

Witness: David A. Errichetti  
Request from: New Hampshire Public Utilities Commission Staff

**Question:**

Provide the days in which Newington Station ran for economic reasons in 2010. Indicate whether all energy generated on such days was the result of economic dispatch .

**Response:**

As discussed in previous data request responses , e.g. OCA-03-003 and STAFF-03-002, ISO-NE does not regularly inform PSNH why its resources are being dispatched . PSNH has reviewed 2010 Newington empirical data and judged whether operation was for economics or for non-economic reasons. The attached table lists the days PSNH concluded operations were for economics and notes on which days some or all of the generation was self-scheduled.
