

**PUC Docket No. DE 10-261  
TransCanada Responses to  
PSNH Data Requests**

<b>ORIGINAL</b>	
N.H.P.U.C. Case No.	DE 10-261
Exhibit No.	PSNH-15
Witness	M. Hachey
DO NOT REMOVE FROM FILE	

**Date of Request:** August 15, 2011

**Date of Response:** August 29, 2011

**Q-PSNH-27** Referencing from page 11, line 241 to page 13, line 285, do you agree that without Newington Station, all other things being equal, the regional supply curve in the FCM would be shorter, the surplus will be lower, and the clearing prices would be higher? If not, please explain why not.

**Witness:** Michael E. Hachey

**Response:** No. Other market participants may elect to enter, remain in, and/or qualify for the capacity market if Newington exits. Further, Mr. Hachey cannot predict the bidding behavior of market participants in the event of a Newington exit.
