Re: Pittsfield Aqueduct Company, Inc.

Dear Ms. Cleveland:

Attached is the 2008 NHPUC Annual Report for Pittsfield Aqueduct Company, Inc., and the 2008 Unaccounted Water Report. Additionally, attached are supplemental financials for North Country and Pittsfield.

Overall, the operating and maintenance expenses decreased 2.64% from the prior year due to reduced management fees, maintenance of mains expenses, maintenance of service expenses and laboratory expenses partially offset by increased purchased water and fuel costs. The following are explanations for expense variances of 10% increases or more from calendar year 2007 to calendar year 2008:

Account 6602: Purchased Water increased by 1920.59% or \$25,352 due to the completion of the Birch Hill interconnection with North Conway Water Precinct (NCWP) in February 2008. The Company did not purchase any water from the NCWP in 2007 as the source of supply for Birch Hill in 2007 was on site wells.

Account 6610: Maintenance Supervision and Engineering increased by 37.88% or \$12,609 due to increased supervisory costs with a corresponding offset/decrease in administrative and general expenses (account 6930).

Account 6624: Pumping Labor and Expenses increased by 18.07% or \$4,228 due to increased labor costs at the Pittsfield water treatment plant.

Account 6626: Miscellaneous Expenses increased by 39.28% or \$3,262 primarily due to increased fuel costs and other operating costs associated with the Pittsfield water treatment plant.

Account 6641: Chemicals increased by 16.67% or \$1,197 primarily due to increased North Country chemical costs.

Account 6652: Maintenance of Water Treatment Equipment increased by 82.06% or \$620 due to increased software maintenance on the SCADA system.

Account 6660: Operations Supervision and Engineering increased by 40.71% or \$8,852 primarily due to increased supervisory costs with a corresponding offset/decrease in administrative and general expenses (account 6930).

Account 6662: Transmission and Distribution Expenses increased by 82.06% or \$620 due to increased general maintenance on transmission and distribution assets.

Account 6665: Miscellaneous Expenses increased by 1706.73% or \$21,811 primarily due to increased fuel costs.

Account 6676: Maintenance of Meters increased by 44.84% or \$1,419 due to increased costs associated with meter maintenance in Pittsfield.

Account 6904: Uncollectible Accounts increased by 86.80% or \$3,242 due to increased customer write off activity.

Account 6928: Regulatory Commission Expense increased by 30.73% or \$465 due to increased regulatory assessment.

Account 6950: Maintenance of General Plant increased by 1368.59% or \$2,316 due to increased computer equipment maintenance fees.

If you should have any questions or comments, please do not hesitate to call me.

Sincerely,

Charles T. Hoepper

** For each amount comprising the reported balance and changes in Account 104, Utility Plant Purchased or Sold, state the property purchased or sold, name of vendor or purchaser, and date of transaction.

Note B: Completed Construction Not Classified, Account 106, shall be classified in this schedule according to prescribed accounts, on an estimated basis if necessary, and the entries included in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (c). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, a tentative distribution of such retirements, on an estimated basis with appropriate contra entry to the account for accumulated depreciation provision, shall be included in column (d). Include also in column (d) reversals of tentative distributions of prior year of unclassified retirements. Attach an insert page showing the account distributions of these tentative classifications in columns (c) and (d) including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the tests of Accounts 101 and 106 will avoid serious omissions of the reported amount in respondent's plant actually in service at end of year. In the space below, describe briefly each major adjustment or transfer included in columns (e) and (f) above.

(See schedule A-13 Important Changes During the Year, for important new territory added and important rate increases or decreases.)

Notes:

(1) Fire and meter counts are based on services that have been active for billing purposes at one time and not abandoned. Customer counts do not match the number of meters and fire services since an account could be both metered and have fire services. Additionally, the number of hydrants may only represent a few accounts.

Notes:

- (2) This information was not available when we acquired the systems. As the Company replaces failed well pumps over time ti will gather well depth data.
- (3) Safe Yields are based on pump tests run on these wells during 2006. No historical information was provided by the former owner on these wells.
- (4) All the Birch Hill wells were taken off line by the end of September 2008. The supply from the wells has been replaced with purchased water from the North Conway Water Precinct.
