labor, construction overheads and AFUDC for regulated property. The cost of repairs and maintenance is charged to Operations and Maintenance expense as incurred.

The following tables summarize property, plant and equipment by asset category:

| Eversource<br>(Millions of Dollars)      | As of December 31, |             |
|--|--------------------|-------------|
|  | 2023               | 2022        |
| Distribution - Electric                  | \$ 19,656.5        | \$ 18,326.2 |
| Distribution - Natural Gas               | 8,155.3            | 7,443.8     |
| Transmission - Electric                  | 14,666.8           | 13,709.3    |
| Distribution - Water                     | 2,280.1            | 2,112.6     |
| Solar                                    | 201.1              | 200.8       |
| Utility                                  | 44,959.8           | 41,792.7    |
| Other <sup>(1)</sup>                     | 2,006.8            | 1,738.1     |
| Property, Plant and Equipment, Gross     | 46,966.6           | 43,530.8    |
| Less: Accumulated Depreciation           |                    |             |
| Utility                                  | (9,670.1)          | (9,167.4)   |
| Other                                    | (869.6)            | (706.1)     |
| Total Accumulated Depreciation           | (10,539.7)         | (9,873.5)   |
| Property, Plant and Equipment, Net       | 36,426.9           | 33,657.3    |
| Construction Work in Progress            | 3,071.7            | 2,455.5     |

| Construction Work in Progress            | 565.4              | 1,507.3        | 270.0      | 498.9       | 1,063.6        | 174.1      |
| Total Property, Plant and Equipment, Net | \$ 12,340.2        | \$ 12,753.8    | \$ 4,574.7 | \$ 11,467.0 | \$ 11,627.0    | \$ 4,060.2 |

<sup>(1)</sup> These assets are primarily comprised of computer software, hardware and equipment at Eversource Service and buildings at The Rocky River Realty Company.

**Depreciation:** Depreciation of utility assets is calculated on a straight-line basis using composite rates based on the estimated remaining useful lives of the various classes of property (estimated useful life for PSNH distribution and the water utilities). The composite rates, which are subject to approval by the appropriate state regulatory agency, include a cost of removal component, which is collected from customers over the lives of the plant assets and is recognized as a regulatory liability. Depreciation rates are applied to property from the time it is placed in service.

Upon retirement from service, the cost of the utility asset is charged to the accumulated provision for depreciation. The actual incurred removal costs are applied against the related regulatory liability.

The depreciation rates for the various classes of utility property, plant and equipment aggregate to composite rates as follows:

| (Percent)      | 2023  | 2022  | 2021  |
|----------------|-------|-------|-------|
| Eversource     | 3.1 % | 3.0 % | 3.1 % |
| CL&P           | 2.8 % | 2.8 % | 2.8 % |
| NSTAR Electric | 2.7 % | 2.7 % | 2.8 % |
| PSNH           | 3.0 % | 3.0 % | 3.1 % |

The following table summarizes average remaining useful lives of depreciable assets:

| (Years)                    | As of December 31, 2023 |      |                |      |
|----------------------------|-------------------------|------|----------------|------|
|                            | Eversource              | CL&P | NSTAR Electric | PSNH |
| Distribution - Electric    | 34.0                    | 35.3 | 34.5           | 29.6 |
| Distribution - Natural Gas | 35.7                    | —    | —              | —    |
| Transmission - Electric    | 40.6                    | 37.1 | 45.3           | 41.4 |
| Distribution - Water       | 40.0                    | —    | —              | —    |
| Solar                      | 22.8                    | —    | 22.8           | —    |
| Other <sup>(1)</sup>       | 10.4                    | —    | —              | —    |

<sup>(1)</sup> The estimated useful life of computer software, hardware and equipment primarily ranges from 5 to 15 years and of buildings is 40 years.

#### 4. DERIVATIVE INSTRUMENTS

The electric and natural gas companies purchase and procure energy and energy-related products, which are subject to price volatility, for their customers. The costs associated with supplying energy to customers are recoverable from customers in future rates. These regulated companies manage the risks associated with the price volatility of energy and energy-related products through the use of derivative and non-derivative contracts.

Many of the derivative contracts meet the definition of, and are designated as, normal and qualify for accrual accounting under the applicable accounting guidance. The costs and benefits of derivative contracts that meet the definition of normal are recognized in Operating Expenses on the statements of income as electricity or natural gas is delivered.

Derivative contracts that are not designated as normal are recorded at fair value as current or long-term Derivative Assets or Derivative Liabilities on the balance sheets. For the electric and natural gas companies, regulatory assets or regulatory liabilities are recorded to offset the fair values of derivatives, as contract settlement amounts are recovered from, or refunded to, customers in their respective energy supply rates.

The gross fair values of derivative assets and liabilities with the same counterparty are offset and reported as net Derivative Assets or Derivative Liabilities, with current and long-term portions, on the balance sheets. The following table presents the gross fair values of contracts, categorized by risk type, and the net amounts recorded as current or long-term derivative assets or liabilities:

| CL&P<br>(Millions of Dollars)    | As of December 31,   |  |                        |                                     |                      |  |                        |                                     |
|----------------------------------|----------------------|--|------------------------|-------------------------------------|----------------------|--|------------------------|-------------------------------------|
|                                  | 2023                 |  |                        |                                     | 2022                 |  |                        |                                     |
|                                  | Fair Value Hierarchy | Commodity Supply and Price Risk Management | Netting <sup>(1)</sup> | Net Amount Recorded as a Derivative | Fair Value Hierarchy | Commodity Supply and Price Risk Management | Netting <sup>(1)</sup> | Net Amount Recorded as a Derivative |
| Current Derivative Assets        | Level 2              | \$ 16.4                                    | \$ (0.5)               | \$ 15.9                             | Level 3              | \$ 16.3                                    | \$ (0.5)               | \$ 15.8                             |
| Long-Term Derivative Assets      | Level 2              | 13.6                                       | (0.5)                  | 13.1                                | Level 3              | 28.8                                       | (0.9)                  | 27.9                                |
| Current Derivative Liabilities   | Level 2              | (81.9)                                     | —                      | (81.9)                              | Level 3              | (81.6)                                     | —                      | (81.6)                              |
| Long-Term Derivative Liabilities | Level 2              | (68.0)                                     | —                      | (68.0)                              | Level 3              | (143.9)                                    | —                      | (143.9)                             |

<sup>(1)</sup> Amounts represent derivative assets and liabilities that Eversource elected to record net on the balance sheets. These amounts are subject to master netting agreements or similar agreements for which the right of offset exists.

The business activities that result in the recognition of derivative assets also create exposure to various counterparties. As of December 31, 2023, CL&P's derivative assets were exposed to counterparty credit risk and contracted with investment grade entities.

**Derivative Contracts at Fair Value with Offsetting Regulatory Amounts**

*Commodity Supply and Price Risk Management:* As required by regulation, CL&P, along with UI, has capacity-related contracts with generation facilities. CL&P has a sharing agreement with UI, with 80 percent of the costs or benefits of each contract borne by or allocated to CL&P and 20 percent borne by or allocated to UI. The combined capacities of these contracts as of December 31, 2023 and 2022 were 682 MW and 674 MW, respectively. The capacity contracts extend through 2026 and obligate both CL&P and UI to make or receive payments on a monthly basis to or from the generation facilities based on the difference between a set capacity price and the capacity market price received in the ISO-NE capacity markets.

For the years ended December 31, 2023, 2022 and 2021, there were losses of \$3.9 million, gains of \$10.1 million and losses of \$7.1 million, respectively, deferred as regulatory costs, which reflect the change in fair value associated with Eversource's derivative contracts.

**Fair Value Measurements of Derivative Instruments**

The fair value of derivative contracts utilizes both observable and unobservable inputs. The fair value is modeled using income techniques, such as discounted cash flow valuations adjusted for assumptions related to exit price. Valuations of derivative contracts using a discounted cash flow methodology include assumptions regarding the timing and likelihood of scheduled capacity payments and also reflect non-performance risk, including credit, using the default probability approach based on the counterparty's credit rating for assets and the Company's credit rating for liabilities. Significant observable inputs for valuations of these contracts include energy-related product prices in future years for which quoted prices in an active market exist. Valuations incorporate estimates of premiums or discounts that would be required by a market participant to arrive at an exit price, using historical market transactions adjusted for the terms of the contract. Fair value measurements were prepared by individuals with expertise in valuation techniques, pricing of energy-related products, and accounting requirements. All derivative contracts were classified as Level 2 in the fair value hierarchy as of December 31, 2023, and were classified as Level 3 as of December 31, 2022.

Exit price premiums are unobservable inputs applied to these contracts and reflect the uncertainty and illiquidity premiums that would be required based on the most recent market activity available for similar type contracts. The risk premium was weighted by the relative fair value of the net derivative instruments. As of December 31, 2022, these exit price premiums were a Level 3 significant unobservable input and ranged from 2.9 percent through 7.1 percent, or a weighted average of 6.1 percent. As of December 31, 2023, exit price premiums are no longer considered significant in the valuation of the derivative contracts.

As of December 31, 2022, Level 3 significant unobservable inputs also utilized in the valuation of CL&P's capacity-related contracts included forward reserve prices of \$0.44 per kW-Month through \$0.50 per kW-Month, or a weighted average of \$0.47 per kW-Month, over the period 2023 through 2024. As of December 31, 2023, these forward reserve price inputs are now observable.

Significant increases or decreases in future capacity or forward reserve prices in isolation would decrease or increase, respectively, the fair value of the derivative liability. Any increases in risk premiums would increase the fair value of the derivative liability. Changes in these fair values are recorded as a regulatory asset or liability and do not impact net income.

The following table presents changes in the Level 3 category of derivative assets and derivative liabilities measured at fair value on a recurring basis. The derivative assets and liabilities are presented on a net basis.

| CL&P<br>(Millions of Dollars)<br>Derivatives, Net                    | For the Years Ended December 31, |            |
|--|----------------------------------|------------|
|  | 2023                             | 2022       |
| Fair Value as of Beginning of Period                                 | \$ (181.8)                       | \$ (249.2) |
| Net Realized/Unrealized (Losses)/Gains Included in Regulatory Assets | (3.9)                            | 10.1       |
| Settlements  | 64.8                             | 57.3       |
| Transfers out of Level 3 <sup>(1)</sup>                              | 120.9                            | —          |
| Fair Value as of End of Period                                       | \$ —                             | \$ (181.8) |

<sup>(1)</sup> Transfers out of Level 3 pertain to certain significant valuation inputs becoming observable as well as certain unobservable inputs no longer being significant to the fair value of the derivative contracts. Eversource's policy is to recognize transfers between levels of the fair value hierarchy as of the end of the reporting period.

**5. MARKETABLE SECURITIES**

Eversource's marketable securities include the CYAPC and YAEC legally restricted trusts that each hold equity and available-for-sale debt securities to fund the spent nuclear fuel removal obligations of their nuclear fuel storage facilities. Eversource also holds trusts that are not subject to regulatory oversight by state or federal agencies that are primarily used to fund certain non-qualified executive benefits. The marketable securities within these non-qualified executive benefit trusts were sold in 2023. Equity and available-for-sale debt marketable securities are recorded at fair value, with the current portion recorded in Prepayments and Other Current Assets and the long-term portion recorded in Marketable Securities on the balance sheets.

*Equity Securities:* Unrealized gains and losses on equity securities held in Eversource's trusts are recorded in Other Income, Net on the statements of income. The fair value of these equity securities as of December 31, 2023 and 2022 was \$3.3 million and \$20.0 million, respectively. Eversource's non-qualified executive benefits equity securities were sold during 2023 and resulted in a \$1.1 million gain recorded in Other Income, Net for the year ended December 31, 2023. For the years ended December 31, 2022 and 2021, there were unrealized losses of \$9.7 million and unrealized gains of \$4.4 million recorded in Other Income, Net related to these equity securities, respectively.

Eversource's equity securities also include CYAPC's and YAEC's marketable securities held in spent nuclear fuel trusts, which had fair values of \$173.6 million and \$170.1 million as of December 31, 2023 and 2022, respectively. Unrealized gains and losses for these spent nuclear fuel trusts are subject to regulatory accounting treatment and are recorded in long-term Marketable Securities with the corresponding offset to long-term liabilities on the balance sheets, with no impact on the statements of income.

*Available-for-Sale Debt Securities:* The following is a summary of the available-for-sale debt securities:

| Eversource<br>(Millions of Dollars) | As of December 31, |                                |                                 |            |                   |                                |                                 |            |
|-------------------------------------|--------------------|--------------------------------|---------------------------------|------------|-------------------|--------------------------------|---------------------------------|------------|
|                                     | 2023               |                                |                                 |            | 2022              |                                |                                 |            |
|                                     | Amortized<br>Cost  | Pre-Tax<br>Unrealized<br>Gains | Pre-Tax<br>Unrealized<br>Losses | Fair Value | Amortized<br>Cost | Pre-Tax<br>Unrealized<br>Gains | Pre-Tax<br>Unrealized<br>Losses | Fair Value |
| Debt Securities                     | \$ 169.5           | \$ 1.4                         | \$ (6.6)                        | \$ 164.3   | \$ 201.6          | \$ 0.1                         | \$ (16.2)                       | \$ 185.5   |

Unrealized gains and losses on available-for-sale debt securities held in Eversource's non-qualified executive benefit trust are recorded in Accumulated Other Comprehensive Income, excluding amounts related to credit losses or losses on securities intended to be sold, which are recorded in Other Income, Net. These debt securities were sold during 2023 and resulted in \$1.2 million of realized losses for the year ended December 31, 2023 that were reclassified out of Accumulated Other Comprehensive Income and recorded in Other Income, Net. There were no credit losses for the years ended December 31, 2023 and 2022, and no allowance for credit losses as of December 31, 2023. Factors considered in determining whether a credit loss exists include adverse conditions specifically affecting the issuer, the payment history, ratings and rating changes of the security, and the severity of the impairment. For asset-backed debt securities, underlying collateral and expected future cash flows are also evaluated. Debt securities included in Eversource's non-qualified benefit trust portfolio were investment-grade bonds with a lower default risk based on their credit quality.

Eversource's debt securities also include CYAPC's and YAEC's marketable securities held in spent nuclear fuel trusts in the amounts of \$164.3 million and \$163.2 million as of December 31, 2023 and 2022, respectively. Unrealized gains and losses for available-for-sale debt securities included in the CYAPC and YAEC spent nuclear fuel trusts are subject to regulatory accounting treatment and are recorded in Marketable Securities with the corresponding offset to long-term liabilities on the balance sheets, with no impact on the statements of income. Pre-tax unrealized gains and losses as of December 31, 2023 and 2022 primarily relate to the debt securities included in CYAPC's and YAEC's spent nuclear fuel trusts.

CYAPC and YAEC's spent nuclear fuel trusts are restricted and are classified in long-term Marketable Securities on the balance sheets.

As of December 31, 2023, the contractual maturities of available-for-sale debt securities were as follows:

| Eversource<br>(Millions of Dollars) | Amortized<br>Cost | Fair<br>Value |
|-------------------------------------|-------------------|---------------|
| Less than one year                  | \$ 15.9           | \$ 15.9       |
| One to five years                   | 30.9              | 30.9          |
| Six to ten years                    | 38.1              | 37.8          |
| Greater than ten years              | 84.6              | 79.7          |
| Total Debt Securities               | \$ 169.5          | \$ 164.3      |

*Realized Gains and Losses:* Realized gains and losses are recorded in Other Income, Net for Eversource's benefit trust and are offset in long-term liabilities for CYAPC and YAEC. Eversource utilizes the specific identification basis method for the Eversource non-qualified benefit trust, and the average cost basis method for the CYAPC and YAEC spent nuclear fuel trusts to compute the realized gains and losses on the sale of marketable securities.

*Fair Value Measurements:* The following table presents the marketable securities recorded at fair value on a recurring basis by the level in which they are classified within the fair value hierarchy:

| Eversource<br>(Millions of Dollars)                          | As of December 31, |                 |
|--|--------------------|-----------------|
|  | 2023               | 2022            |
| Level 1:   |                    |                 |
| Mutual Funds and Equities                                    | \$ 176.9           | \$ 190.1        |
| Money Market Funds   | 13.7               | 25.4            |
| <b>Total Level 1</b>   | <b>\$ 190.6</b>    | <b>\$ 215.5</b> |
| Level 2:   |                    |                 |
| U.S. Government Issued Debt Securities (Agency and Treasury) | \$ 90.1            | \$ 82.3         |
| Corporate Debt Securities                                    | 34.0               | 46.1            |
| Asset-Backed Debt Securities                                 | 5.6                | 8.6             |
| Municipal Bonds  | 9.8                | 12.7            |
| Other Fixed Income Securities                                | 11.1               | 10.4            |
| <b>Total Level 2</b>   | <b>\$ 150.6</b>    | <b>\$ 160.1</b> |
| <b>Total Marketable Securities</b>                           | <b>\$ 341.2</b>    | <b>\$ 375.6</b> |

U.S. government issued debt securities are valued using market approaches that incorporate transactions for the same or similar bonds and adjustments for yields and maturity dates. Corporate debt securities are valued using a market approach, utilizing recent trades of the same or similar instruments and also incorporating yield curves, credit spreads and specific bond terms and conditions. Asset-backed debt securities include collateralized mortgage obligations, commercial mortgage backed securities, and securities collateralized by auto loans, credit card loans or receivables. Asset-backed debt securities are valued using recent trades of similar instruments, prepayment assumptions, yield curves, issuance and maturity dates, and tranche information. Municipal bonds are valued using a market approach that incorporates reported trades and benchmark yields. Other fixed income securities are valued using pricing models, quoted prices of securities with similar characteristics, and discounted cash flows.

## 6. INVESTMENTS IN UNCONSOLIDATED AFFILIATES

Investments in entities that are not consolidated are included in long-term assets on the balance sheets and earnings impacts from these equity investments are included in Other Income, Net on the statements of income. Eversource's investments included the following:

| (Millions of Dollars)                                  | Ownership Interest | Investment Balance as of December 31, |                   |
|--|--------------------|---------------------------------------|-------------------|
|  |                    | 2023                                  | 2022              |
| Offshore Wind Business                                 | 50% - 100%         | \$ 515.5                              | \$ 1,947.1        |
| Natural Gas Pipeline - Algonquin Gas Transmission, LLC | 15%                | 116.0                                 | 118.8             |
| Renewable Energy Investment Fund                       | 90%                | —                                     | 84.1              |
| Other  | various            | 29.0                                  | 26.1              |
| <b>Total Investments in Unconsolidated Affiliates</b>  |                    | <b>\$ 660.5</b>                       | <b>\$ 2,176.1</b> |

For the years ended December 31, 2023, 2022 and 2021, Eversource had equity in earnings of unconsolidated affiliates of \$15.5 million, \$22.9 million, and \$14.2 million, respectively. Eversource received dividends from its equity method investees (excluding proceeds received from sale or liquidation of investments) of \$20.1 million, \$26.2 million, and \$21.6 million, respectively, for the years ended December 31, 2023, 2022 and 2021.

Investments in affiliates where Eversource has the ability to exercise significant influence, but not control, over an investee are initially recognized as an equity method investment at cost. Eversource's offshore wind investments, which include 50 percent ownership interests in two offshore wind joint ventures and a 100 percent ownership in a tax equity investment, do not represent controlling financial interests. Eversource's offshore wind investments, its share of the natural gas pipeline and other investments included in the table above are accounted for under the equity method.

*Offshore Wind Business:* Eversource's offshore wind business includes 50 percent ownership interests in each of North East Offshore and South Fork Class B Member, LLC, which collectively hold three offshore wind projects. North East Offshore holds the Revolution Wind project and the Sunrise Wind project. South Fork Class B Member, LLC holds the South Fork Wind project. Eversource's offshore wind business also includes a noncontrolling tax equity investment in South Fork Wind through a 100 percent ownership in South Fork Wind Holdings, LLC Class A shares. The offshore wind projects are being developed and constructed through joint and equal partnerships with Ørsted.

*Expected Sales of Offshore Wind Investments:* On May 25, 2023, Eversource announced that it had completed a strategic review of its offshore wind investments and determined that it would pursue the sale of its offshore wind investments. On September 7, 2023, Eversource completed the sale of its 50 percent interest in an uncommitted lease area consisting of approximately 175,000 developable acres located 25 miles off the south coast of Massachusetts to Ørsted for \$625 million in an all-cash transaction.

In September of 2023, Eversource made a contribution of \$528 million using the proceeds from the lease area sale to invest in a tax equity interest for South Fork Wind. South Fork Wind was restructured as a tax equity investment, with Eversource purchasing 100 percent ownership of a new Class A tax equity membership interest. As a result of this investment, Eversource expects to receive investment tax credits after the turbines are placed in service for South Fork Wind and meet the requirements to qualify for the ITC. These credits will be utilized to reduce Eversource's federal tax liability or generate tax refunds over the next 24 months. All of South Fork Wind's twelve turbines are expected to be installed and placed into service by the end of March 2024.

On January 24, 2024, Ørsted signed an agreement with Eversource to acquire Eversource's 50 percent share of Sunrise Wind. The sale is subject to the successful selection of Sunrise Wind in the ongoing New York fourth solicitation for offshore wind capacity, signing of an OREC contract with NYSERDA, finalization of sale agreements, receipt of final federal construction permits, and relevant regulatory approvals. If Sunrise Wind is not successful in the solicitation, then the existing OREC contract for Sunrise Wind will be cancelled according to the state's requirements, and Eversource and Ørsted's joint venture for Sunrise Wind will remain in place. In that scenario, Ørsted and Eversource would then assess their options in determining the best path forward for Sunrise Wind and its assets, which include the BOEM offshore lease area. If Sunrise Wind's revised bid is successful in the new solicitation, Sunrise Wind would have 90 days to negotiate a new OREC agreement at the re-bid price. In a successful re-bid, Ørsted would become the sole owner of Sunrise Wind, while Eversource would remain contracted to lead the project's onshore construction. If Sunrise Wind is successful in the re-bid, Ørsted would pay Eversource 50 percent of the negotiated purchase price upon closing the sale transaction, with the remaining 50 percent paid when onshore construction is completed and certain other milestones are achieved. On January 25, 2024, Eversource and Ørsted submitted a new proposal for Sunrise Wind in the New York fourth offshore wind solicitation.

On February 13, 2024, Eversource announced that it has executed an agreement to sell its existing 50 percent interests in the South Fork Wind and Revolution Wind projects to Global Infrastructure Partners (GIP). As part of this transaction, Eversource expects to receive approximately \$1.1 billion of cash proceeds upon closing, which includes the sales value related to the 10 percent energy community ITC adder of approximately \$170 million related to Revolution Wind, and to exit these projects while retaining certain cost sharing obligations for the construction of Revolution Wind. The purchase price is subject to future post-closing adjustment payments based on, among other things, the progress, timing and expense of construction at each project. The cost sharing obligations provide that Eversource would share equally with GIP in GIP's funding obligations for up to approximately \$240 million of incremental capital expenditure overruns incurred during the construction phase for the Revolution Wind project, after which GIP's obligations for any additional capital expenditure overruns would be shared equally by Eversource and Ørsted. Additionally, Eversource's financial exposure will be adjusted by certain purchase price adjustments to be made following commercial operation of the Revolution Wind project and closing of South Fork as a result of final project economics, which includes Eversource's obligation to maintain GIP's internal rate of return for each project as specified in the agreement. Eversource currently expects that South Fork Wind will reach full commercial operation prior to closing of the sale with GIP and Eversource does not expect any material cost sharing or other purchase price adjustment payments for South Fork Wind.

Factors that could result in Eversource's total net proceeds from the transaction to be lower or higher include Revolution Wind's eligibility for federal investment tax credits at other than the anticipated 40 percent level; the ultimate cost of construction and extent of cost overruns for Revolution Wind; delays in constructing Revolution Wind, which would impact the economics associated with the purchase price adjustment; and a benefit due to Eversource if there are lower operation costs or higher availability of the projects through the period that is four years following the commercial operation date of the Revolution Wind project.

Closing a transaction with GIP would be subject to customary conditions, including certain regulatory approvals under the Hart Scott Rodino Act and by the New York Public Service Commission and the FERC, as well as other conditions, among which is the completion and execution of the partnership agreements between GIP and Ørsted that will govern GIP's new ownership interest in those projects following Eversource's divestiture. Closing of the transaction is currently expected to occur in mid-2024. If closing of the sale is delayed, additional capital contributions made by Eversource would be recovered in the sales price. Under the agreement, Eversource's existing credit support obligations are expected to roll off for each project around the time that each project completes its expected capital spend.

**Impairment:** Equity method investments are assessed for impairment when conditions exist as of the balance sheet date that indicate that the fair value of the investment may be less than book value. Eversource continually monitors and evaluates its equity method investments to determine if there are indicators of an other-than-temporary impairment. If the decline in value is considered to be other-than-temporary, the investment is written down to its estimated fair value, which establishes a new cost basis in the investment. Subsequent declines or recoveries after the reporting date are not considered in the impairment recognized. Investments that are other-than-temporarily impaired and written down to their estimated fair value cannot subsequently be written back up for increases in estimated fair value. Impairment evaluations involve a significant degree of judgment and estimation, including identifying circumstances that indicate an impairment may exist at the equity method investment level, selecting discount rates used to determine fair values, and developing an estimate of discounted future cash flows expected from investment operations or the sale of the investment.

In connection with the process to divest its offshore wind business, Eversource identified indicators for impairment in both the second and fourth quarters of 2023. In each impairment assessment, Eversource evaluated its investments and determined that the carrying value of the equity method offshore wind investments exceeded the fair value of the investments and that the decline in fair value was other-than-temporary. The completion of the strategic review in the second quarter of 2023 resulted in Eversource recording a pre-tax other-than-temporary impairment charge of \$401 million (\$331 million after-tax) to reflect the investment at estimated fair value based on the expected sales price at that time. This established a new cost basis in the investments. Negative developments in the fourth quarter of 2023, including a lower expected sales price, additional projected construction cost increases, and the October 2023 OREC pricing denial for Sunrise Wind, resulted in Eversource conducting an impairment evaluation and recognizing an additional pre-tax other-than-temporary impairment charge of \$1.77 billion (\$1.62 billion after-tax) and establishing a new cost basis in the investments as of December 31, 2023. The Eversource statement of income reflects a total pre-tax other-than-temporary impairment charge of \$2.17 billion (\$1.95 billion after-tax) in its offshore wind investments for the year ended 2023.

The impairment evaluations involved judgments in developing the estimates and timing of the future cash flows arising from the expected sales price of Eversource's 50 percent interest in the wind projects, including expected sales value from investment tax credit adder amounts, less estimated costs to sell, and uncertainties related to the Sunrise Wind re-bid process in New York's offshore wind solicitation. Additional assumptions in the fourth quarter assessment included revised projected construction costs and estimated project cost overruns, estimated termination costs, salvage values of Sunrise Wind assets, and the value of the tax equity ownership interest. The assumptions used in the discounted cash flow analyses are subject to inherent uncertainties and subjectivity. The use of different assumptions, estimates, or judgments with respect to the estimation of future cash flows could materially change the impairment charges. The impairment evaluations were based on best information available at the impairment assessment dates. New information from events or circumstances arising after the balance sheet date, such as the January 25, 2024 re-bid of Sunrise Wind in the New York solicitation, are not included in the December 31, 2023 impairment evaluation. All significant inputs into the impairment evaluations were Level 3 fair value measurements.

The expected cash flows arising from the anticipated sales are a significant input in the impairment evaluation. In the fourth quarter of 2023, project construction forecasts were updated, and these new forecasts reflected additional expenditures for construction and scheduling related pressures, including the availability and increased cost of installation vessels and supply chain cost increases related to foundation fabrication. In determining the current fair value of the investments, these updated projections exceeded the previously estimated projections for construction expenditures, which resulted in a revised sales price that was significantly lower than the previous bid value. Another significant assumption in the impairment evaluation includes the probability of payment of future cost overruns on the three wind projects through each project's respective commercial operation date, which would not be recovered in the expected sales price. This assumption was based on construction projections updated in the fourth quarter of 2023 exceeding prior estimates. An increase in expected cost overruns could result in a significant impairment in a future period.

Another key assumption in the impairment model of our offshore wind investments was investment tax credit ("ITC") adders that were included in the Inflation Reduction Act and were a separate part of the sales price value offered by GIP. An ITC adder is an additional 10 percent of credit value for ITC eligible costs and include two distinct qualifications related to either using domestic sourced materials (domestic content) or construction of an onshore substation in a designated community (energy community). Similar to the base ITC of 30 percent of the eligible costs, any ITC adders generated would be used to reduce an owner's federal tax liability and could be used to receive tax refunds from prior years as well. Management believes there is a high likelihood that the 10 percent energy community ITC adder is realizable, and that ITC adder would amount to approximately \$170 million of additional sales value related to Revolution Wind and that it would qualify for the ITC adder after it reaches commercial operation in 2025. Although management believes the ITC adder value is realizable, there is some uncertainty at this time as to whether or not those ITC adders can be achieved, and management continues to evaluate the project's qualifications and to monitor guidance issued by the United States Treasury Department. A change in the expected value or qualification of ITC adders could result in a significant impairment in a future period.

Another fourth quarter 2023 development included in the impairment evaluation is the key judgment regarding the probability of future cash inflows and outflows associated with the sale or abandonment of the Sunrise Wind project and the expected outcome of the New York fourth offshore wind solicitation in 2024. In June 2023, Sunrise Wind filed a petition with the New York State Public Service Commission for an order authorizing NYSERDA to amend the Sunrise Wind OREC contract to increase the contract price to cover increased costs and inflation. At that time, management expected the contract repricing would be successful given NYSERDA's public support for pricing adjustments. On October 12, 2023, the New York State Public Service Commission denied this petition. Subsequent to the denial, on November 30, 2023, the general terms of an expedited offshore wind renewable energy solicitation in New York were released. A primary condition for Sunrise Wind to participate in this new solicitation was to agree to terminate its existing OREC agreement. As of December 31, 2023, Eversource and Ørsted were considering whether to submit a new bid for Sunrise Wind, the price at which a new bid would be made, and the probability of success in the new bidding process. The December 31, 2023 impairment evaluation included management's judgment of the likelihood of possible future scenarios that included the Sunrise Wind project continuing with its existing OREC contract, the project re-bidding and being selected in the new solicitation, the project re-bidding and not being selected, or the project not moving forward. The unfavorable development of the October 2023 denial of the OREC pricing petition, management's assessment of the likelihood of success in the competitive New York re-bidding process, and the increased costs to build the project, have resulted in management's assumption that the Sunrise Wind project will ultimately be abandoned, and therefore, no sales value was modeled in the impairment evaluation. Additionally, in the abandonment assumption, management has assumed the loss of contingent sales value associated with any related ITC adders and has estimated future cash outflows for Eversource's share of cancellation costs required under Sunrise Wind's supplier contracts, partially offset by expected salvage value and expected cost overruns not incurred in the case of abandonment that are included in the fourth quarter 2023 impairment charge. An increase in expected cancellation costs could result in a significant impairment in a future period.

A summary of the significant estimates and assumptions included in the 2023 impairment charges is as follows:

| <i>(Millions of Dollars)</i>  | Second Quarter<br>2023 | Fourth Quarter<br>2023 | Total    |
|---|------------------------|------------------------|----------|
| Lower expected sales proceeds across all three wind projects  | \$ 401                 | \$ 525                 | \$ 926   |
| Expected cost overruns not recovered in the sales price   | —                      | 441                    | 441      |
| Loss of sales value from the sale price offered by GIP, including loss of ITC adders value, cancellation costs and other impacts assuming Sunrise Wind project is abandoned | —                      | 800                    | 800      |
| Impairment Charges, pre-tax   | 401                    | 1,766                  | 2,167    |
| Tax Benefit   | (70)                   | (144)                  | (214)    |
| Impairment Charges, after-tax   | \$ 331                 | \$ 1,622               | \$ 1,953 |

A summary of the carrying value by investee and by project as of December 31, 2023 is as follows:

| <i>(Millions of Dollars)</i>  | Investments Expected to be Disposed of |                 |                                   | Investment to be Held                    |  | Total Offshore<br>Wind Investments |
|---|--|-----------------|-----------------------------------|--|--|------------------------------------|
|   | North East Offshore                    |                 | South Fork Class B<br>Member, LLC | South Fork Wind<br>Holdings, LLC Class A |  |                                    |
|   | Sunrise Wind                           | Revolution Wind |                                   | South Fork Wind<br>Holdings, LLC Class A | South Fork Wind<br>Holdings, LLC Class A |                                    |
| Carrying Value as of December 31, 2023, before<br>Impairment Charge | \$ 699                                 | \$ 799          | \$ 299                            | \$ 485                                   | \$ 2,282                                 |                                    |
| Fourth Quarter 2023 Impairment Charge                               | (1,218)                                | (544)           | —                                 | (4)                                      | (1,766)                                  |                                    |
| Carrying Value as of December 31, 2023                              | \$ (519)                               | \$ 255          | \$ 299                            | \$ 481                                   | \$ 516                                   |                                    |

Management will continue to monitor and evaluate all facts and circumstances in the offshore wind sales process and the impact on its investment balance. Adverse changes in facts and circumstances of estimates and timing of future cash flows and the factors described above could result in the recognition of additional, significant impairment charges that could be material to the financial statements.

The impairment charge was a non-cash charge and did not impact Eversource's cash position. Eversource will continue to make future cash expenditures for required cash contributions to its offshore wind investments up to the time of disposition of each of the offshore wind projects. Capital contributions are expected until the sales are completed and changes in the timing and amounts of these contributions would be adjusted in the sales prices and therefore not result in an additional impairment charge. Proceeds from the transactions will be used to pay off parent company debt. Eversource's offshore wind investments do not meet the criteria to qualify for presentation as a discontinued operation.

Capital contributions in the offshore wind investments, including the 2023 contribution for the tax equity investment in South Fork Wind, are included in Investments in Unconsolidated Affiliates on the statements of cash flows. Proceeds received from the 2023 sale of the uncommitted lease area and from an October 2023 distribution of \$318 million received primarily as a result of being a 50 percent joint owner in the Class B shares of South Fork Wind which was restructured as a tax equity investment, are included in Proceeds from Unconsolidated Affiliates on the statement of cash flows.

As of December 31, 2023, Eversource's share of underlying equity in net assets of the offshore wind business exceeded the carrying amount of the offshore wind investments as a result of the 2023 impairments. As of December 31, 2022, the carrying amount of Eversource's offshore wind investments exceeded its share of underlying equity in net assets by \$343.1 million. The basis differences as of December 31, 2022 were primarily comprised of \$168.9 million of equity method goodwill that was not being amortized, intangible assets for PPAs, and capitalized interest.

*Liquidation of Renewable Energy Investment Fund:* On March 21, 2023, Eversource's equity method investment in a renewable energy investment fund was liquidated by the fund's general partner in accordance with the partnership agreement. Proceeds received from the liquidation totaled \$147.6 million and are included in Proceeds from Unconsolidated Affiliates on the statement of cash flows for the year ended December 31, 2023. A portion of the proceeds was used to make a charitable contribution to the Eversource Energy Foundation (a related party) of \$20.0 million in 2023. The liquidation benefit received in excess of the investment's carrying value and the charitable contribution are included in Other Income, Net on the statement of income.

*NSTAR Electric:* As of December 31, 2023 and 2022, NSTAR Electric's investments included a 14.5 percent ownership interest in two companies that transmit hydro-electricity imported from the Hydro-Quebec system in Canada of \$9.6 million and \$9.3 million, respectively.

## 7. ASSET RETIREMENT OBLIGATIONS

Eversource, including CL&P, NSTAR Electric and PSNH, recognizes a liability for the fair value of an ARO on the obligation date if the liability's fair value can be reasonably estimated, even if it is conditional on a future event. Settlement dates and future costs are reasonably estimated when sufficient information becomes available. Management has identified various categories of AROs, primarily CYAPC's and YAEC's obligation to dispose of spent nuclear fuel and high level waste, and also certain assets containing asbestos and hazardous contamination. Management has performed fair value calculations reflecting expected probabilities for settlement scenarios.

The fair value of an ARO is recorded as a long-term liability with a corresponding amount included in Property, Plant and Equipment, Net on the balance sheets. The ARO assets are depreciated, and the ARO liabilities are accreted over the estimated life of the obligation and the corresponding credits are recorded as accumulated depreciation and ARO liabilities, respectively. As the electric and natural gas companies are rate-regulated on a cost-of-service basis, these companies apply regulatory accounting guidance and both the depreciation and accretion costs associated with these companies' AROs are recorded as increases to Regulatory Assets on the balance sheets.

A reconciliation of the beginning and ending carrying amounts of ARO liabilities is as follows:

|                                     | As of December 31, |         |                |        |            |         |                |        |
|-------------------------------------|--------------------|---------|----------------|--------|------------|---------|----------------|--------|
|                                     | 2023               |         |                |        | 2022       |         |                |        |
| (Millions of Dollars)               | Eversource         | CL&P    | NSTAR Electric | PSNH   | Eversource | CL&P    | NSTAR Electric | PSNH   |
| Balance as of Beginning of Year     | \$ 502.7           | \$ 37.4 | \$ 101.3       | \$ 4.9 | \$ 500.1   | \$ 35.0 | \$ 97.5        | \$ 4.7 |
| Liabilities Settled During the Year | (24.9)             | —       | —              | —      | (22.3)     | —       | —              | —      |
| Accretion                           | 29.2               | 2.5     | 4.3            | 0.3    | 28.9       | 2.4     | 4.1            | 0.2    |
| Revisions in Estimated Cash Flows   | (1.2)              | —       | (0.8)          | —      | (4.0)      | —       | (0.3)          | —      |
| Balance as of End of Year           | \$ 505.8           | \$ 39.9 | \$ 104.8       | \$ 5.2 | \$ 502.7   | \$ 37.4 | \$ 101.3       | \$ 4.9 |

Eversource's amounts include CYAPC and YAEC's AROs of \$315.8 million and \$320.5 million as of December 31, 2023 and 2022, respectively. The fair value of the ARO for CYAPC and YAEC includes uncertainties of the fuel off-load dates related to the DOE's timing of performance regarding its obligation to dispose of the spent nuclear fuel and high level waste and other assumptions, including discount rates. The incremental asset recorded as an offset to the ARO liability was fully depreciated since the plants have no remaining useful life. Any changes in the ARO liability are recorded with a corresponding offset to the related regulatory asset. The assets held in the CYAPC and YAEC spent nuclear fuel trusts are restricted for settling the ARO and all other nuclear fuel storage obligations. For further information on the assets held in the spent nuclear fuel trusts, see Note 5, "Marketable Securities," to the financial statements.

## 8. SHORT-TERM DEBT

*Short-Term Debt - Borrowing Limits:* The amount of short-term borrowings that may be incurred by CL&P and NSTAR Electric is subject to periodic approval by the FERC. Because the NHPUC has jurisdiction over PSNH's short-term debt, PSNH is not currently required to obtain FERC approval for its short-term borrowings. On November 30, 2023, the FERC granted authorization that allows CL&P to issue total short-term borrowings in an aggregate principal amount not to exceed \$600 million outstanding at any one time, through December 31, 2025. On December 18, 2023, the FERC granted authorization that allows NSTAR Electric to issue total short-term borrowings in an aggregate principal amount not to exceed \$655 million outstanding at any one time, through December 31, 2025.

PSNH is authorized by regulation of the NHPUC to incur short-term borrowings up to 10 percent of net fixed plant plus an additional \$60 million until further ordered by the NHPUC. As of December 31, 2023, PSNH's short-term debt authorization under the 10 percent of net fixed plant test plus \$60 million totaled \$483.2 million.

CL&P's certificate of incorporation contains preferred stock provisions restricting the amount of unsecured debt that CL&P may incur, including limiting unsecured indebtedness with a maturity of less than 10 years to 10 percent of total capitalization. As of December 31, 2023, CL&P had \$625.7 million of unsecured debt capacity available under this authorization.

Yankee Gas, NSTAR Gas and EGMA are not required to obtain approval from any state or federal authority to incur short-term debt.

*Short-Term Debt - Commercial Paper Programs and Credit Agreements:* Eversource parent has a \$2.00 billion commercial paper program allowing Eversource parent to issue commercial paper as a form of short-term debt. Eversource parent, CL&P, PSNH, NSTAR Gas, Yankee Gas, EGMA and Aquarion Water Company of Connecticut are parties to a five-year \$2.00 billion revolving credit facility, which terminates on October 13, 2028. This revolving credit facility serves to backstop Eversource parent's \$2.00 billion commercial paper program.

NSTAR Electric has a \$650 million commercial paper program allowing NSTAR Electric to issue commercial paper as a form of short-term debt. NSTAR Electric is also a party to a five-year \$650 million revolving credit facility, which terminates on October 13, 2028, and serves to backstop NSTAR Electric's \$650 million commercial paper program.

The amount of borrowings outstanding and available under the commercial paper programs were as follows:

|  | Borrowings Outstanding<br>as of December 31, |            | Available Borrowing Capacity as<br>of December 31, |          | Weighted-Average Interest Rate<br>as of December 31, |        |
|--|--|------------|--|----------|--|--------|
|  | 2023   | 2022       | 2023   | 2022     | 2023   | 2022   |
| (Millions of Dollars)                      |  |            |  |          |  |        |
| Eversource Parent Commercial Paper Program | \$ 1,771.9                                   | \$ 1,442.2 | \$ 228.1   | \$ 557.8 | 5.60 %   | 4.63 % |
| NSTAR Electric Commercial Paper Program    | 365.8  | —          | 284.2  | 650.0    | 5.40 %   | — %    |

There were no borrowings outstanding on the revolving credit facilities as of December 31, 2023 or 2022.

CL&P and PSNH have uncommitted line of credit agreements totaling \$375 million and \$250 million, respectively, which will expire in 2024. There are no borrowings outstanding on either the CL&P or PSNH uncommitted line of credit agreements as of December 31, 2023.

Amounts outstanding under the commercial paper programs are included in Notes Payable and classified in current liabilities on the Eversource and NSTAR Electric balance sheets, as all borrowings are outstanding for no more than 364 days at one time. As a result of the CL&P long-term debt issuance in January 2024, \$207.3 million of commercial paper borrowings under the Eversource parent commercial paper program were reclassified as Long-Term Debt on Eversource parent's balance sheet as of December 31, 2023.

Under the credit facilities described above, Eversource and its subsidiaries, including CL&P, NSTAR Electric, PSNH, NSTAR Gas, EGMA, Yankee Gas, and Aquarion Water Company of Connecticut, must comply with certain financial and non-financial covenants, including a consolidated debt to total capitalization ratio. As of December 31, 2023 and 2022, Eversource and its subsidiaries were in compliance with these covenants. If Eversource or its subsidiaries were not in compliance with these covenants, an event of default would occur requiring all outstanding borrowings by such borrower to be repaid, and additional borrowings by such borrower would not be permitted under its respective credit facility.

*Intercompany Borrowings:* Eversource parent uses its available capital resources to provide loans to its subsidiaries to assist in meeting their short-term borrowing needs. Eversource parent records intercompany interest income from its loans to subsidiaries, which is eliminated in consolidation. Intercompany loans from Eversource parent to its subsidiaries are eliminated in consolidation on Eversource's balance sheets. As of December 31, 2023, there were intercompany loans from Eversource parent to CL&P of \$457.0 million and to PSNH of \$233.0 million. As of December 31, 2022, there were intercompany loans from Eversource parent to PSNH of \$173.3 million. Eversource parent charges interest on these intercompany loans at the same weighted-average interest rate as its commercial paper program. Intercompany loans from Eversource parent are included in Notes Payable to Eversource parent and classified in current liabilities on the respective subsidiary's balance sheets, as these intercompany borrowings are outstanding for no more than 364 days at one time. As a result of the CL&P long-term debt issuance in January 2024, \$207.3 million of CL&P's intercompany borrowings were reclassified to Long-Term Debt on CL&P's balance sheet as of December 31, 2023.

*Sources and Uses of Cash:* The Company expects the future operating cash flows of Eversource, CL&P, NSTAR Electric and PSNH, along with existing borrowing availability and access to both debt and equity markets, will be sufficient to meet any working capital and future operating requirements, and capital investment forecasted opportunities.

## 9. LONG-TERM DEBT

Details of long-term debt outstanding are as follows:

| CL&P<br>(Millions of Dollars)   | Interest Rate | As of December 31, |            |
|---|---------------|--------------------|------------|
|   |               | 2023               | 2022       |
| First Mortgage Bonds:   |               |                    |            |

<sup>(1)</sup> As a result of the CL&P and Eversource parent long-term debt issuances in January 2024, \$139.8 million and \$990.9 million, respectively, of current portion of long-term debt were reclassified as Long-Term Debt on CL&P's and Eversource parent's balance sheets as of December 31, 2023. As a result of the CL&P and PSNH long-term debt issuances in January 2023, \$400 million and \$295.3 million, respectively, of current portion of long-term debt were reclassified as Long-Term Debt on CL&P's and PSNH's balance sheets as of December 31, 2022.

<sup>(2)</sup> The fair value adjustment amount is the purchase price adjustments, net of amortization, required to record long-term debt at fair value on the dates of the 2012 merger with NSTAR and the 2017 acquisition of Aquarion.

*Availability under Long-Term Debt Issuance Authorizations:* On June 14, 2022, the DPU approved NSTAR Gas' request for authorization to issue up to \$325 million in long-term debt through December 31, 2024. On November 30, 2022, the PURA approved CL&P's request for authorization to issue up to \$1.15 billion in long-term debt through December 31, 2024. As a result of CL&P's January 2024 long-term debt issuance, CL&P has now fully utilized this authorization. On June 7, 2023, PURA approved Yankee Gas' request for authorization to issue up to \$350 million in long-term debt through December 31, 2024. On November 21, 2023, NSTAR Electric petitioned the DPU requesting authorization to issue up to \$2.4 billion in long-term debt through December 31, 2026. On February 8, 2024, the NHPUC approved PSNH's request for authorization to issue up to \$300 million in long-term debt through December 31, 2024.

*Long-Term Debt Issuances and Repayments:* The following table summarizes long-term debt issuances and repayments:

| (Millions of Dollars)                                 | Interest Rate   | Issuance/ (Repayment) | Issue Date or Repayment Date | Maturity Date | Use of Proceeds for Issuance/ Repayment Information   |

*Long-Term Debt Provisions:* The utility plant of CL&P, PSNH, Yankee Gas, NSTAR Gas, EGMA and a portion of Aquarion is subject to the lien of each company's respective first mortgage bond indenture. The Eversource parent, NSTAR Electric and a portion of Aquarion debt is unsecured. Additionally, the long-term debt agreements provide that Eversource and certain of its subsidiaries must comply with certain covenants as are customarily included in such agreements, including equity requirements for NSTAR Electric, NSTAR Gas and Aquarion. Under the equity requirements, NSTAR Electric's and Aquarion's senior notes must maintain a certain consolidated indebtedness to capitalization ratio as of the end of any fiscal quarter and NSTAR Gas' outstanding long-term debt must not exceed equity.

Certain secured and unsecured long-term debt securities are callable at redemption price or are subject to make-whole provisions.

No long-term debt defaults have occurred as of December 31, 2023.

*CYAPC's Pre-1983 Spent Nuclear Fuel Obligation:* Under the Nuclear Waste Policy Act of 1982, the DOE is responsible for the selection and development of repositories for, and the disposal of, spent nuclear fuel and high-level radioactive waste. CYAPC is obligated to pay the DOE for the costs to dispose of spent nuclear fuel and high-level radioactive waste generated prior to April 7, 1983 (pre-1983 Spent Nuclear Fuel). CYAPC has partially paid this obligation and recorded an accrual for its remaining liability to the DOE. This liability accrues interest costs at the 3-month Treasury bill yield rate. For nuclear fuel used to generate electricity prior to April 7, 1983, payment may be made any time prior to the first delivery of spent fuel to the DOE. As of December 31, 2023 and 2022, as a result of consolidating CYAPC, Eversource has consolidated \$12.5 million and \$11.9 million, respectively, in pre-1983 spent nuclear fuel obligations to the DOE. The obligation includes accumulated interest costs of \$9.5 million and \$8.8 million as of December 31, 2023 and 2022, respectively. CYAPC maintains a trust to fund amounts due to the DOE for the disposal of pre-1983 spent nuclear fuel. For further information, see Note 5, "Marketable Securities," to the financial statements. Fees for disposal of nuclear fuel burned on or after April 7, 1983 were billed to member companies and paid to the DOE.

*Long-Term Debt Maturities:* Long-term debt maturities on debt outstanding for the years 2024 through 2028 and thereafter are shown below. These amounts exclude PSNH rate reduction bonds, CYAPC pre-1983 spent nuclear fuel obligation, net unamortized premiums, discounts and debt issuance costs, and other fair value adjustments as of December 31, 2023:

| (Millions of Dollars) | Eversource         | CL&P              | NSTAR Electric    | PSNH              |

#### 10. RATE REDUCTION BONDS AND VARIABLE INTEREST ENTITIES

*Rate Reduction Bonds:* In May 2018, PSNH Funding, a wholly-owned subsidiary of PSNH, issued \$635.7 million of securitized RRBs in multiple tranches with a weighted average interest rate of 3.66 percent, and final maturity dates ranging from 2026 to 2035. The RRBs are expected to be repaid by February 1, 2033. RRB payments consist of principal and interest and are paid semi-annually, beginning on February 1, 2019. The RRBs were issued pursuant to a finance order issued by the NHPUC in January 2018 to recover remaining costs resulting from the divestiture of PSNH's generation assets.

The proceeds were used by PSNH Funding to purchase PSNH's stranded cost asset-recovery property, including its vested property right to bill, collect and adjust a non-bypassable stranded cost recovery charge from PSNH's retail customers. The collections are used to pay principal, interest and other costs in connection with the RRBs. The RRBs are secured by the stranded cost asset-recovery property. Cash collections from the stranded cost recovery charges and funds on deposit in trust accounts are the sole source of funds to satisfy the debt obligation. PSNH is not the owner of the RRBs, and PSNH Funding's assets and revenues are not available to pay PSNH's creditors. The RRBs are non-recourse senior secured obligations of PSNH Funding and are not insured or guaranteed by PSNH or Eversource Energy.

PSNH Funding was formed solely to issue RRBs to finance PSNH's unrecovered remaining costs associated with the divestiture of its generation assets. PSNH Funding is considered a VIE primarily because the equity capitalization is insufficient to support its operations. PSNH has the power to direct the significant activities of the VIE and is most closely associated with the VIE as compared to other interest holders. Therefore, PSNH is considered the primary beneficiary and consolidates PSNH Funding in its consolidated financial statements. The following tables summarize the impact of PSNH Funding on PSNH's balance sheets and income statements:

| (Millions of Dollars)  | As of December 31, |         |
|--|--------------------|---------|
|  | 2023               | 2022    |
| PSNH Balance Sheets:   |                    |         |
| Restricted Cash - Current Portion (included in Current Assets)           | \$ 30.0            | \$ 32.4 |
| Restricted Cash - Long-Term Portion (included in Other Long-Term Assets) | 3.2                | 3.2     |
| Securitized Stranded Cost (included in Regulatory Assets)                | 392.5              | 435.7   |
| Other Regulatory Liabilities (included in Regulatory Liabilities)        | 5.3                | 6.0     |
| Accrued Interest (included in Other Current Liabilities)                 | 6.3                | 6.9     |
| Rate Reduction Bonds - Current Portion                                   | 43.2               | 43.2    |
| Rate Reduction Bonds - Long-Term Portion                                 | 367.3              | 410.5   |

| (Millions of Dollars)  | For the Years Ended December 31, |         |         |
|--|----------------------------------|---------|---------|
|  | 2023                             | 2022    | 2021    |
| PSNH Income Statements:  |                                  |         |         |
| Amortization of RRB Principal (included in Amortization of Regulatory (Liabilities)/Assets, Net) | \$ 43.2                          | \$ 43.2 | \$ 43.2 |
| Interest Expense on RRB Principal (included in Interest Expense)                                 | 15.7                             | 17.0    | 18.4    |

Estimated principal payments on RRBs as of December 31, 2023, is summarized annually through 2028 and thereafter as follows:

| (Millions of Dollars) | 2024    | 2025    | 2026    | 2027    | 2028    | Thereafter | Total    |
|-----------------------|---------|---------|---------|---------|---------|------------|----------|
| PSNH                  | \$ 43.2 | \$ 43.2 | \$ 43.2 | \$ 43.2 | \$ 43.2 | \$ 194.5   | \$ 410.5 |

*Variable Interest Entities - Other:* The Company's variable interests outside of the consolidated group include contracts that are required by regulation and provide for regulatory recovery of contract costs and benefits through customer rates. Eversource, CL&P and NSTAR Electric hold variable interests in VIEs through agreements with certain entities that own single renewable energy or peaking generation power plants, with other independent power producers and with transmission businesses. Eversource, CL&P and NSTAR Electric do not control the activities that are economically significant to these VIEs or provide financial or other support to these VIEs. Therefore, Eversource, CL&P and NSTAR Electric do not consolidate these VIEs.

## 11. EMPLOYEE BENEFITS

### A. Pension Benefits and Postretirement Benefits Other Than Pension

Eversource provides defined benefit retirement plans (Pension Plans) that cover eligible employees and are subject to the provisions of ERISA, as amended by the Pension Protection Act of 2006. Eversource's policy is to annually fund the Pension Plans in an amount at least equal to an amount that will satisfy all federal funding requirements. In addition to the Pension Plans, Eversource maintains non-qualified defined benefit retirement plans (SERP Plans), which provide benefits in excess of Internal Revenue Code limitations to eligible participants consisting of current and retired employees.

Eversource also provides defined benefit postretirement plans (PBOP Plans) that provide life insurance and a health reimbursement arrangement created for the purpose of reimbursing retirees and dependents for health insurance premiums and certain medical expenses to eligible employees that meet certain age and service eligibility requirements. The benefits provided under the PBOP Plans are not vested, and the Company has the right to modify any benefit provision subject to applicable laws at that time. Eversource annually funds postretirement costs through tax deductible contributions to external trusts.

*Funded Status:* The Pension, SERP and PBOP Plans are accounted for under the multiple-employer approach, with each operating company's balance sheet reflecting its share of the funded status of the plans. Although Eversource maintains marketable securities in a benefit trust, the SERP Plans do not contain any assets. For further information, see Note 5, "Marketable Securities," to the financial statements. The following tables provide information on the plan benefit obligations, fair values of plan assets, and funded status:

|   | Pension and SERP   |              |                |            |              |              |                |            |

| Fair Value of Pension Plan Assets as of End of Year       | \$ 5,775.0         | \$ 1,170.0   | \$ 1,411.6     | \$ 614.0   | \$ 5,806.4   | \$ 1,172.0   | \$ 1,418.8     | \$ 618.0   |
| Funded Status as of December 31st                         | \$ 536.6           | \$ 121.5     | \$ 304.6       | \$ 51.7    | \$ 586.3     | \$ 142.0     | \$ 308.4       | \$ 61.8    |

Actuarial (Loss)/Gain: For the year ended December 31, 2023, the actuarial loss was primarily attributable to a decrease in the discount rate, which resulted in an increase to Eversource's Pension and SERP Plans' projected benefit obligation of \$98.9 million. For the year ended December 31, 2022, the actuarial gain was primarily attributable to an increase in the discount rate, which resulted in a decrease to Eversource's Pension and SERP Plans' projected benefit obligation of \$1.48 billion.

As of December 31, 2023 and 2022, the accumulated benefit obligation for the Pension and SERP Plans is as follows:

| (Millions of Dollars) | Eversource | CL&P     | NSTAR Electric | PSNH     |
|-----------------------|------------|----------|----------------|----------|
| 2023                  | \$ 4,936.8 | \$ 977.8 | \$ 1,051.9     | \$ 522.1 |
| 2022                  | 4,911.6    | 960.7    | 1,055.1        | 516.9    |

Actuarial Gain/(Loss): For the year ended December 31, 2023, the actuarial gain was primarily attributable to changes to termination, retirement, and dependency rates that were updated as a result of an experience study performed in 2023, updated census data, changes to plan provisions, and other assumption changes, which resulted in a decrease to the Eversource PBOP projected benefit obligation of \$17 million. The actuarial gain was partially offset by a decrease in the discount rate, which resulted in an increase to the Eversource PBOP projected benefit obligation of \$12 million. For the year ended December 31, 2022, the actuarial gain was primarily attributable to an increase in the discount rate, which resulted in a decrease to the Eversource PBOP projected benefit obligation of \$180.1 million.

A reconciliation of the prepaid assets and liabilities within the Eversource Pension, SERP and PBOP Plans' funded status to the balance sheets is as follows:

|                                      | As of December 31, |          |                |         |            |          |                |         |
|--------------------------------------|--------------------|----------|----------------|---------|------------|----------|----------------|---------|
|                                      | 2023               |          |                |         | 2022       |          |                |         |

| Less: Accrued SERP - current portion | (19.4)             | (0.3)    | (0.2)          | (0.4)   | (47.3)     | (0.3)    | (0.2)          | (0.4)   |
| Accrued Pension, SERP and PBOP       | \$ 123.8           | \$ 5.6   | \$ 1.7         | \$ 4.2  | \$ 135.5   | \$ 12.9  | \$ 1.6         | \$ 6.5  |

The following actuarial assumptions were used in calculating the Pension, SERP and PBOP Plans' year end funded status:

|                               | Pension and SERP   |   |      |      | PBOP               |      |      |   |      |
|-------------------------------|--------------------|---|------|------|--------------------|------|------|---|------|
|                               | As of December 31, |   |      |      | As of December 31, |      |      |   |      |
|                               | 2023               |   | 2022 |      | 2023               |      | 2022 |   |      |
| Discount Rate                 | 4.9%               | — | 5.0% | 5.1% | —                  | 5.2% | 5.0% | — | 5.2% |
| Compensation/Progression Rate | 3.5%               | — | 4.0% | 3.5% | —                  | 4.0% | N/A  |   |      |

For the Eversource Service PBOP Plan, the health care cost trend rate is not applicable. For the Aquarion PBOP Plan, the health care cost trend rate for pre-65 retirees is 6.75 percent, with an ultimate rate of 5 percent in 2031, and for post-65 retirees, the health care trend rate and ultimate rate is 3.5 percent.

*Expense:* Eversource charges net periodic benefit plan expense/(income) for the Pension, SERP and PBOP Plans to its subsidiaries based on the actual participant demographic data for each subsidiary's participants. The actual investment return in the trust is allocated to each of the subsidiaries annually in proportion to the investment return expected to be earned during the year. The Company utilizes the spot rate methodology to estimate the discount rate for the service and interest cost components of benefit expense, which provides a relatively precise measurement by matching projected cash flows to the corresponding spot rates on the yield curve.

The components of net periodic benefit plan expense/(income) for the Pension, SERP and PBOP Plans, prior to amounts capitalized as Property, Plant and Equipment or deferred as regulatory assets/(liabilities) for future recovery or refund, are shown below. The service cost component of net periodic benefit plan expense/(income), less the capitalized portion, is included in Operations and Maintenance expense on the statements of income. The remaining components of net periodic benefit plan expense/(income), less the deferred portion, are included in Other Income, Net on the statements of income. Pension, SERP and PBOP expense reflected in the statements of cash flows for CL&P, NSTAR Electric and PSNH does not include intercompany allocations of net periodic benefit plan expense/(income), as these amounts are cash settled on a short-term basis.

For the Aquarion Pension Plan, the expected long-term rate of return was 7.94 percent and 7 percent for the years ended December 31, 2023 and 2022, respectively. For the Aquarion PBOP Plan the expected long-term rate of return was 7 percent for the years ended December 31, 2023 and 2022 and the health care cost trend rate was a range of 3.5 percent to 7 percent for the year ended December 31, 2023 and 3.5 percent to 6.5 percent for the year ended December 31, 2022.

*Regulatory Assets and Accumulated Other Comprehensive Income/(Loss) Amounts:* The Pension, SERP and PBOP Plans cover eligible employees, including, among others, employees of the regulated companies. The regulated companies record actuarial losses and gains and prior service costs and credits arising at the December 31st remeasurement date of the funded status of the benefit plans as a regulatory asset or regulatory liability in lieu of a charge to Accumulated Other Comprehensive Income/(Loss), reflecting ultimate recovery from customers through rates. Regulatory accounting is also applied to the portions of the Eversource Service retiree benefit costs that support the regulated companies, as these costs are also recovered from customers. Adjustments to the Pension, SERP and PBOP Plans' funded status for the unregulated companies are recorded on an after-tax basis to Accumulated Other Comprehensive Income/(Loss). For further information, see Note 2, "Regulatory Accounting," and Note 16, "Accumulated Other Comprehensive Income/(Loss)," to the financial statements.

The following is a summary of the changes in plan assets and benefit obligations recognized in Regulatory Assets and Other Comprehensive Income (OCI) as well as amounts in Regulatory Assets and OCI that were reclassified as net periodic benefit expense during the years presented:

|   | Pension and SERP                 |            |         |        | PBOP                             |         |          |          |
|---|----------------------------------|------------|---------|--------|----------------------------------|---------|----------|----------|
|   | Regulatory Assets                |            | OCI     |        | Regulatory Assets                |         | OCI      |          |

The following is a summary of the remaining Regulatory Assets and Accumulated Other Comprehensive Income amounts that have not been recognized as components of net periodic benefit expense as of December 31, 2023 and 2022:

|                             | Regulatory Assets as of December 31, |          | AOCI as of December 31, |         |
|-----------------------------|--------------------------------------|----------|-------------------------|---------|
|                             | 2023                                 | 2022     | 2023                    | 2022    |
|                             | (Millions of Dollars)                |          |                         |         |
| <b>Pension and SERP</b>     |                                      |          |                         |         |
| Actuarial Loss              | \$ 1,101.0                           | \$ 888.7 | \$ 56.5                 | \$ 61.9 |
| Prior Service Cost          | 2.9                                  | 4.1      | 0.3                     | 0.4     |
| <b>PBOP</b>                 |                                      |          |                         |         |
| Actuarial Loss              | \$ 49.8                              | \$ 81.8  | \$ 2.4                  | \$ 2.7  |
| Prior Service (Credit)/Cost | (87.4)                               | (108.3)  | 0.7                     | 0.9     |

The difference between the actual return and calculated expected return on plan assets for the Pension and PBOP Plans, as well as changes in actuarial assumptions impacting the projected benefit obligation, are recorded as unamortized actuarial gains or losses arising during the year in Regulatory Assets or Accumulated Other Comprehensive Income/(Loss). Unamortized actuarial gains or losses are amortized as a component of pension and PBOP expense over the estimated average future employee service period using the corridor approach.

*Estimated Future Benefit Payments:* The following benefit payments, which reflect expected future service, are expected to be paid by the Pension, SERP and PBOP Plans:

|                       | 2024     | 2025     | 2026     | 2027     | 2028     | 2029 - 2033 |
|-----------------------|----------|----------|----------|----------|----------|-------------|
| (Millions of Dollars) |          |          |          |          |          |             |
| Pension and SERP      | \$ 370.2 | \$ 367.1 | \$ 370.8 | \$ 373.8 | \$ 375.0 | \$ 1,864.3  |
| PBOP                  | 55.2     | 54.7     | 53.8     | 52.8     | 51.8     | 241.1       |

*Eversource Contributions:* Based on the current status of the Pension Plans and federal pension funding requirements, there is no minimum funding requirement for our Eversource Service Pension Plan in 2024 and we do not expect to make pension contributions in 2024. We do not expect to make any contributions to the Eversource Service PBOP Plan in 2024.

Eversource contributed \$5.0 million and \$1.9 million to the Aquarion Pension and PBOP Plans, respectively, in 2023. Eversource currently estimates contributing \$5.0 million and \$2.4 million to the Aquarion Pension and PBOP Plans, respectively, in 2024.

*Fair Value of Pension and PBOP Plan Assets:* Pension and PBOP funds are held in external trusts. Trust assets, including accumulated earnings, must be used exclusively for Pension and PBOP payments. Eversource's investment strategy for its Pension and PBOP Plans is to maximize the long-term rates of return on these plans' assets within an acceptable level of risk. The investment guidelines for each asset category includes a diversification of asset types, fund strategies and fund managers and it establishes target asset allocations that are routinely reviewed and periodically rebalanced. PBOP assets are comprised of assets held in the PBOP Plan trust, as well as specific assets within the Pension Plan trust (401(h) assets). The investment policy and strategy of the 401(h) assets is consistent with that of the defined benefit pension plan. Eversource's expected long-term rates of return on Pension and PBOP Plan assets are based on target asset allocation assumptions and related expected long-term rates of return. In developing its expected long-term rate of return assumptions for the Pension and PBOP Plans, Eversource evaluated input from consultants, as well as long-term inflation assumptions and historical returns. Management has assumed long-term rates of return of 8.25 percent for the Eversource Service Pension Plan assets, the Eversource Service PBOP Plan assets and the Aquarion Pension Plan assets, and a 7 percent long-term rate of return for the Aquarion PBOP Plan, to estimate its 2024 Pension and PBOP costs.

These long-term rates of return are based on the assumed rates of return for the target asset allocations as follows:

|                                | As of December 31,      |                      |                                       |                                       |                        |

<sup>(1)</sup> Fixed Income investments classified as Level 1 as of December 31, 2023 and 2022 include pending purchases and pending redemption settlements of \$31 million and \$138 million, respectively.

<sup>(2)</sup> The assets of the Pension Plan include a 401(h) account that has been allocated to provide health and welfare postretirement benefits under the PBOP Plan.

The Company values assets based on observable inputs when available. Equity securities, exchange traded funds and futures contracts classified as Level 1 in the fair value hierarchy are priced based on the closing price on the primary exchange as of the balance sheet date.

Fixed income securities, such as government issued securities and corporate bonds, are included in Level 2 and are valued using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. The pricing models utilize observable inputs such as recent trades

for the same or similar instruments, yield curves, discount margins and bond structures. Swaps are valued using pricing models that incorporate interest rates and equity and fixed income index closing prices to determine a net present value of the cash flows.

Certain investments, such as commingled funds, private equity investments, fixed income funds, real asset funds and hedge funds are valued using the net asset value (NAV) as a practical expedient. Assets valued at NAV are uncategorized in the fair value hierarchy. These investments are structured as investment companies offering shares or units to multiple investors for the purpose of providing a return. Commingled funds are recorded at NAV provided by the asset manager, which is based on the market prices of the underlying equity securities. Private Equity investments, Fixed Income partnership funds and Real Assets are valued using the NAV provided by the partnerships, which are based on discounted cash flows of the underlying investments, real estate appraisals or public market comparables of the underlying investments, or the NAV of underlying assets held in hedge funds. Equity Securities investments in United States, Global, Non-United States and Emerging Markets that are uncategorized include investments in commingled funds and hedge funds that are overlaid with equity index swaps and futures contracts. Fixed Income investments that are uncategorized include investments in commingled funds, fixed income funds that invest in a variety of opportunistic credit and private debt strategies, and hedge funds that are overlaid with fixed income futures.

#### B. Defined Contribution Plans

Eversource maintains defined contribution plans on behalf of eligible participants. The Eversource 401k Plan provides for employee and employer contributions up to statutory limits. For eligible employees, the Eversource 401k Plan provides employer matching contributions of either 100 percent up to a maximum of three percent of eligible compensation or 50 percent up to a maximum of eight percent of eligible compensation. The Eversource 401k Plan also contains a K-Vantage feature for the benefit of eligible participants, which provides an additional annual employer contribution based on age and years of service. K-Vantage participants are not eligible to actively participate in the Eversource Pension Plan.

The total Eversource 401k Plan employer matching contributions, including the K-Vantage contributions, were as follows:

| (Millions of Dollars) | Eversource | CL&P   | NSTAR Electric | PSNH   |
|-----------------------|------------|--------|----------------|--------|
| 2023                  | \$ 67.3    | \$ 9.0 | \$ 13.7        | \$ 5.4 |
| 2022                  | 59.9       | 7.7    | 12.8           | 4.8    |
| 2021                  | 55.5       | 7.0    | 12.2           | 4.3    |

#### C. Share-Based Payments

Share-based compensation awards are recorded using a fair-value based method at the date of grant. Eversource, CL&P, NSTAR Electric and PSNH record compensation expense related to these awards, as applicable, for shares issued to their respective employees and officers, as well as for the allocation of costs associated with shares issued to Eversource's service company employees and officers that support CL&P, NSTAR Electric and PSNH.

*Eversource Incentive Plans:* Eversource maintains long-term equity-based incentive plans in which Eversource, CL&P, NSTAR Electric and PSNH employees, officers and board members are eligible to participate. The incentive plans authorize Eversource to grant up to 7,400,000 new shares for various types of awards, including RSUs and performance shares, to eligible employees, officers, and board members. As of December 31, 2023 and 2022, Eversource had 4,587,376 and 903,183 common shares, respectively, available for issuance under these plans.

Eversource accounts for its various share-based plans as follows:

- RSUs - Eversource records compensation expense, net of estimated forfeitures, on a straight-line basis over the requisite service period based upon the fair value of Eversource's common shares at the date of grant. The par value of RSUs is reclassified to Common Stock from Capital Surplus, Paid In as RSUs become issued as common shares.
- Performance Shares - Eversource records compensation expense, net of estimated forfeitures, over the requisite service period. Performance shares vest based upon the extent to which Company goals are achieved. Vesting of outstanding performance shares is based upon the Company's EPS growth over the requisite service period and level of payout is determined based on the total shareholder return as compared to the Edison Electric Institute (EEI) Index during the requisite service period. The fair value of performance shares is determined at the date of grant using a lattice model. Compensation expense is subject to volatility until payout is established.

*RSUs:* Eversource granted RSUs under the annual long-term incentive programs that are subject to three-year graded vesting schedules for employees, and one-year graded vesting schedules, or immediate vesting, for board members. RSUs are paid in shares, reduced by amounts sufficient to satisfy withholdings for income taxes, subsequent to vesting. A summary of RSU transactions is as follows:

|                                     | RSUs<br>(Units) | Weighted Average<br>Grant-Date Fair Value |
|-------------------------------------|-----------------|---|
| Outstanding as of December 31, 2022 | 629,734         | \$ 68.52                                  |
| Granted                             | 248,124         | \$ 76.42                                  |
| Shares Issued                       | (181,409)       | \$ 87.09                                  |
| Forfeited                           | (24,207)        | \$ 83.43                                  |
| Outstanding as of December 31, 2023 | 672,242         | \$ 65.89                                  |

The weighted average grant-date fair value of RSUs granted for the years ended December 31, 2023, 2022 and 2021 was \$76.42, \$85.96 and \$81.89, respectively. As of December 31, 2023 and 2022, the number and weighted average grant-date fair value of unvested RSUs was 326,581

and \$80.76 per share, and 300,592 and \$87.21 per share, respectively. During 2023, there were 199,145 RSUs at a weighted average grant-date fair value of \$86.92 per share that vested during the year and were either paid or deferred. As of December 31, 2023, 345,661 RSUs were fully vested and deferred and an additional 310,252 are expected to vest.

*Performance Shares:* Eversource granted performance shares under the annual long-term incentive programs that vest based upon the extent to which Company goals are achieved at the end of three-year performance measurement periods. Performance shares are paid in shares, after the performance measurement period. A summary of performance share transactions is as follows:

|                                     | Performance Shares<br>(Units) | Weighted Average<br>Grant-Date Fair Value |
|-------------------------------------|-------------------------------|---|
| Outstanding as of December 31, 2022 | 547,290                       | \$ 87.49                                  |
| Granted                             | 278,983                       | \$ 83.39                                  |
| Shares Issued                       | (125,677)                     | \$ 90.49                                  |
| Forfeited                           | (36,172)                      | \$ 85.13                                  |
| Outstanding as of December 31, 2023 | 664,424                       | \$ 85.33                                  |

The weighted average grant-date fair value of performance shares granted for the years ended December 31, 2023, 2022 and 2021 was \$83.39, \$83.34 and \$76.08, respectively. As of December 31, 2023 and 2022, the number and weighted average grant-date fair value of unvested performance shares was 485,480 and \$85.20 per share, and 457,069 and \$88.43 per share, respectively. During 2023, there were 214,742 performance shares at a weighted average grant-date fair value of \$89.70 per share that vested during the year and were either paid or deferred. As of December 31, 2023, 178,944 performance shares were fully vested and deferred.

*Compensation Expense:* The total compensation expense and associated future income tax benefits recognized by Eversource, CL&P, NSTAR Electric and PSNH for share-based compensation awards were as follows:

| Eversource<br>(Millions of Dollars) | For the Years Ended December 31, |         |         |
|-------------------------------------|----------------------------------|---------|---------|
|                                     | 2023                             | 2022    | 2021    |
| Compensation Expense                | \$ 27.8                          | \$ 33.4 | \$ 28.2 |
| Future Income Tax Benefit           | 7.3                              | 8.7     | 7.3     |

| (Millions of Dollars)     | For the Years Ended December 31, |                   |        |         |                   |        |        |                   |        |
|---------------------------|----------------------------------|-------------------|--------|---------|-------------------|--------|--------|-------------------|--------|
|                           | 2023                             |                   |        | 2022    |                   |        | 2021   |                   |        |
|                           | CL&P                             | NSTAR<br>Electric | PSNH   | CL&P    | NSTAR<br>Electric | PSNH   | CL&P   | NSTAR<br>Electric | PSNH   |
| Compensation Expense      | \$ 8.7                           | \$ 8.7            | \$ 3.0 | \$ 10.0 | \$ 10.7           | \$ 3.6 | \$ 8.8 | \$ 9.0            | \$ 3.0 |
| Future Income Tax Benefit | 2.3                              | 2.3               | 0.8    | 2.6     | 2.8               | 0.9    | 2.3    | 2.3               | 0.8    |

As of December 31, 2023, there was \$31.3 million of total unrecognized compensation expense related to nonvested share-based awards for Eversource, including \$5.8 million for CL&P, \$8.6 million for NSTAR Electric, and \$1.9 million for PSNH. This cost is expected to be recognized ratably over a weighted-average period of 1.81 years for Eversource, CL&P, NSTAR Electric and PSNH.

An income tax rate of 26 percent was used to estimate the tax effect on total share-based payments determined under the fair-value based method for all awards. The Company issues treasury shares to settle fully vested RSUs and performance shares under the Company's incentive plans.

For the year ended December 31, 2023, a tax deficiency associated with the distribution of stock compensation awards increased income tax expense by \$0.5 million, which decreased cash flows from operating activities on the statements of cash flows. For the years ended December 31, 2022 and 2021, excess tax benefits associated with the distribution of stock compensation awards reduced income tax expense by \$2.1 million and \$4.0 million, respectively, which increased cash flows from operating activities on the statements of cash flows.

#### D. Other Retirement Benefits

Eversource provides retirement and other benefits for certain current and past company officers. These benefits are accounted for on an accrual basis and expensed over a period equal to the service lives of the employees. The actuarially-determined liability for these benefits is included in Other Current and Long-Term Liabilities on the balance sheets. The related expense, which includes the allocation of expense associated with Eversource's service company officers that support CL&P, NSTAR Electric and PSNH, is included in Operations and Maintenance Expense on the income statements. The liability and expense amounts are as follows:

| Eversource<br>(Millions of Dollars)              | As of and For the Years Ended December 31, |         |         |
|--|--|---------|---------|
|  | 2023                                       | 2022    | 2021    |
| Actuarially-Determined Liability                 | \$ 32.6                                    | \$ 43.4 | \$ 42.8 |

Eversource, CL&P, NSTAR Electric and PSNH file a consolidated federal income tax return and unitary, combined and separate state income tax returns. These entities are also parties to a tax allocation agreement under which taxable subsidiaries do not pay any more taxes than they would have otherwise paid had they filed a separate company tax return, and subsidiaries generating tax losses, if any, are paid for their losses when utilized.

Deferred tax assets and liabilities are recognized for the future tax effects of temporary differences between the carrying amounts and the tax basis of assets and liabilities. The tax effect of temporary differences is accounted for in accordance with the rate-making treatment of the applicable regulatory commissions and relevant accounting authoritative literature. The tax effects of temporary differences that give rise to the net accumulated deferred income tax obligations are as follows:

|  | As of December 31, |            |                |          |            |            |                |          |

<sup>(1)</sup> As of December 31, 2023, the Eversource Valuation Allowance of \$328.1 million includes \$224.0 million related to the impairment of Eversource's offshore wind investments.

**2022 Federal Legislation:** On August 16, 2022, the Inflation Reduction Act of 2022 (IRA) was signed into law. This is a broad package of legislation that includes incentives and support for clean energy resource development. Most notable for Eversource, the investment tax credit (ITC) on offshore wind projects increases from 30 percent to 40 percent if certain requirements for labor and domestic content are met. The act also re-establishes the production tax credit for solar and wind energy projects, gives increased credit for projects in certain communities, and sets credits for qualifying clean energy generation and energy storage projects. The tax provisions of the IRA provide additional incentives for offshore wind projects and could reduce retail electricity costs for our customers related to those clean energy investments. The IRA includes other tax provisions focused on implementing a 15 percent minimum tax on adjusted financial statement income and a one percent excise tax on corporate share repurchases. The Department of Treasury and the Internal Revenue Service issued some guidance during 2023; however, they are expected to issue additional needed guidance with respect to the application of the newly enacted IRA provisions in the future. We will continue to monitor and evaluate impacts on our consolidated financial statements. We currently do not expect the alternative minimum tax change to have a material impact on our earnings, financial condition or cash flows.

**Carryforwards:** The following table provides the amounts and expiration dates of state tax credit and loss carryforwards and federal tax credit and net operating loss carryforwards:

| (Millions of Dollars)         | As of December 31, |       |                |      |                  |            |       |                |      |                  |
|-------------------------------|--------------------|-------|----------------|------|------------------|------------|-------|----------------|------|------------------|
|                               | 2023               |       |                |      |                  | 2022       |       |                |      |                  |
|                               | Eversource         | CL&P  | NSTAR Electric | PSNH | Expiration Range | Eversource | CL&P  | NSTAR Electric | PSNH | Expiration Range |
| State Net Operating Loss      | \$ 243.4           | \$ —  | \$ —           | \$ — | 2023 - 2041      | \$ 288.1   | \$ —  | \$ —           | \$ — | 2022 - 2041      |
| State Tax Credit              | 228.5              | 157.5 | —              | —    | 2023 - 2028      | 204.5      | 137.7 | —              | —    | 2022 - 2027      |
| State Charitable Contribution | 7.9                | —     | —              | —    | 2023 - 2027      | 20.1       | —     | —              | —    | 2022 - 2026      |

In 2023, the Company increased its valuation allowance reserve for state credits by \$21.3 million (\$17.3 million for CL&P), net of tax, to reflect an update for expiring tax credits. In 2022, the Company increased its valuation allowance reserve for state credits by \$21.3 million (\$18.8 million for CL&P), net of tax, to reflect an update for expiring tax credits.

For 2023, state credit and state loss carryforwards have been partially reserved by a valuation allowance of \$104.1 million (net of tax) and for 2022, state credit and state loss carryforwards were partially reserved by a valuation allowance of \$82.8 million (net of tax).

**Unrecognized Tax Benefits:** A reconciliation of the activity in unrecognized tax benefits, all of which would impact the effective tax rate if recognized, is as follows:

| (Millions of Dollars)           | Eversource |       | CL&P |       |
|---------------------------------|------------|-------|------|-------|
| Balance as of January 1, 2021   | \$         | 61.8  | \$   | 25.8  |
| Gross Increases - Current Year  |            | 11.3  |      | 3.8   |
| Gross Decreases - Prior Year    |            | (0.3) |      | (0.6) |
| Lapse of Statute of Limitations |            | (7.0) |      | (2.8) |
| Balance as of December 31, 2021 |            | 65.8  |      | 26.2  |
| Gross Increases - Current Year  |            | 11.5  |      | 3.5   |
| Gross Decreases - Prior Year    |            | (2.4) |      | (0.9) |
| Lapse of Statute of Limitations |            | (7.8) |      | (3.3) |
| Balance as of December 31, 2022 |            | 67.1  |      | 25.5  |
| Gross Increases - Current Year  |            | 23.4  |      | 4.0   |
| Gross Increases - Prior Year    |            | 0.1   |      | 0.1   |
| Gross Decreases - Prior Year    |            | (0.1) |      | —     |
| Lapse of Statute of Limitations |            | (9.2) |      | (3.8) |
| Balance as of December 31, 2023 | \$         | 81.3  | \$   | 25.8  |

**Interest and Penalties:** Interest on uncertain tax positions is recorded and generally classified as a component of Other Interest Expense on the statements of income. However, when resolution of uncertainties results in the Company receiving interest income, any related interest benefit is recorded in Other Income, Net on the statements of income. No penalties have been recorded. The amount of interest expense recognized on uncertain tax positions was \$0.3 million for the year ended December 31, 2023. There was no interest expense/(income) recognized on uncertain tax positions for the years ended December 31, 2022 or 2021. Accrued interest payable was \$0.4 million and \$0.1 million as of December 31, 2023 and 2022, respectively.

**Tax Positions:** During 2023 and 2022, Eversource did not resolve any of its uncertain tax positions.

*Open Tax Years:* The following table summarizes Eversource, CL&P, NSTAR Electric, and PSNH's tax years that remain subject to examination by major tax jurisdictions as of December 31, 2023:

| Description   | Tax Years   |
|---------------|-------------|
| Federal       | 2023        |
| Connecticut   | 2020 - 2023 |
| Massachusetts | 2020 - 2023 |
| New Hampshire | 2020 - 2023 |

Eversource does not estimate to have an earnings impact related to unrecognized tax benefits during the next twelve months.

### 13. COMMITMENTS AND CONTINGENCIES

#### A. Environmental Matters

Eversource, CL&P, NSTAR Electric and PSNH are subject to environmental laws and regulations intended to mitigate or remove the effect of past operations and improve or maintain the quality of the environment. These laws and regulations require the removal or the remedy of the effect on the environment of the disposal or release of certain specified hazardous substances at current and former operating sites. Eversource, CL&P, NSTAR Electric and PSNH have an active environmental auditing and training program and each believes it is substantially in compliance with all enacted laws and regulations.

Environmental reserves are accrued when assessments indicate it is probable that a liability has been incurred and an amount can be reasonably estimated. The approach used estimates the liability based on the most likely action plan from a variety of available remediation options, including no action required or several different remedies ranging from establishing institutional controls to full site remediation and monitoring. These liabilities are estimated on an undiscounted basis and do not assume that the amounts are recoverable from insurance companies or other third parties. The environmental reserves include sites at different stages of discovery and remediation and do not include any unasserted claims.

These reserve estimates are subjective in nature as they take into consideration several different remediation options at each specific site. The reliability and precision of these estimates can be affected by several factors, including new information concerning either the level of contamination at the site, the extent of Eversource's, CL&P's, NSTAR Electric's and PSNH's responsibility for remediation or the extent of remediation required, recently enacted laws and regulations or changes in cost estimates due to certain economic factors. It is possible that new information or future developments could require a reassessment of the potential exposure to required environmental remediation. As this information becomes available, management will continue to assess the potential exposure and adjust the reserves accordingly.

The amounts recorded as environmental reserves are included in Other Current Liabilities and Other Long-Term Liabilities on the balance sheets and represent management's best estimate of the liability for environmental costs, and take into consideration site assessment, remediation and long-term monitoring costs. The environmental reserves also take into account recurring costs of managing hazardous substances and pollutants, mandated expenditures to remediate contaminated sites and any other infrequent and non-recurring clean-up costs. A reconciliation of the activity in the environmental reserves is as follows:

| (Millions of Dollars)           | Eversource | CL&P    | NSTAR Electric | PSNH   |
|---------------------------------|------------|---------|----------------|--------|
| Balance as of January 1, 2022   | \$ 115.4   | \$ 13.9 | \$ 3.3         | \$ 6.3 |
| Additions                       | 12.6       | 0.9     | 0.4            | 0.5    |
| Payments/Reductions             | (5.4)      | (0.9)   | (0.3)          | (0.7)  |
| Balance as of December 31, 2022 | 122.6      | 13.9    | 3.4            | 6.1    |
| Additions                       | 16.8       | 2.6     | 2.5            | 1.7    |
| Payments/Reductions             | (11.2)     | (2.7)   | (0.5)          | (0.2)  |
| Balance as of December 31, 2023 | \$ 128.2   | \$ 13.8 | \$ 5.4         | \$ 7.6 |

The number of environmental sites for which remediation or long-term monitoring, preliminary site work or site assessment is being performed are as follows:

|      | Eversource | CL&P | NSTAR Electric | PSNH |
|------|------------|------|----------------|------|
| 2023 | 65         | 16   | 12             | 8    |
| 2022 | 59         | 13   | 10             | 8    |

The increase in the reserve balance was due primarily to the addition of one environmental site at NSTAR Gas, two additional sites at NSTAR Electric, three additional sites at CL&P, and changes in cost estimates at certain MGP sites at our natural gas companies and PSNH for which additional remediation will be required.

Included in the number of sites and reserve amounts above are former MGP sites that were operated several decades ago and manufactured natural gas from coal and other processes, which resulted in certain by-products remaining in the environment that may pose a potential risk to human health and the environment, for which Eversource may have potential liability. The reserve balances related to these former MGP sites were \$117.1 million and \$112.6 million as of December 31, 2023 and 2022, respectively, and related primarily to the natural gas business segment.

As of December 31, 2023, for 19 environmental sites (11 for CL&P and 1 for NSTAR Electric) that are included in the Company's reserve for environmental costs, management cannot reasonably estimate the exposure to loss in excess of the reserve, or range of loss, as these sites are under investigation and/or there is significant uncertainty as to what remedial actions, if any, the Company may be required to undertake. As of December 31, 2023, \$39.9 million (including \$12.6 million for CL&P and \$0.3 million for NSTAR Electric) had been accrued as a liability for these sites.

As of December 31, 2023, for 7 environmental sites (1 for CL&P) that are included in the Company's reserve for environmental costs, the information known and the nature of the remediation options allow for the Company to estimate the range of losses for environmental costs. As of December 31, 2023, \$29.4 million (including \$0.4 million for CL&P) has been accrued as a liability for these sites, which represents the low end of the range of the liabilities for environmental costs. Management believes that additional losses of up to approximately \$17.7 million (\$0.5 million at CL&P) may be incurred in executing current remediation plans for these sites.

As of December 31, 2023, for the remaining 39 environmental sites (including 4 for CL&P, 11 for NSTAR Electric and 8 for PSNH) that are included in the Company's reserve for environmental costs, the \$58.9 million accrual (including \$0.8 million for CL&P, \$5.1 million for NSTAR Electric and \$7.6 million for PSNH) represents management's best estimate of the probable liability and no additional loss is estimable at this time.

PSNH, NSTAR Gas, EGMA and Yankee Gas have rate recovery mechanisms for MGP related environmental costs, therefore, changes in their respective environmental reserves do not impact Net Income. CL&P is allowed to defer certain environmental costs for future recovery. NSTAR Electric does not have a separate environmental cost recovery regulatory mechanism.

## B. Long-Term Contractual Arrangements

*Estimated Future Annual Costs:* The estimated future annual costs of significant executed, non-cancelable, long-term contractual arrangements in effect as of December 31, 2023 are as follows:

| <b>Eversource</b>                   |            |            |            |            |            |            |             |

| Total                               | \$ 133.5   | \$ 214.4   | \$ 220.1   | \$ 224.3   | \$ 220.1   | \$ 3,000.3 | \$ 4,012.7  |
| <b>PSNH</b>                         |            |            |            |            |            |            |             |
| <i>(Millions of Dollars)</i>        |            |            |            |            |            |            |             |
|                                     | 2024       | 2025       | 2026       | 2027       | 2028       | Thereafter | Total       |
| Renewable Energy Purchase Contracts | \$ 27.6    | \$ 31.8    | \$ 33.4    | \$ 57.1    | \$ 55.8    | \$ 297.5   | \$ 503.2    |
| Transmission Support Commitments    | 4.1        | 4.7        | 5.8        | 6.5        | 6.5        | 6.5        | 34.1        |
| Total                               | \$ 31.7    | \$ 36.5    | \$ 39.2    | \$ 63.6    | \$ 62.3    | \$ 304.0   | \$ 537.3    |

The contractual obligations table above does not include CL&P's, NSTAR Electric's or PSNH's standard/basic service contracts for the purchase of energy supply, the amounts of which vary with customers' energy needs.

*Renewable Energy Purchase Contracts:* Renewable energy purchase contracts include non-cancellable commitments under contracts of CL&P, NSTAR Electric and PSNH for the purchase of energy and capacity from renewable energy facilities. Such contracts extend through 2044 for CL&P and NSTAR Electric and 2033 for PSNH.

Renewable Energy and Purchase Contracts includes long-term commitments of NSTAR Electric pertaining to the Vineyard Wind LLC contract awarded under the Massachusetts Clean Energy 83C procurement solicitation. NSTAR Electric, along with other Massachusetts distribution companies, entered into 20-year contracts to purchase electricity generated by this 800 megawatt offshore wind project. Construction on the Vineyard Wind project commenced in 2022. Estimated energy costs under this contract are expected to begin when the facilities are in service in 2024 and range between \$100 million and \$200 million per year under NSTAR Electric's 20-year contract, totaling approximately \$2.6 billion.

As required by 2018 regulation, CL&P and UI each entered into PURA-approved ten-year contracts in 2019 to purchase a combined total of approximately 9 million MWh annually from the Millstone Nuclear Power Station generation facility, which represents a combined amount of approximately 50 percent of the facility's output (approximately 40 percent by CL&P). Also as required by 2018 regulation, CL&P and UI each entered into PURA-approved eight-year contracts in 2019 to purchase a combined amount of approximately 18 percent of the Seabrook Nuclear Power Plant's output (approximately 15 percent by CL&P) beginning January 1, 2022. The total estimated remaining future cost of the Millstone Nuclear Power Station and Seabrook Nuclear Power Plant energy purchase contracts are \$2.4 billion and are reflected in the table above. CL&P sells the energy purchased under these contracts into the market and uses the proceeds from these energy sales to offset the contract costs. As the net costs under these contracts are recovered from customers in future rates, the contracts do not have an impact on the net income of CL&P. These contracts do not meet the definition of a derivative, and accordingly, the costs of these contracts are being accounted for as incurred.

The contractual obligations table above does not include long-term commitments signed by CL&P and NSTAR Electric, as required by the PURA and the DPU, respectively, for the purchase of renewable energy and related products that are contingent on the future construction of energy facilities, such as the long-term commitments of NSTAR Electric pertaining to the Massachusetts Clean Energy 83D contract entered into in 2018.

*Natural Gas Procurement:* Eversource's natural gas distribution businesses have long-term contracts for the purchase, transportation and storage of natural gas as part of its portfolio of supplies, which extend through 2045.

*Purchased Power and Capacity:* These contracts include capacity CfDs with generation facilities at CL&P through 2026, and various IPP contracts or purchase obligations for electricity which extend through 2024 for CL&P and 2031 for NSTAR Electric. CL&P's portion of the costs and benefits under these capacity contracts are recovered from, or refunded to, CL&P's customers.

*Peaker CfDs:* CL&P, along with UI, has three peaker CfDs for a total of approximately 500 MW of peaking capacity through 2042. CL&P has a sharing agreement with UI, whereby CL&P is responsible for 80 percent and UI for 20 percent of the net costs or benefits of these CfDs. The Peaker CfDs pay the generation facility owner the difference between capacity, forward reserve and energy market revenues and a cost-of-service payment stream for 30 years. The ultimate cost or benefit to CL&P under these contracts will depend on the costs of plant operation and the prices that the projects receive for capacity and other products in the ISO-NE markets. CL&P's portion of the amounts paid or received under the Peaker CfDs are recovered from, or refunded to, CL&P's customers.

*Transmission Support Commitments:* Along with other New England utilities, CL&P, NSTAR Electric and PSNH have entered into agreements to support the costs of, and receive rights to use, transmission and terminal facilities that import electricity from the Hydro-Québec system in Canada. CL&P, NSTAR Electric and PSNH are obligated to pay, over a 20-year period ending in 2040, their proportionate shares of the annual operation and maintenance expenses and capital costs of those facilities.

The total costs incurred under these agreements were as follows:

| Eversource<br>(Millions of Dollars) | For the Years Ended December 31, |          |          |
|-------------------------------------|----------------------------------|----------|----------|
|                                     | 2023                             | 2022     | 2021     |
| Renewable Energy Purchase Contracts | \$ 581.4                         | \$ 678.1 | \$ 609.2 |
| Natural Gas Procurement             | 695.8                            | 1,042.8  | 712.7    |
| Purchased Power and Capacity        | 69.0                             | 61.6     | 56.4     |
| Peaker CfDs                         | 20.1                             | 13.4     | 24.3     |

### C. Spent Nuclear Fuel Obligations - Yankee Companies

CL&P, NSTAR Electric and PSNH have plant closure and fuel storage cost obligations to the Yankee Companies, which have each completed the physical decommissioning of their respective nuclear power facilities and are now engaged in the long-term storage of their spent fuel. The Yankee Companies fund these costs through litigation proceeds received from the DOE and, to the extent necessary, through wholesale, FERC-approved rates charged under power purchase agreements with several New England utilities, including CL&P, NSTAR Electric and PSNH. CL&P, NSTAR Electric and PSNH, in turn recover these costs from their customers through state regulatory commission-approved retail rates. The Yankee Companies collect amounts that management believes are adequate to recover the remaining plant closure and fuel storage cost

estimates for the respective plants. Management believes CL&P and NSTAR Electric will recover their shares of these obligations from their customers. PSNH has recovered its total share of these costs from its customers.

*Spent Nuclear Fuel Litigation:*

The Yankee Companies have filed complaints against the DOE in the Court of Federal Claims seeking monetary damages resulting from the DOE's failure to accept delivery of, and provide for a permanent facility to store, spent nuclear fuel pursuant to the terms of the 1983 spent fuel and high-level waste disposal contracts between the Yankee Companies and the DOE. The court previously awarded the Yankee Companies damages for Phases I, II, III and IV of litigation resulting from the DOE's failure to meet its contractual obligations. These Phases covered damages incurred in the years 1998 through 2016, and the awarded damages have been received by the Yankee Companies with certain amounts of the damages refunded to their customers.

*DOE Phase V Damages* - On March 25, 2021, each of the Yankee Companies filed a fifth set of lawsuits against the DOE in the Court of Federal Claims resulting from the DOE's failure to begin accepting spent nuclear fuel for disposal covering the years from 2017 to 2020. The Yankee Companies filed claims seeking monetary damages totaling \$120.4 million for CYAPC, YAEC and MYAPC. Pursuant to a June 2, 2022 court order, the Yankee Companies were subsequently permitted to include monetary damages relating to the year 2021 in the DOE Phase V complaint. The Yankee Companies submitted a supplemental filing to include these costs of \$33.1 million on June 8, 2022. The DOE Phase V trial is expected to begin in the spring of 2024.

**D. Guarantees and Indemnifications**

In the normal course of business, Eversource parent provides credit assurances on behalf of its subsidiaries, including CL&P, NSTAR Electric and PSNH, in the form of guarantees. Management does not anticipate a material impact to net income or cash flows as a result of these various guarantees and indemnifications.

Guarantees issued on behalf of unconsolidated entities, including equity method offshore wind investments, for which Eversource parent is the guarantor, are recorded at fair value as a liability on the balance sheet at the inception of the guarantee. The fair value of guarantees issued on behalf of unconsolidated entities are recorded within Other Long-Term Liabilities on the balance sheet, and were \$4.4 million and \$4.2 million as of December 31, 2023 and 2022, respectively. Eversource regularly reviews performance risk under these guarantee arrangements, and believes the likelihood of payments being required under the guarantees is remote. In the event it becomes probable that Eversource parent will be required to perform under the guarantee, the amount of probable payment will be recorded.

The following table summarizes Eversource parent's exposure to guarantees and indemnifications of its subsidiaries and affiliates to external parties, and primarily relates to its offshore wind business:

| As of December 31, 2023   |  |                                |
|---|--|--------------------------------|
| Company (Obligor)   | Description  | Maximum Exposure (in millions) |
| North East Offshore, LLC, Sunrise Wind LLC, Revolution Wind, LLC and South Fork Wind, LLC | Offshore wind construction-related purchase agreements with third-party contractors <sup>(1)</sup>     | \$ 1,941.1                     |
| Eversource Investment LLC and South Fork Class B Member, LLC                              | Funding and indemnification obligations of South Fork Wind and North East Offshore, LLC <sup>(2)</sup> | 485.9                          |
| Sunrise Wind LLC  | OREC capacity production <sup>(3)</sup>  | 11.0                           |
| South Fork Wind, LLC  | Power Purchase Agreement Security <sup>(4)</sup>   | 7.1                            |
| Eversource Investment LLC   | Letters of Credit <sup>(5)</sup>   | 15.2                           |
| Eversource TEI LLC  | South Fork Wind Tax Equity <sup>(6)</sup>  | —                              |
| Various   | Surety bonds <sup>(7)</sup>  | 38.8                           |
| Sunrise Wind LLC  | Surety bonds <sup>(8)</sup>  | 20.5                           |

<sup>(1)</sup> Eversource parent issued guarantees on behalf of its 50 percent-owned affiliates, North East Offshore, LLC (NEO), Sunrise Wind LLC, Revolution Wind, LLC and South Fork Wind, LLC, under which Eversource parent agreed to guarantee each entity's performance of obligations under certain construction-related purchase agreements with third-party contractors, in an aggregate amount not to exceed \$3.03 billion. Eversource parent's obligations under the guarantees expire upon the earlier of (i) dates ranging between May 2024 and October 2028 and (ii) full performance of the guaranteed obligations. Eversource parent also issued a separate guarantee to Ørsted on behalf of NEO, under which Eversource parent agreed to guarantee 50 percent of NEO's payment obligations under certain offshore wind project construction-related agreements with Ørsted in an aggregate amount not to exceed \$62.5 million and expiring upon full performance of the guaranteed obligation.

<sup>(2)</sup> Eversource parent issued guarantees on behalf of its wholly-owned subsidiary Eversource Investment LLC (EI), which holds Eversource's investments in offshore wind-related equity method investments, and on behalf of its 50 percent-owned affiliate, South Fork Class B Member, LLC, whereby Eversource parent will guarantee each entity's performance of certain capital expenditure funding obligations during the construction phases of the South Fork Wind project and NEO's underlying offshore wind projects. Eversource parent also guaranteed certain indemnification obligations of EI associated with third party credit support for EI's investment in NEO. These guarantees will not exceed \$1.52 billion and expire upon the full performance of the guaranteed obligations.

- (3) Eversource parent issued a guarantee on behalf of its 50 percent-owned affiliate, Sunrise Wind LLC, whereby Eversource parent will guarantee Sunrise Wind LLC's performance of certain obligations, in an amount not to exceed \$15.4 million, under the Offshore Wind Renewable Energy Certificate Purchase and Sale Agreement (the Agreement). The Agreement was executed by and between the New York State Energy Research and Development Authority (NYSERDA) and Sunrise Wind LLC. The guarantee expires upon the full performance of the guaranteed obligations. Effective January 1, 2024, the maximum exposure under the guarantee increased from \$11.0 million to \$15.4 million.
- (4) Eversource parent issued a guarantee on behalf of its 50 percent-owned affiliate, South Fork Wind, LLC, whereby Eversource parent will guarantee South Fork Wind, LLC's performance of certain obligations, in an amount not to exceed \$7.1 million, under a Power Purchase Agreement between the Long Island Power Authority and South Fork Wind, LLC (the Agreement). The guarantee expires upon the later of (i) the end of the Agreement term and (ii) full performance of the guaranteed obligations.
- (5) Eversource parent entered into a guarantee on behalf of EI, under which Eversource parent would guarantee EI's obligations under a letter of credit facility with a financial institution that EI may request in an aggregate amount of up to approximately \$25 million. As of December 31, 2023, EI has issued letters of credit on behalf of South Fork Wind, LLC, Sunrise Wind LLC and Revolution Wind, LLC totaling \$15.2 million. In January 2024, EI issued two additional letters of credit on behalf of Sunrise Wind LLC totaling \$8.0 million. The guarantee will remain in effect until full performance of the guaranteed obligations.
- (6) Eversource parent issued a guarantee on behalf of its wholly-owned subsidiary, Eversource TEI LLC, whereby Eversource parent will guarantee Eversource TEI LLC's performance of certain obligations, in an amount not to exceed \$528.4 million, primarily in connection with tax equity funding obligations during the construction phase of the South Fork Wind project. Eversource parent's obligations expire upon the full performance of the guaranteed obligations.
- (7) Surety bonds expire in 2024. Expiration dates reflect termination dates, the majority of which will be renewed or extended. Certain surety bonds contain credit ratings triggers that would require Eversource parent to post collateral in the event that the unsecured debt credit ratings of Eversource parent are downgraded.
- (8) In December 2023, Sunrise Wind LLC issued a surety bond related to future decommissioning obligations of certain onshore transmission assets in the amount of \$20.5 million. The surety bond shall remain outstanding until full performance of the obligations.

#### **E. FERC ROE Complaints**

Four separate complaints were filed at the FERC by combinations of New England state attorneys general, state regulatory commissions, consumer advocates, consumer groups, municipal parties and other parties (collectively, the Complainants). In each of the first three complaints, filed on October 1, 2011, December 27, 2012, and July 31, 2014, respectively, the Complainants challenged the NETOs' base ROE of 11.14 percent that had been utilized since 2005 and sought an order to reduce it prospectively from the date of the final FERC order and for the separate 15-month complaint periods. In the fourth complaint, filed April 29, 2016, the Complainants challenged the NETOs' base ROE billed of 10.57 percent and the maximum ROE for transmission incentive (incentive cap) of 11.74 percent, asserting that these ROEs were unjust and unreasonable.

The ROE originally billed during the period October 1, 2011 (beginning of the first complaint period) through October 15, 2014 consisted of a base ROE of 11.14 percent and incentives up to 13.1 percent. On October 16, 2014, FERC issued Opinion No. 531-A and set the base ROE at 10.57 percent and the incentive cap at 11.74 percent for the first complaint period. This was also effective for all prospective billings to customers beginning October 16, 2014. This FERC order was vacated on April 14, 2017 by the U.S. Court of Appeals for the D.C. Circuit (the Court).

All amounts associated with the first complaint period have been refunded, which totaled \$38.9 million (pre-tax and excluding interest) at Eversource and reflected both the base ROE and incentive cap prescribed by the FERC order. The refund consisted of \$22.4 million for CL&P, \$13.7 million for NSTAR Electric and \$2.8 million for PSNH.

Eversource has recorded a reserve of \$39.1 million (pre-tax and excluding interest) for the second complaint period as of both December 31, 2023 and 2022. This reserve represents the difference between the billed rates during the second complaint period and a 10.57 percent base ROE and 11.74 percent incentive cap. The reserve consisted of \$21.4 million for CL&P, \$14.6 million for NSTAR Electric and \$3.1 million for PSNH as of both December 31, 2023 and 2022.

On October 16, 2018, FERC issued an order on all four complaints describing how it intends to address the issues that were remanded by the Court. FERC proposed a new framework to determine (1) whether an existing ROE is unjust and unreasonable and, if so, (2) how to calculate a replacement ROE. Initial briefs were filed by the NETOs, Complainants and FERC Trial Staff on January 11, 2019 and reply briefs were filed on March 8, 2019. The NETOs' brief was supportive of the overall ROE methodology determined in the October 16, 2018 order provided the FERC does not change the proposed methodology or alter its implementation in a manner that has a material impact on the results.

The FERC order included illustrative calculations for the first complaint using FERC's proposed frameworks with financial data from that complaint. Those illustrative calculations indicated that for the first complaint period, for the NETOs, which FERC concludes are of average financial risk, the preliminary just and reasonable base ROE is 10.41 percent and the preliminary incentive cap on total ROE is 13.08 percent. If the results of the illustrative calculations were included in a final FERC order for each of the complaint periods, then a 10.41 percent base ROE and a 13.08 percent incentive cap would not have a significant impact on our financial statements for all of the complaint periods. These preliminary calculations are not binding and do not represent what we believe to be the most likely outcome of a final FERC order.

On November 21, 2019, FERC issued Opinion No. 569 affecting the two pending transmission ROE complaints against the Midcontinent ISO (MISO) transmission owners, in which FERC adopted a new methodology for determining base ROEs. Various parties sought rehearing. On December 23, 2019, the NETOs filed supplementary materials in the NETOs' four pending cases to respond to this new methodology because of the uncertainty of the applicability to the NETOs' cases. On May 21, 2020, the FERC issued its order in Opinion No. 569-A on the rehearing of the MISO transmission owners' cases, in which FERC again changed its methodology for determining the MISO transmission owners' base ROEs. On November 19, 2020, the FERC issued Opinion No. 569-B denying rehearing of Opinion No. 569-A and reaffirmed the methodology previously adopted in Opinion No. 569-A. The new methodology differs significantly from the methodology proposed by FERC in its October 16, 2018 order to determine the NETOs' base ROEs in its four pending cases. FERC Opinion Nos. 569-A and 569-B were appealed to the Court. On August 9, 2022, the Court issued its decision vacating MISO ROE FERC Opinion Nos. 569, 569-A and 569-B and remanded to FERC to reopen the proceedings. The Court found that FERC's development of the new return methodology was arbitrary and capricious due to FERC's failure to offer a reasonable explanation for its decision to reintroduce the risk-premium financial model in its new methodology for calculating a just and reasonable return. At this time, Eversource cannot predict how and when FERC will address the Court's findings on the remand of the MISO FERC opinions or any potential associated impact on the NETOs' four pending ROE complaint cases.

Given the significant uncertainty regarding the applicability of the FERC opinions in the MISO transmission owners' two complaint cases to the NETOs' pending four complaint cases, Eversource concluded that there is no reasonable basis for a change to the reserve or recognized ROEs for any of the complaint periods at this time. As well, Eversource cannot reasonably estimate a range of loss for any of the four complaint proceedings at this time. Eversource, CL&P, NSTAR Electric and PSNH currently record revenues at the 10.57 percent base ROE and incentive cap at 11.74 percent established in the October 16, 2014 FERC order.

A change of 10 basis points to the base ROE used to establish the reserves would impact Eversource's after-tax earnings by an average of approximately \$3 million for each of the four 15-month complaint periods.

#### **F. CL&P Regulatory Matters**

*CL&P Tropical Storm Isaias Response Investigation:* On April 28, 2021, PURA issued a final decision on CL&P's compliance with its emergency response plan that concluded CL&P failed to comply with certain storm performance standards and was imprudent in certain instances regarding its preparation for, and response to, Tropical Storm Isaias. Based on its findings, PURA ordered CL&P to adjust its future rates in a pending or future rate proceeding to reflect a monetary penalty in the form of a downward adjustment of 90 basis points in its allowed rate of return on equity (ROE), which is currently 9.25 percent. On July 14, 2021, PURA issued a final decision in a penalty proceeding that included an assessment of \$28.6 million, consisting of a \$28.4 million civil penalty for non-compliance with storm performance standards to be provided as credits on customer bills and a \$0.2 million fine for violations of accident reporting requirements to be paid to the State of Connecticut's general fund. The \$28.4 million performance penalty was credited to customers on electric bills beginning on September 1, 2021 over a one-year period. The \$28.4 million is the maximum statutory penalty amount under applicable Connecticut law in effect at the time of Tropical Storm Isaias, which is 2.5 percent of CL&P's annual distribution revenues. The liability for the performance penalty was recorded as a current regulatory liability on CL&P's balance sheet and as a reduction to Operating Revenues on the year ended December 31, 2021 statement of income.

*CL&P Settlement Agreement:* On October 1, 2021, CL&P entered into a settlement agreement with the DEEP, Office of Consumer Counsel, Office of the Attorney General and the Connecticut Industrial Energy Consumers, resolving certain issues that arose in then-pending regulatory proceedings initiated by PURA. PURA approved the settlement agreement on October 27, 2021. In the settlement agreement, CL&P agreed to provide a total of \$65 million of customer credits, which were distributed based on customer sales over a two-month billing period from December 1, 2021 to January 31, 2022. CL&P also agreed to irrevocably set aside \$10 million in a customer assistance fund to provide bill payment assistance to certain existing non-hardship and hardship customers carrying arrearages, as approved by PURA, with the objective of disbursing the funds prior to April 30, 2022. Those customers were provided with \$10 million of bill forgiveness in the first quarter of 2022. CL&P recorded a current regulatory liability of \$75 million on the balance sheet associated with the provisions of the settlement agreement, with a \$65 million pre-tax charge as a reduction to Operating Revenues associated with the customer credits and a \$10 million charge to Operations and Maintenance expense associated with the customer assistance fund on the year ended December 31, 2021 statement of income.

In exchange for the \$75 million of customer credits and assistance, PURA's interim rate reduction docket was resolved without findings. As a result of the settlement agreement, neither the 90 basis point reduction to CL&P's return on equity introduced in PURA's storm-related decision issued April 28, 2021, nor the 45 basis point reduction to CL&P's return on equity included in PURA's decision issued September 14, 2021 in the interim rate reduction docket, will be implemented. CL&P also agreed to freeze its current base distribution rates, subject to the customer credits described above, until no earlier than January 1, 2024. The rate freeze applied only to base distribution rates (including storm costs) and not to other rate mechanisms such as the retail rate components, rate reconciling mechanisms, formula rates and any other adjustment mechanisms. The rate freeze also did not apply to any cost recovery mechanism outside of the base distribution rates with regard to grid-modernization initiatives or any other proceedings that were either pending or that could be initiated during the rate freeze period, that could have placed additional obligations on CL&P. The approval of the settlement agreement satisfied the Connecticut statute of rate review requirements that requires electric utilities to file a distribution rate case within four years of the last rate case.

As part of the settlement agreement, CL&P agreed to withdraw with prejudice its pending appeals of PURA's decisions dated April 28, 2021 and July 14, 2021 related to Storm Isaias and agreed to waive its right to file an appeal and seek a judicial stay of the September 14, 2021 decision in the interim rate reduction docket. The settlement agreement assures that CL&P will have the opportunity to petition for and demonstrate the prudence of the storm costs incurred to respond to customer outages associated with Storm Isaias in a future ratemaking proceeding.

The cumulative pre-tax impact of the settlement agreement and the Storm Isaias assessment imposed in PURA's April 28, 2021 and July 14, 2021 decisions totaled \$103.6 million, and the after-tax earnings impact was \$86.1 million, or \$0.25 per share, for the year ended December 31, 2021.

**G. Litigation and Legal Proceedings**

Eversource, including CL&P, NSTAR Electric and PSNH, are involved in legal, tax and regulatory proceedings regarding matters arising in the ordinary course of business, which involve management's assessment to determine the probability of whether a loss will occur and, if probable, its best estimate of probable loss. The Company records and discloses losses when these losses are probable and reasonably estimable, and discloses matters when losses are probable but not estimable or when losses are reasonably possible. Legal costs related to the defense of loss contingencies are expensed as incurred.

**14. LEASES**

Eversource, including CL&P, NSTAR Electric and PSNH, has entered into lease agreements as a lessee for the use of land, office space, service centers, vehicles, information technology, and equipment. These lease agreements are classified as either finance or operating leases and the liability and right-of-use asset are recognized on the balance sheet at lease commencement. Leases with an initial term of 12 months or less are not recorded on the balance sheet and are recognized as lease expense on a straight-line basis over the lease term.

Eversource determines whether or not a contract contains a lease based on whether or not it provides Eversource with the use of a specifically identified asset for a period of time, as well as both the right to direct the use of that asset and receive the significant economic benefits of the asset. Eversource has elected the practical expedient to not separate non-lease components from lease components and instead to account for both as a single lease component, with the exception of the information technology asset class where the lease and non-lease components are separated.

The provisions of Eversource, CL&P, NSTAR Electric and PSNH lease agreements contain renewal options. The renewal options range from one year to twenty years. The renewal period is included in the measurement of the lease liability if it is reasonably certain that Eversource will exercise these renewal options.

For leases entered into or modified after the January 1, 2019 implementation date of the leases standard under Topic 842, the discount rate utilized for classification and measurement purposes as of the inception date of the lease is based on each company's collateralized incremental interest rate to borrow over a comparable term for an individual lease because the rate implicit in the lease is not determinable.

CL&P and PSNH entered into certain contracts for the purchase of energy that qualify as leases. These contracts do not have minimum lease payments and therefore are not recognized as a lease liability on the balance sheet and are not reflected in the future minimum lease payments table below. Expense related to these contracts is included as variable lease cost in the table below. The expense and long-term obligation for these contracts are also included in Note 13B, "Commitments and Contingencies - Long-Term Contractual Arrangements," to the financial statements.

The components of lease cost, prior to amounts capitalized, are as follows:

| Eversource<br>(Millions of Dollars) | For the Years Ended December 31, |          |         |

| Total Lease Cost                    | \$ 22.6                          | \$ 3.8         | \$ 47.7 | \$ 25.9 | \$ 3.1         | \$ 52.7 | \$ 17.1 | \$ 3.1         | \$ 45.0 |

Operating lease cost, net of the capitalized portion, is included in Operations and Maintenance (or Purchased Power, Purchased Natural Gas and Transmission expense for transmission leases) on the statements of income. Amortization of finance lease assets is included in Depreciation on the statements of income. Interest expense on finance leases is included in Interest Expense on the statements of income.

Supplemental balance sheet information related to leases is as follows:

| (Millions of Dollars)             | Balance Sheet Classification       | As of December 31, 2023 |         |                |        | As of December 31, 2022 |        |                |      |

The finance lease payments that NSTAR Electric will make over the next twelve months are entirely interest-related, due to escalating payments. As such, none of the finance lease payments over the next twelve months will reduce the finance lease liability.

Other information related to leases is as follows:

| Operating Cash Flows from Finance Leases                                       | 3.4        | 0.1    | 0.6            | —      |
| Financing Cash Flows from Finance Leases                                       | 4.1        | 1.4    | —              | 0.1    |
| <b>Supplemental Non-Cash Information on Lease Liabilities:</b>                 |            |        |                |        |
| Right-of-use-Assets Obtained in Exchange for New Operating Lease Liabilities   | 2.1        | —      | 1.9            | —      |
| Right-of-use-Assets Obtained in Exchange for New Finance Lease Liabilities     | 2.3        | —      | —              | —      |

As of December 31, 2023, lease agreements executed but not having yet commenced totaled \$11.5 million for Eversource, \$7 million for CL&P and \$4.5 million for NSTAR Electric. These amounts are not recorded as right-of-use assets and operating lease liabilities as of December 31, 2023, but will be in 2024. Also in 2023, EGMA executed an early termination of an office space lease in connection with the purchase of the same facilities from the lessor, which reduced right-of-use assets for operating leases of Eversource by \$7.5 million.

Future minimum lease payments, excluding variable costs, under long-term leases, as of December 31, 2023 are as follows:

(Millions of Dollars)

| Year Ending December 31,                       | Operating Leases |        |                |        | Finance Leases |         |                |
|--|------------------|--------|----------------|--------|----------------|---------|----------------|
|  | Eversource       | CL&P   | NSTAR Electric | PSNH   | Eversource     | CL&P    | NSTAR Electric |
| 2024   | \$ 11.1          | \$ 0.9 | \$ 3.4         | \$ 1.7 | \$ 7.8         | \$ 1.9  | \$ 0.6         |
| 2025   | 8.3              | 0.9    | 3.0            | 1.7    | 8.2            | 2.3     | 0.7            |

| Present value of future minimum lease payments | \$ 53.5          | \$ 2.2 | \$ 27.7        | \$ 4.7 | \$ 72.7        | \$ 18.3 | \$ 4.9         |

## 15. FAIR VALUE OF FINANCIAL INSTRUMENTS

The following methods and assumptions were used to estimate the fair value of each of the following financial instruments:

**Preferred Stock, Long-Term Debt and Rate Reduction Bonds:** The fair value of CL&P's and NSTAR Electric's preferred stock is based upon pricing models that incorporate interest rates and other market factors, valuations or trades of similar securities and cash flow projections. The fair value of long-term debt and RRB debt securities is based upon pricing models that incorporate quoted market prices for those issues or similar issues adjusted for market conditions, credit ratings of the respective companies and treasury benchmark yields. The fair values provided in the table below are classified as Level 2 within the fair value hierarchy. Carrying amounts and estimated fair values are as follows:

(Millions of Dollars)

|   | Eversource      |            | CL&P            |            | NSTAR Electric  |            | PSNH            |            |
|---|-----------------|------------|-----------------|------------|-----------------|------------|-----------------|------------|
|   | Carrying Amount | Fair Value |
| <b>As of December 31, 2023:</b>                     |                 |            |                 |            |                 |            |                 |            |
| Preferred Stock Not Subject to Mandatory Redemption | \$ 155.6        | \$ 122.2   | \$ 116.2        | \$ 90.4    | \$ 43.0         | \$ 31.8    | \$ —            | \$ —       |
| Long-Term Debt                                      | 24,413.5        | 22,855.2   | 4,814.4         | 4,572.0    | 4,496.9         | 4,273.7    | 1,431.6         | 1,292.6    |
| Rate Reduction Bonds                                | 410.5           | 395.0      | —               | —          | —               | —          | 410.5           | 395.0      |
| <b>As of December 31, 2022:</b>                     |                 |            |                 |            |                 |            |                 |            |
| Preferred Stock Not Subject to Mandatory Redemption | \$ 155.6        | \$ 136.7   | \$ 116.2        | \$ 99.2    | \$ 43.0         | \$ 37.5    | \$ —            | \$ —       |
| Long-Term Debt                                      | 21,044.1        | 18,891.3   | 4,216.5         | 3,828.3    | 4,425.1         | 4,091.8    | 1,164.6         | 970.5      |
| Rate Reduction Bonds                                | 453.7           | 424.7      | —               | —          | —               | —          | 453.7           | 424.7      |

**Derivative Instruments and Marketable Securities:** Derivative instruments and investments in marketable securities are carried at fair value. For further information, see Note 4, "Derivative Instruments," and Note 5, "Marketable Securities," to the financial statements.

See Note 1G, "Summary of Significant Accounting Policies – Fair Value Measurements," for the fair value measurement policy and the fair value hierarchy.

**16. ACCUMULATED OTHER COMPREHENSIVE INCOME/(LOSS)**

The changes in accumulated other comprehensive income/(loss) by component, net of tax, are as follows:

| Eversource<br>(Millions of Dollars) | For the Year Ended December 31, 2023    |  |                       |           | For the Year Ended December 31, 2022    |  |                       |           |
|-------------------------------------|---|--|-----------------------|-----------|---|--|-----------------------|-----------|
|                                     | Qualified Cash Flow Hedging Instruments | Unrealized Gains/(Losses) on Marketable Securities | Defined Benefit Plans | Total     | Qualified Cash Flow Hedging Instruments | Unrealized Gains/(Losses) on Marketable Securities | Defined Benefit Plans | Total     |
| Balance as of January 1st           | \$ (0.4)                                | \$ (1.2)   | \$ (37.8)             | \$ (39.4) | \$ (0.4)                                | \$ 0.4   | \$ (42.3)             | \$ (42.3) |
| OCI Before Reclassifications        | —                                       | —  | (8.8)                 | (8.8)     | —                                       | (1.6)  | (2.5)                 | (4.1)     |
| Amounts Reclassified from AOCI      | —                                       | 1.2  | 13.3                  | 14.5      | —                                       | —  | 7.0                   | 7.0       |
| Net OCI                             | —                                       | 1.2  | 4.5                   | 5.7       | —                                       | (1.6)  | 4.5                   | 2.9       |
| Balance as of December 31st         | \$ (0.4)                                | \$ —   | \$ (33.3)             | \$ (33.7) | \$ (0.4)                                | \$ (1.2)   | \$ (37.8)             | \$ (39.4) |

Defined benefit plan OCI amounts before reclassifications relate to actuarial gains and losses that arose during the year and were recognized in AOCI. The unamortized actuarial gains and losses and prior service costs on the defined benefit plans are amortized from AOCI into Other Income, Net over the average future employee service period, and are reflected in amounts reclassified from AOCI. The related tax effects of the defined benefit plan OCI amounts before reclassifications recognized in AOCI were net deferred tax assets of \$4.9 million and \$1.3 million in 2023 and 2022, respectively and were net deferred tax liabilities of \$8.3 million in 2021.

The following table sets forth the amounts reclassified from AOCI by component and the impacted line item on the statements of income:

| Eversource<br>(Millions of Dollars)                            | Amounts Reclassified from AOCI   |          |           | Statements of Income<br>Line Item Impacted |

| Defined Benefit Plan Costs, Net of Tax                         | (13.3)                           | (7.0)    | (9.7)     |  |
| Total Amounts Reclassified from AOCI, Net of Tax               | \$ (14.5)                        | \$ (7.0) | \$ (10.7) |  |

<sup>(1)</sup> These amounts are included in the computation of net periodic Pension, SERP and PBOP costs. See Note 1K, "Summary of Significant Accounting Policies – Other Income, Net" and Note 11A, "Employee Benefits – Pension Benefits and Postretirement Benefits Other Than Pension," for further information.

## 17. DIVIDEND RESTRICTIONS

Eversource parent's ability to pay dividends may be affected by certain state statutes, the ability of its subsidiaries to pay common dividends and the leverage restriction tied to its consolidated total indebtedness to total capitalization ratio requirement in its revolving credit agreements.

Pursuant to the joint revolving credit agreement of Eversource, CL&P, PSNH, NSTAR Gas, Yankee Gas, EGMA and Aquarion Water Company of Connecticut, and to the NSTAR Electric revolving credit agreement, Eversource is required to maintain consolidated total indebtedness to total capitalization ratio of no greater than 70 percent at the end of each fiscal quarter and each other company is required to maintain consolidated total indebtedness to total capitalization ratio of no greater than 65 percent at the end of each fiscal quarter. As of December 31, 2023, all companies were in compliance with such covenant and in compliance with all such provisions of the revolving credit agreements that may restrict the payment of dividends as of December 31, 2023.

The Retained Earnings balances subject to dividend restrictions were \$4.14 billion for Eversource, \$2.65 billion for CL&P, \$3.14 billion for NSTAR Electric and \$655.8 million for PSNH as of December 31, 2023.

CL&P, NSTAR Electric and PSNH are subject to Section 305 of the Federal Power Act that makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in its capital account." Management believes that this Federal Power Act restriction, as applied to CL&P, NSTAR Electric and PSNH, would not be construed or applied by the FERC to prohibit the payment of dividends from retained earnings for lawful and legitimate business purposes. In addition, certain state statutes may impose additional limitations on such companies and, including but not limited to, on NSTAR Gas, Yankee Gas, EGMA, and Aquarion's operating companies. Such state law restrictions do not restrict the payment of dividends from retained earnings or net income.

## 18. COMMON SHARES

The following table sets forth the Eversource parent common shares and the shares of common stock of CL&P, NSTAR Electric and PSNH that were authorized and issued, as well as the respective per share par values:

|                | Par Value | Shares                        |             |                           |             |
|----------------|-----------|-------------------------------|-------------|---------------------------|-------------|
|                |           | Authorized as of December 31, |             | Issued as of December 31, |             |
|                |           | 2023                          | 2022        | 2023                      | 2022        |
| Eversource     | \$ 5      | 410,000,000                   | 380,000,000 | 359,984,073               | 359,984,073 |
| CL&P           | \$ 10     | 24,500,000                    | 24,500,000  | 6,035,205                 | 6,035,205   |
| NSTAR Electric | \$ 1      | 100,000,000                   | 100,000,000 | 200                       | 200         |
| PSNH           | \$ 1      | 100,000,000                   | 100,000,000 | 301                       | 301         |

*Common Share Issuances and 2022 Equity Distribution Agreement:* On May 11, 2022, Eversource entered into an equity distribution agreement pursuant to which it may offer and sell up to \$1.2 billion of its common shares from time to time through an "at-the-market" (ATM) equity offering program. Eversource may issue and sell its common shares through its sales agents during the term of this agreement. Shares may be offered in transactions on the New York Stock Exchange, in the over-the-counter market, through negotiated transactions or otherwise. Sales may be made at either market prices prevailing at the time of sale, at prices related to such prevailing market prices or at negotiated prices. In 2023, no shares were issued under this agreement. In 2022, Eversource issued 2,165,671 common shares, which resulted in proceeds of \$197.1 million, net of issuance costs. Eversource used the net proceeds received for general corporate purposes.

*Treasury Shares:* As of December 31, 2023 and 2022, there were 10,443,807 and 11,540,218 Eversource common shares held as treasury shares, respectively. As of December 31, 2023 and 2022, there were 349,540,266 and 348,443,855 Eversource common shares outstanding, respectively.

*Acquisition of The Torrington Water Company:* On October 3, 2022, Aquarion acquired The Torrington Water Company (TWC) following the receipt of all required approvals. The acquisition was structured as a stock-for-stock exchange, and Eversource issued 925,264 treasury shares at closing for a purchase price of \$72.1 million.

*Acquisition of New England Service Company:* On December 1, 2021, Aquarion acquired New England Service Company (NESC), pursuant to a definitive agreement entered into on April 8, 2021. The acquisition was structured as a stock-for-stock merger and Eversource issued 462,517 treasury shares at closing for a purchase price of \$38.1 million.

Eversource issues treasury shares to satisfy awards under the Company's incentive plans, shares issued under the dividend reinvestment and share purchase plan, and matching contributions under the Eversource 401k Plan. Eversource also issued treasury shares for its December 2021 and October 2022 water business acquisitions. The issuance of treasury shares represents a non-cash transaction, as the treasury shares were used to fulfill Eversource's obligations that require the issuance of common shares.

On May 3, 2023, shareholders voted to increase the authorized common shares from 380,000,000 shares to 410,000,000 shares.

## 19. PREFERRED STOCK NOT SUBJECT TO MANDATORY REDEMPTION

The CL&P and NSTAR Electric preferred stock is not subject to mandatory redemption and is presented as a noncontrolling interest of a subsidiary in Eversource's financial statements.

CL&P is authorized to issue up to 9,000,000 shares of preferred stock, par value \$50 per share, and NSTAR Electric is authorized to issue 2,890,000 shares of preferred stock, par value \$100 per share. Holders of preferred stock of CL&P and NSTAR Electric are entitled to receive cumulative dividends in preference to any payment of dividends on the common stock. Upon liquidation, holders of preferred stock of CL&P and NSTAR Electric are entitled to receive a liquidation preference before any distribution to holders of common stock in an amount equal to the par value of the preferred stock plus accrued and unpaid dividends. If the net assets were to be insufficient to pay the liquidation preference in full, then the net assets would be distributed ratably to all holders of preferred stock. The preferred stock of CL&P and NSTAR Electric is subject to optional redemption by the CL&P and NSTAR Electric Boards of Directors at any time.

Details of preferred stock not subject to mandatory redemption are as follows (in millions, except in redemption price and shares):

| Series  | Redemption Price<br>Per Share | Shares Outstanding as of December 31, |           | As of December 31, |                 |
|---|-------------------------------|---------------------------------------|-----------|--------------------|-----------------|

## 20. COMMON SHAREHOLDERS' EQUITY AND NONCONTROLLING INTERESTS

Dividends on the preferred stock of CL&P and NSTAR Electric totaled \$7.5 million for each of the years ended December 31, 2023, 2022 and 2021. These dividends were presented as Net Income Attributable to Noncontrolling Interests on the Eversource statements of income.

Noncontrolling Interest – Preferred Stock of Subsidiaries on the Eversource balance sheets totaled \$155.6 million as of December 31, 2023 and 2022. On the Eversource balance sheets, Common Shareholders' Equity was fully attributable to Eversource parent and Noncontrolling Interest – Preferred Stock of Subsidiaries was fully attributable to the noncontrolling interest.

For the years ended December 31, 2023, 2022 and 2021, there was no change in ownership of the common equity of CL&P and NSTAR Electric.

## 21. EARNINGS/(LOSS) PER SHARE

Basic earnings/(loss) per share is computed based upon the weighted average number of common shares outstanding during each period. Diluted earnings/(loss) per share is computed on the basis of the weighted average number of common shares outstanding plus the potential dilutive effect of certain share-based compensation awards as if they were converted into outstanding common shares. The dilutive effect of unvested RSU and performance share awards is calculated using the treasury stock method. RSU and performance share awards are included in basic weighted average common shares outstanding as of the date that all necessary vesting conditions have been satisfied.

For the years ended December 31, 2023, 2022 and 2021, there were no antidilutive share awards excluded from the computation.

The following table sets forth the components of basic and diluted earnings/(loss) per share:

| Eversource<br>(Millions of Dollars, except share information) | For the Years Ended December 31, |             |             |
|---|----------------------------------|-------------|-------------|
|   | 2023                             | 2022        | 2021        |
| Net (Loss)/Income Attributable to Common Shareholders         | \$ (442.2)                       | \$ 1,404.9  | \$ 1,220.5  |
| Weighted Average Common Shares Outstanding:                   |                                  |             |             |
| Basic   | 349,580,638                      | 346,783,444 | 343,972,926 |
| Dilutive Effect   | 259,843                          | 463,324     | 658,130     |
| Diluted   | 349,840,481                      | 347,246,768 | 344,631,056 |
| Basic (Loss)/Earnings Per Common Share                        | \$ (1.27)                        | \$ 4.05     | \$ 3.55     |
| Diluted (Loss)/Earnings Per Common Share                      | \$ (1.26)                        | \$ 4.05     | \$ 3.54     |

## 22. REVENUES

Revenue is recognized when promised goods or services (referred to as performance obligations) are transferred to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. A five-step model is used for recognizing and measuring revenue from contracts with customers, which includes identifying the contract with the customer, identifying the performance obligations promised within the contract, determining the transaction price (the amount of consideration to which the company expects to be entitled), allocating the transaction price to the performance obligations and recognizing revenue when (or as) the performance obligation is satisfied.

The following tables present operating revenues disaggregated by revenue source:

| Eversource<br>(Millions of Dollars)          | For the Year Ended December 31, 2023 |                          |                       |                    |            |              | Total       |

*Retail Tariff Sales:* Regulated utilities provide products and services to their regulated customers under rates, pricing, payment terms and conditions of service, regulated by each state regulatory agency. The arrangement whereby a utility provides commodity service to a customer for a price approved by the respective state regulatory commission is referred to as a tariff sale contract, and the tariff governs all aspects of the provision of regulated services by utilities. The majority of revenue for Eversource, CL&P, NSTAR Electric and PSNH is derived from regulated retail tariff sales for the sale and distribution of electricity, natural gas and water to residential, commercial and industrial retail customers.

The utility's performance obligation for the regulated tariff sales is to provide electricity, natural gas or water to the customer as demanded. The promise to provide the commodity represents a single performance obligation, as it is a promise to transfer a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer. Revenue is recognized over time as the customer simultaneously receives and consumes the benefits provided by the utility, and the utility satisfies its performance obligation. Revenue is recognized based on the output method as there is a directly observable output to the customer (electricity, natural gas or water units delivered to the customer and immediately consumed). Each Eversource utility is entitled to be compensated for performance completed to date (service taken by the customer) until service is terminated.

In regulated tariff sales, the transaction prices are the rates approved by the respective state regulatory commissions. In general, rates can only be changed through formal proceedings with the state regulatory commissions. These rates are designed to recover the costs to provide service to customers and include a return on investment. Regulatory commission-approved tracking mechanisms are included in these rates and are also used to recover, on a fully-reconciling basis, certain costs, such as the procurement of energy supply, retail transmission charges, energy efficiency program costs, net metering for distributed generation, and restructuring and stranded costs, among others. These tracking mechanisms result in rates being changed periodically to ensure recovery of actual costs incurred and the refund of any overcollection of costs.

Electric customers may elect to purchase electricity from each Eversource electric utility or may contract separately with a competitive third party supplier. Certain eligible natural gas customers may elect to purchase natural gas from each Eversource natural gas utility or may contract separately with a gas supply operator. Revenue is not recorded for the sale of the electricity or the natural gas commodity to customers who have contracted separately with these suppliers, only the delivery to a customer, as the utility is acting as an agent on behalf of the supplier.

*Wholesale Transmission Revenues:* The Eversource electric transmission-owning companies (CL&P, NSTAR Electric and PSNH) each own and maintain transmission facilities that are part of an interstate power transmission grid over which electricity is transmitted throughout New England. CL&P, NSTAR Electric and PSNH, as well as most other New England utilities, are parties to a series of agreements that provide for coordinated planning and operation of the region's transmission facilities and the rules by which they acquire transmission services. The Eversource electric transmission-owning companies have a combination of FERC-approved regional and local formula rates that work in tandem to recover all their transmission costs. These rates are part of the ISO-NE Tariff. Regional rates recover the costs of higher voltage transmission facilities that benefit the region and are collected from all New England transmission customers, including the Eversource distribution businesses. Eversource's local rates recover the costs of transmission facilities that do not provide a benefit to the region, and are collected from Eversource's distribution businesses and other transmission customers. The distribution businesses of Eversource, in turn, recover the FERC approved charges from retail customers through annual tracking mechanisms, which are retail tariff sales.

The utility's performance obligation for regulated wholesale transmission sales is to provide transmission services to the customer as demanded. The promise to provide transmission service represents a single performance obligation. The transaction prices are the transmission rate formulas as defined by the ISO-NE Tariff and are regulated and established by FERC. Wholesale transmission revenue is recognized over time as the performance obligation is completed, which occurs as transmission services are provided to customers. The revenue is recognized based on the output method. Each Eversource utility is entitled to be compensated for performance completed to date (e.g., use of the transmission system by the customer).

*Wholesale Market Sales Revenues:* Wholesale market sales transactions include sales of energy and energy-related products into the ISO-NE wholesale electricity market, sales of natural gas to third party marketers, and also the sale of RECs to various counterparties. ISO-NE oversees the region's wholesale electricity market and administers the transactions and terms and conditions, including payment terms, which are established in the ISO-NE tariff, between the buyers and sellers in the market. Pricing is set by the wholesale market. The wholesale transactions in the ISO-NE market occur on a day-ahead basis or a real-time basis (daily) and are, therefore, short-term. Transactions are tracked and reported by ISO-NE net by the hour, which is the net hourly position of energy sales and purchases by each market participant. The performance obligation for ISO-NE energy transactions is defined to be the net by hour transaction. Revenue is recognized when the performance obligation for these energy sales transactions is satisfied, which is when the sale occurs and the energy is transferred to the customer. For sales of natural gas, transportation, and natural gas pipeline capacity to third party marketers, revenue is recognized when the performance obligation is satisfied at the point in time the sale occurs and the natural gas or related product is transferred to the marketer. RECs are sold to various counterparties, and revenue is recognized when the performance obligation is satisfied upon transfer of title to the customer through the New England Power Pool Generation Information System. Wholesale transactions also include the sale of CL&P's, NSTAR Electric's and PSNH's transmission rights associated with their proportionate equity ownership share in the transmission lines of the Hydro-Québec system in Canada.

*Other Revenues from Contracts with Customers:* Other revenues from contracts with customers primarily include property rentals that are not deemed leases. These revenues are generally recognized on a straight-line basis over time as the service is provided to the customer. Other revenues also include revenues from Eversource's service company, which is eliminated in consolidation.

*Amortization of/(Reserve for) Revenues Subject to Refund:* A reserve is recorded as a reduction to revenues when future refunds to customers are deemed probable. The reserve is reversed as refunds are provided to customers in rates. Amortization of Revenues Subject to Refund within the Electric Distribution segment in 2022 represents the reversal of a 2021 reserve at CL&P established to provide bill credits to customers as a result of the settlement agreement on October 1, 2021 and a storm performance penalty assessed by PURA. The reserve was reversed as customer credits were distributed to CL&P's customers in retail electric rates. Total customer credits as a result of the 2021 settlement and civil penalty of \$93.4 million were recorded as a reserve for revenues subject to refund within current regulatory liabilities and reflected as a reduction to Operating Revenues on the 2021 income statement. The settlement amount of \$65 million was refunded over a two-month billing period from December 1, 2021 to January 31, 2022 and the civil penalty of \$28.4 million was refunded over a one year billing period, which began September 1, 2021.

*Alternative Revenue Programs:* In accordance with accounting guidance for rate-regulated operations, certain of Eversource's utilities' rate making mechanisms qualify as alternative revenue programs (ARPs) if they meet specified criteria, in which case revenues may be recognized prior to billing based on allowed levels of collection in rates. Eversource's utility companies recognize revenue and record a regulatory asset or liability once the condition or event allowing for the automatic adjustment of future rates occurs. ARP revenues include both the recognition of the deferral adjustment to ARP revenues, when the regulator-specified condition or event allowing for additional billing or refund has occurred, and an equal and offsetting reversal of the ARP deferral to revenues as those amounts are reflected in the price of service in subsequent periods.

Eversource's ARPs include the revenue decoupling mechanism, the annual reconciliation adjustment to transmission formula rates, and certain capital tracker mechanisms. Certain Eversource electric, natural gas and water companies, including CL&P and NSTAR Electric, have revenue decoupling mechanisms approved by a regulatory commission (decoupled companies). Decoupled companies' distribution revenues are not directly based on sales volumes. The decoupled companies reconcile their annual base distribution rate recovery to pre-established levels of baseline distribution delivery service revenues, with any difference between the allowed level of distribution revenue and the actual amount realized adjusted through subsequent rates. The transmission formula rates provide for the annual reconciliation and recovery or refund of estimated costs to actual costs. The financial impacts of differences between actual and estimated costs are deferred for future recovery from, or refund to, transmission customers. This transmission deferral reconciles billed transmission revenues to the revenue requirement for our transmission businesses.

*Other Revenues:* Other Revenues include certain fees charged to customers that are not considered revenue from contracts with customers. Other revenues also include lease revenues under lessor accounting guidance of \$4.6 million (\$0.7 million at CL&P and \$2.5 million at NSTAR Electric), \$4.0 million (\$0.8 million at CL&P and \$2.5 million at NSTAR Electric), and \$4.8 million, (\$0.8 million at CL&P and \$3.1 million at NSTAR Electric) for the years ended December 31, 2023, 2022 and 2021, respectively.

*Intercompany Eliminations:* Intercompany eliminations are primarily related to the Eversource electric transmission revenues that are derived from ISO-NE regional transmission charges to the distribution businesses of CL&P, NSTAR Electric and PSNH that recover the costs of the wholesale transmission business, and revenues from Eversource's service company. Intercompany revenues and expenses between the Eversource wholesale transmission businesses and the Eversource distribution businesses and from Eversource's service company are eliminated in consolidation and included in "Eliminations" in the tables above.

*Receivables:* Receivables, Net on the balance sheet primarily includes trade receivables from retail customers and customers related to wholesale transmission contracts, wholesale market sales, sales of RECs, and property rentals. In general, retail tariff customers and wholesale transmission customers are billed monthly and the payment terms are generally due and payable upon receipt of the bill.

*Unbilled Revenues:* Unbilled Revenues on the balance sheet represent estimated amounts due from retail customers for electricity, natural gas or water delivered to customers but not yet billed. The utility company has satisfied its performance obligation and the customer has received and consumed the commodity as of the balance sheet date, and therefore, the utility company records revenue for those services in the period the services were provided. Only the passage of time is required before the company is entitled to payment for the satisfaction of the performance obligation. Payment from customers is due monthly as services are rendered and amounts are billed. Actual amounts billed to customers when meter readings become available may vary from the estimated amount.

Unbilled revenues are recognized by allocating estimated unbilled sales volumes to the respective customer classes, and then applying an estimated rate by customer class to those sales volumes. Unbilled revenue estimates reflect seasonality, weather, customer usage patterns, customer rates in effect for customer classes, and the timing of customer billing. The companies that have a decoupling mechanism record a regulatory deferral to reflect the actual allowed amount of revenue associated with their respective decoupled distribution rate design.

*Practical Expedients:* Eversource has elected practical expedients in the accounting guidance that allow the company to record revenue in the amount that the company has a right to invoice, if that amount corresponds directly with the value to the customer of the company's performance to date, and not to disclose related unsatisfied performance obligations. Retail and wholesale transmission tariff sales fall into this category, as these sales are recognized as revenue in the period the utility provides the service and completes the performance obligation, which is the same as the monthly amount billed to customers. There are no other material revenue streams for which Eversource has unsatisfied performance obligations.

## **23. SEGMENT INFORMATION**

Eversource is organized into the Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution reportable segments and Other based on a combination of factors, including the characteristics of each segments' services, the sources of operating revenues and expenses and the regulatory environment in which each segment operates. These reportable segments represent substantially all of Eversource's total consolidated revenues. Revenues from the sale of electricity, natural gas and water primarily are derived from residential, commercial and industrial customers and are not dependent on any single customer. The Electric Distribution reportable segment includes the results of NSTAR Electric's solar power facilities. Eversource's reportable segments are determined based upon the level at which Eversource's chief operating decision maker assesses performance and makes decisions about the allocation of company resources.

The remainder of Eversource's operations is presented as Other in the tables below and primarily consists of 1) the equity in earnings of Eversource parent from its subsidiaries and intercompany interest income, both of which are eliminated in consolidation, and interest expense related to the debt of Eversource parent, 2) the revenues and expenses of Eversource Service, most of which are eliminated in consolidation, 3) the operations of CYAPC and YAEC, 4) the results of other unregulated subsidiaries, which are not part of its core business, and 5) Eversource parent's equity ownership interests that are not consolidated, which primarily include the offshore wind business, a natural gas pipeline owned by Enbridge, Inc., and a renewable energy investment fund that was liquidated in 2023.

In the ordinary course of business, Yankee Gas, NSTAR Gas and EGMA purchase natural gas transmission services from the Enbridge, Inc. natural gas pipeline project described above. These affiliate transaction costs total \$77.7 million annually and are classified as Purchased Power, Purchased Natural Gas and Transmission on the Eversource statements of income.

Each of Eversource's subsidiaries, including CL&P, NSTAR Electric and PSNH, has one reportable segment.

Cash flows used for investments in plant included in the segment information below are cash capital expenditures that do not include amounts incurred on capital projects but not yet paid, cost of removal, AFUDC related to equity funds, and the capitalized and deferred portions of pension and PBOP income/expense. Eversource's segment information is as follows:

## 24. GOODWILL

In a business combination, the excess of the purchase price over the estimated fair values of the assets acquired and liabilities assumed is recognized as goodwill. The following table presents Eversource's goodwill by reportable segment:

| <i>(Millions of Dollars)</i>        | Electric<br>Distribution | Electric<br>Transmission | Natural Gas<br>Distribution | Water<br>Distribution | Total      |
|-------------------------------------|--------------------------|--------------------------|-----------------------------|-----------------------|------------|
| Balance as of January 1, 2022       | \$ 2,543.6               | \$ 576.8                 | \$ 451.0                    | \$ 905.9              | \$ 4,477.3 |
| NESC Measurement Period Adjustments | —                        | —                        | —                           | 0.5                   | 0.5        |
| Acquisition of TWC                  | —                        | —                        | —                           | 44.8                  | 44.8       |
| Balance as of December 31, 2022     | \$ 2,543.6               | \$ 576.8                 | \$ 451.0                    | \$ 951.2              | \$ 4,522.6 |
| Water Acquisitions                  | —                        | —                        | —                           | 9.5                   | 9.5        |
| Balance as of December 31, 2023     | \$ 2,543.6               | \$ 576.8                 | \$ 451.0                    | \$ 960.7              | \$ 4,532.1 |

Eversource completed the acquisition of TWC on October 3, 2022, resulting in the addition of \$44.8 million of goodwill, all of which was allocated to the Water Distribution reporting unit. Eversource completed the acquisition of NESC on December 1, 2021, resulting in the addition of \$22.2 million of goodwill, which included measurement period increases in 2022 totaling \$0.5 million. Eversource completed two water acquisitions in 2023, resulting in the addition of \$9.5 million of goodwill. The goodwill was allocated to the Water Distribution reporting unit. For further information on the acquisitions of TWC and NESC, see Note 18, "Common Shares," to the financial statements.

Goodwill is evaluated for impairment at least annually and more frequently if indicators of impairment arise. In accordance with the accounting standards, if the fair value of a reporting unit is less than its carrying value (including goodwill), the goodwill is tested for impairment. Goodwill is not subject to amortization, however is subject to a fair value based assessment for impairment at least annually and whenever facts or circumstances indicate that there may be an impairment. A resulting write-down, if any, would be charged to Operating Expenses.

In assessing goodwill for impairment, an entity is permitted to first assess qualitatively whether it is more likely than not that goodwill impairment exists as of the annual impairment test date. A quantitative impairment test is required only if it is concluded that it is more likely than not that a reporting unit's fair value is less than its carrying amount. The annual goodwill assessment included a qualitative evaluation of multiple factors that impact the fair value of the reporting units, including general, macroeconomic and market conditions, and entity-specific assumptions that affect the future cash flows of the reporting units. Key considerations include discount rates, utility sector market performance and merger transaction multiples, the Company's share price and credit ratings, analyst reports, financial performance, cost and risk factors, internal estimates and projections of future cash flows and net income, long-term strategy, the timing and outcome of rate cases, and recent regulatory and legislative proceedings.

Eversource's reporting units for the purpose of testing goodwill are Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution. These reporting units are consistent with the operating segments underlying the reportable segments identified in Note 23, "Segment Information," to the financial statements.

Eversource completed its annual goodwill impairment assessment for the Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution reporting units as of October 1, 2023 and determined that no impairment existed. There were no events subsequent to October 1, 2023 that indicated impairment of goodwill.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

No events that would be described in response to this item have occurred with respect to Eversource, CL&P, NSTAR Electric or PSNH.

**Item 9A. Controls and Procedures**

Management, on behalf of Eversource, CL&P, NSTAR Electric and PSNH, is responsible for the preparation, integrity, and fair presentation of the accompanying Financial Statements and other sections of this combined Annual Report on Form 10-K. Eversource's internal controls over financial reporting were audited by Deloitte & Touche LLP.

Management, on behalf of Eversource, CL&P, NSTAR Electric and PSNH, is responsible for establishing and maintaining adequate internal controls over financial reporting. The internal control framework and processes have been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. There are inherent limitations of internal controls over financial reporting that could allow material misstatements due to error or fraud to occur and not be prevented or detected on a timely basis by employees during the normal course of business. Additionally, internal controls over financial reporting may become inadequate in the future due to changes in the business environment. Under the supervision and with the participation of the principal executive officer and principal financial officer, an evaluation of the effectiveness of internal controls over financial reporting was conducted based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation under the framework in COSO, management concluded that internal controls over financial reporting at Eversource, CL&P, NSTAR Electric and PSNH were effective as of December 31, 2023.

Management, on behalf of Eversource, CL&P, NSTAR Electric and PSNH, evaluated the design and operation of the disclosure controls and procedures as of December 31, 2023 to determine whether they are effective in ensuring that the disclosure of required information is made timely and in accordance with the Securities Exchange Act of 1934 and the rules and regulations of the SEC. This evaluation was made under management's supervision and with management's participation, including the principal executive officer and principal financial officer as of the end of the period covered by this Annual Report on Form 10-K. There are inherent limitations of disclosure controls and procedures, including the possibility of human error and the circumventing or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. The principal executive officer and principal financial officer have concluded, based on their review, that the disclosure controls and procedures of Eversource, CL&P, NSTAR Electric and PSNH are effective to ensure that information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 (i) is recorded, processed, summarized, and reported within the time periods specified in SEC rules and regulations and (ii) is accumulated and communicated to management, including the principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosures.

There have been no changes in internal controls over financial reporting for Eversource, CL&P, NSTAR Electric and PSNH during the quarter ended December 31, 2023 that have materially affected, or are reasonably likely to materially affect, internal controls over financial reporting.

**Item 9B. Other Information**

During the quarter ended December 31, 2023, none of the Company's directors or officers adopted, modified, or terminated a "Rule 10b5-1 trading arrangement" or a "non-Rule 10b5-1 trading arrangement," as such terms are defined under Item 408 of Regulation S-K.

No additional information is required to be disclosed under this item as of December 31, 2023, as this information has been previously disclosed in applicable reports on Form 8-K during the fourth quarter of 2023.

**PART III**

**Item 10. Directors, Executive Officers and Corporate Governance**

**Eversource Energy**

The information required by this Item 10 for Eversource Energy is incorporated herein by reference to certain information contained in the sections captioned "Election of Trustees," and "Governance of Eversource Energy" plus related subsections, of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 22, 2024.

Information concerning executive officers of Eversource Energy required by this Item 10 is reported under a separate caption entitled "Information About Our Executive Officers" in Part I of this report.

**CL&P, NSTAR Electric and PSNH**

Certain information required by this Item 10 is omitted for CL&P, NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly Owned Subsidiaries.

**Item 11. Executive Compensation**

**Eversource Energy**

The information required by this Item 11 for Eversource Energy is incorporated herein by reference to certain information contained in Eversource Energy's definitive proxy statement for solicitation of proxies, which is expected to be filed with the SEC on or about March 22, 2024, under the sections captioned "Compensation Discussion and Analysis," plus related subsections, and "Compensation Committee Report," plus related subsections following such Report.

**CL&P, NSTAR Electric and PSNH**

Certain information required by this Item 11 has been omitted for CL&P, NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly-Owned Subsidiaries.

**Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters**

**Eversource Energy**

In addition to the information below under "Securities Authorized for Issuance Under Equity Compensation Plans," incorporated herein by reference is the information contained in the sections "Securities Ownership of Certain Beneficial Owners" and "Common Share Ownership of Trustees and Management" of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 22, 2024.

**CL&P, NSTAR Electric and PSNH**

Certain information required by this Item 12 has been omitted for CL&P, NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly-Owned Subsidiaries.

**SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS**

The following table sets forth the number of Eversource Energy common shares issuable under Eversource Energy equity compensation plans, as well as their weighted exercise price, as of December 31, 2023, in accordance with the rules of the SEC:

| Plan Category   | Number of securities to be issued upon exercise of outstanding options, warrants and rights <sup>(1)</sup> | Weighted-average exercise price of outstanding options, warrants and rights <sup>(2)</sup> | Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column <sup>(1)</sup> ) |
|---|--|--|---|
| Equity compensation plans approved by security holders                    | 1,336,666  | \$—  | 4,587,376   |
| Equity compensation plans not approved by security holders <sup>(3)</sup> | —  | —  | —   |
| <b>Total</b>  | <b>1,336,666</b>   | <b>\$—</b>   | <b>4,587,376</b>  |

(1) Includes 672,242 common shares for distribution in respect of restricted share units, and 664,424 performance shares issuable at target, all pursuant to the terms of our Incentive Plans.

(2) The weighted-average exercise price does not take into account restricted share units or performance shares, which have no exercise price.

(3) Securities set forth in this table are authorized for issuance under compensation plans that have been approved by shareholders of Eversource Energy.

For information regarding our Incentive Plans, see Note 11C, "Employee Benefits - Share Based Payments," to the financial statements.

**Item 13. Certain Relationships and Related Transactions, and Director Independence**

**Eversource Energy**

Incorporated herein by reference is the information contained in the sections captioned "Trustee Independence" and "Related Person Transactions" of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 22, 2024.

**CL&P, NSTAR Electric and PSNH**

Certain information required by this Item 13 has been omitted for CL&P, NSTAR Electric and PSNH pursuant to Instruction I(2)(c) to Form 10-K, Omission of Information by Certain Wholly-Owned Subsidiaries.

**Item 14. Principal Accountant Fees and Services**

**Eversource Energy**

Incorporated herein by reference is the information contained in the section "Relationship with Principal Independent Registered Public Accounting Firm" of Eversource Energy's definitive proxy statement for solicitation of proxies, expected to be filed with the SEC on or about March 22, 2024.

**CL&P, NSTAR Electric and PSNH**

**Pre-Approval of Services Provided by Principal Auditors**

None of CL&P, NSTAR Electric and PSNH is subject to the audit committee requirements of the SEC, the national securities exchanges or the national securities associations. CL&P, NSTAR Electric and PSNH obtain audit services from the independent auditor engaged by the Audit Committee of Eversource Energy's Board of Trustees. Eversource Energy's Audit Committee has established policies and procedures regarding the pre-approval of services provided by the principal auditors. Those policies and procedures delegate pre-approval of services to the Eversource Energy Audit Committee Chair provided that such offices are held by Trustees who are "independent" within the meaning of the Sarbanes-Oxley Act of 2002 and that all such pre-approvals are presented to the Eversource Energy Audit Committee at the next regularly scheduled meeting of the Committee.

The following relates to fees and services for the entire Eversource Energy system, including Eversource Energy, CL&P, NSTAR Electric and PSNH.

**Fees Billed By Principal Independent Registered Public Accounting Firm**

The aggregate fees billed to the Company and its subsidiaries by Deloitte & Touche LLP, the member firms of Deloitte Touche Tohmatsu, and their respective affiliates (collectively, the Deloitte Entities), for the years ended December 31, 2023 and 2022 totaled \$7,070,914 and \$7,029,422, respectively. In addition, affiliates of Deloitte & Touche LLP as noted below provide other accounting services to the Company.

| <b>Audit and Non-Audit Fees</b>   | <b>2023</b> |                  | <b>2022</b> |                  |
|-----------------------------------|-------------|------------------|-------------|------------------|
| Audit Fees <sup>(1)</sup>         | \$          | 5,310,000        | \$          | 5,323,600        |
| Audit Related Fees <sup>(2)</sup> |             | 1,759,000        |             | 1,542,000        |
| All Other Fees <sup>(3)</sup>     |             | 1,914            |             | 163,822          |
| <b>TOTAL</b>                      | <b>\$</b>   | <b>7,070,914</b> | <b>\$</b>   | <b>7,029,422</b> |

- <sup>(1)</sup> Audit Fees consisted of fees related to the audits of financial statements of Eversource Energy and its subsidiaries in the Annual Report on Form 10-K, reviews of financial statements in the Combined Quarterly reports on Form 10-Q of Eversource Energy and its subsidiaries, consultations with management, regulatory and compliance filings, system conversion quality assurance, out of pocket expenses, and audits of internal controls over financial reporting for the years ended December 31, 2023 and 2022.
- <sup>(2)</sup> Audit Related Fees were incurred for procedures performed in the ordinary course of business in support of certain regulatory filings, comfort letters, consents, and other costs related to registration statements and financials for the years ended December 31, 2023 and 2022. Audit Related Fees for the year ended 2022 also included Eversource's ATM equity offering program.
- <sup>(3)</sup> All Other Fees for the years ended December 31, 2023 and 2022 related to an annual license for access to an accounting standards research tool. All Other Fees for the year ended December 31, 2022 also related to a system pre-implementation control review and an executive training program.

The Audit Committee pre-approves all auditing services and permitted audit-related or other services (including the fees and terms thereof) to be performed for us by our independent registered public accounting firm, subject to the de minimis exceptions for non-audit services described in Section 10A(i)(1)(B) of the Securities Exchange Act of 1934, which are approved by the Audit Committee prior to the completion of the audit. The Audit Committee may form and delegate its authority to subcommittees consisting of one or more members when appropriate, including the authority to grant pre-approvals of audit and permitted non-audit services, provided that decisions of such subcommittees to grant pre-approvals are presented to the full Audit Committee at its next scheduled meeting. During 2023, all services described above were pre-approved by the Audit Committee or its Chair.

The Audit Committee has considered whether the provision by the Deloitte Entities of the non-audit services described above was allowed under Rule 2-01(c)(4) of Regulation S-X and was compatible with maintaining the independence of the registered public accountants and has concluded that the Deloitte Entities were and are independent of us in all respects.

**PART IV**

**Item 15. Exhibits and Financial Statement Schedules**

(a) 1. Financial Statements:

The financial statements filed as part of this Annual Report on Form 10-K are set forth under Item 8, "Financial Statements and Supplementary Data."

2. Schedules

I. Financial Information of Registrant:

Eversource Energy (Parent) Balance Sheets as of December 31, 2023 and 2022 S-1

Eversource Energy (Parent) Statements of Income for the Years Ended  
December 31, 2023, 2022 and 2021 S-2

Eversource Energy (Parent) Statements of Comprehensive Income for the Years Ended  
December 31, 2023, 2022 and 2021 S-2

Eversource Energy (Parent) Statements of Cash Flows for the Years Ended  
December 31, 2023, 2022 and 2021 S-3

II. Valuation and Qualifying Accounts and Reserves for Eversource, CL&P, NSTAR Electric and PSNH  
for 2023, 2022 and 2021 S-4

All other schedules of the companies for which inclusion is required in the applicable regulations of the SEC are permitted to be omitted under the related instructions or are not applicable, and therefore have been omitted.

3. Exhibit Index E-1

**Item 16. Form 10-K Summary**

Not applicable.

Exhibit 31

CERTIFICATION PURSUANT TO  
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Joseph R. Nolan, Jr., certify that:

1. I have reviewed this Annual Report on Form 10-K of Eversource Energy (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 32

CERTIFICATION PURSUANT TO  
18 U.S.C. SECTION 1350  
AS ADOPTED PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with this Annual Report on Form 10-K of Public Service Company of New Hampshire (the registrant) for the period ending December 31, 2023 as filed with the Securities and Exchange Commission (the Report), we, Joseph R. Nolan, Jr., Chairman of the registrant, and John M. Moreira, Executive Vice President, Chief Financial Officer and Treasurer of the registrant, certify, pursuant to 18 U.S.C. Sec. 1350, as adopted pursuant to Sec. 906 of the Sarbanes-Oxley Act of 2002, that:

- 1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- 2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the registrant.

| Officers 7 through 65   | \$ 16,357,717   | \$ -        | \$ 10,394,192        | \$ -             | \$ 10,257,000                                | \$ 2,093,039   | \$ 1,936,875              | \$ 41,038,822         | \$ 2,699,808  | 6.6%  |
| <b>TOTAL</b>  | <b>\$ 21,200,739</b>  | <b>\$ -</b> | <b>\$ 27,790,068</b> | <b>\$ -</b>      | <b>\$ 16,335,000</b>                         | <b>\$ 4,656,128</b>  | <b>\$ 2,057,258</b>       | <b>\$ 72,039,194</b>  | <b>\$ 4,437,471</b>   | <b>6.2%</b>   |

1) Officers listed above include all officers reported in the Eversource proxy and other officers at the Vice President level or above as of December 31 for whom a portion of compensation was charged to the Utility as allowed by the PUC in rates.

2) External Board member compensation is not included in rates; therefore, no external board members reported.

3) Consistent with the reporting format in Attachment A to the December 3, 2008, Decision in Docket No. 08-01-16, the names and titles of those officers whose compensation is not required to be publicly reported in the Northeast Utilities proxy or Utility 10-K are not publicly reported here, but the compensation for all such officers is provided here and such officers are identified in this document as "Officers 7 through 65."

4) Except as noted below, values shown in each column are determined as if reported in the Summary Compensation Table required by Item 402(c) of Regulation S-K (17 CFR § 229.402(c)), or successor, appearing in the proxy statement for the company's annual meeting of shareholders filed with the U.S. Securities and Exchange Commission.

5) Change in pension value for officers that are not reported in proxy statements or Utility 10-K is estimated using service cost and interest cost related to each such officer.

6) Amount and percentage of compensation charged to the Utility represents amount and percentage of compensation charged to Utility Capital Accounts and/or Operating Expense (above-the-line), reflecting extent each category of compensation was allowed by the PUC in rates.

| <b>TOTAL</b>  | <b>\$ 21,930,211</b>  | <b>\$ -</b> | <b>\$ 28,667,396</b> | <b>\$ -</b>      | <b>\$ 12,885,700</b>                         | <b>\$ 16,164,480</b>   | <b>\$ 1,919,080</b>       | <b>\$ 81,566,868</b>  | <b>\$ 5,109,193</b>   | <b>6.3%</b>   |

1) Officers listed above include all officers reported in the Eversource proxy and other officers at the Vice President level or above as of December 31 for whom a portion of compensation was charged to the Utility as allowed by the PUC in rates.

2) External Board member compensation is not included in rates; therefore, no external board members reported.

3) This filing is made consistent with Section 14.4 of the Settlement Agreement in Docket No. DE 09-035, approved by Order No. 25.123 that requires PSNH to annually file a report on executive compensation in the same format and with the same type of information as required in Connecticut for that state's regulated utilities. See CT DPUC Order in Docket 08-01-16, Petition of Richard Blumenthal, Attorney General for the State of Connecticut, for Standardized Disclosure of Utility Executive and Officers Compensation, dated December 3, 2008.

4) Except as noted below, values shown in each column are determined as if reported in the Summary Compensation Table required by Item 402(c) of Regulation S-K (17 CFR § 229.402(c)), or successor, appearing in the proxy statement for the company's annual meeting of shareholders filed with the U.S. Securities and Exchange Commission.

5) Change in pension value for officers that are not reported in proxy statements or Utility 10-K is estimated using service cost and interest cost related to each such officer.

6) Amount and percentage of compensation charged to the Utility represents amount and percentage of compensation charged to Utility Capital Accounts and/or Operating Expense (above-the-line), reflecting extent each category of compensation was allowed by the PUC in rates.

**Response:**

Please refer to 1604.01(a)(15) Attachment 1 for a copy of the 2018 Eversource Incentive Plan applicable to all officers and executives.

## APPENDIX A

### 2018 EVERSOURCE ENERGY INCENTIVE PLAN

#### 1. PURPOSE

The purpose of the 2018 Eversource Energy Incentive Plan (the Plan) is to attract and retain employees of the Company, to provide an incentive for Participants to generate shareholder value by contributing to the appreciation of shares of Company Stock, to enable Participants to share in the growth of the Company through the grant of Awards, and to provide non-employee Trustees with Equity Awards.

#### 2. DEFINED TERMS

Exhibit A, which is incorporated by reference, defines the terms used in the Plan and includes certain operational rules related to those terms.

#### 3. ADMINISTRATION

The Plan shall be administered by the Compensation Committee. The Board may in any instance perform any of the Plan functions of the Compensation Committee, and the Compensation Committee may delegate such of its Plan duties, powers and responsibilities as it may determine to any other person, including the grant of Awards, in accordance with applicable legal requirements and the Compensation Committee's charter. References to the Compensation Committee in this Plan shall include the Board or the person or persons so delegated to the extent of such delegation, as applicable.

The Compensation Committee shall select the persons eligible to receive Awards and shall determine the terms and conditions of the Awards. The Compensation Committee has discretionary authority, subject only to the express provisions of the Plan, to interpret the Plan; determine eligibility for and grant Awards; determine, modify or waive the terms and conditions of any Award; determine the form of settlement of Awards (whether in cash, shares of Stock, other property or a combination thereof); prescribe forms, rules and procedures; and otherwise do all things necessary or desirable to carry out the purposes of the Plan. Determinations of the Compensation Committee made under the Plan will be conclusive and will bind all parties.

#### 4. ELIGIBILITY FOR ANNUAL CASH INCENTIVE AWARDS

Each employee of the Company employed in a position classified as a Vice President or higher (an Executive Employee) shall be eligible to receive an Annual Cash Incentive Award under the Plan. As soon as practicable after the start of each fiscal year, but in any event within 90 days thereafter, the Compensation Committee shall set performance goals for the Company, which shall be the basis for determining the Annual Cash Incentive Award to be paid to each Executive Employee for such fiscal year, unless otherwise determined by the Compensation Committee. The Compensation Committee shall communicate to each Executive Employee the target and the percentages (including minimums and maximums) of the Annual Cash Incentive Award that such employee is eligible to receive. The Compensation Committee may permit an

Executive Employee to defer an Annual Cash Incentive Award in accordance with such procedures as the Compensation Committee may from time to time specify, subject to compliance with Section 409A.

The Compensation Committee shall certify and announce the Annual Incentive Awards that will be paid by the Company to each Executive Employee as soon as practicable following the final determination of the Company's financial results for the relevant fiscal year. Payment of an Annual Incentive Award that an Executive Employee has not expressly deferred shall be made in cash after the end of the relevant fiscal year but not later than two and one-half months after the end of such fiscal year, only if the employment of the Executive Employee has not been terminated prior to the date that payment is due, except as otherwise specifically provided in a written agreement between the Company and the Executive Employee. The Compensation Committee may provide for complete or partial exceptions to this requirement if an Executive Employee's employment terminates on account of his or her Retirement, death or Disability, or is terminated by the Company without Cause or in connection with a Change in Control.

## **5. ELIGIBILITY AND PARTICIPATION FOR EQUITY AWARDS**

The Compensation Committee shall select Participants from among key Employees of the Company and its subsidiaries, it being understood that no Employee whose terms and conditions of employment are subject to negotiation with a collective bargaining agent will be eligible to receive an Equity Award under the Plan until the agreement between the Company and such collective bargaining agent with respect to the Employee provides for eligibility to participate in the Plan. Eligibility for ISOs is limited to individuals described in the first sentence of this Section 5 who are employees of the Company or of a "parent corporation" or "subsidiary corporation" of the Company as those terms are defined in Section 424 of the Code. Eligibility for Stock Options, other than ISOs and SARs, is limited to individuals described in the first sentence of this Section 5 who are providing direct services on the date of grant of the Award to the Company or to a subsidiary of the Company that would be described in the first sentence of Section 1.409A-1(b)(5)(iii)(E) of the Treasury Regulations. Non-employee Trustees shall also participate in the Plan through Stock Awards made as a component of Trustee compensation.

## **6. LIMITS ON GRANTS AND COMPENSATION UNDER THE PLAN**

(a) **Number of Shares.** Subject to adjustment as provided in Section 8(b), the maximum number of shares of Company Stock that may be issued in satisfaction of Equity Awards under the Plan on and after the Effective Date shall be 3,200,000 shares. For purposes of this Section 6(a), the number of shares of Company Stock issued in satisfaction of Equity Awards will be determined (i) by including shares of Company Stock withheld by the Company in payment of the exercise price or purchase price of the Award or in satisfaction of tax withholding requirements with respect to the Award, (ii) by including the full number of shares covered by a SAR any portion of which is settled in Company Stock (and not only the number of shares of Company Stock delivered in settlement), and (iii) by excluding any shares of Company Stock underlying Awards settled in cash or property (other than Company Stock) or that expire, become unexercisable, terminate or are forfeited to or repurchased by the Company without the issuance of Company Stock. For the avoidance of doubt, the number of shares of Company Stock available

for delivery under the Plan will not be increased by any shares of Company Stock delivered under the Plan that are subsequently repurchased using proceeds directly attributable to Stock Option exercises. The limits set forth in this Section 6(a) will be construed to comply with Section 422.

**(b) Substitute Awards.** The Compensation Committee may grant Substitute Awards under the Plan in substitution for equity awards of an acquired company. To the extent consistent with the requirements of Section 422 and the regulations thereunder and other applicable legal requirements (including applicable stock exchange requirements), Company Stock issued under Substitute Awards will be in addition to and will not reduce the number of shares available for Awards under the Plan set forth in Section 6(a), but, notwithstanding anything in Section 6(a) to the contrary, if any Substitute Award is settled in cash or expires, becomes unexercisable, terminates or is forfeited to or repurchased by the Company without the issuance of Company Stock, the shares of Company Stock previously subject to such Award will not be available for future grants under the Plan. The Compensation Committee will determine the extent to which the terms and conditions of the Plan apply to Substitute Awards, if at all.

**(c) Type of Shares.** Shares of Company Stock delivered by the Company under the Plan may be authorized but unissued shares of Company Stock or previously issued shares of Company Stock acquired by the Company.

**(d) Individual Limits.**

**(1)** The following additional limits apply to Awards of the specified type granted or, in the case of Cash Awards, payable to any person in any calendar year.

- (A)** Stock Options: 500,000 shares of Company Stock.
- (B)** SARs: 500,000 shares of Company Stock.
- (C)** Long term Incentive Cash Awards: \$4,000,000
- (D)** Annual Cash Incentive Awards: \$4,000,000
- (E)** Equity Awards (other than Stock Options or SARs): 400,000 shares of Company Stock.

In applying the foregoing limits, (i) all Awards of the specified type granted to the same person in the same calendar year are aggregated and made subject to one limit; (ii) the limits applicable to Stock Options and SARs refer to the number of shares of Company Stock underlying those Awards; (iii) the share limits under clause (E) refer to the maximum number of shares of Company Stock that may be delivered, or the value of which could be paid in cash or other property, under an Award or Awards of the type specified in clause (E), assuming a maximum payout; (iv) Awards other than Annual Cash Incentive Awards or Long Term Incentive Cash Awards that are settled in cash count against the applicable share limit under clauses (A), (B) or (E), as applicable, and not against the dollar limit under clause (C) and (D); and (v) the dollar limit under clauses (C) and (D) refers to the maximum dollar amount payable under an Annual Cash Incentive Award or Long Term Incentive Cash Award, as applicable, assuming a maximum payout.

(2) Notwithstanding the foregoing limits, the aggregate value of all compensation granted or paid to any non-employee Trustee with respect to any calendar year in respect of his or her service as Trustee, including Awards granted under the Plan and cash fees or other compensation paid to the non-employee Trustee for his or her services as a Trustee, including service on committees of the Board during such calendar year, shall not exceed \$750,000 in the aggregate, calculating the value of any Equity Awards based on the grant date fair value of such awards in accordance with the Accounting Rules.

## 7. RULES APPLICABLE TO AWARDS

### (a) All Awards.

(1) Awards. Awards under the Plan may consist of any or a combination of the following: Stock Options, SARs, Restricted Stock, Stock Units, including Restricted Stock Units, Performance Awards, Cash Awards and other awards that are convertible into or otherwise based on Common Stock (each, an Award, and, collectively, Awards).

(2) Award Provisions. By accepting (or, under such rules as the Compensation Committee may prescribe, being deemed to have accepted) an Award, the Participant will be deemed to have agreed to the terms of the Award and the Plan. Notwithstanding any provision of this Plan to the contrary, Substitute Awards may contain terms and conditions that are different from the terms and conditions specified herein, as determined by the Compensation Committee. The Compensation Committee shall determine the terms of all Awards, subject to the limitations provided herein. Awards under a particular section of the Plan need not be uniform as among the Participants.

(3) Term of Plan. No Awards may be made after 10 years from the Date of Adoption, but previously granted Awards may continue beyond that date in accordance with their terms.

(4) Transferability. Neither ISOs nor, except as the Compensation Committee otherwise expressly provides in accordance with the third sentence of this Section 7(a)(4), other Awards, may be transferred other than by will or by the laws of descent and distribution. During a Participant's lifetime, ISOs and, except as the Compensation Committee otherwise expressly provides in accordance with the third sentence of this Section 7(a)(4), SARs and NSOs, may be exercised only by the Participant. The Compensation Committee may permit the gratuitous transfer (*i.e.*, transfer not for value) of Awards other than ISOs, subject to applicable securities and other laws and such limitations as the Compensation Committee may impose.

(5) Vesting. The Compensation Committee shall determine the time or times at which an Award vests or becomes exercisable or any restrictions on such Award lapse and the terms on which an Award remains outstanding; *provided, however*, that no portion of any grant of an Equity Award may be scheduled by its terms to vest prior to the date that is one year following the date the Equity Award is granted; *provided also, however*, that Equity Awards that by the terms of a grant are scheduled to result in the issuance (as determined in accordance with the rules set forth in Section 6(a)) of an aggregate of up to five percent of the shares of Company Stock

reserved for issuance under Section 6(a) may be granted to eligible persons (including Trustees) without regard to the minimum vesting provisions of this Section 7(a). Without limiting the foregoing, the Compensation Committee may at any time accelerate the vesting or exercisability of an Award, regardless of any adverse or potentially adverse tax or other consequences resulting from such acceleration. Unless the Compensation Committee expressly provides otherwise, however, the following rules will apply if a Participant's Employment ceases:

(A) Except as provided in (B) and (C) below, immediately upon the cessation of the Participant's Employment, each Stock Option and SAR that is then held by the Participant or by the Participant's permitted transferees, if any, will cease to be exercisable and will terminate, and all other Awards that are then held by the Participant or by the Participant's permitted transferees, if any, to the extent not already vested will be forfeited.

(B) Subject to (C) and (D) below, all Stock Options and SARs held by the Participant or the Participant's permitted transferees, if any, immediately prior to the cessation of the Participant's Employment, to the extent then exercisable, will remain exercisable for the lesser of (i) a period of three months or (ii) the period ending on the latest date on which such Stock Option or SAR could have been exercised without regard to this Section 7(a)(5), and will thereupon immediately terminate.

(C) Subject to (D) below, all Stock Options and SARs held by a Participant or the Participant's permitted transferees, if any, immediately prior to the Participant's death, to the extent then exercisable, will remain exercisable for the lesser of (i) the one year period ending with the first anniversary of the Participant's death or (ii) the period ending on the latest date on which such Stock Option or SAR could have been exercised without regard to this Section 7(a)(5), and will thereupon immediately terminate.

(D) All Equity Awards (whether or not vested or exercisable) held by a Participant or the Participant's permitted transferees, if any, immediately prior to the cessation of the Participant's Employment, will immediately terminate upon such cessation of Employment if the termination is for Cause or occurs in circumstances that in the determination of the Compensation Committee would have constituted grounds for the Participant's Employment to be terminated for Cause.

(6) **Recovery of Compensation.** Upon written demand of the Company, the Compensation Committee may require the forfeiture and disgorgement to the Company of outstanding Awards and the proceeds from the exercise or disposition of Awards or Company Stock acquired under Awards, with interest and other related earnings, if payment of the Award was predicated on the achievement of certain financial results that were subsequently the subject of a material restatement of the financial statements of the Company, in the judgment of the Board, and if the Participant engaged in fraud or misconduct that caused or partially caused the need for the material restatement, and a lower payment would have been made to the Participant based on the restated financial results. In the event the Participant fails to make prompt reimbursement of any such Award or amounts previously paid or delivered, as applicable, the Company may, to the extent permitted by applicable law, deduct the amount required to be

reimbursed from the Participant's compensation otherwise due from the Company; *provided, however*, that the Company will not seek to recover upon Awards paid more than three years prior to the date the applicable restatement is disclosed. In addition, the Compensation Committee may require forfeiture and disgorgement to the Company of outstanding Awards and the proceeds or amounts with respect to the exercise, settlement, payment or disposition of Awards or Company Stock acquired under Awards, with interest and other related earnings, (i) to the extent required by law or applicable stock exchange listing standards, including, without limitation, Section 10D of the Securities Exchange Act of 1934, as amended (the Exchange Act), (ii) pursuant to any applicable Company clawback or recoupment policy, as in effect from time to time, or (iii) in connection with a willful violation by the Participant of a material provision of the code of business conduct of the Company or any of its subsidiaries, any material policy of the Company or any of its subsidiaries, or any material provision set forth in an employment agreement occurring within three years following payment of an Award, each, as in effect from time to time, and all as may be determined by the Compensation Committee. Each Participant, by accepting or being deemed to have accepted an Award under the Plan, agrees to cooperate fully with the Compensation Committee, and to cause any and all permitted transferees of the Participant to cooperate fully with the Compensation Committee to effectuate any forfeiture or disgorgement required hereunder. Neither the Compensation Committee nor the Company nor any other person, other than the Participant and his or her permitted transferees, if any, will be responsible for any adverse tax or other consequences to a Participant or his or her permitted transferees, if any, that may arise in connection with this Section 7(a)(6).

(7) **Taxes.** The delivery, vesting and retention of Company Stock, cash or other property under an Award are conditioned upon full satisfaction by the Participant of all tax withholding requirements with respect to the Award. The Compensation Committee shall prescribe such rules for the withholding of taxes with respect to any Award as it deems necessary. The Company may hold back shares of Company Stock from an Equity Award or permit a Participant to tender previously owned shares of Company Stock in satisfaction of tax withholding requirements (but not in excess of the maximum withholding amount consistent with the award being subject to equity accounting treatment under the Accounting Rules).

(8) **Dividend Equivalents.** The Compensation Committee may provide for the payment of amounts (on terms and subject to conditions established by the Compensation Committee) in lieu of cash dividends or other cash distributions with respect to Company Stock subject to an Award whether or not the holder of such Award is otherwise entitled to share in the actual dividend or distribution in respect of such Award; *provided, however*, that (a) dividends or dividend equivalents relating to an Award that, at the dividend payment date, remain subject to a risk of forfeiture (whether service-based or performance-based) shall be subject to the same risk of forfeiture as applies to the underlying Award and (b) no dividends or dividend equivalents shall be payable with respect to Options or SARs. Any entitlement to dividend equivalents or similar entitlements will be established and administered either consistent with an exemption from, or in compliance with, the requirements of Section 409A. Dividends or dividend equivalent amounts payable in respect of Awards that are subject to restrictions may be subject to such additional limits or restrictions as the Compensation Committee may impose.

(9) **Rights Limited.** Nothing in the Plan may be construed as giving any person the right to be granted an Award or to continued employment or service with the Company

or any of its subsidiaries, or any rights as a shareholder except as to shares of Company Stock actually issued under the Plan. The loss of existing or potential profit in Awards will not constitute an element of damages in the event of termination of Employment for any reason, even if the termination is in violation of an obligation of the Company or any of its subsidiaries to the Participant.

**(10) Performance- based Compensation Tax Exception.** In the case of any Performance Award (other than a Stock Option or SAR) intended to qualify for any performance-based compensation exception that might now or in the future be contained in any law or regulation, the Compensation Committee shall establish the Performance Criterion (or Criteria) applicable to the Award within the time period required under such law or regulation, and the grant, vesting or payment, as the case may be, of the Award will be conditioned upon the satisfaction of the Performance Criterion (or Criteria) as certified by the Compensation Committee, unless otherwise determined by the Compensation Committee.

**(11) Coordination with Other Plans.** Awards under the Plan may be granted in tandem with, or in satisfaction of or substitution for, other Awards under the Plan or awards made under other compensatory plans or programs of the Company or any of its subsidiaries. For example, but without limiting the generality of the foregoing, awards under other compensatory plans or programs of the Company or any of its subsidiaries may be settled in Company Stock under the Plan if the Compensation Committee so determines, in which case the shares delivered will be treated as awarded under the Plan (and will reduce the number of shares thereafter available under the Plan in accordance with the rules set forth in Section 6). In any case where an award is made under another plan or program of the Company or any of its subsidiaries and is intended to qualify for any performance-based compensation exception under law or regulation, and such award is settled by the delivery of Company Stock or another Award under the Plan, the limitations under both the other plan or program and under the Plan will be applied to the Plan as necessary (as determined by the Compensation Committee) to preserve the availability of any performance-based compensation exception with respect thereto.

**(12) Section 409A.**

**(A)** Without limiting the generality of Section 12(B) hereof, each Award will contain such terms as the Compensation Committee determines and will be construed and administered such that the Award either qualifies for an exemption from the requirements of Section 409A, or satisfies such requirements.

**(B)** Notwithstanding any provision of this Plan or any Award agreement to the contrary, the Compensation Committee may unilaterally amend, modify or terminate the Plan or any outstanding Award, including but not limited to changing the form of the Award, if the Compensation Committee determines that such amendment, modification or termination is necessary or advisable to avoid the imposition of an additional tax, interest or penalty under Section 409A.

**(C)** If a Participant is deemed on the date of the Participant's termination of Employment to be a "specified employee" within the meaning of that term under Section 409A(a)(2)(B), then, with regard to any payment that is considered

nonqualified deferred compensation under Section 409A, to the extent applicable, payable on account of a “separation from service”, such payment will be made or provided on the date that is the earlier of (i) the expiration of the six-month period measured from the date of such “separation from service” and (ii) the date of the Participant’s death (the Delay Period). Upon the expiration of the Delay Period, all payments delayed pursuant to this Section 7(a)(12) (whether they would have otherwise been payable in a single lump sum or in installments in the absence of such delay) will be paid on the first business day following the expiration of the Delay Period in a lump sum and any remaining payments due under the Award will be paid in accordance with the normal payment dates specified for them in the applicable Award agreement.

**(D)** For purposes of Section 409A, each payment made under this Plan will be treated as a separate payment.

**(E)** With regard to any payment considered to be nonqualified deferred compensation under Section 409A, to the extent applicable, that is payable upon a Change in Control of the Company or other similar event, to avoid the imposition of an additional tax, interest or penalty under Section 409A, no amount will be payable unless such change in control constitutes a “change in control event” within the meaning of Section 1.409A-3(i)(5) of the Treasury Regulations.

**(b) Stock Options and SARs.**

**(1) Time and Manner of Exercise.** Unless the Compensation Committee expressly provides otherwise, no Stock Option or SAR will be deemed to have been exercised until the Company receives notice of exercise in a form acceptable to the Compensation Committee that is signed by the appropriate person and accompanied by any payment required under the Award. Any attempt to exercise a Stock Option or SAR by any person other than the Participant will not be given effect unless the Compensation Committee has received such evidence as it may require that the person exercising the Award has the right to do so.

**(2) Exercise Price.** The exercise price (or the base value from which appreciation is to be measured) of each Award requiring exercise must be no less than 100% (in the case of an ISO granted to a 10-percent shareholder within the meaning of subsection (b)(6) of Section 422, 110%) of the Fair Market Value of the Company Stock subject to the Award, determined as of the date of grant, or such higher amount as the Compensation Committee may determine in connection with the grant.

**(3) Payment of Exercise Price.** Where the exercise of an Award is to be accompanied by payment, payment of the exercise price must be by cash or check acceptable to the Compensation Committee or, if so permitted by the Compensation Committee and if legally permissible, (i) through the delivery of previously acquired unrestricted shares of Company Stock, or the withholding of shares of Company Stock otherwise deliverable upon exercise, in either case that have a Fair Market Value equal to the exercise price, (ii) through a broker-assisted cashless exercise program acceptable to the Compensation Committee, (iii) by other means acceptable to the Compensation Committee, or (iv) by any combination of the foregoing permissible forms of payment. The delivery of previously acquired shares in payment of the

exercise price under clause (b)(3) above may be accomplished either by actual delivery or by constructive delivery through attestation of ownership, subject to such rules as the Compensation Committee may prescribe.

(4) **Maximum Term.** The maximum term of Stock Options and SARs must not exceed 10 years from the date of grant (or five years from the date of grant in the case of an ISO granted to a 10-percent shareholder described in Section 7(b)(2) above).

(5) **No Repricing.** Except in connection with a corporate transaction involving the Company (which term includes, without limitation, any stock dividend, stock split, extraordinary cash dividend, recapitalization, reorganization, merger, consolidation, split-up, spin-off, combination or exchange of shares) or as otherwise contemplated by Section 8 below, the Company may not, without obtaining shareholder approval, (A) amend the terms of outstanding Stock Options or SARs to reduce the exercise price or base value of such Stock Options or SARs, (B) cancel outstanding Stock Options or SARs in exchange for Stock Options or SARs with an exercise price or base value that is less than the exercise price or base value of the original Stock Options or SARs, or (C) cancel outstanding Stock Options or SARs that have an exercise price or base value greater than the Fair Market Value of a share of Company Stock on the date of such cancellation in exchange for cash or other consideration.

## 8. EFFECT OF CERTAIN TRANSACTIONS

(a) Except as otherwise expressly provided in an Award agreement, Company plan, or other individual agreement, or by the Compensation Committee, the following provisions will apply in the event of a Corporate Transaction or a Change in Control:

(1) **Assumption or Substitution.** If the Corporate Transaction or Change in Control is one in which there is an acquiring or surviving entity, the Compensation Committee shall provide for either (A) the assumption or continuation of all outstanding Awards or any portion thereof or (B) the grant of new awards in substitution therefor by the acquiror or survivor or an affiliate of the acquiror or survivor.

(2) **Cash-Out of Awards.** Subject to Section 8(a)(6) below, the Compensation Committee may alternatively or also provide for payment (a “cash-out”), with respect to some or all Awards or any portion thereof, equal in the case of each affected Equity Award or portion thereof to the excess, if any, of (A) the Fair Market Value of one share of Company Stock times the number of shares of Company Stock subject to the Equity Award or such portion, over (B) the aggregate exercise or purchase price, if any, under the Equity Award or such portion (in the case of a SAR, the aggregate base value above which appreciation is measured), in each case on such payment terms (which need not be the same as the terms of payment to holders of Company Stock) and other terms, and subject to such conditions, as the Compensation Committee determines; *provided, however*, for the avoidance of doubt, that if the exercise or purchase price (or base value) of an Equity Award is equal to or greater than the Fair Market Value of one share of Company Stock, the Equity Award may be cancelled with no payment due hereunder or otherwise in respect of such Equity Award.

(3) **Acceleration of Certain Awards.** Subject to Section 8(a)(6) below, the Compensation Committee may provide that any Equity Award requiring exercise will become exercisable, in full or in part, and/or that the delivery of any shares of Company Stock remaining deliverable under any outstanding Award of Company Stock Units (including Restricted Stock Units and Performance Awards to the extent consisting of Company Stock Units) will be accelerated, in full or in part, in each case on a basis that gives the holder of the Award a reasonable opportunity, as determined by the Compensation Committee, following exercise of the Award or the delivery of the shares, as the case may be, to participate as a shareholder in the Corporate Transaction or Change in Control.

(4) **Termination of Awards upon Consummation of a Corporate Transaction or Change in Control.** Except as the Compensation Committee may otherwise determine in any case, each Award will automatically terminate (and in the case of outstanding shares of Restricted Stock, will automatically be forfeited) immediately upon consummation of the Corporate Transaction or a Change in Control, other than (A) any Award that is assumed or substituted pursuant to Section 8(a)(1) above, and (B) any Cash Award that by its terms, or as a result of action taken by the Compensation Committee, continues following the Corporate Transaction or Change in Control.

(5) **Involuntary Employment Action.** Except as otherwise provided in an Award agreement or an individual agreement, if at any time within two (2) years after the effective date of a Change in Control there is an Involuntary Employment Action with respect to a Participant, each then outstanding Equity Award assumed, substituted or continued under Section 8(a)(1) and held by such Participant (or a permitted transferee of such person), to the extent then outstanding, shall, upon the occurrence of such Involuntary Employment Action, automatically accelerate so that each such Award shall become fully vested or exercisable, as applicable, immediately prior to such Involuntary Employment Action. Upon the occurrence of an Involuntary Employment Action with respect to a Participant, any outstanding Options or SARs held by such Participant (and a permitted transferee of such person) shall be exercisable for one (1) year following the Involuntary Employment Action or, if earlier, within the originally prescribed term of the Option or SAR.

(6) **Additional Limitations.** Any share of Company Stock and any cash or other property delivered pursuant to Section 8(a)(2) or Section 8(a)(3) above with respect to an Equity Award may, in the discretion of the Compensation Committee, contain such restrictions, if any, as the Compensation Committee deems appropriate to reflect any performance or other vesting conditions to which the Award was subject and that did not lapse (and were not satisfied) in connection with a Corporate Transaction or a Change in Control. For purposes of the immediately preceding sentence, a cash-out under Section 8(a)(2) above or an acceleration under Section 8(a)(3) above will not, in and of itself, be treated as the lapsing (or satisfaction) of a performance or other vesting condition. In the case of Restricted Stock that does not vest and is not forfeited in connection with the Corporate Transaction or Change in Control, the Compensation Committee may require that any amounts delivered, exchanged or otherwise paid in respect of such Company Stock in connection with the Corporate Transaction or Change in Control be placed in escrow or otherwise made subject to such restrictions as the Compensation Committee deems appropriate to carry out the intent of the Plan.

**(b) Changes in and Distributions with Respect to Company Stock.**

**(1) Basic Adjustment Provisions.** In the event of a stock dividend, stock split or combination of shares (including a reverse stock split), recapitalization or other change in the Company's capital structure that constitutes an equity restructuring within the meaning of the Accounting Rules, the Compensation Committee shall make appropriate adjustments to the maximum number of shares of Company Stock specified in Section 6(a) that may be issued under the Plan and to the maximum share limits described in Section 6(d), and shall make appropriate adjustments to the number and kind of shares of stock or securities underlying Equity Awards then outstanding or subsequently granted, any exercise or purchase prices (or base values) relating to Equity Awards and any other provision of Awards affected by such change.

**(2) Certain Other Adjustments.** The Compensation Committee may also make adjustments of the type described in Section 8(b)(1) above to take into account distributions to shareholders other than those provided for in Section 8(a) and 8(b)(1), or any other event, if the Compensation Committee determines that adjustments are appropriate to avoid distortion in the operation of the Plan.

**(3) Continuing Application of Plan Terms.** References in the Plan to shares of Company Stock will be construed to include any stock or securities resulting from an adjustment pursuant to this Section 8.

**9. LEGAL CONDITIONS ON DELIVERY OF COMPANY STOCK**

The Company will not be obligated to deliver any shares of Company Stock pursuant to the Plan or to remove any restriction from shares of Company Stock previously delivered under the Plan until: (i) the Company is satisfied that any legal matters in connection with the issuance and delivery of such shares have been addressed and resolved; (ii) if the outstanding Company Stock is at the time of delivery listed on any stock exchange or national market system, the shares to be delivered have been listed or authorized to be listed on such exchange or system upon official notice of issuance; and (iii) all conditions of the Award have been satisfied or waived. The Company may require, as a condition to the exercise of an Award or the delivery of shares of Company Stock under an Award, such representations or agreements as counsel for the Company may consider appropriate to avoid violation of the Securities Act of 1933, as amended, or any applicable state or non-U.S. securities law. Any Company Stock required to be issued to Participants under the Plan will be evidenced in such manner as the Compensation Committee may deem appropriate, including book-entry registration or delivery of stock certificates. In the event that the Compensation Committee determines that stock certificates will be issued to Participants under the Plan, the Compensation Committee may require that certificates evidencing Company Stock issued under the Plan bear an appropriate legend reflecting any restriction on transfer applicable to such Company Stock, and the Company may hold the certificates pending lapse of the applicable restrictions.

**10. AMENDMENT AND TERMINATION**

The Compensation Committee may at any time or times amend the Plan or any outstanding Award for any purpose which may at the time be permitted by law, and may at any

time terminate the Plan as to any future grants of Awards; *provided, however*, that except as otherwise expressly provided in the Plan, the Compensation Committee may not, without the Participant's consent, alter the terms of an Award so as to affect materially and adversely the Participant's rights under the Award, unless the Compensation Committee expressly reserved the right to do so at the time the Award was granted. Any amendments to the Plan will be conditioned upon shareholder approval to the extent, if any, such approval is required by law (including the Code) or applicable stock exchange requirements, as determined by the Compensation Committee.

## 11. MISCELLANEOUS

(a) **Waiver of Jury Trial.** By accepting or being deemed to have accepted an Award under the Plan, each Participant waives any right to a trial by jury in any action, proceeding or counterclaim concerning any rights under the Plan and any Award, or under any amendment, waiver, consent, instrument, document or other agreement delivered or which in the future may be delivered in connection therewith, and agrees that any such action, proceedings or counterclaim will be tried before a court and not before a jury. By accepting or being deemed to have accepted an Award under the Plan, each Participant certifies that no officer, representative, or attorney of the Company has represented, expressly or otherwise, that the Company would not, in the event of any action, proceeding or counterclaim, seek to enforce the foregoing waivers. Notwithstanding anything to the contrary in the Plan, nothing herein is to be construed as limiting the ability of the Company and a Participant to agree to submit disputes arising under the terms of the Plan or any Award made hereunder to binding arbitration or as limiting the ability of the Company to require any eligible individual to agree to submit such disputes to binding arbitration as a condition of receiving an Award hereunder.

(b) **Limitation of Liability.** Notwithstanding anything to the contrary in the Plan, neither the Company, nor any of its subsidiaries, nor the Compensation Committee, nor any person acting on behalf of the Company, any of its subsidiaries, or the Compensation Committee, will be liable to any Participant, to any permitted transferee, to the estate or beneficiary of any Participant or any permitted transferee, or to any other holder of an Award by reason of any acceleration of income, or any additional tax (including any interest and penalties), asserted by reason of the failure of an Award to satisfy the requirements of Section 422 or Section 409A or by reason of Section 4999 of the Code, or otherwise asserted with respect to the Award.

(c) **Funding of the Plan.** This Plan shall be unfunded. The Company shall not be required to establish any special or separate fund or to make any other segregation of assets to assure the payment of any Awards under this Plan. In no event shall interest be paid or accrued on any Award, including unpaid installments of Awards.

(d) **Disclaimer of Liability.** The Declaration of Trust of the Company provides that no shareholder of the Company shall be held to any liability whatever for the payment of any sum of money, or for damages or otherwise under any contract, obligation or undertaking made, entered into or issued by the Board or by any officer, agent or representative elected or appointed by the Board, and no such contract, obligation or undertaking shall be enforceable against the Board or any of them in their or his or her individual capacities or capacity and all such contracts,

obligations and undertakings shall be enforceable only against the Board as such contract, obligation or undertaking shall look only to the trust estate for the payment or satisfaction thereof.

## 12. ESTABLISHMENT OF SUB-PLANS

The Compensation Committee may at any time and from time to time establish one or more sub-plans under the Plan (for local-law compliance purposes or other administrative reasons determined by the Compensation Committee) by adopting supplements to the Plan containing, in each case, such limitations on the Compensation Committee's discretion under the Plan, and such additional terms and conditions, as the Compensation Committee deems necessary or desirable. Each supplement so established will be deemed to be part of the Plan but will apply only to Participants within the group to which the supplement applies, as determined by the Compensation Committee.

## 13. GOVERNING LAW

(a) **Certain Requirements of Corporate Law.** Equity Awards will be granted and administered consistent with the requirements of applicable Massachusetts law relating to the issuance of stock and the consideration to be received therefor, and with the applicable requirements of the stock exchanges or other trading systems on which the Company Stock is listed or entered for trading, in each case as determined by the Compensation Committee.

(b) **Other Matters.** Except as otherwise provided by the express terms of an Award agreement, under a sub-plan described in Section 12 or as provided in Section 13(a) above, the domestic substantive laws of the Commonwealth of Massachusetts govern the provisions of the Plan and of Awards under the Plan and all claims or disputes arising out of or based upon the Plan or any Award under the Plan or relating to the subject matter hereof or thereof without giving effect to any choice or conflict of laws provision or rule that would cause the application of the domestic substantive laws of any other jurisdiction.

(c) **Jurisdiction.** By accepting an Award, each Participant will be deemed to (a) have submitted irrevocably and unconditionally to the jurisdiction of the federal and state courts located within the geographic boundaries of the United States District Court for the District of Massachusetts for the purpose of any suit, action or other proceeding arising out of or based upon the Plan or any Award; (b) agree not to commence any suit, action or other proceeding arising out of or based upon the Plan or an Award, except in the federal and state courts located within the geographic boundaries of the United States District Court for the District of Massachusetts; and (c) waive, and agree not to assert, by way of motion as a defense or otherwise, in any such suit, action or proceeding, any claim that he or she is not subject personally to the jurisdiction of the above-named courts that his or her property is exempt or immune from attachment or execution, that the suit, action or proceeding is brought in an inconvenient forum, that the venue of the suit, action or proceeding is improper or that the Plan or an Award or the subject matter thereof may not be enforced in or by such court.

## EXHIBIT A

### Definition of Terms

The following terms, when used in the Plan, have the meanings and are subject to the provisions set forth below:

**“Accounting Rules”**: Financial Accounting Standards Board Accounting Standards Codification Topic 718, or any successor provision.

**“Annual Cash Incentive Award”**: An Award denominated in cash that has a performance period of one (1) year.

**“Board”**: The Board of Trustees of the Company.

**“Cash Award”**: An Award denominated in cash, including an Annual Cash Incentive Award and a Long-Term Incentive Cash Award.

**“Cause”**: Unless otherwise defined in any then effective agreement between a Participant and the Company or its predecessors, “Cause” means, except to the extent specified otherwise by the Committee acting on behalf of the Company, the Participant’s conviction of a felony; in the reasonable determination of the Compensation Committee, the Participant’s commission of an act of fraud, embezzlement, or theft in connection with the Participant’s duties in the course of the Participant’s employment with the Company; acts or omissions causing intentional, wrongful damage to the property of the Company or intentional and wrongful disclosure of confidential information of the Company, or engaging in gross misconduct or gross negligence in the course of the Participant’s employment with the Company, or the Participant’s material breach of his or her obligations under any written agreement with the Company if such breach shall not have been remedied within 30 days after receiving written notice from the Compensation Committee specifying the details thereof. For purposes of this Plan, an act or omission on the part of a Participant shall be deemed “intentional” only if it was not due primarily to an error in judgment or negligence and was done by Participant not in good faith and without reasonable belief that the act or omission was in the best interest of the Company. In the event a Participant's employment or service is terminated for Cause, in addition to the immediate termination of all Grants, the Participant shall automatically forfeit all shares underlying any exercised portion of an Option for which the Company has not yet delivered the share certificates, upon refund by the Company of the Exercise Price paid by the Participant for such shares.

**“Change in Control”**: Unless otherwise defined in any then effective agreement between a Participant and the Company or its predecessors, (i) an event in which any person or entity, is or becomes the “beneficial owner” (as defined in Section 13(d) of the Exchange Act), together with all affiliates and associates (as such terms are used in Rule 12b-2 under the Exchange Act) of such person or entity, directly or indirectly, of securities of the Company representing 50% or more of the combined voting power of the Company’s then outstanding securities; (ii) the consummation of the merger or consolidation of the Company with any other company, other than a merger or consolidation which would result in the voting securities of the Company outstanding immediately prior thereto continuing to represent (either by remaining

outstanding or by being converted into voting securities of the surviving entity), more than 50% of the combined voting power of the voting securities of the Company or such surviving entity outstanding immediately after such merger; or (iii) at any time the Trustees as of the Date of Adoption or Trustees nominated by the Board do not constitute a majority of the Board (or, if applicable, the board of directors of a successor to the Company), provided, however, that any individual becoming a Trustee subsequent to the Effective Date whose election, or nomination for election by the Company's shareholders, was approved by a vote of at least a majority of the Trustees then comprising the Incumbent Board shall be considered as though such individual were a member of the Incumbent Board, but excluding, for this purpose, any such individual whose initial assumption of office occurs as a result of actual or threatened election contest with respect to the election or removal of Trustees or other actual or threatened solicitation of proxies or consents by or on behalf of a Person other than the Board.

Notwithstanding the foregoing, in any case where the occurrence of a Change in Control could affect the vesting of or payment under an Award subject to the requirements of Section 409A, to the extent required to comply with Section 409A, the term "Change in Control" shall mean an occurrence that both (i) satisfies the requirements set forth above in this definition and (ii) is a "change in control event" as that term is defined in the regulations under Section 409A.

**"Code"**: The U.S. Internal Revenue Code of 1986, as from time to time amended and in effect, or any successor statute as from time to time in effect.

**"Compensation Committee"**: The Compensation Committee of the Board.

**"Company"**: Eversource Energy, a Massachusetts voluntary association.

**"Corporate Transaction"**: Means any of: (i) a consolidation, merger or similar transaction or series of related transactions, including a sale or other disposition of stock, in which the Company (or an Affiliate) is not the surviving entity or which results in the acquisition of all or substantially all of the then outstanding Company Stock by a single person or entity or by a group of persons and/or entities acting in concert; (ii) a sale or transfer of all or substantially all of the Company's assets or (iii) a dissolution or liquidation of the Company. Where a Corporate Transaction involves a tender offer that is reasonably expected to be followed by a merger described in clause (i) as determined by the Compensation Committee, the Corporate Transaction shall be deemed to have occurred upon consummation of the tender offer.

Notwithstanding the foregoing, in any case where the occurrence of a Corporate Transaction could affect the vesting of or payment under an Award subject to the requirements of Section 409A, to the extent required to comply with Section 409A, the term "Corporate Transaction" shall mean an occurrence that both (a) satisfies the requirements set forth above in this definition and (b) is a "change in control event" as that term is defined in the regulations under Section 409A.

**"Date of Adoption"**: The date the Plan was approved by the Company's Board.

**"Disability"**: A Participant's being determined to be disabled within the meaning of the long-term disability plan or program that is a part of the Eversource Energy Service Company Flexible Benefits Plan (or any successor plan or program).

**“Employee”:** Any person who is employed by the Company or any of its subsidiaries.

**“Employment”:** A Participant’s employment or other service relationship with the Company or any of its subsidiaries. Employment will be deemed to continue, unless the Compensation Committee expressly provides otherwise, so long as the Participant is employed by, or otherwise is providing services in a capacity described in Section 5 to the Company or any of its subsidiaries. If a Participant’s employment or other service relationship is with any subsidiary of the Company and that entity ceases to be a subsidiary of the Company, the Participant’s Employment will be deemed to have terminated when the entity ceases to be a subsidiary of the Company, unless the Participant transfers Employment to the Company or any of its remaining subsidiaries. Notwithstanding the foregoing, in construing the provisions of any Award relating to the payment of “nonqualified deferred compensation” (subject to Section 409A) upon a termination or cessation of Employment, references to termination or cessation of employment, separation from service, retirement, or similar or correlative terms will be construed to require a “separation from service” (as that term is defined in Section 1.409A-1(h) of the Treasury Regulations) from the Company and from all other corporations and trades or businesses, if any, that would be treated as a single “service recipient” with the Company under Section 1.409A-1(h)(3) of the Treasury Regulations. The Company may, but need not, elect in writing, subject to the applicable limitations under Section 409A, any of the special elective rules prescribed in Section 1.409A-1(h) of the Treasury Regulations for purposes of determining whether a “separation from service” has occurred. Any such written election will be deemed a part of the Plan.

**“Equity Award”:** An Award other than a Cash Award.

**“Fair Market Value”:** As of a particular date, (i) the closing price for a share of Company Stock reported on the New York Stock Exchange (or any other national securities exchange on which the Company Stock is then listed) for that date or, if no closing price is reported for that date, the closing price on the immediately preceding date on which a closing price was reported or (ii) in the event that the Company Stock is not traded on a national securities exchange, the fair market value of a share of Company Stock determined by the Compensation Committee consistent with the rules of Section 422 and Section 409A to the extent applicable.

**“ISO”:** A Stock Option intended to be an “incentive stock option” within the meaning of Section 422. Each Stock Option granted pursuant to the Plan will be treated as providing by its terms that it is to be an NSO unless, as of the date of grant, it is expressly designated as an ISO.

**“Long Term Incentive Cash Award”:** An Award denominated in cash that has a performance period of greater than 12 months.

**“Involuntary Employment Action”:** As to a Participant means the involuntary termination of the Participant’s employment with the Company following a Change in Control, as applicable, (i) by the Company other than for Cause or (ii) upon the occurrence of any of the following circumstances, without the Participant’s consent: (a) any adverse and/or material alteration and diminution in the Participant’s authority, duties or responsibilities (other than a mere change in title or reporting relationship) as they existed immediately prior to the Change in Control, as applicable, or as the same may be increased from time to time thereafter, (b) a

reduction of the Participant's base salary or a reduction in targeted bonus opportunity, in each case as in effect on the date prior to the Change in Control, as applicable, or as the same may be increased from time to time thereafter or (c) relocation of the offices at which the Participant is employed which increases his or her daily commute by more than 50 miles, *however*, that in any case the Participant notifies the Company in writing of the basis for his or her involuntary termination within ninety (90) days of the occurrence of the circumstances and the Company does not cure such circumstances within thirty (30) days thereafter and the Participant terminates his or her employment within thirty (30) days thereafter.

**“NSO”:** A Stock Option that is not intended to be an “incentive stock option” within the meaning of Section 422.

**“Participant”:** Any eligible individual to whom an Award or Grant is made.

**“Performance Award”:** An Award subject to Performance Criteria. The Compensation Committee may grant Performance Awards that are intended to qualify for any performance-based compensation exception under applicable law or regulation now or in the future and Performance Awards that are not intended to so qualify.

**“Performance Criteria”:** Specified criteria, other than the mere continuation of Employment or the mere passage of time, the satisfaction of which is a condition for the grant, exercisability, vesting or full enjoyment of an Award. A Performance Criterion and any targets with respect thereto need not be based upon an increase, a positive or improved result or avoidance of loss. For purposes of Awards that are intended to qualify for the performance-based compensation exception under applicable law or regulation, a Performance Criterion will mean an objectively determinable measure or objectively determinable measures of performance relating to any, or any combination of, the following (measured either absolutely or comparatively (including, without limitation, by reference to an index or indices or the performance of one or more companies) and determined either on a consolidated basis or, as the context permits, on a divisional, subsidiary, line of business, project or geographical basis or in combinations thereof and subject to such adjustments, if any, as the Committee specifies, consistent with the requirements of applicable law or regulation): cash flow; cash flow from operations; earnings (including, but not limited to, earnings before interest, taxes, depreciation and amortization or operating earnings); earnings per share, diluted or basic; earnings per share from continuing operations; net asset turnover; inventory turnover; capital expenditures; debt; debt reduction; credit rating; working capital; return on investment; return on sales; net or gross sales; market share; economic value added; cost of capital; change in assets; expense reduction levels; unit volume; productivity; delivery performance; service levels; operating performance; customer satisfaction; diversity of new hires and/or promotions; environmental, social and corporate governance objectives and the return on such objectives; safety record; stock price; return on equity; total shareholder return; return on capital; return on assets or net assets; revenue; income or net income; operating income or net operating income; operating profit or net operating profit; gross margin, operating margin or profit margin; and completion of acquisitions, divestitures, business expansion, product diversification, new or expanded market penetration and other non-financial operating and management performance objectives, or other strategic business criteria consisting of one or more objectives based on satisfaction of specified revenue goals, geographic business expansion goals or cost targets. To the extent consistent with the requirements for satisfying any performance-based compensation exception under applicable

law or regulation, or as otherwise determined by the Compensation Committee, the Compensation Committee may provide in the case of any Award intended to qualify for such exception that one or more of the Performance Criteria applicable to such Award will be adjusted in an objectively determinable manner to reflect events (for example, but without limitation, acquisitions or dispositions) occurring during the performance period that affect the applicable Performance Criterion or Criteria.

**“Plan”**: The 2018 Eversource Energy Incentive Plan, as from time to time amended and in effect.

**“Restricted Stock”**: Company Stock subject to restrictions requiring that it be redelivered or offered for sale to the Company if specified service or performance-based conditions are not satisfied.

**“Restricted Stock Unit”**: A Company Stock Unit that is, or as to which the delivery of Company Stock or cash in lieu of Stock is, subject to the satisfaction of specified performance, time or other vesting conditions.

**“Retirement”**. Termination of employment from the Company, other than for “Cause” on or after the earlier to occur of (x) attainment of age 65, (y) eligibility for pension payments under the Supplemental Executive Retirement Plan for Officers of the Company, or employment-related agreement with the Company, or (z) attainment of age 55 after completing at least ten years of vesting service under the Company’s 401k Plan.

**“SAR”**: A right entitling the holder upon exercise to receive an amount (payable in cash or in shares of Company Stock of equivalent value) equal to the excess of the Fair Market Value of the shares of Company Stock subject to the right over the base value from which appreciation under the SAR is to be measured.

**“Section 409A”**: Section 409A of the Code.

**“Section 422”**: Section 422 of the Code.

**“Stock or Company Stock”**: Common shares of the Company, par value \$5.00 per share.

**“Stock Option”**: An option entitling the holder to acquire shares of Company Stock upon payment of the exercise price.

**“Stock Unit”**: An unfunded and unsecured promise, denominated in shares of Company Stock, to deliver Company Stock or cash measured by the value of Company Stock in the future.

**“Substitute Awards”**: Equity Awards issued under the Plan in substitution for equity awards of an acquired company that are converted, replaced or adjusted in connection with the acquisition.

**“Termination”**. Termination of employment with the Company and any affiliate of the Company in all capacities, including as a common-law employee and independent contractor. Whether a Participant has had a Termination shall be determined by the Committee based on all

relevant facts and circumstances with reference to Treasury Regulations Section 1.409A-1(h) regarding a “separation from service” and the default provisions set forth in Regulations Sections 1.409A-1(h)(1)(ii) and 1.409A-1(n).

**“Treasury Regulations”.** The Internal Revenue Service’s regulations relating to nonqualified deferred compensation plans.

**“Trustee”.** A member of the Board, and with respect to the compensation and benefits of a member of the Board who is also an Employee, a non-employee member of the Board.

002CSN8D43

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.01(a)(16)**

Lists of the amount of voting stock of the utility categorized as follows:

- a. Owned by an officer or director individually;
- b. Owned by the spouse or minor child of an officer or director; or
- c. Controlled by the officer or director directly or indirectly.

**Response:**

The Company does not have any voting stock. Stock is held only by the parent company, Eversource Energy.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.01(a)(17)**

A list of all payments to individuals or corporations for contractual services in the test year with a description of the purpose of the contractual services, as follows:

- a. For utilities with less than \$10,000,000 in annual gross revenues, a list of all payments in excess of \$10,000;
- b. For utilities with \$10,000,001 to \$100,000,000 in annual gross revenues, a list of all payments in excess of \$50,000;
- c. For utilities with annual gross revenues in excess of \$100,000,000, a list of all payments in excess of \$100,000; and
- d. The reporting thresholds for a particular entity shall be on a cumulative basis, indicating the number of items comprising the total amount of expenditure.

**Response:**

Please see 1604.01(a)(17) Attachment 1.

PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE  
PAYMENT FOR CONTRACTUAL SERVICES

**a** -- This PSNH Distribution segment financial data relates to the intercompany transactions between PSNH's segments (Distribution, Generation and Transmission), which are eliminated in the PSNH FERC Form 1 financial reports, as well as intercompany transactions between PSNH and affiliated companies, which are not eliminated in PSNH FERC Form 1 financial reports.

**b** -- This PSNH Distribution segment financial data is not appropriate for purposes of this presentation. PSNH does not manage or evaluate the Stockholder's Equity by PSNH Distribution, Transmission, or Generation; rather, PSNH's Stockholder's Equity is evaluated and managed in totality, which has been provided in detail in the PSNH FERC Form 1 financial report in the second column above. In addition, management does not issue long-term debt based on individual segment needs; rather, PSNH evaluates short-term and long-term capital and liquidity resources and needs on a legal entity basis. PSNH's long-term debt issuances have been provided in the PSNH FERC Form 1 financial report in the second column above.

**a** -- This PSNH Distribution segment financial data relates to the intercompany transactions between PSNH's segments (Distribution, Generation and Transmission), which are eliminated in the PSNH FERC Form 1 financial reports, as well as intercompany transactions between PSNH and affiliated companies, which are not eliminated in PSNH FERC Form 1 financial reports.

**b** -- This PSNH Distribution segment financial data is not appropriate for purposes of this presentation. PSNH does not manage or evaluate the Stockholder's Equity by PSNH Distribution, Transmission, or Generation; rather, PSNH's Stockholder's Equity is evaluated and managed in totality, which has been provided in detail in the PSNH FERC Form 1 financial report in the second column above. In addition, management does not issue long-term debt based on individual segment needs; rather, PSNH evaluates short-term and long-term capital and liquidity resources and needs on a legal entity basis. PSNH's long-term debt issuances have been provided in the PSNH FERC Form 1 financial report in the second column above.

**Rate Case Filing Requirements  
Pursuant to Puc 1604.01(a)(22)**

A description of the utility's projected need for external capital for the two-year period immediately following the test year.

**Response:**

On a daily basis, PSNH uses cash from operations to fund working capital obligations and capital expenditures. If working capital obligations coupled with capital expenditures exceed cash from operations, the Company will bridge the gap by raising short-term debt through its intercompany revolving credit agreement with the Eversource parent company. As PSNH's short-term debt balance approaches its limit, short-term debt will be refinanced with long-term capital in the form of long-term debt and equity via capital contributions from the Eversource parent company. Additionally, if necessary, long-term capital may be raised in advance of refunding long-term debt maturities. In any event, additional long-term capital will be balanced with the Company's retained earnings and dividends so that PSNH maintains an appropriate capital structure. During the two-year period immediately following the test year, the current year and 2025, the Company expects that it will be necessary to both issue long-term debt and receive capital contributions from PSNH's parent company.

The utility's capital budget with a statement of the source and uses of funds for the two years immediately following the test year.

**Response:**

Please see 1604.01(a)(23) Attachment 1, page 1, for the Company's current estimate of its distribution capital spend for calendar years 2024 and 2025. Please note that estimates for both years remain subject to change.

With respect to the sources and uses of funds, please refer to 1604.01(a)(23) Attachment 1, page 2, for a Statement of Cash Flows for 2024 and 2025. Please note that PSNH is financed on a consolidated entity basis, therefore the attached exhibit reflects sources and uses of funds for both PSNH transmission and distribution.

---

**Rate Case Filing Requirements  
Pursuant to Puc 1604.02(a)(1)**

A cover letter summarizing the requested rate relief and the nature and magnitude of the requested changes.

**Response:**

A cover letter is provided with this rate petition filing.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.02(a)(2)**

A “Report of Proposed Rate Changes”, which shall set forth the following:

- a. Rate or class of service;
- b. Effect of proposed change showing increases, decreases and net changes in each rate classification separately, where applicable;
- c. Average number of customers;
- d. Estimated annual revenue under present rates and under proposed rates; and
- e. Proposed rates by amount and percentage increase or decrease.

**Response:**

Please see Attachment ES-EAD-3 (Temp), Attachment ES-EAD-4 (Temp), Attachment ES-EAD-6 (Temp), Attachment ES-EAD-12, Attachment ES-EAD-13, and Attachment ES-EAD-15 for the information required pursuant to 1604.02(a)(2).

The Report of Proposed Rate Changes is included in Attachment ES-EAD-4 (Temp) and Attachment ES-EAD-13. These summarize subsections (a) through (d) by major rate categories consistent with the Company’s filing in Docket No. DE 19-057.

Attachment ES-EAD-3 (Temp) and Attachment ES-EAD-12 provide a summary of current and proposed rates that meets the criteria of subsection (e).

Finally, detailed rate class data is provided in Attachment ES-EAD-6 (Temp) and Attachment ES-EAD-15 in compliance with the requirements listed. The attachments provide the workpapers associated with the revenue proof detailed for each rate class’s distribution rates, both current and proposed rates, revenue and percentages.

**PUBLIC UTILITIES COMMISSION**

Public Service Company of New Hampshire  
Petition for Permanent Rates  
Docket No. DE 24-070

**Attestation**

I affirm, based on my personal knowledge, information and belief, that the cost and revenue statements and the supporting data submitted, which purport to reflect the books and records of the company, do in fact set forth the results shown by such books records and that all differences between the books and the test year data and any changes in the manner of recording an item on the utility's books during the test year, have been expressly noted.

A utility shall include with the "Filing Requirement Schedules" required by Puc 1604.06 each of the following:

- (1) "Computation of Revenue Deficiency"

**Response:**

The revenue deficiency computation is provided on Attachment ES-REVREQ-1, Schedule ES-REVREQ-1. In accordance with 1604.07(b), the schedule includes:

1. Rate base from "Attachment ES-REVREQ-1, Schedule ES-REVREQ-36;
2. Rate of return;
3. Income required;
4. Adjusted net operating income from Attachment ES-REVREQ-1, Schedule ES-REVREQ-3;
5. Income deficiency;
6. Tax effect by percentage; and
7. Revenue deficiency.

The schedule provides the above information for the unadjusted and adjusted test year periods, as well as the pro forma period.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.07(a)(2)**

A utility shall include with the "Filing Requirement Schedules" required by Puc 1604.06 each of the following:

- (2) "Schedule 1 - Operating Income Statement"

**Response:**

The Operating Income Statement for the test year is provided on Attachment ES-REVREQ-1, Schedule ES-REVREQ-5 for the test year and pro forma periods. Additionally, refer to 1604.07(a)(2) Attachment 1, which reflects this same information, as well as the prior two years as originally reflected in the Fourth Quarter FERC Form F-1 for each of 2021 and 2022. The combined sources meet the timeframe and content requirements for Puc 1604.07(c) and 1604.07(d).

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.07(a)(3)**

A utility shall include with the "Filing Requirement Schedules" required by Puc 1604.06 each of the following:

- (3) "Schedule 1 Att - Pro Forma Adj Income or expense"

**Response:**

The Income and Expense Adjustments are itemized on Attachment ES-REVREQ-1, Schedule ES-REVREQ-5, page 2. Further, the requirements below as per Puc 1604.07(h) are fully documented in each of the schedules supporting the proposed adjustments, as well as the joint testimony of Ashley N. Botelho and Yi-An Chen. The supporting schedules are provided as Attachment ES-REVREQ-1, Schedules ES-REVREQ-6 through 28.

1. The name of the account;
2. A detailed explanation of the adjustment and reasons for the adjustment;
3. A description of data and source data;
4. Comparable data and source for at least 2 preceding years, where applicable;
5. Calculation of adjustments including explanation and justification of methods used; and
6. The dollar amount of the adjustment.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.07(a)(4)**

A utility shall include with the "Filing Requirement Schedules" required by Puc 1604.06 each of the following:

(4) "Schedule 1A - Property Taxes"

**Response:**

For a schedule of property taxes please see Attachment ES-REVREQ-1, Schedule ES-REVREQ-31. In accordance with 1604.07(i) the schedules contain the following information for the test year and pro forma periods:

1. Municipality where taxes paid;
2. Period of taxation (test year and pro forma);
3. Amount paid;
4. Amount accrued;
5. Amount not applicable to utility operations;
6. Pro forma adjustments;
7. Pro forma property tax;
8. The tax rate; and
9. Whether a discount was available, the tax rate, and whether the utility used the discount.

*\*\*\*The Company reserves the right to supplement this information as further information is gathered and becomes available. All additional information will be provided to the parties to the docket in a timely manner.*

NOTE: Numbers may not add due to rounding

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.07(a)(12)**

A utility shall include with the "Filing Requirement Schedules" required by Puc 1604.06 each of the following:

(12) "Schedule 3 Attachment - Working Capital"

**Response:**

In accordance with Puc 1604.07(t) and 1604.07(u), Attachment ES-REVREQ-2, Schedule ES-REVREQ-1 through Schedule ES-REVREQ-12 provide detailed work papers associated with the lead lag study presented in this proceeding. Additionally, the joint testimony of Ashley N. Botelho and Yi-An Chen provides detailed discussion of the methodology utilized within the aforementioned schedules.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.07(a)(13)**

A utility shall include with the "Filing Requirement Schedules" required by Puc 1604.06 each of the following:

- (13) "Schedule 3 Attachment - Pro Forma Adjustment Rate Base"

**Response:**

Puc 1604.07(s) requires detailed calculations of any pro forma adjustments to rate base. The Company's filing reflects two pro forma adjustments to rate base: (1) an adjustment to working capital which is fully detailed in Attachment ES-REVREQ-2, Schedule ES-REVREQ-1 through Schedule ES-REVREQ-12; and (2) the addition to rate base for expected activity through December 31, 2024, including plant in service, accumulated depreciation, and accumulated deferred income taxes. The pro forma adjustment to rate base for working capital and expected plant activity through 2024 is discussed in the joint testimony of Ashley N. Botelho and Yi-An Chen.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.07(a)(14)**

A utility shall include with the "Filing Requirement Schedules" required by Puc 1604.06 each of the following:

(14) "Schedule 3 Attachment - Name of Account"

**Response:**

The Company's filing provides specific detail including account names for each of the underlying rate base items. The information required by Puc 1604.07(w) has been provided in Attachment ES-REVREQ-1, Schedule ES-REVREQ-36 through Schedule ES-REVREQ-39.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.08(a)**

Each utility filing for a change in the rate proposed to be charged for any service shall complete and provide the rate of return schedules, called “Rate of Return Information Required of All Electric, Gas, Telephone, Water and Sewer Utilities”, the specific requirements of which are set forth in (c) below.

**Response:**

Please see responses to 1604.08(c)(1) through 1604.08(c)(9).

**Rate Case Filing Requirements  
Pursuant to Puc 1604.08(c)(1)**

Schedule 1, "Overall Rate of Return", showing the component ratio, component cost rate, and weighted average cost rate of:

- a. Common and preferred stock;
- b. Long and short-term debt; and
- c. The total of a. and b.

**Response:**

Please see 1604.08(c)(1) Attachment 1.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.08(c)(6)**

Schedule 6, “Cost of Short-Term Debt”, showing the cost rate, outstanding amount and annual cost for:

- a. Bank loans;
- b. Loans from individuals;
- c. Commercial paper; and
- d. Weighted average cost.

**Response:**

The Company’s short-term debt is solely financed through its parent company. Eversource issues commercial paper and lends the net proceeds to the Eversource system companies to meet liquidity needs. Each Eversource subsidiary has an intercompany note payable and the Eversource parent company has a respective short-term intercompany note receivable.

The interest rate charged by the Eversource parent company to its system companies is the daily commercial paper rate that the Eversource parent company is charged. This rate is calculated daily and fluctuates daily.

The outstanding short-term debt amount at December 31, 2023 is \$232.9 million. The annual cost of short-term debt totaled \$7.9 million consisting of interest expense of \$7.7 million and revolver and commitment fees of \$266 thousand. The weighted-average cost of short-term debt is 5.63% for calendar year 2023.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.08(c)(7)**

Schedule 7, "Weighted Average Cost of Preferred Stock", showing, for each entry, the following:

- a. Item;
- b. Date sold;
- c. Financing costs;
- d. Net proceeds ratio;
- e. Outstanding amount;
- f. Cost rate based upon net proceeds;
- g. Annual cost;
- h. Total amount outstanding; and
- i. Weighted average cost rate.

**Response:**

There are no issues of preferred stock outstanding. The Company has no plans to issue preferred stock.

10 (1) Distribution Net Operating Income includes an after-tax pro forma adjustment of (\$16.6m) related to the approved poles purchase agreement between PSNH and Consolidated Communications Inc (CCI) finalized on May 1, 2023. The pre-tax amount is (\$21.6m).

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.08(c)(9)**

A “Report of Proposed Rate Changes”, including the following:

- a. Rate or class of service;
- b. Effect of proposed change showing increases, decreases and net changes in each rate classification separately, where applicable;
- c. Average number of customers;
- d. Annual revenue under present rates and under proposed rates;
- e. Proposed annual change in revenues by amount and by percentage;
- f. Proposed change in rates by amount and by percentage;
- g. Signature and title of signatory; and
- h. Title section showing the utility's name, date filed, tariff number, tariff page numbers and effective date.

**Response:**

Temporary Rates

Please see the report of proposed rate changes included in Attachment ES-EAD-4 (Temp) for items (a) through (e), (g) and (h). For item (f), the rates and percent change are included in Attachment ES-EAD-6 (Temp).

Permanent Rates

Please see the report of proposed rate changes included in Attachment ES-EAD-13 for items (a) through (e), (g) and (h). For item (f), the rates and percent change are included in Attachment ES-EAD-15.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.09(a)**

A utility shall provide an explanation with its proposed tariff of any change in the manner of recording accounting data on the utility's books during the test year.

**Response:**

There were no changes in the manner of recording accounting data on the Company's books during the test year. There were no accounting standards adopted by the Company during the year 2023.

**Rate Case Filing Requirements  
Pursuant to Puc 1604.09(b)**

As to the explanation of any adjustment in the manner of recording data as required by (a) above, a utility shall provide with its proposed tariff a justification for the change and an explanation of its financial impact.

**Response:**

Please see the response to 1604.09(a) which indicates that there were no changes in the manner of recording accounting data on the Company's books during the test year. There were no accounting standards adopted by the Company during the year 2023.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.09(c)**

A utility shall make adjustments in projections to reflect what the utility reasonably anticipates for the following:

- (1) All items of unusual magnitude which occurred during the test year, but which are not expected to recur beyond the test year; and
- (2) All items which are fixed, determinable, and likely to occur in the future, but which did not occur during the test year.

**Response:**

To identify the appropriate normalizing and post-test year adjustments to test year revenues or expenses, the Company first reviewed the test year activity to identify any cost or revenue elements that are non-recurring, out-of-period, or otherwise not appropriate to be reflected in the revenue requirement. Similarly, to the extent that the test year excludes certain known and measurable cost or revenue changes that will be incurred on a continuing basis, those elements are appropriate for inclusion in the revenue requirement. Where the Company has identified such elements, it has reflected the elements as normalizing adjustments to the cost of service in this filing to establish a “normalized” revenue requirement from which to make pro-forma or post-test year adjustments.

To remove out-of-period or non-recurring items from the test year level of expense activity, the Company performed a detailed review of account activity to normalize out-of-period or non-recurring activity. As a supplement to this review, the Company’s Accounting Department identified any accounting entries that were recorded on PSNH’s books that were “out-of-period,” meaning the entries were booked during the test year but are related to a different time period. In addition, the Company’s Accounting Department identified entries that were recorded outside of the 12-month test year but that should have been recorded within the test year. This exercise has resulted in the Company’s proposal for an adjusted test year that is reflected in the various schedules of Attachment ES-REVREQ-1 and has been summarized on Attachment ES-REVREQ-1, Schedule ES-REVREQ-5, page 5.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1604.09(d)**

A utility shall describe in detail and justify all aspects of any adjustment and shall complete a "Schedule 1 Attachment-Pro Forma Adjustment Income or Expense" appropriate to the particular utility area as required by Puc 1604.07(a)(3).

**Response:**

The Income and Expense Adjustments are itemized on Attachment ES-REVREQ-1, Schedule ES-REVREQ-5, page 2. Further, the pro forma adjustments are fully documented in Attachment ES-REVREQ-1, Schedules ES-REVREQ-6 through 28 and described in the joint testimony of Ashley N. Botelho and Yi-An Chen.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1905.01(a)(1)**

Consistent with the utility's duty to keep the commission informed pursuant to RSA 374:4, at the time a utility files the materials required for a full rate case pursuant to Puc 1604, and every 90 days thereafter during the pendency of the rate case, the utility shall also file with the commission:

- (1) A detailed description of rate case expenses actually incurred as of the date of the filing and projected total rate case expenses that include:
  - a. The name of the service provider;
  - b. The procurement process;
  - c. The amount of the expense; and
  - d. A description of the charge or service rendered.

**Response:**

Please see 1905.01(a)(1) Attachment 1 for the requested information. Additionally, the Company has provided a description of the procurement process it used to obtain the outside service providers it is utilizing in this proceeding in the joint testimony of Ashley N. Botelho and Yi-An Chen.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1905.01(a)(2)**

Consistent with the utility's duty to keep the commission informed pursuant to RSA 374:4, at the time a utility files the materials required for a full rate case pursuant to Puc 1604, and every 90 days thereafter during the pendency of the rate case, the utility shall also file with the commission:

- (2) a list of all services to be rendered on behalf of the utility by an vendor

**Response:**

Keegan Werlin LLP provides legal services and rate case support for the Company necessary to cover a surge event such as a rate case. Eversource only maintains sufficient legal staff to cover the average PSNH and Aquarion regulatory legal workloads and those staff are kept at capacity with those workloads.

Regulatory Finance Associates performed the cost of capital study. Kolesar Buchanan & Associates, LLC is supporting the performance based ratemaking plan and cost benchmarking testimony.

Gannett Flemming, Inc. performed the depreciation study and drafted testimony and supporting schedules. Gannett Fleming will act as an expert witness and provide support during the discovery process of the proceeding.

CRA International performed the marginal cost study and allocated cost of service study.

Please note, for services including postage and delivery, and staff and OCA consultants, the vendors are to be determined at this time.

Please see 1905.01(a)(1) Attachment 1 for additional information.

**Rate Case Filing Requirements**  
**Pursuant to Puc 1905.01(a)(3)**

Consistent with the utility's duty to keep the commission informed pursuant to RSA 374:4, at the time a utility files the materials required for a full rate case pursuant to Puc 1604, and every 90 days thereafter during the pendency of the rate case, the utility shall also file with the commission:

(3) the total estimated costs of each service.

**Response:**

Please see 1905.01(a)(1) Attachment 1 for the requested information.
