Utility Revenue Recognition – Regulated utility revenues are based on rates and charges approved by federal and state regulatory commissions. Revenues related to the sale of electric and gas service are recorded when service is rendered or energy is delivered to customers. However, the determination of energy sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts – The Company recognizes a provision for doubtful accounts each month based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior years. At the end of each month, an analysis of the delinquent receivables is performed which takes into account an assumption about the cash recovery of delinquent receivables. The analysis also calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company's distribution utilities are authorized by regulators to recover the costs of their energy commodity portion of bad debts through rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis, including expected fuel assistance payments from governmental authorities and the level of customers enrolling in payment plans with the Company. It has been the Company's experience that the assumptions it has used in evaluating the adequacy of the Allowance for Doubtful Accounts have proven to be reasonably accurate.

Retirement Benefit Obligations – The Company sponsors the Unitil Corporation Retirement Plan (Pension Plan), which is a defined benefit pension plan covering substantially all of its employees. The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (SERP), covering certain executives of the Company and an employee 401(k) savings plan. Additionally, the Company sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan), primarily to provide health care and life insurance benefits to retired employees.

The Company records on its balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas rates.

The Company's reported costs of providing retirement benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. The Company's RBO are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future costs.

The Company's RBO may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the Company's RBO. If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's financial statements. The discount rate assumptions used in determining retirement plan costs and retirement plan obligations are based on a market average of long-term bonds that receive one of the two highest ratings given by a recognized rating agency. For the years ended December 31, 2009 and 2008, a change in the discount rate of 0.25% would have resulted in an increase or decrease of approximately $300,000 and $200,000, respectively, in the Net Periodic Benefit Cost for the Pension Plan. For the years ended December 31, 2009 and 2008, a 1.0% increase in the assumption of health care cost trend rates would have resulted in increases in the Net Periodic Benefit Cost for the PBOP Plan of $735,000 and $675,000, respectively. Similarly, a 1.0% decrease in the assumption of health care cost trend rates for those same time periods would have resulted in decreases in the Net Periodic Benefit Cost for the PBOP Plan of $576,000 and $531,000, respectively. See Note 8 to the accompanying Consolidated Financial Statements.

Income Taxes – Provisions for income taxes are calculated in each of the jurisdictions in which the Company operates for each period for which a statement of earnings is presented. This process involves estimating the Company's current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deductions of expenses and recognition of taxable income for tax and book accounting purposes.

Table of Contents

These temporary differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets.

Depreciation – Depreciation expense is calculated on a group straight-line basis based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company's fixed assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements.

Commitments and Contingencies – The Company's accounting policy is to record and/or disclose commitments and contingencies in accordance with the FASB Codification as it applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. As of March 31, 2010, the Company is not aware of any material commitments or contingencies other than those disclosed in the Commitments and Contingencies footnote to the Company's consolidated financial statements below.

Refer to "Recently Issued Accounting Pronouncements in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

As of March 31, 2010, the Company and its subsidiaries had 433 employees. The Company considers its relationship with employees to be good and has not experienced any major labor disruptions.

As of March 31, 2010, 149 of the Company's employees were represented by labor unions. These employees are covered by collective bargaining agreements. Two agreements expire on May 31, 2010, one agreement expires on June 5, 2010 and one agreement expires on March 31, 2012. The agreements provide discreet salary adjustments, established work practices and uniform benefit packages. The Company expects to successfully negotiate new agreements prior to their expiration dates.

INTEREST RATE RISK

As discussed above, Unitil meets its external financing needs by issuing short-term and long-term debt. The majority of debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new issuances of long-term debt securities. In addition, short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease interest expense in future periods. For example, if the average amount of short-term debt outstanding was $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000. The average interest rates on the Company's short-term borrowings for the three months ended March 31, 2010 and March 31, 2009 were 2.26% and 4.78%, respectively.

MARKET RISK

Although Unitil's three distribution utilities are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

UNITIL CORPORATION AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations – Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (Unitil Energy), Fitchburg Gas and Electric Light Company (Fitchburg), Northern Utilities, Inc. (Northern Utilities), Granite State Gas Transmission, Inc. (Granite State), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

On December 1, 2008, the Company purchased: (i) all of the outstanding capital stock of Northern Utilities, a natural gas distribution utility serving customers in Maine and New Hampshire, from Bay State Gas Company (Bay State) and (ii) all of the outstanding capital stock of Granite State, an interstate gas transmission pipeline company primarily serving the needs of Northern Utilities, from NiSource, Inc. (NiSource) pursuant to the Stock Purchase agreement dated as of February 15, 2008 by and among NiSource, Bay State, and Unitil (the "Acquisitions"). The final purchase price allocation is disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2009 as filed with the Securities and Exchange Commission on February 10, 2010.

Unitil's principal business is the local distribution of electricity in the southeastern seacoast and state capital regions of New Hampshire and the greater Fitchburg area of north central Massachusetts and the local distribution of natural gas in southeastern New Hampshire, portions of southern and central Maine and in the greater Fitchburg area of north central Massachusetts. Unitil has three distribution utility subsidiaries, Unitil Energy, which operates in New Hampshire, Fitchburg, which operates in Massachusetts and Northern Utilities, which operates in New Hampshire and Maine (collectively referred to as the distribution utilities).

Granite State is a natural gas transportation pipeline, operating 87 miles of underground gas transmission pipeline primarily located in Maine, New Hampshire and Massachusetts. Granite State provides Northern Utilities with interconnection to three major natural gas pipelines and access to domestic natural gas supplies in the south and Canadian natural gas supplies in the north. Granite State derives its revenues principally from the transportation services provided to Northern Utilities and, to a lesser extent, third –party marketers.

A fifth utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for Unitil Energy. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of Unitil Energy on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve Unitil Energy's customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service; Unitil Realty; and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology, energy management and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-regulated subsidiary. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three months ended March 31, 2010 are not necessarily indicative of results to be expected for the year ending December 31, 2010. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of

Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2009, as filed with the Securities and Exchange Commission (SEC) on February 10, 2010, for a description of the Company's Basis of Presentation.

As a result of the issuance of new common shares, discussed below, consolidated results for the Company in the current period may not be directly comparable to prior period results until such time as the stock issuance is fully reflected in both reporting periods. Also, the Company's results are expected to reflect the seasonal nature of the acquired natural gas businesses. Accordingly, the Company expects that results of operations will be positively affected during the first and fourth quarters, when sales of natural gas are typically higher, and negatively affected during the second and third quarters, when gas operating and maintenance expenses usually exceed sales margins in the period.

Accounting Codification–In June 2009, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 168, "The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles", (SFAS No. 168). SFAS No. 168 was effective for financial statements for interim and annual periods ending after September 15, 2009. The Company has adopted SFAS No. 168 and therefore all references by the Company to authoritative accounting principles recognized by the FASB reflect the FASB Codification.

Derivatives – The Company has a regulatory approved hedging program for Northern Utilities designed to fix a portion of its gas supply costs for the coming year of service. In order to fix these costs, the Company purchases natural gas futures contracts on the New York Mercantile Exchange (NYMEX) that correspond to the associated delivery month. Any gains or losses on the fair value of these derivatives are passed through to ratepayers directly through a regulatory commission approved recovery mechanism. The fair value of these derivatives is determined using Level 2 inputs (valuations based on quoted prices available in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are directly observable, and inputs derived principally from market data), specifically based on the NYMEX closing prices for outstanding contracts as of the balance sheet date. As a result of the ratemaking process, the Company records gains and losses as regulatory liabilities or assets, recognizes such gains or losses in Purchased Gas and these gains and losses are passed through to customers through rate reconciling mechanisms.

As of March 31, 2010 and December 31, 2009, the Company had 1.2 billion and 1.9 billion cubic feet (BCF), respectively, outstanding in natural gas purchase contracts under its hedging program. The following table provides information on the hedging instruments.

Natural Gas Futures Contracts ($millions)

	As of March 31, 2010		As of December 31, 2009	
Balance Sheet Location	Current and Noncurrent	Liabilities	Current and Noncurrent	Liabilities
Fair Value	$	1.9	$	2.3
Amount of Gain (Loss) Recognized in Regulatory Asset / Liability for Derivatives (1)	$	(3.1)	$	(2.9)

For the Three Months Ended March 31, 2010

Location of Gain (Loss) Reclassified from Regulatory Asset / Liability into Consolidated Statement of Earnings	Purchased Gas	
Amount of Gain (Loss) Reclassified from Regulatory Asset / Liability into Consolidated Statement of Earnings	$	(2.3)

(1) Includes approximately $1.2 million of loss on contracts designated for April 2010 that were physically sold in March 2010 and the impact on the Consolidated Balance Sheet has been deferred until April 2010 when the natural gas is used.

Subsequent Events – On April 15, 2010 Unitil Energy filed a proposed base rate increase of $10.1 million which represents an increase of 6.5 percent above present rates. Unitil Energy requested temporary rates to be effective July 1, 2010. In addition, Unitil Energy requested adjustments for a Rate Year Step Adjustment, a Large Capital Project Step Adjustment and a long-term rate plan establishing step adjustments associated with the Company's Reliability Enhancement Plan and Vegetation Management Plan. A decision from the NHPUC on Unitil Energy's rate increase request may take up to one year.

The Company has evaluated all events or transactions through the date of this filing. During this period, the Company did not have any material subsequent events that impacted its consolidated financial statements.

Reclassifications – Based on the Company's analysis certain amounts previously reported have been reclassified to improve the financial statements' presentation and to conform to current year presentation.

Recently Issued Pronouncements – There are no recently issued pronouncements that the Company has not already adopted.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount
03/25/10	05/14/10	04/30/10	$ 0.345
01/14/10	02/16/10	02/02/10	$ 0.345

06/18/09	08/14/09	07/31/09	$ 0.345
03/26/09	05/15/09	05/01/09	$ 0.345
01/15/09	02/16/09	02/02/09	$ 0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

Common Stock

The Company's common stock trades under the symbol, "UTL".

On September 10, 2008, the Company's shareholders, at a Special Meeting of Shareholders, approved an increase in the authorized shares of the Company's common stock. Shareholders approved an amendment to the Company's Articles of Incorporation to increase the authorized number of shares of the Company's common stock, from 8,000,000 shares to 16,000,000 shares in the aggregate. The Company had 10,859,442, 8,105,540 and 10,836,759 of common shares outstanding at March 31, 2010, March 31, 2009 and December 31, 2009, respectively.

Unitil Corporation Common Stock Offering – Between December 2008 and June 2009, the Company sold 4,970,000 shares of its common stock at a price of $20.00 per share in registered public offerings. The Company used the net proceeds of $93.1 million from these offerings primarily to complete the acquisition of Northern Utilities and Granite State. Please see Note 3 to the Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2009 as filed with the SEC on February 10, 2010 for additional information.

Dividend Reinvestment and Stock Purchase Plan – During the first quarter of 2010, the Company sold 10,328 shares of its Common Stock, at an average price of $21.78 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $225,000 were used to reduce short-term borrowings.

During the first quarter of 2009, the Company sold 11,663 shares of its Common Stock, at an average price of $20.29 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $237,000 were used to reduce short-term borrowings.

Restricted Stock Plan – The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 5, 2010, 12,520 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $262,920. There were 42,000 and 49,053 non-vested shares under the Plan as of March 31, 2010 and 2009, respectively. The weighted average grant date fair value of these shares was $22.13 and $23.06, respectively. The compensation expense associated with the issuance of shares under the Plan is being recognized over the vesting period and was $0.1 million and $0.1 million for the three months ended March 31, 2010 and 2009, respectively. At March 31, 2010, there was approximately $1.1 million of total unrecognized compensation cost under the Plan which is expected to be recognized over approximately 2.9 years. There were 165 restricted shares forfeited under the Plan during the three months ended March 31, 2010. There were no cancellations under the Plan during the three months ended March 31, 2010.

Total Long-Term Debt	**289.1**	249.6	249.3
Less: Current Portion	**0.4**	0.4	0.4
Total Long-term Debt, Less Current Portion	**$ 288.7**	$ 249.2	$ 248.9

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at March 31, 2010 is estimated to be approximately $310 million, before considering any costs, including prepayment costs, to market the Company's debt. Currently, the Company believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

On March 2, 2010, UES completed the sale of $15 million of First Mortgage Bonds through a private placement to institutional investors. The First Mortgage Bonds have a maturity of ten years and a coupon rate of 5.24%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

On March 2, 2010, Northern Utilities completed the sale of $25 million of Senior Unsecured Notes through a private placement to institutional investors. The Senior Unsecured Notes have a maturity of ten years and a coupon rate of 5.29%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

Credit Arrangements

At March 31, 2010, the Company had $19.3 million in short-term debt outstanding through bank borrowings under its revolving credit facility. The revolving credit facility contains customary terms and conditions for credit facilities of this type, including, without limitation, covenants restricting the Company's ability to incur liens, merge or consolidate with another entity or change its line of business. The revolving credit agreement also contains a covenant restricting the Company's ability to permit long-term debt to exceed 65% of capitalization at the end of each fiscal quarter. As of March 31, 2010, the Company was in compliance with the financial covenants contained in the revolving credit agreement.

On October 13, 2009, the Company entered into an amendment to its 364-day revolving credit facility with Bank of America, as administrative agent, and a syndicate of lenders. The Company originally entered into the facility on November 26, 2008. The amendment increases the maximum borrowings under the facility from $60 million to $80 million.

Northern enters into asset management agreements under which Northern releases certain natural gas pipeline and storage assets, resells the natural gas storage inventory to an asset manager and subsequently repurchases the inventory over the course of the natural gas heating season at the same price at which it sold the natural gas inventory to the asset manager. There was $6.2 million and $5.0 million outstanding at March 31, 2010 and March 31, 2009, respectively, related to these asset management agreements.

Guarantees

The Company also provides limited guarantees on certain energy and natural gas storage management contracts entered into by the three distribution utilities. The Company's policy is to limit these guarantees to two years or less. As of March 31, 2010 there are $39.2 million of guarantees outstanding and the longest of these guarantees extends through December 31, 2010. Of this amount, $12.0 million is related to Unitil's guarantee of payment for the term of the Northern Utilities' gas storage Agreement discussed above.

The Company also guarantees the payment of principal, interest and other amounts payable on the notes issued by Unitil Realty and Granite State. As of March 31, 2010, the principal amount outstanding for the 8% Unitil Realty notes was $4.1 million. On December 15, 2008, the Company entered into a guarantee for the payment of principal, interest and other amounts payable on the $10 million Granite State notes due 2018. As of March 31, 2010, the principal amount outstanding for the 7.15% Granite State notes was $10.0 million. This guarantee will terminate if Granite State reorganizes and merges with and into Northern Utilities.

Capital Expenditures	13.3	4.6	0.1	—	18.0

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 7 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2009 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 10, 2010.

Legal Proceedings

A putative class action Complaint was filed against Fitchburg on January 7, 2009 in Worcester Superior Court in Worcester, Massachusetts, captioned Bellerman v. Fitchburg Gas and Electric Light Company. On April 1, 2009 an Amended Complaint was filed in Worcester Superior Court and served on Fitchburg. The Amended Complaint seeks an unspecified amount of damages including the cost of temporary housing and alternative fuel sources, emotional and physical pain and suffering and property damages allegedly incurred by customers in connection with the loss of electric service during the ice storm in Fitchburg's service territory in December, 2008. The Amended Complaint includes M.G.L. ch. 93A claims for purported unfair and deceptive trade practices related to the December 2008 Storm. On September 4, 2009, the Superior Court issued its order on the Company's Motion to Dismiss the Complaint, granting it in part and denying it in part. The Company anticipates that the court will decide whether the lawsuit is appropriate for class action treatment in the fall of 2010. The Company continues to believe the suit is without merit, and will defend itself vigorously.

Regulatory Matters

Unitil Energy Rate Case Filing – On April 15, 2010 Unitil Energy filed a proposed base rate increase of $10.1 million which represents an increase of 6.5 percent above present rates. Unitil Energy requested temporary rates to be effective July 1, 2010. In addition, Unitil Energy requested adjustments for a Rate Year Step Adjustment, a Large Capital Project Step Adjustment and a long-term rate plan establishing step adjustments associated with the Company's Reliability Enhancement Plan and Vegetation Management Plan. A decision from the NHPUC on Unitil Energy's rate increase request may take up to one year.

Major Ice Storm – On December 11 and 12, 2008, a severe ice storm (December 2008 Ice Storm) struck the New England region. The Company spent approximately $23 million for the repair and replacement of electric distribution systems damaged during the storm, including $8.3 million related to capital construction and $15.0 million, including carrying charges, which has been deferred as a regulatory asset, based on orders issued by the MDPU and NHPUC, discussed below. Also, the Company expensed $3.0 million for professional fees related to the ice storm, in addition to normal anticipated expenditures related to emergency storm preparedness. The Company does not believe these storm restoration expenditures and the timing of cost recovery will have a material adverse impact on the Company's financial condition or results of operations. However, if it were ultimately determined that certain of these costs were not recoverable in rates, and/or the Company were required to incur additional costs to defend itself, there may be a significant impact on the Company's results of operations in future periods.

The MDPU conducted an investigation of Fitchburg's preparation for and response to the December 2008 Ice Storm during the first half of 2009. On November 2, 2009, the MDPU issued its order with respect to its investigation, finding that Fitchburg's preparation for, and response to, the December 2008 Ice Storm constituted a failure of the Company to meet its public service obligation to provide safe and reliable service. As a result, the MDPU ordered a comprehensive independent management audit of Fitchburg's management practices, and also directed Fitchburg to implement a series of operational and capital improvements which had been identified and recommended through the Company's self-assessment review. On April 20, 2010 the Company issued Requests for Proposals to perform the independent management audit in accordance with the schedule set by the MDPU. Finally, the MDPU noted that the costs incurred by Fitchburg for the December 2008 Ice Storm would be subject to review in Fitchburg's next electric rate case, along with Fitchburg's rate of return.

On July 28, 2009, Fitchburg filed with the MDPU a petition for approval to defer and record as a regulatory asset approximately $11.5 million of costs associated with the repair of its electric distribution system from damage caused by the December 2008 Ice Storm for future recovery in rates. On December 30, 2009, the MDPU approved the request. The order of approval made no findings as to whether the subject expenses were reasonable or whether they can be recovered from ratepayers, and that the MDPU will consider the subsequent ratemaking treatment of the expense as part of Fitchburg's next rate case. As of March 31, 2010, March 31, 2009 and December 31, 2009, Fitchburg has deferred approximately $12.6 million, $0.4 million and $12.3 million of costs, respectively, including carrying charges, associated with the repair of its electric distribution system for future recovery in rates.

On August 26, 2009, Unitil Energy filed a petition with the NHPUC requesting an accounting order authorizing Unitil Energy to record as a regulatory asset approximately $2 million in expenses associated with network damage from the December 2008 Ice Storm until such time as the Commission issues a final order in Unitil Energy's next base rate case. On November 9, 2009, the NHPUC granted the requested accounting order, clarifying that such issues as the appropriate amount of the storm related expenses to be recovered, the timing and manner of recovery, and what, if any, return should be applied to the unrecovered balance are issues that will be deferred to Unitil Energy's next rate case. As of March 31, 2010, March 31, 2009 and December 31, 2009, Unitil Energy has deferred approximately $2.4 million, $0.2 million and $2.3 million of costs, respectively, including carrying charges, associated with the repair of its electric distribution system for future recovery in rates.

On December 3, 2009, the NHPUC issued its final report regarding its review of the December 2008 Ice Storm. The report stated that the NHPUC will commence an adjudicative proceeding to examine the reasonableness of Unitil's response to the December 2008 Ice Storm. On January 8, 2010, the NHPUC opened a docket to consider Unitil Energy's response to the December 2008 Ice Storm, including the timing of its response, its restoration priorities and strategies and the procurement and allocation of its resources in New Hampshire and Massachusetts. This matter remains pending.

Fitchburg – Electric Division – On November 25, 2009, Fitchburg submitted its annual reconciliation of costs and revenues for Transition and Transmission under its restructuring plan (the Annual Reconciliation Filing). In addition, the Standard Offer Service and Default Service Costs incurred during the seven year Standard Offer Service period that ended February 28, 2005 have been combined and recovery is proposed through a Transition Charge Surcharge of $0.00400 per kWh. Changes to the Pension/PBOP Adjustment and Residential Assistance Adjustment Factor were proposed in other proceedings. The rates were approved effective January 1, 2010, subject to reconciliation pending investigation by the MDPU. This matter remains pending. A final order approving Fitchburg's 2008 Annual Reconciliation Filing was issued on April 12, 2010.

On November 12, 2009, the Governor of Massachusetts signed House Bill 4329. The bill (i) requires the MDPU to establish regulations for utilities to respond to emergencies, (ii) requires utilities to file with the MDPU annual emergency response plans, (iii) authorizes the MDPU to impose penalties for a utility's failure to comply with the MDPU's regulations, and (iv) allows the chair of the MDPU to issue operational and management directives during an emergency. The bill also authorizes the Massachusetts Attorney General to bring a court action for receivership of a small investor-owned utility where an emergency exists and the utility has materially violated the MDPU's standards for responding to emergencies. On February 2, 2010, the MDPU issued an order adopting the items required by House Bill 4329.

Fitchburg – Gas Operations – On November 2, 2009 the MDPU issued an order finding that Fitchburg engaged in certain price stabilization practices for the 2007 / 2008 and 2008 / 2009 heating seasons without the MDPU's prior approval and that Fitchburg's gas purchasing practices were imprudent. As a result, the MDPU required Fitchburg to refund $4.6 million of natural gas costs, plus an appropriate carrying charge based on the prime lending rate, to its gas customers. The Company recorded a pre-tax charge of $4.9 million in the fourth quarter of 2009 based on the MDPU's order. On November 30, 2009, the MDPU approved Fitchburg's proposal to amortize its refund of natural gas costs to customers over a five-year period. Fitchburg has appealed the gas procurement Order to the Massachusetts Supreme Judicial Court. Fitchburg believes that its gas-procurement practices were consistent with those of other Massachusetts natural gas distribution companies and all relevant MDPU rules and orders and Massachusetts law. This appeal remains pending before the Massachusetts Supreme Judicial Court. Immediately after the MDPU opened its investigation of this matter in March 2009, Fitchburg ceased making the gas procurement purchases in question and filed a request with the MDPU for approval of a gas procurement plan for future gas purchases. This matter remains pending before the MDPU.

During the summer of 2009, Fitchburg operated its gas system entirely on local production from LNG for approximately three months due to construction on the lateral from Tennessee Gas Pipeline, which is the sole source of pipeline gas to Fitchburg. During this time Fitchburg provided gas LNG supply to all firm sales customers and also to the retail marketers for delivery to firm customers who have contracted for third party supply. Fitchburg's management of this project was reviewed by the MDPU during its last Integrated Resource Plan proceeding, before the shutdown occurred. In its order, the MDPU stated it would investigate the costs associated with the shutdown in Fitchburg's March 2010 Cost of Gas Adjustment Clause filing when its actual costs will be reconciled with its projected costs.

Fitchburg – Other – On June 22, 2007, the MDPU opened an inquiry into revenue decoupling for gas and electric distribution utilities, generally defined as a ratemaking mechanism designed to eliminate or reduce the dependence of a utility's distribution revenues on sales. Revenue decoupling is intended to remove the disincentive a utility has to promote efforts to reduce energy consumption by its customers or to facilitate installation of distributed generation to displace electricity delivered by the utility. On July 16, 2008, the MDPU issued an order establishing a comprehensive plan for decoupling to be adopted by gas and electric distribution utilities on a going-forward basis, including company-specific rate cases. Lost base revenue recovery associated with incremental energy efficiency savings will be allowed through 2012 consistent with the MDPU's expectation that, with limited exceptions, distribution companies will be operating under decoupling plans by year-end 2012.

On February 11, 2009, the MA Supreme Judicial Court (SJC) issued its decision in the Attorney General's (AG) appeal of the MDPU orders relating to Fitchburg's recovery of bad debt expense. The SJC agreed with the AG that the MDPU was required to hold hearings regarding changes in Fitchburg's tariff and rates, and on that basis vacated the MDPU orders. The Court, however, declined to rule on an appropriate remedy, and remanded the cases back to the MDPU for consideration of that issue. This matter remains pending before the MDPU.

On July 2, 2008, the Governor of Massachusetts signed into law "The Green Communities Act" (the GC Act), an energy policy statute designed to substantially increase energy efficiency and the development of renewable energy resources in Massachusetts. The GC Act provides for utilities to recover in rates the incremental costs associated with its various mandated programs. Several regulatory proceedings have been initiated to implement various provisions of the GC Act, including provisions for each distribution company to file enhanced three year energy efficiency investment plans, plans to establish smart grid pilot programs, proposals to purchase long-term contracts for renewable energy, and special tariffs to allow the net metering of customer-owned renewable generation. Three year energy efficiency investment plans, plans to establish smart grid pilot programs, and net metering tariffs have been approved by the MDPU. Proposals to purchase long-term contracts for renewable energy are under review in a separately designated docket.

Unitil Energy – Other – In July 2008, the State of New Hampshire enacted legislation that allows electric utilities to make investments in distributed energy resources, including energy efficiency and demand reduction technologies, as well as clean cogeneration and renewable generation. On August 5, 2009 Unitil Energy filed a plan for approval of investment in and rate recovery for Distributed Energy Resources. This matter remains pending before the NHPUC.

On February 25, 2010, a significant wind storm struck portions of the New England region, causing extensive damage to electric facilities and loss of service to significant numbers of customers of several utilities. An estimated one million electric customers in the region were affected, including approximately 85% of the Company's customers. Unitil Energy was able to restore power to 96% percent of its customers by day three, and its final customers, including those with individual service problems, were restored by day four. As a result of this storm, the Company estimates that it has spent approximately $9.0 million for the repair and replacement of electric distribution systems damaged during the storm. Unitil Energy, in its base rate case filing discussed above, has requested recovery in rates for the costs associated with the emergency repair of its electric distribution system for damage caused by this storm. The amount and timing of the cost recovery of these storm restoration expenditures will be determined in the base rate case proceeding. The Company does not believe these storm restoration expenditures and the timing of cost recovery will have a material adverse impact on the Company's financial condition or results of operations. However, if it were ultimately determined that certain of these costs were not recoverable in rates, and/or the Company were required to incur additional costs to defend itself, there may be a significant impact on the Company's results of operations in future periods.

Northern Utilities – On November 21, 2008, the MPUC issued an order approving a settlement agreement resolving a number of Notices of Probable Violation ("NOPVs") of certain safety related procedures and rules by Northern Utilities. Under the Settlement, Northern Utilities will incur total expenditures of approximately $3.8 million for safety related improvements to Northern's distribution system to ensure compliance with the relevant state and federal gas safety laws, for which no rate recovery will be allowed. These compliance costs were accrued by Northern Utilities prior to the acquisition date and the remaining amount on the Company's balance sheet at March 31, 2010 was $2.3 million.

On June 27, 2008 the MPUC opened an investigation of Northern Utilities' cast iron pipe replacement activities and the benefits of an accelerated replacement program for cast iron distribution pipe remaining in the Portland and Westbrook service areas. Northern Utilities has filed a proposed accelerated replacement program for the MPUC's consideration. A final decision on this matter is expected by year-end.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 7 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2009 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 10, 2010.

The Company's past and present operations include activities that are generally subject to extensive and complex federal and state environmental laws and regulations. The Company believes it is in compliance with applicable environmental and safety laws and regulations, and the Company believes that as of March 31, 2010, there were no material losses reasonably likely to be incurred in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Included on the Company's Consolidated Balance Sheet at March 31, 2010, March 31, 2009 and December 31, 2009 are non-current accrued liabilities totaling $12.0 million, $10.8 million and $12.0 million, respectively, related to estimated future clean up costs for permanent remediation of a former manufactured gas plant (MGP) site at Sawyer Passway, located in Fitchburg, Massachusetts. The amounts recorded do not assume any amounts are recoverable from insurance companies or other third parties. Also included on the Company's Consolidated Balance Sheet at March 31, 2010, March 31, 2009 and December 31, 2009 are current and non-current accrued liabilities totaling $2.5 million, $2.4 million and $2.5 million, respectively, associated with Northern Utilities' environmental remediation obligations for former MGP sites. Corresponding Regulatory Assets were recorded to reflect that the recovery of these environmental remediation costs is probable through the regulatory process.

Table of Contents

NOTE 8: RETIREMENT BENEFIT OBLIGATIONS

The Company co-sponsors the Unitil Corporation Retirement Plan (Pension Plan), the Unitil Retiree Health and Welfare Benefits Plan (PBOP Plan), and the Unitil Corporation Supplemental Executive Retirement Plan (SERP) to provide certain pension and postretirement benefits for its retirees and current employees. Please see Note 9 to the Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2009 as filed with the SEC on February 10, 2010 for additional information regarding these plans.

The following table includes the key weighted average assumptions used in determining the Company's benefit plan costs and obligations:

	2010	2009
Used to Determine Plan Costs		
Discount Rate	**5.75%**	6.25%
Rate of Compensation Increase	**3.50%**	3.50%
Expected Long-term rate of return on plan assets	**8.50%**	8.50%
Health Care Cost Trend Rate Assumed for Next Year	**7.50%**	8.00%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year that Ultimate Health Care Cost Trend Rate is reached	**2017**	2017

The following table provides the components of the Company's Retirement plan costs ($000's):

	Pension Plan		PBOP Plan		SERP	
Three Months Ended March 31,	**2010**	**2009**	**2010**	**2009**	**2010**	**2009**
Service Cost	**$ 652**	$ 571	**$ 367**	$ 357	**$ 71**	$ 54
Interest Cost	**1,114**	1,073	**504**	578	**57**	45
Expected Return on Plan Assets	**(1,045)**	(1,108)	**(150)**	(89)	**—**	—
Prior Service Cost Amortization	**63**	66	**395**	428	**1**	—
Transition Obligation Amortization	**—**	—	**5**	5	**—**	—
Actuarial Loss Amortization	**601**	399	**—**	—	**33**	18
Sub-total	**1,385**	1,001	**1,121**	1,279	**162**	117

Net Periodic Benefit Cost Recognized	**$ 763**	$ 719	**$ 771**	$ 921	**$ 162**	$ 117

Employer Contributions

On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA were new minimum funding rules which went into effect for plan years beginning in 2008. The funding target was 100% of a plan's liability (as determined under the PPA) with any shortfall amortized over seven years, with lower (92% - 100%) funding targets available to well-funded plans during the transition period. Due to the significant declines in the valuation of capital markets during 2008, the Worker, Retiree, and Employer Recovery Act of 2008 (Recovery Act) was signed into law on December 23, 2008. Included in the Recovery Act are temporary modifications to the minimum funding rules set forth in the PPA such that all plans, except those that were subject to deficit reduction contribution requirements in 2007, are allowed to amortize any shortfall from the lower funding targets, rather than the 100% target, for the 2008 - 2010 plan years. This did not affect the Company's Pension Plan in 2009 as its Pension Plan was 94% funded under the requirements of the Employee Retirement Income Security Act of 1974 (ERISA) as of January 1, 2008 and met the exemption from the shortfall amortization. The Company expects to contribute approximately $4.0 million to fund its Pension Plan in 2010.

As of March 31, 2010, the Company had made $13,000 of contributions to the SERP Plan in 2010. The Company presently anticipates contributing $3.5 million to the PBOP Plan and an additional $40,000 to the SERP Plan in 2010.

NOTE 9: INCOME TAXES

The Company bills its customers sales tax in Massachusetts and consumption tax in New Hampshire. These taxes are remitted to the appropriate departments of revenue in each state and are excluded from revenues on the Company's Consolidated Statements of Earnings.

The Company evaluated its tax positions at December 31, 2009 and for the current interim reporting period ended March 31, 2010 in accordance with the FASB Codification, and has concluded that no adjustment for recognition, derecognition, settlement and foreseeable future events to any unrecognized tax liabilities or assets as defined by the FASB Codification is required. The Company does not have any unrecognized tax positions for which it is reasonably possible that the total amounts recognized will significantly change within the next 12 months. The Company remains subject to examination by Federal, Massachusetts and New Hampshire tax authorities for the tax periods ended December 31, 2006; December 31, 2007; and December 31, 2008. Income tax filings for the year ended December 31, 2009 have been extended until September 15, 2010. In its Federal Income Tax return filings for the year ended December 31, 2008, the Company recognized net operating loss (NOL) carrybacks against its Federal Income Tax returns for the years ended December 31, 2006 and 2007 in the amounts of $5.0 million and $6.7 million, respectively. These NOL carrybacks resulted in a refund to the Company of $4.0 million which was received in November 2009. According to Internal Revenue Code rules, NOL refunds in excess of $2.0 million fall under the jurisdiction of the Joint Committee of Congress (Joint Committee) and are subject to review by the Internal Revenue Service (IRS) and attorneys of the Joint Committee. As a result, on December 30, 2009, the Company received notice that its Federal Income Tax return filings for the years ended December 31, 2006, December 31, 2007, and December 31, 2008 are under examination by the IRS. The Company classifies penalty and interest expense related to income tax liabilities as an income tax expense. There are no material interest and penalties recognized in the statement of earnings or accrued on the balance sheet.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in the Company's internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

[Table of Contents](#)

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2009 as filed with the SEC on February 10, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no sales of unregistered equity securities by the Company for the fiscal period ended March 31, 2010.

Pursuant to the written trading plan under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended (the Exchange Act), adopted by the Company on March 26, 2009, the Company periodically repurchased shares of its Common Stock on the open market related to Employee Length of Service Awards and the stock portion of the Directors' annual retainer. There was no pool or maximum number of shares related to these purchases; however, the trading plan automatically terminated when $83,000 in value of shares were purchased so that, as of March 31, 2010, the value of shares that may yet be purchased under that trading plan was $0.

The Company adopted a new written trading plan under Rule 10b5-1 under the Exchange Act on March 25, 2010, covering the period March 25, 2010 through March 25, 2011. The Company may suspend or terminate this trading plan at any time, so long as the suspension or termination is made in good faith and not as part of a plan or scheme to evade the prohibitions of Rule 10b-5 under the Exchange Act, or other applicable securities laws. There is no pool or maximum number of shares related to these purchases; however, the trading plan will terminate when $80,700 in value of shares have been purchased or, if sooner, on March 25, 2011.

The Company's repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs
1/1/10 – 1/31/10	—	—	—
2/1/10 – 2/28/10	—	—	—
3/1/10 – 3/31/10	139	$ 22.24	139
Total	139	$ 22.24	139

Item 5. Other Information

On April 27, 2010, the Company issued a press release announcing its results of operations for the three-month period ended March 31, 2010. The press release is furnished with the Quarterly Report on Form 10-Q as Exhibit 99.1.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Unitil Reports First Quarter Earnings

Hampton, NH – April 27, 2010: Unitil Corporation (NYSE: UTL) (www.unitil.com) today announced Earnings Applicable to Common Shareholders of $6.5 million for the first quarter of 2010 compared to 2009 first quarter earnings of $9.1 million. Earnings per common share (EPS) were $0.61 for the three months ended March 31, 2010 compared to EPS of $1.14 in the first quarter of 2009. Earnings per share in the first quarter of 2010 are not directly comparable with 2009 due to a 35% increase in average common shares outstanding year over year resulting from the issuance of new common equity in 2009 to complete the financing of the Company's acquisition of Northern Utilities and Granite State.

"Lower sales due to warmer than normal winter temperatures and the continued slow economic recovery in the region resulted in significantly lower earnings in the first quarter of 2010 compared to last year," said Robert G. Schoenberger, Unitil's Chairman and Chief Executive Officer. "Over the next 12 to 18 months we will be filing for rate relief for all our utility subsidiaries to align our revenues and operating costs and to recover the significant investments we are making to provide safe, reliable and cost effective electric and gas service to our customers. On April 15, 2010 we filed the first of these rate cases seeking a $10.1 million rate adjustment for our electric operations in New Hampshire."

Natural gas sales margin decreased $1.4 million in the three months ended March 31, 2010 compared to the same period in 2009 reflecting lower sales volumes. Total therm sales of natural gas decreased 6.5% in the three months ended March 31, 2010 compared to the same period in 2009, reflecting decreases of 7.8% and 6.0% in sales to residential and commercial and industrial (C&I) customers, respectively. The lower sales in the first three months of 2010 reflect a milder winter heating season this year. There were 7.6% fewer Heating Degree Days in the Company's service territories in the first quarter of 2010 compared to the same period in 2009. On a weather-normalized basis, natural gas sales decreased by 2.7% in the three months ended March 31, 2010 compared to the same period in 2009.

Electric sales margin decreased $0.3 million in the three months ended March 31, 2010 compared to the same period in 2009, reflecting lower sales volumes. Total electric kilowatt-hour (kWh) sales decreased 1.8% in the three months ended March 31, 2010 compared to the same period in 2009 driven by lower average usage per customer reflecting the milder winter weather as well as energy conservation efforts by our customers. On a weather-normalized basis, kWh sales in the three months ended March 31, 2010 were flat compared to the same period in 2009.

Selected financial data for 2010 is presented in the following table:

Unitil Corporation - Condensed Financial Data

(Millions, except Per Share Data) (Unaudited)

	Three Months Ended March 31, 2010	2009	Change
Gas Therm Sales:			
Residential	17.8	19.3	(7.8%)
Commercial/Industrial	54.6	58.1	(6.0%)
Total Gas Therm Sales	**72.4**	**77.4**	**(6.5%)**
Electric kWh Sales:			
Residential	177.7	180.6	(1.6%)
Commercial/Industrial	237.5	242.1	(1.9%)
Total Electric kWh Sales	**415.2**	**422.7**	**(1.8%)**
Gas Revenues	$ 61.1	$ 72.4	$ (11.3)
Purchased Gas	39.1	49.0	(9.9)
Gas Sales Margin	**22.0**	**23.4**	**(1.4)**
Electric Revenues	50.8	62.1	(11.3)
Purchased Electricity	36.7	47.7	(11.0)
Electric Sales Margin	**14.1**	**14.4**	**(0.3)**
Usource Sales Margin	**1.1**	**1.1**	**—**
Total Sales Margin	**37.2**	**38.9**	**(1.7)**
Operation & Maintenance	12.2	10.4	1.8
Depreciation, Amortization, Taxes & Other	14.2	14.6	(0.4)
Interest Expense, Net	4.3	4.8	(0.5)
Earnings Applicable to Common Shareholders	**$ 6.5**	**$ 9.1**	**$ (2.6)**
Earnings Per Share	**$ 0.61**	**$ 1.14**	**$ (0.53)**

Operation & Maintenance (O&M) expenses increased $1.8 million in the three months ended March 31, 2010 compared to the same period in 2009. The increase in O&M expenses primarily reflects higher utility operating costs associated with the completion of the transition and full integration of Northern Utilities and Granite State operations into the Company's consolidated operating results in the current period.

Depreciation, Amortization, Taxes and Other expenses decreased $0.4 million in the three months ended March 31, 2010 compared to the same period in 2009. Higher depreciation expense on utility plant additions were offset by lower amortization and lower income taxes on lower pre-tax earnings in the quarter.

Interest Expense, Net decreased $0.5 million in the three months ended March 31, 2010 compared to the same period in 2009 reflecting higher acquisition related debt fees incurred in 2009 and lower average borrowings in the current quarter.

Also in the first quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

Additionally, EPS in the first quarter of 2010 reflect a higher number of average shares outstanding year over year. In May and June 2009, the Company sold 2,700,000 shares of its common stock at a price of $20.00 per share in a registered public offering. The Company used the net proceeds of $51.2 million from this offering to complete the acquisition of Northern Utilities and Granite State.

As a result of the issuance of new common shares, consolidated results for the Company in the current period may not be directly comparable to prior period results until such time as the stock issuance is fully reflected in both reporting periods. Also, the Company's results are expected to reflect the seasonal nature of the acquired natural gas businesses. Accordingly, the Company expects that results of operations will be positively affected during the first and fourth quarters, when sales of natural gas are typically higher, and negatively affected during the second and third quarters, when gas operating and maintenance expenses usually exceed sales margins in the period.

The Company will hold a quarterly conference call to discuss first quarter 2010 results on Tuesday, April 27, 2010, at 2:00 p.m. Eastern Time. This call is being webcast by Thomson Financial and can be accessed in the Investor Relations section of Unitil Corporation's website, www.unitil.com. Institutional investors can access the call via Thomson StreetEvents (www.streetevents.com), a password-protected event management site.

About Unitil

Unitil Corporation is a public utility holding company headquartered in Hampton, New Hampshire. Unitil's principal business is the local distribution of electricity and natural gas in the states of New Hampshire, Massachusetts and Maine. Unitil is the parent company of three distribution utilities: (i) Unitil Energy Systems, Inc., which provides electric service in the southeastern seacoast and state capital regions of New Hampshire; (ii) Fitchburg Gas and Electric Light Company, which provides both electric and natural gas service in the greater Fitchburg area of north central Massachusetts; and (iii) Northern Utilities, Inc., which provides natural gas service in southeastern New Hampshire and portions of southern and central Maine. In addition, Unitil is the parent company of Granite State Gas Transmission, Inc., an interstate natural gas transmission pipeline in New Hampshire and Maine. Together, Unitil's operating utilities serve approximately 100,500 electric customers and 70,000, natural gas customers. Unitil's non-regulated business, Usource, also provides energy brokering and advisory services to large commercial and industrial customers in the northeastern United States.

This press release contains forward-looking statements, which are subject to the inherent uncertainties in predicting future results and conditions. All statements, other than statements of historical fact, are forward-looking statements. Certain factors that could cause the actual results to differ materially from those projected in these forward-looking statements include, but are not limited to the following: variations in weather; changes in the regulatory environment; customers' preferences on energy sources; general economic conditions; increased competition; fluctuations in supply, demand, transmission capacity and prices for energy commodities; and other uncertainties, all of which are difficult to predict, and many of which are beyond the control of Unitil Corporation.

For more information, visit Unitil at www.unitil.com or call Mark Collin at 603-773-6612.

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Unitil Corporation (Unitil or the Company) is a public utility holding company headquartered in Hampton, New Hampshire. Unitil is subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. On December 1, 2008, the Company purchased: (i) all of the outstanding capital stock of Northern Utilities, Inc. (Northern Utilities), a natural gas distribution utility serving customers in New Hampshire and Maine, from Bay State Gas Company and (ii) all of the outstanding capital stock of Granite State Gas Transmission, Inc. (Granite), an interstate gas transmission pipeline company primarily serving the needs of Northern Utilities, from NiSource, Inc. (the Acquisition).

Unitil's principal business is the local distribution of electricity and natural gas throughout its service territory in the states of New Hampshire, Massachusetts and Maine. Unitil is the parent company of three wholly-owned distribution utilities:

i) Unitil Energy Systems, Inc. (Unitil Energy), which provides electric service in southeastern seacoast and state capital regions of New Hampshire;

ii) Fitchburg Gas and Electric Light Company (Fitchburg), which provides both electric and natural gas service in the greater Fitchburg area of north central Massachusetts; and

iii) Northern Utilities, which provides natural gas service in southeastern New Hampshire and portions of southern and central Maine, including the city of Portland and the Lewiston-Auburn area.

Unitil Energy, Fitchburg and Northern Utilities are collectively referred to as the "distribution utilities." Together, the distribution utilities serve approximately 100,500 electric customers and 70,000 natural gas customers in their service territory.

In addition, Unitil is the parent company of Granite, a natural gas transmission pipeline, regulated by the FERC, operating 87 miles of underground gas transmission pipeline primarily located in Maine and New Hampshire. Granite provides Northern Utilities with interconnection to three major natural gas pipelines and access to pipeline supplies.

The distribution utilities are local "pipes and wires" operating companies and, combined with Granite, had an investment in Net Utility Plant of $456.6 million at June 30, 2010. Unitil's total operating revenue includes revenue to recover the approved cost of purchased electricity and natural gas in rates on a fully reconciling basis. As a result of this reconciling rate structure, the Company's earnings are not affected by changes in the cost of purchased electricity and natural gas. Earnings from Unitil's utility operations are derived from the return on investment in the three distribution utilities and Granite.

Unitil also conducts non-regulated operations principally through Usource, which is wholly-owned by Unitil Resources Inc., a wholly-owned subsidiary of Unitil. Usource provides energy brokering and consulting services to large commercial and industrial customers in the northeastern United States. The Company's other subsidiaries include Unitil Service Corp., which provides, at cost, a variety of administrative and professional services to Unitil's affiliated companies, Unitil Realty Corp., which owns and manages Unitil's corporate office building and property located in Hampton, New Hampshire and Unitil Power Corp., which formerly functioned as the full requirements wholesale power supply provider for Unitil Energy. Unitil's consolidated net income includes the earnings of the holding company and these subsidiaries.

RATES AND REGULATION

Base Rate Cases:

On April 15, 2010, Unitil Energy filed a proposed annual base rate increase of $10.1 million with the New Hampshire Public Utilities Commission (NHPUC), which represents an increase of 6.5 percent above present rates. Unitil Energy's filing also included a long-term rate plan establishing base rate step adjustments associated with future planned capital additions and targeted reliability enhancement and vegetation management programs. In its rate filing, Unitil Energy requested that rates initially be set at a lower level on a temporary basis.

On June 29, 2010, the NHPUC issued an order approving a temporary rate increase for Unitil Energy. The order provides for a temporary rate increase of $5.2 million (annual) effective July 1, 2010 which will be collected by applying a uniform per kilowatt-hour (kWh) surcharge of $0.00438 to each of Unitil Energy's current rate schedules. Of the $5.2 million rate increase, $500,000 of the increase is intended to permit Unitil Energy to annually recover expenses incurred during the December 2008 ice storm and another $500,000 of the increase is intended to fund higher planned vegetation management program expenditures. Once permanent rates are approved by the NHPUC, they will be reconciled to the date temporary rates were ordered, July 1, 2010. Final review and approval by the NHPUC of Unitil Energy's permanent base rate increase request is currently scheduled to be completed by February 2011.

On June 29, 2010, Granite filed a proposed base transportation rate increase with the FERC, which is Granite's first filing for a rate change since its last general rate case in 1997. If approved as filed, the rate increase would provide for an increase of approximately $3 million in revenue on an annual basis. The rate case filing reflects a rate base of $18.3 million which includes $4.2 million of capital additions to be made through the end of 2010.

In addition to its request for new base transportation rates, Granite, in its rate case filing, is seeking approval to implement a capital cost surcharge that would allow Granite to implement a rate surcharge annually to recover projected capital expenditures of approximately $12.7 million during the three-year time period 2011-2013. Granite expects the FERC regulatory process to result in an effective date of January 1, 2011 for the requested rate increase.

Additionally, Fitchburg and Northern Utilities are currently preparing base rate cases and anticipate filing them with their respective regulatory commissions within the next year.

Other:

Unitil is subject to comprehensive regulation by federal and state regulatory authorities. Unitil and its subsidiaries are subject to regulation as a holding company system by the FERC under the Energy Policy Act of 2005 in regards to certain bookkeeping, accounting and reporting requirements. Unitil's utility operations related to wholesale and interstate energy business activities are also regulated by FERC. Unitil's distribution utilities are subject to regulation by the applicable state public utility commissions, in regards to their rates, issuance of securities and other accounting and operational matters: Unitil Energy is subject to regulation by the NHPUC; Fitchburg is subject to regulation by the Massachusetts Department of Public Utilities (MDPU); and Northern Utilities is regulated by the NHPUC and the Maine Public Utilities Commission (MPUC). Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's distribution utilities deliver electricity and/or natural gas to all customers in their service territory, at rates established under traditional cost of service regulation. Under this regulatory structure, Unitil's distribution utilities recover the cost of providing distribution service to their customers based on a historical test year, in addition to earning a return on their capital investment in utility assets. As a result of a restructuring of the utility industry in New Hampshire, Massachusetts and Maine, Unitil's customers have the opportunity to purchase their electricity or natural gas supplies from third party suppliers. A majority of Unitil's largest commercial and industrial (C&I) customers purchase their electric and natural gas supplies from third party suppliers. However, most residential and small customers continue to purchase their electric and natural gas supplies through Unitil's distribution utilities. Unitil's distribution utilities purchase electricity or natural gas from unaffiliated wholesale suppliers and recover the actual costs of these supplies on a pass-through basis, as well as certain costs associated with industry restructuring, through reconciling rate mechanisms that are periodically adjusted.

The regulatory process in both New Hampshire and Maine, in connection with those states' approvals of the Acquisitions, included the negotiation and filing of settlement agreements reflecting commitments by Unitil with respect to Northern Utilities' rates, customer service and operations. The settlement agreements were separately negotiated and filed in each state but reflect a number of common features. For additional discussion, please refer to Unitil's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 10, 2010.

CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for the Company's future operations, are forward-looking statements.

These statements include declarations regarding the Company's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include those described in Item 1A (Risk Factors) and the following:

- The Company's ability to achieve the estimated potential synergy savings attributable to the Acquisitions;
- The Company's ability to retain existing customers and gain new customers;
- Variations in weather;
- Major storms;
- Recovery of deferred major storm costs;
- Recovery of energy commodity costs;
- Changes in the regulatory environment;
- Customers' preferences on energy sources;
- Interest rate fluctuation and credit market concerns;
- General economic conditions that could have an adverse impact on the availability of credit and liquidity resources generally and could jeopardize certain of our counterparty obligations, including those of our insurers and financial institutions;
- Fluctuations in supply, demand, transmission capacity and prices for energy commodities;
- Increased competition; and
- Customers' performance under multi-year energy brokering contracts.

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements.

RESULTS OF OPERATIONS

The following section of MD&A compares the results of operations for each of the two fiscal periods ended June 30, 2010 and June 30, 2009 and should be read in conjunction with the accompanying Consolidated Financial Statements and the accompanying Notes to Consolidated Financial Statements included in Part I, Item 1 of this report.

Between December 2008 and June 2009 the Company issued 5.0 million common shares to complete the Acquisition. As a result of the Acquisition and the issuance of new common shares, consolidated results for the Company in the current period may not be directly comparable to prior period results until such time as the Acquisition and stock issuance is fully reflected in both reporting periods. Also, the Company's results are expected to reflect the seasonal nature of the acquired natural gas businesses. Accordingly, the Company expects that results of operations will be positively affected during the first and fourth quarters, when sales of natural gas are typically higher, and negatively affected during the second and third quarters, when gas operating and maintenance expenses usually exceed sales margins in the period.

Earnings Overview

The Company's Earnings (Loss) Applicable to Common Shareholders was a net loss of ($2.1) million for the second quarter of 2010, compared to earnings of $0.2 million for the second quarter of 2009. For the six months ended June 30, 2010, the Company reported net income of $4.4 million compared to $9.3 million for the same period of 2009. Results for the second quarter were driven primarily by higher depreciation and interest expense and lower gas sales margins due to warmer regional temperatures.

Earnings (loss) per common share (EPS) were ($0.19) and $0.41 for the three and six month periods ended June 30, 2010 compared with $0.03 and $1.10 for the same periods of 2009. The Company's results of operations for 2010 are not directly comparable with 2009 due to the issuance of 5.0 million common shares between December 2008 and June 2009 to complete the financing of the Company's acquisition of Northern Utilities and Granite.

Natural gas sales margin decreased $2.4 million and $3.8 million in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009. Total natural gas therm sales were 5.1% and 6.0% lower in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. Lower gas therm sales in the Company's utility service territories reflect the effect of warmer temperatures in 2010, where there were approximately 22% and 12% fewer Heating Degree Days in the three and six month periods, respectively, compared to the prior year.

Electric sales margin increased $0.4 million and $0.1 million in the three and six months ended June 30, 2010 compared to the same periods in 2009, reflecting higher electric kilowatt-hour (kWh) sales. Total kWh sales increased 5.3% and 1.5% in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009 reflecting increased sales to all customer groups.

O&M expenses decreased $0.4 million and increased $1.4 million for the three and six months ended June 30, 2010, respectively, compared to 2009. The changes in O&M reflect higher utility operating costs and lower professional fees. The increases in utility operating expenses reflect the full integration of Northern Utilities and Granite into the Company's consolidated operating results.

Depreciation and Amortization expense increased $0.7 million and $1.5 million in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009 reflecting normal utility plant additions.

Interest Expense, Net increased $0.8 million and $0.3 million in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. In March 2010, Unitil Energy and Northern Utilities collectively issued $40 million of long-term debt which is contributing to the higher interest expense in the three and six month periods. Furthermore, net interest expense in 2010 reflects the permanent financing of Northern Utilities and Granite, which was completed in the second quarter of 2009.

Provisions for Federal and State Income Taxes decreased by $2.5 million due to lower pre-tax income in 2010 compared to 2009.

All other items increased $0.3 million and $0.5 million in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009, primarily reflecting higher property and payroll taxes.

Usource, our non-regulated energy brokering business, recorded revenues of $1.1 million and $2.2 million in the three and six month periods ended June 30, 2010, respectively, which were flat compared to the same periods of 2009. Usource's revenues are primarily derived from fees and charges billed to suppliers as customers take delivery of energy from these suppliers under term contracts brokered by Usource.

Additionally, EPS in the three and six months ended June 30, 2010 reflect a higher number of average shares outstanding year over year, as discussed above.

In 2009, Unitil's annual common dividend was $1.38, representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock. At its January, 2010, March, 2010 and June 2010 meetings, the Unitil Board of Directors declared quarterly dividends on the Company's common stock of $0.345 per share.

A more detailed discussion of the Company's results of operations for the three and six months ended June 30, 2010 and a period-to-period comparison of changes in financial position are presented below.

Gas Sales, Revenues and Margin

Therm Sales – Total therm sales of natural gas decreased 5.1% and 6.0% in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009. Lower gas therm sales in the Company's utility service territories reflect the effect of warmer temperatures in 2010, where there were approximately 22% and 12% fewer Heating Degree Days in the three and six month periods, respectively, compared to the prior year.

The following table details total firm therm sales for the three and six months ended June 30, 2010 and 2009, by major customer class:

Therm Sales (millions)	Three Months Ended June 30,				Six Months Ended June 30,			
	2010	2009	Change	% Change	2010	2009	Change	% Change
Residential	**6.6**	6.9	(0.3)	(4.3%)	**24.4**	26.2	(1.8)	(6.9%)
Commercial / Industrial	**27.0**	28.5	(1.5)	(5.3%)	**81.6**	86.6	(5.0)	(5.8%)
Total	**33.6**	35.4	(1.8)	(5.1%)	**106.0**	112.8	(6.8)	(6.0%)

Gas Operating Revenues and Sales Margin – The following table details total Gas Operating Revenues and Sales Margin for the three and six months ended June 30, 2010 and 2009:

Gas Operating Revenues and Sales Margin (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2010	**2009**	**$ Change**	**% Change(1)**	**2010**	**2009**	**$ Change**	**% Change(1)**
Gas Operating Revenue:								
Residential	**$10.0**	$ 9.6	$ 0.4	1.7%	**$35.8**	$40.0	$ (4.2)	(4.4%)
Commercial / Industrial	**13.7**	13.8	(0.1)	(0.4%)	**49.0**	55.8	(6.8)	(7.1%)
Total Gas Operating Revenue	**$23.7**	$23.4	$ 0.3	1.3%	**$84.8**	$95.8	$(11.0)	(11.5%)
Cost of Gas Sales:								
Purchased Gas	**$14.3**	$11.8	$ 2.5	10.7%	**$52.6**	$60.2	$ (7.6)	(7.9%)
Conservation & Load Management	**0.8**	0.6	0.2	0.9%	**1.6**	1.2	0.4	0.4%
Gas Sales Margin	**$ 8.6**	$11.0	$ (2.4)	(10.3%)	**$30.6**	$34.4	$ (3.8)	(4.0%)

(1) Represents change as a percent of Total Gas Operating Revenue.

Total Gas Operating Revenues increased $0.3 million, or 1.3%, and decreased $11.0 million, or 11.5%, in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. Total Gas Operating Revenues include the recovery of the approved cost of gas sales, which are recorded as Purchased Gas and Conservation & Load Management (C&LM) in Operating Expenses. The increase in Total Gas Operating Revenues in the second quarter of 2010 reflects higher Purchased Gas revenues of $2.5 million and higher C&LM revenues of $0.2 million, partially offset by lower gas sales margin of $2.4 million. The decrease in Total Gas Operating Revenues in the first six months of 2010 reflects lower Purchased Gas revenues of $7.6 million and lower gas sales margin of $3.8 million, partially offset by higher C&LM revenues of $0.4 million.

The Purchased Gas and C&LM components of Gas Operating Revenues increased a combined $2.7 million, or 11.6%, of Total Gas Operating Revenue and decreased a combined $7.2 million, or 7.5%, of Total Gas Operating Revenue in the three and six month periods ended June 30, 2010 compared to the same periods in 2009. The increase in the second quarter of 2010 is due to higher natural gas commodity costs, increased spending on energy efficiency and conservation programs, partially offset by lower natural gas sales. Also, Purchased Gas in the second quarter of 2010 reflects an adjustment of $0.8 million due to the recognition, for consistency purposes, of commodity-related bad debt expense previously recorded in O&M expense in the first quarter of 2010. The decrease in the six month period of 2010 primarily reflects lower sales of natural gas, partially offset by increased spending on energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Natural gas sales margin decreased $2.4 million and $3.8 million in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009. The decrease in the three month period principally reflects lower sales of natural gas, which reflect the effect of warmer temperatures, of approximately $0.5 million, lower estimated unbilled revenue in the current period of $1.1 million and the recognition of commodity-related bad debt, discussed above, of $0.8 million. The decrease in the six month period principally reflects lower sales of natural gas, which reflect the effect of the milder winter heating season, of approximately $2.1 million and lower estimated unbilled revenue in the current period of $1.7 million.

Electric Sales, Revenues and Margin

Kilowatt-hour Sales – Total electric kilowatt-hour (kWh) sales increased 5.3% and 1.5% in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009 reflecting increased sales to all customer groups.

The following table details total kWh sales for the three and six months ended June 30, 2010 and 2009 by major customer class:

kWh Sales (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2010	**2009**	**Change**	**% Change**	**2010**	**2009**	**Change**	**% Change**
Residential	**148.3**	141.1	7.2	5.1%	**326.0**	321.7	4.3	1.3%
Commercial/Industrial	**245.8**	233.2	12.6	5.4%	**483.3**	475.3	8.0	1.7%
Total	**394.1**	374.3	19.8	5.3%	**809.3**	797.0	12.3	1.5%

Electric Operating Revenues and Sales Margin – The following table details total Electric Operating Revenues and Sales Margin for the three and six month periods ended June 30, 2010 and 2009:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2010	**2009**	**$ Change**	**% Change(1)**	**2010**	**2009**	**$ Change**	**% Change(1)**
Electric Operating Revenue:								
Residential	**$23.8**	$23.3	$ 0.5	1.1%	**$51.9**	$ 56.4	$ (4.5)	(4.1%)
Commercial/Industrial	**22.8**	23.7	(0.9)	(1.9%)	**45.5**	52.7	(7.2)	(6.6%)
Total Electric Operating Revenue	**$46.6**	$47.0	$ (0.4)	(0.8%)	**$97.4**	$109.1	$ (11.7)	(10.7%)
Cost of Electric Sales:								
Purchased Electricity	**$31.7**	$33.4	$ (1.7)	(3.6%)	**$67.5**	$ 80.6	$ (13.1)	(12.0%)
Conservation & Load Management	**1.7**	0.8	0.9	1.9%	**2.6**	1.3	1.3	1.2%
Electric Sales Margin	**$13.2**	$12.8	$ 0.4	0.9%	**$27.3**	$ 27.2	$ 0.1	0.1%

(1) Represents change as a percent of Total Electric Operating Revenue.

Total Electric Operating Revenue, decreased by $0.4 million, or 0.8%, and $11.7 million, or 10.7%, in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. Total Electric Operating Revenues include the recovery of the approved cost of electric sales, which are recorded as Purchased Electricity and C&LM in Operating Expenses. The decrease in Total Electric Operating Revenues in the second quarter of 2010 reflects lower Purchased Electricity revenues of $1.7 million, partially offset by higher C&LM revenues of $0.9 million and higher electric sales margin of $0.4 million. The decrease in Total Electric Operating Revenues in the first six months of 2010 reflects lower Purchased Electricity revenues of $13.1 million, partially offset by higher C&LM revenues of $1.3 million and higher electric sales margin of $0.1 million.

The Purchased Electricity and C&LM components of Total Electric Operating Revenues decreased a combined $0.8 million, or 1.7%, and $11.8 million, or 10.8%, of Total Electric Operating Revenues in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. These decreases primarily reflect an increase in the amount of electricity purchased by customers directly from third-party suppliers, partially offset by higher spending on energy efficiency and conservation programs and increased sales. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin increased $0.4 million and $0.1 million in the three and six months ended June 30, 2010 compared to the same periods in 2009, reflecting higher electric kWh sales, as discussed above.

Operating Revenue - Other

The following table details total Other Revenue for the three and six months ended June 30, 2010 and 2009:

Other Revenue (000's)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2010	**2009**	**$ Change**	**% Change**	**2010**	**2009**	**$ Change**	**% Change**
Other	**$1.1**	$1.1	$ —	—	**$2.2**	$2.2	$ —	—
Total Other Revenue	**$1.1**	$1.1	$ —	—	**$2.2**	$2.2	$ —	—

Total Other Revenue was on par in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. Other Revenues represents revenues from the Company's non-regulated energy brokering business, Usource.

Operating Expenses

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas increased $2.5 million, or 21.2%, and decreased $7.6 million, or 12.6%, in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009. The increase in the second quarter of 2010 is due to higher natural gas commodity costs partially offset by lower sales of natural gas. Also, Purchased Gas in the second quarter of 2010 reflects an adjustment of $0.8 million due to the recognition, for consistency purposes, of commodity-related bad debt expense previously recorded in O&M expense in the first quarter of 2010. The decrease in the six month period of 2010 primarily reflects lower sales of natural gas. The Company recovers the approved costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect earnings.

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity decreased $1.7 million, or 5.1%, and $13.1 million, or 16.3%, in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. These decreases primarily reflect an increase in the amount of electricity purchased by customers directly from third-party suppliers and lower electric commodity costs, partially offset by increased sales. The Company recovers the approved costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect earnings.

Operation and Maintenance (O&M) – O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total O&M expenses decreased $0.4 million, or 3.3%, and increased $1.4 million, or 6.3%, for the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009. The changes in O&M reflect higher utility operating costs and lower professional fees. Utility operating costs primarily consist of compensation and benefit costs, utility distribution and transmission system maintenance costs, bad debt expenses, office expenses and insurance costs. The increases in utility operating expenses reflect the full integration of Northern Utilities and Granite into the Company's consolidated operating results.

Conservation & Load Management – Conservation and Load Management expenses are expenses associated with the development, management, and delivery of the Company's energy efficiency programs. Energy efficiency programs are designed, in conformity to state regulatory requirements, to help consumers use natural gas and electricity more efficiently and thereby decrease their energy usage. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 60% of these costs are related to electric operations and 40% to gas operations.

Total C&LM expenses increased $1.1 million, or 78.6% and $1.7 million, or 68.0%, in the three and six month periods ended June 30, 2010 compared to the same periods in 2009. These approved costs are collected from customers on a pass through basis and therefore, fluctuations in program costs do not affect earnings.

Depreciation, Amortization and Taxes

Depreciation and Amortization – Depreciation and Amortization expense increased $0.7 million, or 10.9%, and $1.5 million, or 11.8% in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. These increases reflect higher depreciation on normal utility plant additions.

Local Property and Other Taxes – Local Property and Other Taxes increased $0.3 million and $0.4 million in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. These increases reflect higher local property tax rates on higher levels of utility plant in service and higher payroll taxes on higher compensation expenses.

Federal and State Income Taxes – Federal and State Income Taxes were lower by $1.1 million and $2.5 million in the three and six month periods ended June 30, 2010 compared to the same periods in 2009 reflecting lower pre-tax earnings in the current periods.

Other Non-Operating Expenses (Income)

Other Non-Operating Expenses were on par in the three month period ended June 30, 2010 compared to the same period in 2009 and increased by $0.1 million in the six month period ended June 30, 2010 compared to the same period in 2009.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. In addition, certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

Unitil's utility subsidiaries operate a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the distribution utilities' rate tariffs, interest is accrued on these balances and will produce either interest income or interest expense. Consistent with regulatory precedent, interest income is recorded on an under-collection of costs which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (Millions)	Three Months Ended June 30,			Six Months Ended June 30,		
	2010	2009	Change	2010	2009	Change
Interest Expense						
Long-term Debt	**$ 5.1**	$ 4.5	$ 0.6	**$ 9.8**	$ 9.1	$ 0.7
Short-term Debt	**0.3**	0.6	(0.3)	**0.8**	1.1	(0.3)
Regulatory Liabilities	**0.1**	0.1	—	**0.2**	0.1	0.1
Subtotal Interest Expense	**5.5**	5.2	0.3	**10.8**	10.3	0.5
Interest (Income)						
Regulatory Assets	**(0.9)**	(0.6)	(0.3)	**(1.7)**	(1.3)	(0.4)
AFUDC[1] and Other	**(0.1)**	(0.9)	0.8	**(0.3)**	(0.5)	0.2
Subtotal Interest (Income)	**(1.0)**	(1.5)	0.5	**(2.0)**	(1.8)	(0.2)
Total Interest Expense, Net	**$ 4.5**	$ 3.7	$ 0.8	**$ 8.8**	$ 8.5	$ 0.3

(1) AFUDC – Allowance for Funds Used During Construction.

Interest Expense, Net increased $0.8 million and $0.3 million in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. In March 2010, Unitil Energy and Northern Utilities collectively issued $40 million of long-term debt which is contributing to the higher interest expense in the three and six month periods. Furthermore, net interest expense in 2010 reflects the permanent financing of Northern Utilities and Granite, which was completed in the second quarter of 2009.

On March 2, 2010, Unitil Energy completed the sale of $15 million of First Mortgage Bonds through a private placement to institutional investors. The First Mortgage Bonds have a maturity of ten years and a coupon rate of 5.24%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

On March 2, 2010, Northern Utilities completed the sale of $25 million of Senior Unsecured Notes through a private placement to institutional investors. The Senior Unsecured Notes have a maturity of ten years and a coupon rate of 5.29%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

CAPITAL REQUIREMENTS

Sources of Capital

Unitil requires capital to fund utility plant additions, working capital and other utility expenditures recovered in subsequent and future periods through regulated rates. The capital necessary to meet these requirements is derived primarily from internally-generated funds, which consist of cash flows from operating activities. The Company initially supplements internally-generated funds through bank borrowings, as needed, under its unsecured short-term bank credit facility. Periodically, the Company replaces portions of its short-term debt with long-term financings more closely matched to the long-term nature of its utility assets. The Company's utility operations are seasonal in nature and are therefore subject to seasonal fluctuations in cash flows.

The continued availability of these methods of financing, as well as the Company's choice of a specific form of security, will depend on many factors, including, but not limited to: security market conditions; general economic climate; regulatory approvals; the ability to meet covenant issuance restrictions; the level of the Company's earnings, cash flows and financial position; and the competitive pricing offered by financing sources.

At June 30, 2010, the Company had $24.6 million in short-term debt outstanding through bank borrowings under its revolving credit facility. The revolving credit facility contains customary terms and conditions for credit facilities of this type, including certain financial covenants. As of June 30, 2010, the Company was in compliance with the financial covenants contained in the revolving credit facility.

Northern Utilities enters into asset management agreements under which Northern Utilities releases certain natural gas pipeline and storage assets, resells the natural gas storage inventory to an asset manager and subsequently repurchases the inventory over the course of the natural gas heating season at the same price at which it sold the natural gas inventory to the asset manager. There was $8.5 million, $3.1 million and $10.0 million outstanding at June 30, 2010, June 30, 2009 and December 31, 2009, respectively, related to these asset management agreements.

The Company also provides limited guarantees on certain energy and natural gas storage management contracts entered into by the three distribution utilities. The Company's policy is to limit these guarantees to two years or less. As of June 30, 2010 there are $40.8 million of guarantees outstanding and the longest of these guarantees extends through October 31, 2011. Of this amount, $12.0 million is related to Unitil's guarantee of payment for the term of the Northern Utilities' gas storage Agreement discussed above.

The Company also guarantees the payment of principal, interest and other amounts payable on the notes issued by Unitil Realty and Granite. As of June 30, 2010, the principal amount outstanding for the 8% Unitil Realty notes was $4.0 million. On December 15, 2008, the Company entered into a guarantee for the payment of principal, interest and other amounts payable on the $10 million Granite notes due 2018. As of June 30, 2010, the principal amount outstanding for the 7.15% Granite notes was $10.0 million.

Off-Balance Sheet Arrangements

The Company and its subsidiaries do not currently use, and are not dependent on the use of, off-balance sheet financing arrangements such as securitization of receivables or obtaining access to assets or cash through special purpose entities or variable interest entities. Unitil's subsidiaries conduct a portion of their operations in leased facilities and also lease some of their vehicles, machinery and office equipment under both capital and operating lease arrangements.

Cash Flows

Unitil's utility operations, taken as a whole, are seasonal in nature and are therefore subject to seasonal fluctuations in cash flows. The tables below summarize the major sources and uses of cash (in millions) for the six months ended June 30, 2010 compared to the same period in 2009.

	Six Months Ended June 30,	
	2010	2009
Cash Provided by Operating Activities	**$ 27.0**	$ 53.5

Cash Provided by Operating Activities – Cash Provided by Operating Activities was $27.0 million in the first six months of 2010 compared to $53.5 million in the same period of 2009. In the first six months of 2010 as compared to the first six months of 2009, net sources of cash flow from Net Income, adjusted for non-cash charges to depreciation, amortization and deferred taxes decreased by $6.1 million, changes in current assets and liabilities decreased $19.9 million, and changes in all other Operating Activities decreased $0.5 million. The $19.9 million decrease in changes in current assets and liabilities primarily resulted from a decrease in gas inventory of $19.9 million driven by changes in natural gas prices. The Company finances its gas inventory requirements with asset management agreements (see Credit Arrangements in Note 4).

	Six Months Ended June 30,	
	2010	2009
Cash (Used in) Investing Activities	**$(19.2)**	$(32.2)

Cash (Used in) Investing Activities – Cash (Used in) Investing Activities was ($19.2) million for the six months ended June 30, 2010 compared to ($32.2) million for the same period in 2009. The Company recorded ($1.3) million of the total expenditures related to the February 2010 wind storm as capital spending and the remaining ($5.9) of expenditures have been deferred as a regulatory asset for future recovery in rates. Capital spending in the same period of 2009 included ($7.5) million related to the December 2008 ice storm and ($6.1) million of acquisition costs related to the acquisition of Northern Utilities and Granite. All other capital spending in the first six months of 2010 was ($17.9) million compared to ($18.6) million in the same period of 2009. Capital expenditures are projected to be approximately ($64.0) million in 2010 and ($60.0) million in 2011, reflecting normal electric and gas utility system additions.

	Six Months Ended June 30,	
	2010	2009
Cash (Used in) Financing Activities	**$ (9.2)**	$ (22.5)

Cash Provided by (Used in) Financing Activities – Cash Provided by (Used in) Financing Activities was ($9.2) million in the six months ended June 30, 2010 compared to ($22.5) million for the same period in 2009. In March 2010, Unitil Energy and Northern Utilities closed long-term debt financings of $15.0 million and $25.0 million, respectively. The net proceeds of these financings were used to refinance short-term borrowings. Short-term borrowings were reduced by ($39.9) million in the first six months of 2010. Other uses of cash include ($7.6) million for quarterly dividend payments and ($1.6) million related to gas inventory financing. Proceeds from issuances of common stock provided a source of cash of $0.5 million, and all other uses of cash were ($0.3) million.

CRITICAL ACCOUNTING POLICIES

The preparation of the Company's financial statements in conformity with generally accepted accounting principles in the United States of America requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, the Company is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgment, the financial position of the Company could be materially affected and the results of operations of the Company could be materially different than reported. The following is a summary of the Company's most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company's significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 10, 2010.

Regulatory Accounting – The Company's principal business is the distribution of electricity and natural gas by the three distribution utilities: Unitil Energy, Fitchburg and Northern Utilities. Unitil Energy and Fitchburg are subject to regulation by the FERC. Fitchburg is also regulated by the MDPU, Unitil Energy is regulated by the NHPUC and Northern Utilities is regulated by the MPUC and NHPUC. Granite, the Company's natural gas transmission pipeline, is regulated by the FERC. Accordingly, the Company uses the Regulated Operations guidance as set forth in the FASB Codification. The Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

Regulatory Assets consist of the following (millions)

	June 30, 2010	June 30, 2009	December 31, 2009
Energy Supply Contract Obligations	**$ 27.8**	$ 42.8	$ 34.7
Deferred Restructuring Costs	**26.9**	27.5	28.3
Generation-related Assets	**—**	0.4	—
Subtotal – Restructuring Related Items	**54.7**	70.7	63.0
Retirement Benefit Obligations	**43.7**	46.2	43.7
Income Taxes	**13.3**	15.3	14.5
Environmental Obligations	**21.2**	21.9	22.7
Deferred Storm Charges	**21.7**	12.5	14.6
Other	**8.7**	10.4	7.9
Total Regulatory Assets	**$163.3**	$177.0	$ 166.4
Less: Current Portion of Regulatory Assets(1)	**16.6**	24.0	21.9
Regulatory Assets – noncurrent	**$146.7**	$153.0	$ 144.5

(1) Reflects amounts included in Accrued Revenue on the Company's Consolidated Balance Sheets.

The Company receives a return on investment on its regulated assets for which a cash outflow has been made. Regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. The Company believes it is probable that its regulated distribution and transmission utilities will recover their investments in long-lived assets, including regulatory assets. If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of the FASB Codification topic on Regulated Operations. If unable to continue to apply the FASB Codification provisions for Regulated Operations, the Company would be required to apply the provisions for the Discontinuation of Rate-Regulated Accounting included in the FASB Codification. In the Company's opinion, its regulated operations will be subject to the FASB Codification provisions for Regulated Operations for the foreseeable future.

Utility Revenue Recognition – Regulated utility revenues are based on rates and charges approved by federal and state regulatory commissions. Revenues related to the sale of electric and gas service are recorded when service is rendered or energy is delivered to customers. However, the determination of energy sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts – The Company recognizes a provision for doubtful accounts each month based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior years. At the end of each month, an analysis of the delinquent receivables is performed which takes into account an assumption about the cash recovery of delinquent receivables. The analysis also calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company's distribution utilities are authorized by regulators to recover the costs of their energy commodity portion of bad debts through rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis, including expected fuel assistance payments from governmental authorities and the level of customers enrolling in payment plans with the Company. It has been the Company's experience that the assumptions it has used in evaluating the adequacy of the Allowance for Doubtful Accounts have proven to be reasonably accurate.

Retirement Benefit Obligations – The Company sponsors the Unitil Corporation Retirement Plan (Pension Plan), which is a defined benefit pension plan covering substantially all of its employees. The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (SERP), covering certain executives of the Company and an employee 401(k) savings plan. Additionally, the Company sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan), primarily to provide health care and life insurance benefits to retired employees.

The Company records on its balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas rates.

The Company's reported costs of providing retirement benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. The Company's RBO are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future costs.

The Company's RBO may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the Company's RBO. If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's financial statements. The discount rate assumptions used in determining retirement plan costs and retirement plan obligations are based on a market average of long-term bonds that receive one of the two highest ratings given by a recognized rating agency. For the years ended December 31, 2009 and 2008, a change in the discount rate of 0.25% would have resulted in an increase or decrease of approximately $300,000 and $200,000, respectively, in the Net Periodic Benefit Cost for the Pension Plan. For the years ended December 31, 2009 and 2008, a 1.0% increase in the assumption of health care cost trend rates would have resulted in increases in the Net Periodic Benefit Cost for the PBOP Plan of $735,000 and $675,000, respectively. Similarly, a 1.0% decrease in the assumption of health care cost trend rates for those same time periods would have resulted in decreases in the Net Periodic Benefit Cost for the PBOP Plan of $576,000 and $531,000, respectively. See Note 8 to the accompanying Consolidated Financial Statements.

Income Taxes – Provisions for income taxes are calculated in each of the jurisdictions in which the Company operates for each period for which a statement of earnings is presented. This process involves estimating the Company's current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deductions of expenses and recognition of taxable income for tax and book accounting purposes. These temporary differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets.

Depreciation – Depreciation expense is calculated on a group straight-line basis based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company's fixed assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements.

Commitments and Contingencies – The Company's accounting policy is to record and/or disclose commitments and contingencies in accordance with the FASB Codification as it applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. As of June 30, 2010, the Company is not aware of any material commitments or contingencies other than those disclosed in the Commitments and Contingencies footnote to the Company's consolidated financial statements below.

Refer to "Recently Issued Accounting Pronouncements in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

As of June 30, 2010, the Company and its subsidiaries had 431 employees. The Company considers its relationship with employees to be good and has not experienced any major labor disruptions.

As of June 30, 2010, 147 of the Company’s employees were represented by labor unions. These employees are covered by four separate collective bargaining agreements which expire on March 31, 2012, May 31, 2012, May 31, 2013 and June 5, 2014. The agreements provide discreet salary adjustments, established work practices and uniform benefit packages. The Company expects to successfully negotiate new agreements prior to their expiration dates.

INTEREST RATE RISK

As discussed above, Unitil meets its external financing needs by issuing short-term and long-term debt. The majority of debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new issuances of long-term debt securities. In addition, short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease interest expense in future periods. For example, if the average amount of short-term debt outstanding was $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000. The average interest rates on the Company’s short-term borrowings for the three months ended June 30, 2010 and June 30, 2009 were 2.33% and 4.28%, respectively. The average interest rates on the Company’s short-term borrowings for the six months ended June 30, 2010 and June 30, 2009 were 2.28% and 4.53%, respectively.

MARKET RISK

Although Unitil’s three distribution utilities are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

UNITIL CORPORATION AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations – Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (Unitil Energy), Fitchburg Gas and Electric Light Company (Fitchburg), Northern Utilities, Inc. (Northern Utilities), Granite State Gas Transmission, Inc. (Granite), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

On December 1, 2008, the Company purchased: (i) all of the outstanding capital stock of Northern Utilities, a natural gas distribution utility serving customers in Maine and New Hampshire, from Bay State Gas Company (Bay State) and (ii) all of the outstanding capital stock of Granite, an interstate gas transmission pipeline company primarily serving the needs of Northern Utilities, from NiSource, Inc. (NiSource) pursuant to the Stock Purchase agreement dated as of February 15, 2008 by and among NiSource, Bay State, and Unitil (the "Acquisitions"). The final purchase price allocation is disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2009 as filed with the Securities and Exchange Commission on February 10, 2010.

Unitil's principal business is the local distribution of electricity in the southeastern seacoast and state capital regions of New Hampshire and the greater Fitchburg area of north central Massachusetts and the local distribution of natural gas in southeastern New Hampshire, portions of southern and central Maine and in the greater Fitchburg area of north central Massachusetts. Unitil has three distribution utility subsidiaries, Unitil Energy, which operates in New Hampshire, Fitchburg, which operates in Massachusetts and Northern Utilities, which operates in New Hampshire and Maine (collectively referred to as the distribution utilities).

Granite is a natural gas transportation pipeline, operating 87 miles of underground gas transmission pipeline primarily located in Maine, New Hampshire and Massachusetts. Granite provides Northern Utilities with interconnection to three major natural gas pipelines and access to domestic natural gas supplies in the south and Canadian natural gas supplies in the north. Granite derives its revenues principally from the transportation services provided to Northern Utilities and, to a lesser extent, third –party marketers.

A fifth utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for Unitil Energy. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of Unitil Energy on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve Unitil Energy's customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service; Unitil Realty; and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology, energy management and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-regulated subsidiary. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three and six months ended June 30, 2010 are not necessarily indicative of results to be expected for the year ending December 31, 2010. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2009, as filed with the Securities and Exchange Commission (SEC) on February 10, 2010, for a description of the Company's Basis of Presentation.

Between December 2008 and June 2009 the Company issued 5.0 million common shares to complete the Acquisition. As a result of the Acquisition and the issuance of new common shares, consolidated results for the Company in the current period may not be directly comparable to prior period results until such time as the Acquisition and stock issuance is fully reflected in both reporting periods. Also, the Company's results are expected to reflect the seasonal nature of the acquired natural gas businesses. Accordingly, the Company expects that results of operations will be positively affected during the first and fourth quarters, when sales of natural gas are typically higher, and negatively affected during the second and third quarters, when gas operating and maintenance expenses usually exceed sales margins in the period.

Accounting Codification – In June 2009, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 168, "The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles", (SFAS No. 168). SFAS No. 168 was effective for financial statements for interim and annual periods ending after September 15, 2009. The Company has adopted SFAS No. 168 and therefore all references by the Company to authoritative accounting principles recognized by the FASB reflect the FASB Codification.

Derivatives – The Company has a regulatory approved hedging program for Northern Utilities designed to fix a portion of its gas supply costs for the coming year of service. In order to fix these costs, the Company purchases natural gas futures contracts on the New York Mercantile Exchange (NYMEX) that correspond to the associated delivery month. Any gains or losses resulting from the change in the fair value of these derivatives are passed through to ratepayers directly through a regulatory commission approved recovery mechanism. The fair value of these derivatives is determined using Level 2 inputs (valuations based on quoted prices available in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are directly observable, and inputs derived principally from market data), specifically based on the NYMEX closing prices for outstanding contracts as of the balance sheet date. As a result of the ratemaking process, the Company records gains and losses resulting from the change in fair value of the derivatives as regulatory liabilities or assets, then reclassifies these gains or losses into Purchased Gas when the gains and losses are passed through to customers in accordance with rate reconciling mechanisms.

As of June 30, 2010 and December 31, 2009, the Company had 1.3 billion and 1.9 billion cubic feet (BCF), respectively, outstanding in natural gas purchase contracts under its hedging program.

Liability Derivatives ($ millions)

The tables below show derivatives that are not designated as hedging instruments, under FASB ASC 815-20. As discussed above, the change in fair value related to these derivatives is recorded initially as a Regulatory Asset then reclassified to Purchased Gas in accordance with the recovery mechanism. The tables below include disclosure of the Regulatory Asset and reclassifications from the Regulatory Asset into Purchased Gas.

	As of					
	June 30, 2010		June 30, 2009		December 31, 2009	
Description	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Natural Gas Futures Contracts	Other Current Liabilities	$ 1.2	Other Current Liabilities	$ 5.5	Other Current Liabilities	$ 2.2
Natural Gas Futures Contracts	Other Noncurrent Liabilities	0.1	Other Noncurrent Liabilities	—	Other Noncurrent Liabilities	0.1
Total		$ 1.3		$ 5.5		$ 2.3

Regulatory Approved Hedging Programs	Amount of Loss Recognized in Regulatory Assets for Derivatives	
	Three Months Ended June 30, 2010	Six Months Ended June 30, 2010
Natural Gas Futures Contracts	$ 1.0	$ 2.9
	Three Months Ended June 30, 2009	Six Months Ended June 30, 2009
Natural Gas Futures Contracts	$ 1.4	$ 5.6

Location of Loss Reclassified into the Consolidated Statements of Earnings from Regulatory Assets	Amount of Loss Reclassified into the Consolidated Statements of Earnings from Regulatory Assets[1]	
	Three Months Ended June 30, 2010	Six Months Ended June 30, 2010
Purchased Gas	$ 1.6	$ 3.9
	Three Months Ended June 30, 2009	Six Months Ended June 30, 2009
Purchased Gas	$ 2.8	$ 5.8

(1) These amounts are offset in the Consolidated Statements of Earnings with Accrued Revenue and therefore there is no effect on earnings.

Subsequent Events – The Company has evaluated all events or transactions through the date of this filing. During this period, the Company did not have any material subsequent events that impacted its consolidated financial statements.

Reclassifications – Certain amounts previously reported have been reclassified to improve the financial statements' presentation and to conform to current year presentation.

Recently Issued Pronouncements – There are no recently issued pronouncements that the Company has not already adopted.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

Common Stock

The Company's common stock trades under the symbol "UTL".

On September 10, 2008, the Company's shareholders, at a Special Meeting of Shareholders, approved an increase in the number of authorized shares of the Company's common stock. Shareholders approved an amendment to the Company's Articles of Incorporation to increase the authorized number of shares of the Company's common stock, from 8,000,000 shares to 16,000,000 shares in the aggregate. The Company had 10,869,603, 10,816,312 and 10,836,759 of common shares outstanding at June 30, 2010, June 30, 2009 and December 31, 2009, respectively.

Unitil Corporation Common Stock Offering – Between December 2008 and June 2009, the Company sold 4,970,000 shares of its common stock at a price of $20.00 per share in registered public offerings. The Company used the net proceeds of $93.1 million from these offerings primarily to complete the acquisition of Northern Utilities and Granite. Please see Note 3 to the Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2009 as filed with the SEC on February 10, 2010 for additional information.

Dividend Reinvestment and Stock Purchase Plan – During the first six months of 2010, the Company sold 20,639 shares of its Common Stock, at an average price of $21.80 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $450,000 were used to reduce short-term borrowings.

During the first six months of 2009, the Company sold 22,435 shares of its Common Stock, at an average price of $20.72 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $465,000 were used to reduce short-term borrowings.

Restricted Stock Plan – The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 5, 2010, 12,520 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $262,920. There were 37,797 and 44,602 non-vested shares under the Plan as of June 30, 2010 and 2009, respectively. The weighted average grant date fair value of these shares was $22.03 and $22.98, respectively. The compensation expense associated with the issuance of shares under the Plan is being recognized over the vesting period and was $0.3 million and $0.3 million for the six months ended June 30, 2010 and 2009, respectively. At June 30, 2010, there was approximately $1.0 million of total unrecognized compensation cost under the Plan which is expected to be recognized over approximately 2.7 years. There were 315 restricted shares forfeited under the Plan during the six months ended June 30, 2010. There were no cancellations under the Plan during the six months ended June 30, 2010.

Preferred Stock

Details on preferred stock at June 30, 2010, June 30, 2009 and December 31, 2009 are shown below:

Less: Current Portion	**0.4**	0.4	0.4
Total Long-term Debt, Less Current Portion	**$288.6**	$249.1	$ 248.9

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at June 30, 2010 is estimated to be approximately $311 million, before considering any costs, including prepayment costs, which generally require a "make-whole" payment, to market the Company's debt. Currently, the Company believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

On March 2, 2010, Unitil Energy completed the sale of $15 million of First Mortgage Bonds through a private placement to institutional investors. The First Mortgage Bonds have a maturity of ten years and a coupon rate of

5.24%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

On March 2, 2010, Northern Utilities completed the sale of $25 million of Senior Unsecured Notes through a private placement to institutional investors. The Senior Unsecured Notes have a maturity of ten years and a coupon rate of 5.29%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

Credit Arrangements

At June 30, 2010, the Company had $24.6 million in short-term debt outstanding through bank borrowings under its revolving credit facility. The revolving credit facility contains customary terms and conditions for credit facilities of this type, including, without limitation, covenants restricting the Company's ability to incur liens, merge or consolidate with another entity or change its line of business. The revolving credit agreement also contains a covenant restricting the Company's ability to permit long-term debt to exceed 65% of capitalization at the end of each fiscal quarter. As of June 30, 2010, the Company was in compliance with the financial covenants contained in the revolving credit agreement.

On October 13, 2009, the Company entered into an amendment to its 364-day revolving credit facility with Bank of America, as administrative agent, and a syndicate of lenders. The Company originally entered into the facility on November 26, 2008. The amendment increased the maximum borrowings under the facility from $60 million to $80 million.

Northern Utilities enters into asset management agreements under which Northern Utilities releases certain natural gas pipeline and storage assets, resells the natural gas storage inventory to an asset manager and subsequently repurchases the inventory over the course of the natural gas heating season at the same price at which it sold the natural gas inventory to the asset manager. There was $8.5 million, $3.1 million and $10.0 million outstanding at June 30, 2010, June 30, 2009 and December 31, 2009, respectively, related to these asset management agreements.

Guarantees

The Company also provides limited guarantees on certain energy and natural gas storage management contracts entered into by the three distribution utilities. The Company's policy is to limit these guarantees to two years or less. As of June 30, 2010 there are $40.8 million of guarantees outstanding and the longest of these guarantees extends through October 31, 2011. Of this amount, $12.0 million is related to Unitil's guarantee of payment for the term of the Northern Utilities' gas storage Agreement discussed above.

The Company also guarantees the payment of principal, interest and other amounts payable on the notes issued by Unitil Realty and Granite. As of June 30, 2010, the principal amount outstanding for the 8% Unitil Realty notes was $4.0 million. On December 15, 2008, the Company entered into a guarantee for the payment of principal, interest and other amounts payable on the $10 million Granite notes due 2018. As of June 30, 2010, the principal amount outstanding for the 7.15% Granite notes was $10.0 million. This guarantee will terminate if Granite reorganizes and merges with and into Northern Utilities.

NOTE 5 – SEGMENT INFORMATION

The following table provides significant segment financial data for the three and six months ended June 30, 2010 and June 30, 2009 (Millions):

Three Months Ended June 30, 2010	Electric	Gas	Other	Non-Regulated	Total

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 7 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2009 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 10, 2010.

Legal Proceedings

A putative class action Complaint was filed against Fitchburg on January 7, 2009 in Worcester Superior Court in Worcester, Massachusetts, captioned Bellerman v. Fitchburg Gas and Electric Light Company. On April 1, 2009 an Amended Complaint was filed in Worcester Superior Court and served on Fitchburg. The Amended Complaint seeks an unspecified amount of damages including the cost of temporary housing and alternative fuel sources, emotional and physical pain and suffering and property damages allegedly incurred by customers in connection with the loss of electric service during the ice storm in Fitchburg's service territory in December, 2008. The Amended Complaint includes M.G.L. ch. 93A claims for purported unfair and deceptive trade practices related to the December 2008 Storm. On September 4, 2009, the Superior Court issued its order on the Company's Motion to Dismiss the Complaint, granting it in part and denying it in part. The Company anticipates that the court will decide whether the lawsuit is appropriate for class action treatment in the fall of 2010. The Company continues to believe the suit is without merit, and will defend itself vigorously.

Regulatory Matters

Unitil Energy Rate Case Filing – On April 15, 2010 Unitil Energy filed a proposed base rate increase of $10.1 million which represents an increase of 6.5 percent above present rates. Unitil Energy requested temporary rates to be effective July 1, 2010. In addition, Unitil Energy requested adjustments for a Rate Year Step Adjustment, a Large Capital Project Step Adjustment and a long-term rate plan establishing step adjustments associated with the Company's Reliability Enhancement Plan and Vegetation Management Plan. On June 29, 2010, the NHPUC issued an order approving a temporary rate increase for Unitil Energy. The order provides for a temporary rate increase of $5.2 million (annual) effective July 1, 2010 which will be collected by applying a uniform per kilowatt-hour (kWh) surcharge of $0.00438 to each of Unitil Energy's current rate schedules. Of the $5.2 million rate increase, $500,000 of the increase is intended to permit Unitil Energy to annually recover expenses incurred during the December 2008 ice storm and another $500,000 of the increase is intended to fund higher planned vegetation management program expenditures. Once permanent rates are approved by the NHPUC, they will be reconciled to the date temporary rates were ordered, July 1, 2010. Final review and approval by the NHPUC of Unitil Energy's permanent base rate increase request is scheduled to be completed by February 2011.

Major Ice Storm – On December 11 and 12, 2008, a severe ice storm (December 2008 Ice Storm) struck the New England region. The Company spent approximately $24.0 million for the repair and replacement of electric distribution systems damaged during the storm, including $8.3 million related to capital construction and $15.8 million, including carrying charges, which has been deferred as a regulatory asset, based on orders issued by the MDPU and NHPUC, discussed below. Also, the Company expensed $3.0 million for professional fees related to the ice storm, in addition to normal anticipated expenditures related to emergency storm preparedness. The Company does not believe these storm restoration expenditures and the timing of cost recovery will have a material adverse impact on the Company's financial condition or results of operations. However, if it were ultimately determined that certain of these costs were not recoverable in rates, and/or the Company were required to incur additional costs to defend itself, there may be a significant impact on the Company's results of operations in future periods.

The MDPU conducted an investigation of Fitchburg's preparation for and response to the December 2008 Ice Storm during the first half of 2009. On November 2, 2009, the MDPU issued its order with respect to its investigation, finding that Fitchburg's preparation for, and response to, the December 2008 Ice Storm constituted a failure of the Company to meet its public service obligation to provide safe and reliable service, and ordered several remedial actions. First, the MDPU ordered a comprehensive independent management audit of Fitchburg's management practices. The management audit is expected to begin in the third quarter of 2010, subject to the selection of the audit firm by the MDPU from a list of qualified bidders who responded to an RFP issued by Fitchburg. Second, the MDPU directed Fitchburg to implement a series of operational and capital improvements which had been identified and recommended through the Company's self-assessment review. All of these operational and capital improvements have either been completed or are currently underway, and remain subject to MDPU review. Finally, the MDPU noted that the costs incurred by Fitchburg for the December 2008 Ice Storm would be subject to review in Fitchburg's next electric rate case, along with Fitchburg's rate of return.

On July 28, 2009, Fitchburg filed with the MDPU a petition for approval to defer and record as a regulatory asset costs associated with the repair of its electric distribution system from damage caused by the December 2008 Ice Storm for future recovery in rates. On December 30, 2009, the MDPU approved the request. The order of approval made no findings as to whether the subject expenses were reasonable or whether they can be recovered from ratepayers, and that the MDPU will consider the subsequent ratemaking treatment of the expense as part of Fitchburg's next rate case. As of June 30, 2010, Fitchburg has deferred approximately $13.5 million, including carrying charges, associated with the repair of its electric distribution system for future recovery in rates.

On August 26, 2009, Unitil Energy filed a petition with the NHPUC requesting an accounting order authorizing Unitil Energy to record as a regulatory asset costs associated with electric distribution system damage from the December 2008 Ice Storm until such time as the Commission issues a final order in Unitil Energy's next base rate case. On November 9, 2009, the NHPUC granted the requested accounting order, clarifying that such issues as the appropriate amount of the storm related expenses to be recovered, the timing and manner of recovery, and what, if any, return should be applied to the unrecovered balance are issues that are appropriate for review in Unitil Energy's rate case. As of June 30, 2010, Unitil Energy has deferred approximately $2.3 million, including carrying charges, associated with the repair of its electric distribution system for future recovery in rates.

On December 3, 2009, the NHPUC issued its “After-Action” report regarding its review of the December 2008 Ice Storm. The report stated that the NHPUC will commence an adjudicative proceeding to examine the reasonableness of Unitil’s response to the December 2008 Ice Storm. On January 8, 2010, the NHPUC opened a docket to consider Unitil Energy’s response to the December 2008 Ice Storm, including the timing of its response, its restoration priorities and strategies and the procurement and allocation of its resources in New Hampshire and Massachusetts. This matter remains pending.

Fitchburg – Electric Operations – On November 25, 2009, Fitchburg submitted to the MDPU its annual (2009) reconciliation of costs and revenues for Transition and Transmission under its restructuring plan (the Annual Reconciliation Filing). The rates were approved effective January 1, 2010, subject to reconciliation pending further investigation by the MDPU. This matter remains pending. A final order approving Fitchburg’s 2008 Annual Reconciliation Filing was issued on April 12, 2010.

On November 12, 2009, the Governor of Massachusetts signed House Bill 4329. The bill (i) requires the MDPU to establish regulations for utilities to respond to emergencies, (ii) requires utilities to file with the MDPU annual emergency response plans, (iii) authorizes the MDPU to impose penalties for a utility’s failure to comply with the MDPU’s regulations, and (iv) allows the chair of the MDPU to issue operational and management directives during an emergency. The bill also authorizes the Massachusetts Attorney General to bring a court action for receivership of a small investor-owned utility where an emergency exists and the utility has materially violated the MDPU’s standards for responding to emergencies. On February 2, 2010, the MDPU issued an order adopting regulations concerning the items required by House Bill 4329. Fitchburg has complied with the requirements concerning the filing of its emergency response plans and has met with MDPU Staff to review them.

Fitchburg – Gas Operations – On November 2, 2009 the MDPU issued an order finding that Fitchburg engaged in certain price stabilization practices for the 2007 / 2008 and 2008 / 2009 heating seasons without the MDPU’s prior approval and that Fitchburg’s gas purchasing practices were imprudent. As a result, the MDPU required Fitchburg to refund $4.6 million of natural gas costs, plus an appropriate carrying charge based on the prime lending rate, to its gas customers. The Company recorded a pre-tax charge of $4.9 million in the fourth quarter of 2009 based on the MDPU’s order. On November 30, 2009, the MDPU approved Fitchburg’s proposal to amortize its refund of natural gas costs to customers over a five-year period. Fitchburg has appealed the gas procurement Order to the Massachusetts Supreme Judicial Court. Fitchburg believes that its gas-procurement practices were consistent with those of other Massachusetts natural gas distribution companies and all relevant MDPU rules and orders and Massachusetts law. This appeal remains pending before the Massachusetts Supreme Judicial Court. Immediately after the MDPU opened its investigation of this matter in March 2009, Fitchburg ceased making the gas procurement purchases in question and filed a request with the MDPU for approval of a gas procurement plan for future gas purchases. This matter remains pending before the MDPU.

During the summer of 2009, Fitchburg operated its gas system entirely on local production from LNG for approximately three months due to construction on the lateral from Tennessee Gas Pipeline, which is the sole source of pipeline gas to Fitchburg. During this time Fitchburg provided gas LNG supply to all firm sales customers and also to the retail marketers for delivery to firm customers who have contracted for third party supply. Fitchburg’s management of this project was reviewed by the MDPU during its last Integrated Resource Plan proceeding, before the shutdown occurred. In its order, the MDPU stated it would investigate the costs associated with the shutdown in Fitchburg’s March 2010 Cost of Gas Adjustment (CGA) Clause filing when its actual costs will be reconciled with its projected costs. The Company received some data requests on the subject in the CGA proceeding, but no further investigation was necessary and the proposed CGA rates were approved as filed.

Fitchburg – Other – On July 16, 2008, the MDPU issued an order establishing a comprehensive plan for Revenue Decoupling to be adopted by gas and electric distribution utilities on a going-forward basis, through company-specific rate cases. Revenue decoupling is generally defined as a ratemaking mechanism designed to eliminate or reduce the dependence of a utility’s distribution revenues on sales, and is intended to remove the disincentive a utility has to promote efforts to reduce energy consumption by its customers or to facilitate installation of distributed generation to displace electricity delivered by the utility. It is anticipated that, with limited exceptions, all distribution companies will be operating under decoupling plans by year-end 2012.

On February 11, 2009, the Massachusetts Supreme Judicial Court (SJC) issued its decision in the Attorney General's (AG) appeal of the MDPU orders relating to Fitchburg's recovery of bad debt expense. The SJC agreed with the AG that the MDPU was required to hold hearings regarding changes in Fitchburg's tariff and rates, and on that basis vacated the MDPU orders. The Court, however, declined to rule on an appropriate remedy, and remanded the cases back to the MDPU for consideration of that issue. This matter remains pending before the MDPU.

On July 2, 2008, the Governor of Massachusetts signed into law "The Green Communities Act" (the GC Act), an energy policy statute designed to substantially increase energy efficiency and the development of renewable energy resources in Massachusetts. The GC Act provides for utilities to recover in rates the incremental costs associated with its various mandated programs. Several regulatory proceedings have been initiated to implement various provisions of the GC Act, including provisions for each distribution company to file enhanced three year energy efficiency investment plans, plans to establish smart grid pilot programs, proposals to purchase long-term contracts for renewable energy, special tariffs to allow the net metering of customer-owned renewable generation, and terms and conditions for purchasing supplier receivables. Three year energy efficiency investment plans, plans to establish smart grid pilot programs, and net metering tariffs have been approved by the MDPU. Proposals to purchase long-term contracts for renewable energy and terms and conditions for purchasing supplier receivables are under review in a separately designated docket.

Unitil Energy – Other – In July 2008, the State of New Hampshire enacted legislation that allows electric utilities to make investments in distributed energy resources, including energy efficiency and demand reduction technologies, as well as clean cogeneration and renewable generation. On August 5, 2009 Unitil Energy filed a plan for approval of investment in and rate recovery for Distributed Energy Resources. An order approving a settlement agreement for a time-of-use pilot program was issued on February 26, 2010. On June 11, 2010, the NHPUC issued an order on the remaining two proposed projects and cost recovery. The NHPUC denied one of the two projects, citing that the costs outweighed the benefits but found the other project to be in the public interest. Unitil Energy may also file step adjustments to base distribution rates to collect actual costs associated with authorized DER projects. Recovery of ongoing program management and reporting costs was not allowed at this time, however.

On February 25, 2010, a significant wind storm struck portions of the New England region, causing extensive damage to electric facilities and loss of service to significant numbers of customers of several utilities. An estimated one million electric customers in the region were affected, including approximately 85% of the Company's customers. Unitil Energy was able to restore power to 96% percent of its customers by day three, and its final customers, including those with individual service problems, were restored by day four. The Company spent approximately $7.2 million for the repair and replacement of electric distribution systems damaged during the storm, including $1.3 million related to capital construction and $5.9 million which has been deferred as a regulatory asset. Unitil Energy, in its base rate case filing discussed above, has requested recovery in rates for the costs associated with the emergency repair of its electric distribution system for damage caused by this storm. The amount and timing of the cost recovery of the storm restoration expenditures will be determined in the base rate case proceeding. The Company does not believe these storm restoration expenditures and the timing of cost recovery will have a material adverse impact on the Company's financial condition or results of operations. However, if it were ultimately determined that certain of these costs were not recoverable in rates, and/or the Company were required to incur additional costs to defend itself, there may be a significant impact on the Company's results of operations in future periods.

On June 17, 2010, Unitil Energy made its annual reconciliation and rate filing with the NHPUC under its restructuring plan, for rates effective August 1, 2010, including reconciliation of prior year costs and revenues. This matter remains pending.

Northern Utilities – On November 21, 2008, the MPUC issued an order approving a settlement agreement resolving a number of Notices of Probable Violation ("NOPVs") of certain safety related procedures and rules by Northern Utilities. Under the Settlement, Northern Utilities will incur total expenditures of approximately $3.8 million for safety related improvements to Northern's distribution system to ensure compliance with the relevant state and federal gas safety laws, for which no rate recovery will be allowed. These compliance costs were accrued by Northern Utilities prior to the acquisition date and the remaining amount on the Company's balance sheet at June 30, 2010 was $2.3 million.

On June 27, 2008 the MPUC opened an investigation of Northern Utilities' cast iron pipe replacement activities and the benefits of an accelerated replacement program for cast iron distribution pipe remaining in portions of Northern Utilities' Maine service areas. An Agreement resolving this matter, filed on behalf of Northern Utilities, the Maine Office of the Public Advocate, and several state legislator intervenors, was filed with the MPUC on July 6, 2010. Under the Agreement, Northern Utilities will proceed with a comprehensive upgrade and replacement program (the "Program"), which will provide for the systematic replacement of cast iron, wrought iron and bare steel pipe in Northern Utilities' natural gas distribution system in Portland and Westbrook, Maine and the conversion of the system to intermediate pressure. The Agreement establishes the objective of completing the Program by the end of the 2024 construction season. Under the Agreement, the parties agreed to support a cost recovery mechanism that will provide for the timely recovery of prudently-incurred costs of the Program. The features of this cost recovery mechanism will be finalized during Northern Utilities' next base rate case proceeding, which is anticipated to be filed in early 2011. On July 7, 2010, the MPUC considered the Agreement during its public deliberation session and voted to approve the Agreement. A written final order of approval has not yet been issued and, as a result, the matter remains pending.

Granite State Gas Transmission, Inc. – Base Rate Case Filing – On June 29, 2010, Granite filed a base transportation rate increase which would provide for an increase of approximately $3 million in annual revenue with the FERC. This represents Granite's first filing for a rate change since its last general rate case in 1997. The effect of this rate increase would result in an approximate increase of two percent in the total annual bill to an average residential natural gas heating customer served by Northern Utilities. The rate case filing reflects a rate base of $18.3 million, which includes $4.2 million of capital additions to be made through the end of 2010. In addition to its request for new base transportation rates, Granite is seeking FERC approval to implement a capital cost surcharge that would allow Granite to implement a rate surcharge annually to recover projected capital expenditures of approximately $12.7 million during the three-year time period 2011-2013. Granite expects the FERC regulatory process to take approximately six months with a rate order near the beginning of 2011.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 7 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2009 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 10, 2010.

The Company's past and present operations include activities that are generally subject to extensive and complex federal and state environmental laws and regulations. The Company believes it is in compliance with applicable environmental and safety laws and regulations, and the Company believes that as of June 30, 2010, there were no material losses reasonably likely to be incurred in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Included in Environmental Obligations on the Company's Consolidated Balance Sheet at June 30, 2010 are accrued liabilities totaling $12.0 million related to estimated future clean up costs for permanent remediation of a former manufactured gas plant (MGP) site at Sawyer Passway, located in Fitchburg, Massachusetts. The amounts recorded do not assume any amounts are recoverable from insurance companies or other third parties. Also included in Environmental Obligations on the Company's Consolidated Balance Sheet at June 30, 2010 are accrued liabilities totaling $2.3 million associated with Northern Utilities' environmental remediation obligations for former MGP sites. In addition to the amounts noted above, there are $0.2 million of accrued liabilities in Other Current Liabilities on the Company's Consolidated Balance Sheet at June 30, 2010 associated with Northern Utilities' environmental remediation obligations for former MGP sites. Corresponding Regulatory Assets were recorded to reflect that the recovery of these environmental remediation costs is probable through the regulatory process.

NOTE 8 – INCOME TAXES

The Company bills its customers sales tax in Massachusetts and Maine and consumption tax in New Hampshire. These taxes are remitted to the appropriate departments of revenue in each state and are excluded from revenues on the Company's Consolidated Statements of Earnings.

The Company evaluated its tax positions at December 31, 2009 and for the current interim reporting period ended June 30, 2010 in accordance with the FASB Codification, and has concluded that no adjustment for recognition, derecognition, settlement and foreseeable future events to any unrecognized tax liabilities or assets as defined by the FASB Codification is required. The Company does not have any unrecognized tax positions for which it is reasonably possible that the total amounts recognized will significantly change within the next 12 months. The Company classifies penalty and interest expense related to income tax liabilities as an income tax expense. There are no material interest and penalties recognized in the statement of earnings or accrued on the balance sheet.

The Company remains subject to examination by Federal, Massachusetts and New Hampshire tax authorities for the tax periods ended December 31, 2006; December 31, 2007; and December 31, 2008. Income tax filings for the year ended December 31, 2009 have been extended until September 15, 2010. In its Federal Income Tax return filings for the year ended December 31, 2008, the Company recognized net operating loss (NOL) carrybacks against its Federal Income Tax returns for the years ended December 31, 2006 and 2007 in the amounts of $5.0 million and $6.7 million, respectively. These NOL carrybacks resulted in a refund to the Company of $4.0 million which was received in November 2009. According to Internal Revenue Code rules, NOL refunds in excess of $2.0 million fall under the jurisdiction of the Joint Committee of Congress (Joint Committee) and are subject to review by the Internal Revenue Service (IRS) and attorneys of the Joint Committee. As a result, on December 30, 2009, the Company received notice that its Federal Income Tax return filings for the years ended December 31, 2006, December 31, 2007, and December 31, 2008 are under examination by the IRS. The IRS is currently performing fieldwork as part of their audit procedures. Currently, the Company believes that the ultimate resolution of this examination will not result in a material adverse effect to the Company's financial position or results of operations.

NOTE 9 – RETIREMENT BENEFIT OBLIGATIONS

The Company co-sponsors the Unitil Corporation Retirement Plan (Pension Plan), the Unitil Retiree Health and Welfare Benefits Plan (PBOP Plan), and the Unitil Corporation Supplemental Executive Retirement Plan (SERP) to provide certain pension and postretirement benefits for its retirees and current employees. Please see Note 9 to the Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2009 as filed with the SEC on February 10, 2010 for additional information regarding these plans.

The following table includes the key weighted average assumptions used in determining the Company's benefit plan costs and obligations:

	2010	2009
Used to Determine Plan Costs		
Discount Rate	**5.75%**	6.25%
Rate of Compensation Increase	**3.50%**	3.50%
Expected Long-term rate of return on plan assets	**8.50%**	8.50%
Health Care Cost Trend Rate Assumed for Next Year	**7.50%**	8.00%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year that Ultimate Health Care Cost Trend Rate is reached	**2017**	2017

The following tables provide the components of the Company's Retirement plan costs ($000's):

Three Months Ended June 30,	Pension Plan 2010	Pension Plan 2009	PBOP Plan 2010	PBOP Plan 2009	SERP 2010	SERP 2009
Service Cost	**$ 652**	$ 571	**$ 366**	$ 357	**$ 71**	$ 54
Interest Cost	**1,115**	1,074	**504**	579	**57**	45
Expected Return on Plan Assets	**(1,046)**	(1,108)	**(149)**	(89)	**—**	—
Prior Service Cost Amortization	**64**	66	**394**	428	**1**	(1)
Transition Obligation Amortization	**—**	—	**6**	5	**—**	—
Actuarial Loss Amortization	**602**	399	**—**	—	**33**	18
Sub-total	**1,387**	1,002	**1,121**	1,280	**162**	116
Amounts Capitalized and Deferred	**(481)**	(364)	**(237)**	(442)	**—**	—
Net Periodic Benefit Cost Recognized	**$ 906**	$ 638	**$ 884**	$ 838	**$162**	$116

Six Months Ended June 30,	Pension Plan 2010	Pension Plan 2009	PBOP Plan 2010	PBOP Plan 2009	SERP 2010	SERP 2009
Service Cost	**$ 1,304**	$ 1,142	**$ 733**	$ 714	**$142**	$108
Interest Cost	**2,229**	2,147	**1,008**	1,157	**114**	90
Expected Return on Plan Assets	**(2,091)**	(2,216)	**(299)**	(178)	**—**	—
Prior Service Cost Amortization	**127**	132	**789**	856	**2**	(1)
Transition Obligation Amortization	**—**	—	**11**	10	**—**	—
Actuarial Loss Amortization	**1,203**	798	**—**	—	**66**	36
Sub-total	**2,772**	2,003	**2,242**	2,559	**324**	233
Amounts Capitalized and Deferred	**(1,103)**	(646)	**(587)**	(800)	**—**	—
Net Periodic Benefit Cost Recognized	**$ 1,669**	$ 1,357	**$1,655**	$1,759	**$324**	$233

Employer Contributions

On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA were new minimum funding rules which went into effect for plan years beginning in 2008. The funding target was 100% of a plan's liability (as determined under the PPA) with any shortfall amortized over seven years, with lower (92%—100%) funding targets available to well-funded plans during the transition period. Due to the significant declines in the valuation of capital markets during 2008, the Worker, Retiree, and Employer Recovery Act of 2008 (Recovery Act) was signed into law on December 23, 2008. Included in the Recovery Act are temporary modifications to the minimum funding rules set forth in the PPA such that all plans, except those that were subject to deficit reduction contribution requirements in 2007, are allowed to amortize any shortfall from the lower funding targets, rather than the 100% target, for the 2008—2010 plan years. This did not affect the Company's Pension Plan in 2009 as its Pension Plan was 94% funded under the requirements of the Employee Retirement Income Security Act of 1974 (ERISA) as of January 1, 2008 and met the exemption from the shortfall amortization. As of June 30, 2010, the Company had made $1.8 million of contributions to the Pension Plan in 2010. The Company presently anticipates contributing an additional $2.7 million to fund its Pension Plan in 2010.

As of June 30, 2010, the Company had made $1.7 million and $26,000 of contributions to the PBOP and SERP Plans, respectively, in 2010. The Company presently anticipates contributing an additional $1.8 million and $27,000 to the PBOP and SERP Plans, respectively, in 2010.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in the Company's internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2009 as filed with the SEC on February 10, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no sales of unregistered equity securities by the Company for the fiscal period ended June 30, 2010.

Pursuant to the written trading plan under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended (the Exchange Act), adopted by the Company on March 25, 2010, the Company will periodically repurchase shares of its Common Stock on the open market related to Employee Length of Service Awards and the stock portion of the Directors' annual retainer. There is no pool or maximum number of shares related to these purchases; however, the trading plan will automatically terminate when $80,700 in value of shares have been purchased, or, if sooner, on March 25, 2011.

The Company may suspend or terminate this trading plan at any time, so long as the suspension or termination is made in good faith and not as part of a plan or scheme to evade the prohibitions of Rule 10b-5 under the Exchange Act, or other applicable securities laws.

The Company's repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs
4/1/10 – 4/30/10	—	—	—
5/1/10 – 5/31/10	—	—	—
6/1/10 – 6/30/10	371	$ 19.91	371
Total	371	$ 19.91	371

Item 5. Other Information

On July 27, 2010, the Company issued a press release announcing its results of operations for the three- and six-month periods ended June 30, 2010. The press release is furnished with this Quarterly Report on Form 10-Q as Exhibit 99.1.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f))for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Laurence M. Brock, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Unitil Corporation (the "Company") on Form 10-Q for the period ending June 30, 2010 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned Robert G. Schoenberger, Chief Executive Officer and President, Mark H. Collin, Chief Financial Officer and Laurence M. Brock, Chief Accounting Officer, certifies, to the best knowledge and belief of the signatory, pursuant to 18 U.S.C. section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Unitil Reports Second Quarter Results

Hampton, NH – July 27, 2010: Unitil Corporation ("Company") (NYSE: UTL) (www.unitil.com) today announced a net loss of ($2.1) million for the second quarter of 2010, compared to earnings of $0.2 million for the second quarter of 2009. For the six months ended June 30, 2010, the Company reported net income of $4.4 million compared to $9.3 million for the same period of 2009. Results for the second quarter were driven primarily by higher depreciation and interest expense and lower gas sales margins due to warmer regional temperatures.

Earnings (loss) per common share (EPS) were ($0.19) and $0.41 for the three and six month periods ended June 30, 2010 compared with $0.03 and $1.10 for the same periods of 2009. The Company's results of operations for 2010 are not directly comparable with 2009 due to the issuance of 5.0 million common shares between December 2008 and June 2009 to complete the financing of the Company's acquisition of Northern Utilities Inc. (Northern Utilities) and Granite State Gas Transmission, Inc. (Granite), the ("Acquisition").

"2010 is an important transition year for the Company as we initiate the process of resetting rates in each of our regulatory jurisdictions," said Bob Schoenberger, Unitil's Chairman and Chief Executive Officer. "This regulatory agenda, which we expect to complete over the next twelve to eighteen months, will support our ongoing investment in the reliability and safety of our gas and electric distribution systems."

The Company filed two base rate cases in the second quarter of 2010, one for its New Hampshire electric distribution utility, Unitil Energy Systems, Inc. (Unitil Energy) and one for its natural gas pipeline subsidiary, Granite. The New Hampshire Public Utilities Commission has approved a temporary rate increase of $5.2 million on an annual basis, including recovery of 2008 ice storm costs, for Unitil Energy effective July 1, 2010. A decision from the Federal Energy Regulatory Commission on Granite's request for an increase of approximately $3 million in annual revenues is expected in January 2011. Additionally, the Company's two other distribution utilities, Fitchburg Gas and Electric Light Company and Northern Utilities, are currently preparing base rate cases and anticipate filing them with their respective regulatory commissions within the next year.

Natural gas sales margin decreased $2.4 million and $3.8 million in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009. Total natural gas therm sales were 5.1% and 6.0% lower in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. Lower gas therm sales in the Company's utility service territories reflect the effect of warmer temperatures in 2010, where there were approximately 22% and 12% fewer Heating Degree Days in the three and six month periods, respectively, compared to the prior year.

Electric sales margin increased $0.4 million and $0.1 million in the three and six months ended June 30, 2010 compared to the same periods in 2009, reflecting higher electric kilowatt-hour (kWh) sales. Total kWh sales increased 5.3% and 1.5% in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009 reflecting increased sales to all customer groups.

Selected Financial Data for 2010 and 2009 is presented in the following table:

Unitil Corporation – Condensed Financial Data

(Millions, except Per Share data)(Unaudited)

	Three Months Ended June 30,			Six Months Ended June 30,		
	2010	2009	Change	2010	2009	Change
Gas Therm Sales:						
Residential	6.6	6.9	(4.3%)	24.4	26.2	(6.9%)
Commercial/Industrial	27.0	28.5	(5.3%)	81.6	86.6	(5.8%)
Total Gas Therm Sales	**33.6**	**35.4**	**(5.1%)**	**106.0**	**112.8**	**(6.0%)**
Electric kWh Sales:						
Residential	148.3	141.1	5.1%	326.0	321.7	1.3%
Commercial/Industrial	245.8	233.2	5.4%	483.3	475.3	1.7%
Total Electric kWh Sales	**394.1**	**374.3**	**5.3%**	**809.3**	**797.0**	**1.5%**
Gas Revenues	$ 23.7	$ 23.4	$ 0.3	$ 84.8	$ 95.8	$(11.0)

Gas Sales Margin	**8.6**	**11.0**	**(2.4)**	**30.6**	**34.4**	**(3.8)**
Electric Revenues	46.6	47.0	(0.4)	97.4	109.1	(11.7)
Purchased Electricity	33.4	34.2	(0.8)	70.1	81.9	(11.8)
Electric Sales Margin	**13.2**	**12.8**	**0.4**	**27.3**	**27.2**	**0.1**
Usource Sales Margin	**1.1**	**1.1**	**—**	**2.2**	**2.2**	**—**
Total Sales Margin:	**22.9**	**24.9**	**(2.0)**	**60.1**	**63.8**	**(3.7)**
Operation & Maintenance Expenses	11.6	12.0	(0.4)	23.8	22.4	1.4
Depreciation, Amortization, Taxes & Other	8.9	9.0	(0.1)	23.1	23.6	(0.5)
Interest Expense, Net	4.5	3.7	0.8	8.8	8.5	0.3
Earnings (Loss) Applicable to Common Shareholders:	**$ (2.1)**	**$ 0.2**	**$ (2.3)**	**$ 4.4**	**$ 9.3**	**$ (4.9)**
Earnings (Loss) Per Share	**$ (0.19)**	**$ 0.03**	**$ (0.22)**	**$ 0.41**	**$ 1.10**	**$(0.69)**

O&M expenses decreased $0.4 million and increased $1.4 million for the three and six months ended June 30, 2010, respectively, compared to 2009. The changes in O&M reflect higher utility operating costs and lower professional fees. The increases in utility operating expenses reflect the full integration of Northern Utilities and Granite State into the Company's consolidated operating results.

Depreciation and Amortization expense increased $0.7 million and $1.5 million in the three and six months ended June 30, 2010, respectively, compared to the same periods in 2009 reflecting normal utility plant additions.

Interest Expense, Net increased $0.8 million and $0.3 million in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009. In March 2010, Unitil Energy and Northern Utilities collectively issued $40 million of long-term debt which is contributing to the higher interest expense in the three and six month periods. Furthermore, net interest expense in 2010 reflects the permanent financing of Northern Utilities and Granite State, which was completed in the second quarter of 2009.

Federal and State Income Taxes decreased by $2.5 million due to lower pre-tax income in 2010 compared to 2009.

All other items increased $0.3 million and $0.5 million in the three and six month periods ended June 30, 2010, respectively, compared to the same periods in 2009, primarily reflecting higher property and payroll taxes.

Also in the second quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

Additionally, EPS in the three and six months ended June 30, 2010 reflect a higher number of average shares outstanding year over year. Between December 2008 and June 2009 the Company issued 5.0 million common shares to complete the Acquisition. As a result of the Acquisition and the issuance of new common shares, consolidated results for the Company in the current period may not be directly comparable to prior period results until such time as the Acquisition and stock issuance is fully reflected in both reporting periods. Also, the Company's results are expected to reflect the seasonal nature of the acquired natural gas businesses. Accordingly, the Company expects that results of operations will be positively affected during the first and fourth quarters, when sales of natural gas are typically higher, and negatively affected during the second and third quarters, when gas operating and maintenance expenses usually exceed sales margins in the period.

The Company will hold a quarterly conference call to discuss second quarter 2010 results on Tuesday, July 27, 2010, at 2:00 p.m. Eastern Time. This call is being webcast by Thomson Financial and can be accessed in the Investor Relations section of Unitil Corporation's website, www.unitil.com.

About Unitil

Unitil Corporation is a public utility holding company headquartered in Hampton, New Hampshire. Unitil's principal business is the local distribution of electricity and natural gas in the states of New Hampshire, Massachusetts and Maine. Unitil is the parent company of three distribution utilities: (i) Unitil Energy Systems, Inc., which provides electric service in the southeastern seacoast and state capital regions of New Hampshire; (ii) Fitchburg Gas and Electric Light Company, which provides both electric and natural gas service in the greater Fitchburg area of north central Massachusetts; and (iii) Northern Utilities, Inc., which provides natural gas service in southeastern New Hampshire and portions of southern and central Maine. In addition, Unitil is the parent company of Granite State Gas Transmission, Inc., an interstate natural gas transmission pipeline in New Hampshire and Maine. Together, Unitil's operating utilities serve approximately 100,500 electric customers and 70,000, natural gas customers. Unitil's non-regulated business, Usource, also provides energy brokering and advisory services to large commercial and industrial customers in the northeastern United States.

This press release contains forward-looking statements, which are subject to the inherent uncertainties in predicting future results and conditions. All statements, other than statements of historical fact, are forward-looking statements. Certain factors that could cause the actual results to differ materially from those projected in these forward-looking statements include, but are not limited to the following: variations in weather; changes in the regulatory environment; customers' preferences on energy sources; general economic conditions; increased competition; fluctuations in supply, demand, transmission capacity and prices for energy commodities; and other uncertainties, all of which are difficult to predict, and many of which are beyond the control of Unitil Corporation.

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Unitil Corporation (Unitil or the Company) is a public utility holding company headquartered in Hampton, New Hampshire. Unitil is subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. On December 1, 2008, the Company purchased: (i) all of the outstanding capital stock of Northern Utilities, Inc. (Northern Utilities), a natural gas distribution utility serving customers in New Hampshire and Maine, from Bay State Gas Company and (ii) all of the outstanding capital stock of Granite State Gas Transmission, Inc. (Granite), an interstate gas transmission pipeline company primarily serving the needs of Northern Utilities, from NiSource, Inc. (the Acquisitions).

Unitil's principal business is the local distribution of electricity and natural gas throughout its service territory in the states of New Hampshire, Massachusetts and Maine. Unitil is the parent company of three wholly-owned distribution utilities:

i) Unitil Energy Systems, Inc. (Unitil Energy), which provides electric service in southeastern seacoast and state capital regions of New Hampshire;

ii) Fitchburg Gas and Electric Light Company (Fitchburg), which provides both electric and natural gas service in the greater Fitchburg area of north central Massachusetts; and

iii) Northern Utilities, which provides natural gas service in southeastern New Hampshire and portions of southern and central Maine, including the city of Portland and the Lewiston-Auburn area.

Unitil Energy, Fitchburg and Northern Utilities are collectively referred to as the "distribution utilities." Together, the distribution utilities serve approximately 100,500 electric customers and 70,000 natural gas customers in their service territory.

In addition, Unitil is the parent company of Granite, a natural gas inter-state transmission pipeline, regulated by the FERC, operating 87 miles of underground gas transmission pipeline primarily located in Maine and New Hampshire. Granite provides Northern Utilities with interconnection to three major natural gas pipelines and access to pipeline supplies.

The distribution utilities are local "pipes and wires" operating companies and Unitil had an investment in Net Utility Plant of $463.6 million at September 30, 2010. Unitil's total operating revenue includes revenue to recover the approved cost of purchased electricity and natural gas in rates on a fully reconciling basis. As a result of this reconciling rate structure, the Company's earnings are not directly affected by changes in the cost of purchased electricity and natural gas. Earnings from Unitil's utility operations are primarily derived from the return on investment in the utility assets of the three distribution utilities and Granite.

Unitil also conducts non-regulated operations principally through Usource Inc. and Usource L.L.C. (collectively, "Usource"), which is wholly-owned by Unitil Resources Inc., a wholly-owned subsidiary of Unitil. Usource provides energy brokering and consulting services to large commercial and industrial customers in the northeastern United States. The Company's other subsidiaries include Unitil Service Corp., which provides, at cost, a variety of administrative and professional services to Unitil's affiliated companies, Unitil Realty Corp., which owns and manages Unitil's corporate office building and property located in Hampton, New Hampshire and Unitil Power Corp., which formerly functioned as the full requirements wholesale power supply provider for Unitil Energy. Unitil's consolidated net income includes the earnings of the holding company and these subsidiaries.

RATES AND REGULATION

Base Rate Cases:

On April 15, 2010, Unitil Energy filed a proposed annual base rate increase of $10.1 million with the New Hampshire Public Utilities Commission (NHPUC), which represents an increase of 6.5 percent above present rates. Unitil Energy's filing also included a long-term rate plan establishing base rate step adjustments associated with future planned capital additions and targeted reliability enhancement and vegetation management programs. In its rate filing, Unitil Energy requested that rates initially be set at a lower level on a temporary basis.

On June 29, 2010, the NHPUC issued an order approving a temporary rate increase for Unitil Energy. The order provides for a temporary rate increase of $5.2 million (annual) effective July 1, 2010 which will be collected by applying a uniform per kilowatt-hour (kWh) surcharge of $0.00438 to each of Unitil Energy's current rate schedules. Of the $5.2 million rate increase, $500,000 of the increase is intended to permit Unitil Energy to annually recover expenses incurred during the December 2008 ice storm and another $500,000 of the increase is intended to fund higher planned vegetation management program expenditures. Once permanent rates are approved by the NHPUC, they will be reconciled to the date temporary rates were ordered, July 1, 2010. Final review and approval by the NHPUC of Unitil Energy's permanent base rate increase request is currently scheduled to be completed by February 2011.

On June 29, 2010, Granite filed for an initial proposed base transportation rate increase with the FERC, which is Granite's first filing for a rate change since its last general rate case in 1997. If approved as filed, the initial rate increase would provide for an increase of approximately $2.3 million in revenue on an annual basis. In addition to its request for new base transportation rates, Granite, in its rate case filing, is seeking approval to implement a capital cost surcharge that would allow Granite to implement a rate surcharge annually to recover certain projected capital expenditures in future periods. Granite expects the FERC regulatory process to result in an effective date of January 1, 2011 for the requested rate increase.

Additionally, Fitchburg and Northern Utilities are currently preparing base rate cases and anticipate completing them with their respective state regulatory commissions within the next twelve months.

Regulation:

Unitil is subject to comprehensive regulation by federal and state regulatory authorities. Unitil and its subsidiaries are subject to regulation as a holding company system by the FERC under the Energy Policy Act of 2005 in regards to certain bookkeeping, accounting and reporting requirements. Unitil's utility operations related to wholesale and interstate energy business activities are also regulated by FERC. Unitil's distribution utilities are subject to regulation by the applicable state public utility commissions, in regards to their rates, issuance of securities and other accounting and operational matters: Unitil Energy is subject to regulation by the NHPUC; Fitchburg is subject to regulation by the Massachusetts Department of Public Utilities (MDPU); and Northern Utilities is regulated by the NHPUC and the Maine Public Utilities Commission (MPUC). Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's distribution utilities deliver electricity and/or natural gas to all customers in their service territory, at rates established under traditional cost of service regulation. Under this regulatory structure, Unitil's distribution utilities recover the cost of providing distribution service to their customers based on a historical test year, in addition to earning a return on their capital investment in utility assets. As a result of a restructuring of the utility industry in New Hampshire, Massachusetts and Maine, Unitil's customers have the opportunity to purchase their electricity or natural gas supplies from third party suppliers. A majority of Unitil's largest commercial and industrial (C&I) customers purchase their electric and natural gas supplies from third party suppliers. However, most residential and small customers continue to purchase their electric and natural gas supplies through Unitil's distribution utilities. Unitil's distribution utilities purchase electricity or natural gas from unaffiliated wholesale suppliers and recover the actual costs of these supplies on a pass-through basis, as well as certain costs associated with industry restructuring, through reconciling rate mechanisms that are periodically adjusted.

Table of Contents

The regulatory process in both New Hampshire and Maine, in connection with those states' approvals of the Acquisitions, included the negotiation and filing of settlement agreements reflecting commitments by Unitil with respect to Northern Utilities' rates, customer service and operations. The settlement agreements were separately negotiated and filed in each state but reflect a number of common features. For additional discussion, please refer to Unitil's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 10, 2010.

CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for the Company's future operations, are forward-looking statements.

These statements include declarations regarding the Company's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include those described in Item 1A (Risk Factors) and the following:

- The Company's ability to achieve the estimated potential synergy savings attributable to the Acquisitions;
- The Company's ability to retain existing customers and gain new customers;
- Variations in weather;
- Major storms;
- Recovery of deferred major storm costs;
- Recovery of energy commodity costs;
- Changes in the regulatory environment;
- Customers' preferences on energy sources;
- Interest rate fluctuation and credit market concerns;
- General economic conditions that could have an adverse impact on the availability of credit and liquidity resources generally and could jeopardize certain of our counterparty obligations, including those of our insurers and financial institutions;
- Fluctuations in supply, demand, transmission capacity and prices for energy commodities;
- Increased competition; and
- Customers' performance under multi-year energy brokering contracts.

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements.

RESULTS OF OPERATIONS

The following section of MD&A compares the results of operations for each of the two fiscal periods ended September 30, 2010 and September 30, 2009 and should be read in conjunction with the accompanying Consolidated Financial Statements and the accompanying Notes to Consolidated Financial Statements included in Part I, Item 1 of this report.

Between December 2008 and June 2009 the Company issued 5.0 million common shares to complete the Acquisitions. As a result of the Acquisitions and the issuance of new common shares, consolidated results for the Company in the current period may not be directly comparable to prior period results until such time as the Acquisitions and stock issuance is fully reflected in both reporting periods. Also, the Company's results are expected to reflect the seasonal nature of the acquired natural gas businesses. Accordingly, the Company expects that results of operations will be positively affected during the first and fourth quarters, when sales of natural gas are typically higher, and negatively affected during the second and third quarters, when gas operating and maintenance expenses usually exceed sales margins in the period.

Earnings Overview

The Company's Earnings (Loss) Applicable to Common Shareholders was a net loss of ($0.1) million for the third quarter of 2010, an improvement of $0.5 million compared to the third quarter of 2009. For the nine months ended September 30, 2010, the Company reported net income of $4.3 million compared to $8.7 million for the same period of 2009. Results for the third quarter were driven primarily by higher electric sales margins reflecting favorable summer weather and higher rates, partially offset by increases in operating and interest costs.

Earnings (loss) per common share (EPS) were ($0.01) and $0.40 for the three and nine month periods ended September 30, 2010 compared with ($0.06) and $0.94 for the same periods of 2009. The Company's results of operations for 2010 are not directly comparable with 2009 due to the issuance of 5.0 million common shares between December 2008 and June 2009 to complete the financing of the Company's acquisitions of Northern Utilities and Granite.

Natural gas sales margin was unchanged in the third quarter of 2010 compared to the same period in 2009. For the nine month period ended September 30, 2010, gas sales margin was $3.8 million lower compared to the same period in 2009. Total natural gas therm sales were 2.7% and 5.5% lower in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. Lower gas therm sales in the Company's utility service territories reflect the effect of warmer winter temperatures earlier in 2010, where there were approximately 13% fewer Heating Degree Days in the nine month period, compared to the prior year.

Electric sales margin increased $2.4 million and $2.5 million in the three and nine months ended September 30, 2010 compared to the same periods in 2009, reflecting higher electric kilowatt-hour (kWh) sales and an electric rate increase implemented in July 2010 for the Company's New Hampshire electric distribution utility. Total kWh sales increased 11.1% and 4.9% in the three and nine months ended September 30, 2010, respectively, compared to the same periods in 2009 reflecting increased sales to all customer groups. The increased sales reflect above average summer temperatures in the Company's utility service territories in 2010. According to ISO-New England, the grid operator for the New England region, July was the second-hottest July in New England since 1960 and New England's all-time electricity consumption for one month was recorded in that month.

Operation and Maintenance (O&M) expenses increased $1.1 million and $2.5 million for the three and nine months ended September 30, 2010, respectively, compared to 2009. The changes in O&M expenses reflect higher utility operating costs and professional fees. Utility operating expenses reflect the full integration of Northern Utilities and Granite into the Company's consolidated operating results.

Depreciation and Amortization expense decreased $0.4 million and increased $1.1 million in the three and nine months ended September 30, 2010, respectively, compared to the same periods in 2009, reflecting higher depreciation on normal utility plant additions partially offset by lower amortization expense in the current year.

Interest Expense, Net increased $0.7 million and $1.0 million in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. In March 2010, Unitil Energy and Northern Utilities collectively issued $40 million of long-term debt which is contributing to the higher interest expense in the three and nine month periods.

Federal and State Income Taxes decreased by $2.1 million for the nine month period due to lower pre-tax income in 2010 compared to 2009.

All other expenses increased $0.3 million and $0.8 million in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009, primarily reflecting higher property and payroll taxes.

Usource, our non-regulated energy brokering business, recorded revenues of $1.2 million and $3.4 million in the three and nine month periods ended September 30, 2010, respectively, increases of $0.2 million and $0.2 million, respectively compared to the same periods of 2009. Usource's revenues are primarily derived from fees and charges billed to suppliers as customers take delivery of energy from these suppliers under term contracts brokered by Usource.

Additionally, EPS for the nine months ended September 30, 2010 reflects a higher number of average shares outstanding year over year, as discussed above.

In 2009, Unitil's annual common dividend was $1.38, representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock. At its January, 2010, March, 2010, June 2010 and September 2010 meetings, the Unitil Board of Directors declared quarterly dividends on the Company's common stock of $0.345 per share.

A more detailed discussion of the Company's results of operations for the three and nine months ended September 30, 2010 and a period-to-period comparison of changes in financial position are presented below.

Gas Sales, Revenues and Margin

Therm Sales – Total natural gas therm sales were 2.7% and 5.5% lower in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. Lower gas therm sales in the Company's utility service territories reflect the effect of milder winter temperatures earlier in 2010, where there were approximately 13% fewer Heating Degree Days in the nine month period, compared to the prior year.

The following table details total firm therm sales for the three and nine months ended September 30, 2010 and 2009, by major customer class:

Therm Sales (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	2009	Change	% Change	2010	2009	Change	% Change
Residential	**2.5**	2.9	(0.4)	(13.8%)	**26.9**	29.1	(2.2)	(7.6%)
Commercial / Industrial	**19.3**	19.5	(0.2)	(1.0%)	**100.9**	106.1	(5.2)	(4.9%)
Total	**21.8**	22.4	(0.6)	(2.7%)	**127.8**	135.2	(7.4)	(5.5%)

Table of Contents

Gas Operating Revenues and Sales Margin – The following table details total Gas Operating Revenues and Sales Margin for the three and nine months ended September 30, 2010 and 2009:

Gas Operating Revenues and Sales Margin (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	**2009**	**$ Change**	**% Change(1)**	**2010**	**2009**	**$ Change**	**% Change(1)**
Gas Operating Revenue:								
Residential	**$ 6.7**	$ 5.7	$ 1.0	6.6%	**$ 42.5**	$ 45.9	$ (3.4)	(3.1%)
Commercial / Industrial	**10.7**	9.5	1.2	7.9%	**59.7**	65.1	(5.4)	(4.8%)
Total Gas Operating Revenue	**$ 17.4**	$ 15.2	$ 2.2	14.5%	**$ 102.2**	$ 111.0	$ (8.8)	(7.9%)
Cost of Gas Sales:								
Purchased Gas	**$ 8.9**	$ 6.9	$ 2.0	13.2%	**$ 61.5**	$ 67.1	$ (5.6)	(5.0%)
Conservation & Load Management	**0.6**	0.4	0.2	1.3%	**2.2**	1.6	0.6	0.5%
Total Cost of Gas Sales	**$ 9.5**	$ 7.3	$ 2.2	14.5%	**$ 63.7**	$ 68.7	$ (5.0)	(4.5%)
Gas Sales Margin	**$ 7.9**	$ 7.9	$ —	—	**$ 38.5**	$ 42.3	$ (3.8)	(3.4%)

(1) Represents change as a percent of Total Gas Operating Revenue.

Total Gas Operating Revenues increased $2.2 million, or 14.5%, and decreased $8.8 million, or 7.9%, in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. Total Gas Operating Revenues include the recovery of the approved cost of gas sales, which are recorded as Purchased Gas and Conservation & Load Management (C&LM) in Operating Expenses. The increase in Total Gas Operating Revenues in the third quarter of 2010 reflects higher Purchased Gas revenues of $2.0 million and higher C&LM revenues of $0.2 million. The decrease in Total Gas Operating Revenues in the first nine months of 2010 reflects lower Purchased Gas revenues of $5.6 million and lower gas sales margin of $3.8 million, partially offset by higher C&LM revenues of $0.6 million.

The Purchased Gas and C&LM components of Gas Operating Revenues increased a combined $2.2 million, or 14.5%, of Total Gas Operating Revenue and decreased a combined $5.0 million, or 4.5%, of Total Gas Operating Revenue in the three and nine month periods ended September 30, 2010 compared to the same periods in 2009. The increase in the third quarter of 2010 is due to higher natural gas commodity costs and increased spending on energy efficiency and conservation programs, partially offset by lower natural gas sales. The decrease in the nine month period of 2010 primarily reflects lower sales of natural gas, partially offset by increased spending on energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Natural gas sales margin was unchanged in the third quarter of 2010 compared to the same period in 2009. For the nine month period ended September 30, 2010, gas sales margin was $3.8 million lower compared to the same period in 2009. The decrease in the nine month period principally reflects lower sales of natural gas, which reflect the effect of the milder winter heating season.

Electric Sales, Revenues and Margin

Kilowatt-hour Sales – Total electric kWh sales increased 11.1% and 4.9% in the three and nine months ended September 30, 2010, respectively, compared to the same periods in 2009 reflecting increased sales to all customer groups. The increased sales reflect higher than average summer temperatures in the Company's utility service territories in 2010 where there were approximately 61% more Cooling

Degree Days in the three month period ended September 30, 2010, compared to the prior year. According to ISO-New England, the grid operator for the New England region, July was the second-hottest July in New England since 1960 and New England's all-time electricity consumption for one month was recorded in that month.

The following table details total kWh sales for the three and nine months ended September 30, 2010 and 2009 by major customer class:

kWh Sales (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	**2009**	**Change**	**% Change**	**2010**	**2009**	**Change**	**% Change**
Residential	**198.7**	172.1	26.6	15.5%	**524.7**	493.8	30.9	6.3%
Commercial / Industrial	**284.6**	263.0	21.6	8.2%	**767.9**	738.2	29.6	4.0%
Total	**483.3**	435.1	48.2	11.1%	**1,292.6**	1,232.1	60.5	4.9%

Electric Operating Revenues and Sales Margin – The following table details total Electric Operating Revenues and Sales Margin for the three and nine month periods ended September 30, 2010 and 2009:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	**2009**	**$ Change**	**% Change(1)**	**2010**	**2009**	**$ Change**	**% Change(1)**
Electric Operating Revenue:								
Residential	**$ 31.0**	$ 27.9	$ 3.1	5.7%	**$ 82.9**	$ 84.3	$ (1.4)	(0.9%)
Commercial / Industrial	**26.5**	26.3	0.2	0.4%	**72.0**	79.0	(7.0)	(4.3%)
Total Electric Operating Revenue	**$ 57.5**	$ 54.2	$ 3.3	6.1%	**$ 154.9**	$ 163.3	$ (8.4)	(5.2%)
Cost of Electric Sales:								
Purchased Electricity	**$ 39.6**	$ 38.9	$ 0.7	1.3%	**$ 107.1**	$ 119.5	$ (12.4)	(7.6%)
Conservation & Load Management	**1.0**	0.8	0.2	0.4%	**3.6**	2.1	1.5	0.9%
Total Cost of Electric Sales	**$ 40.6**	$ 39.7	$ 0.9	1.7%	**$ 110.7**	$ 121.6	$ (10.9)	(6.7%)
Electric Sales Margin	**$ 16.9**	$ 14.5	$ 2.4	4.4%	**$ 44.2**	$ 41.7	$ 2.5	1.5%

(1) Represents change as a percent of Total Electric Operating Revenue.

Total Electric Operating Revenue, increased by $3.3 million, or 6.1%, and decreased by $8.4 million, or 5.2%, in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. Total Electric Operating Revenues include the recovery of the approved cost of electric sales, which are recorded as Purchased Electricity and C&LM in Operating Expenses. The increase in Total Electric Operating Revenues in the third quarter of 2010 reflects higher Purchased Electricity revenues of $0.7 million, higher C&LM revenues of $0.2 million and higher electric sales margin of $2.4 million. The decrease in Total Electric Operating Revenues in the first nine months of 2010 reflects lower Purchased Electricity revenues of $12.4 million, partially offset by higher C&LM revenues of $1.5 million and higher electric sales margin of $2.5 million.

The Purchased Electricity and C&LM components of Total Electric Operating Revenues increased a combined $0.9 million, or 1.7%, and decreased a combined $10.9 million, or 6.7%, of Total Electric Operating Revenues in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. The increase in the three month period primarily reflects higher kWh sales in the current period. The decrease in the nine month period primarily reflects an increase in the amount of electricity purchased by customers directly from third-party suppliers and lower electric commodity costs, partially offset by higher spending on energy efficiency and conservation programs and increased sales. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin increased $2.4 million and $2.5 million in the three and nine months ended September 30, 2010 compared to the same periods in 2009, reflecting higher electric kilowatt-hour (kWh) sales and higher rates, implemented in July 2010 for Unitil Energy Systems, Inc., the Company's New Hampshire electric distribution utility.

Operating Revenue - Other

The following table details total Other Revenue for the three and nine months ended September 30, 2010 and 2009:

Other Revenue (000's)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	**2009**	**$ Change**	**% Change**	**2010**	**2009**	**$ Change**	**% Change**
Other	**$ 1.2**	$ 1.0	$ 0.2	20.0%	**$ 3.4**	$ 3.2	$ 0.2	6.3%
Total Other Revenue	**$ 1.2**	$ 1.0	$ 0.2	20.0%	**$ 3.4**	$ 3.2	$ 0.2	6.3%

Total Other Revenue increased $0.2 million, or 20.0%, and $0.2 million, or 6.3%, in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. Other Revenues represents revenues from the Company's non-regulated energy brokering business, Usource.

Operating Expenses

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas increased $2.0 million, or 29.0%, and decreased $5.6 million, or 8.4%, in the three and nine months ended September 30, 2010, respectively, compared to the same periods in 2009. The increase in the third quarter of 2010 is due to higher natural gas commodity costs partially offset by lower sales of natural gas. The decrease in the nine month period of 2010 primarily reflects lower sales of natural gas. The Company recovers the approved costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect earnings.

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity increased $0.7 million, or 1.8%, and decreased $12.4 million, or 10.4%, in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. The increase in the three month period primarily reflects increased sales in the current period. The decrease in the nine month period primarily reflects an increase in the amount of electricity purchased by customers directly from third-party suppliers and lower electric commodity costs, partially offset by increased sales. The Company recovers the approved costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect earnings.

Operation and Maintenance (O&M) – O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total O&M expenses increased $1.1 million, or 9.2%, and $2.5 million, or 7.3%, for the three and nine months ended September 30, 2010, respectively, compared to the same periods in 2009. The changes in O&M expenses reflect higher utility operating costs and professional fees. Utility operating costs primarily consist of compensation and benefit costs, utility distribution and transmission system maintenance costs, bad debt expenses, office expenses and insurance costs. O&M expenses reflect the full integration of Northern Utilities and Granite State into the Company's consolidated operating results.

Conservation & Load Management – Conservation and Load Management expenses are expenses associated with the development, management, and delivery of the Company's energy efficiency programs. Energy efficiency programs are designed, in conformity to state regulatory requirements, to help consumers use natural gas and electricity more efficiently and thereby decrease their energy usage. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 60% of these costs are related to electric operations and 40% to gas operations.

Total C&LM expenses increased $0.4 million, or 33.3% and $2.1 million, or 56.8%, in the three and nine month periods ended September 30, 2010 compared to the same periods in 2009. These approved costs are collected from customers on a pass through basis and therefore, fluctuations in program costs do not affect earnings.

Depreciation, Amortization and Taxes

Depreciation and Amortization – Depreciation and Amortization expense decreased $0.4 million, or 6.1%, and increased $1.1 million, or 5.7% in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009, reflecting higher depreciation on normal utility plant additions partially offset by lower amortization expense in the current year.

Local Property and Other Taxes – Local Property and Other Taxes increased $0.3 million and $0.7 million in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. These increases reflect higher local property tax rates on higher levels of utility plant in service and higher payroll taxes on higher compensation expenses.

Federal and State Income Taxes – Federal and State Income Taxes were higher by $0.4 million in the three month period ended September 30, 2010 compared to the same period in 2009 reflecting higher pre-tax earnings in the current period. For the nine month period ended September 30, 2010, Federal and State Income Taxes were lower by $2.1 million compared to the same period in 2009 reflecting lower pre-tax earnings in the current period.

Other Non-Operating Expenses (Income)

Other Non-Operating Expenses were on par in the three month period ended September 30, 2010 compared to the same period in 2009 and increased by $0.1 million in the nine month period ended September 30, 2010 compared to the same period in 2009.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. In addition, certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

Unitil's utility subsidiaries operate a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the distribution utilities' rate tariffs, interest is accrued on these balances and will produce either interest income or interest expense. Consistent with regulatory precedent, interest income is recorded on an under-collection of costs which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (Millions)	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
Interest Expense						
Long-term Debt	**$ 5.1**	$ 4.5	$ 0.6	**$ 14.9**	$ 13.7	$ 1.2
Short-term Debt	**0.3**	0.5	(0.2)	**1.1**	1.6	(0.5)
Regulatory Liabilities	**0.1**	0.1	—	**0.2**	0.2	—
Subtotal Interest Expense	**5.5**	5.1	0.4	**16.2**	15.5	0.7
Interest (Income)						
Regulatory Assets	**(0.6)**	(0.6)	—	**(2.3)**	(1.9)	(0.4)
AFUDC[(1)] and Other	**(0.2)**	(0.5)	0.3	**(0.4)**	(1.1)	0.7
Subtotal Interest (Income)	**(0.8)**	(1.1)	0.3	**(2.7)**	(3.0)	0.3
Total Interest Expense, Net	**$ 4.7**	$ 4.0	$ 0.7	**$ 13.5**	$ 12.5	$ 1.0

(1) AFUDC – Allowance for Funds Used During Construction.

Interest Expense, Net increased $0.7 million and $1.0 million in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. In March 2010, Unitil Energy and Northern Utilities collectively issued $40 million of long-term debt which is contributing to the higher interest expense in the three and nine month periods.

On March 2, 2010, Unitil Energy completed the sale of $15 million of First Mortgage Bonds through a private placement to institutional investors. The First Mortgage Bonds have a maturity of ten years and a coupon rate of 5.24%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

On March 2, 2010, Northern Utilities completed the sale of $25 million of Senior Unsecured Notes through a private placement to institutional investors. The Senior Unsecured Notes have a maturity of ten years and a coupon rate of 5.29%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

CAPITAL REQUIREMENTS

Sources of Capital

Unitil requires capital to fund utility plant additions, working capital and other utility expenditures recovered in subsequent and future periods through regulated rates. The capital necessary to meet these requirements is derived primarily from internally-generated funds, which consist of cash flows from operating activities. The Company initially supplements internally-generated funds through bank borrowings, as needed, under its unsecured short-term bank credit facility. Periodically, the Company replaces portions of its short-term debt with long-term financings more closely matched to the long-term nature of its utility assets. The Company's utility operations are seasonal in nature and are therefore subject to seasonal fluctuations in cash flows.

The continued availability of these methods of financing, as well as the Company's choice of a specific form of security, will depend on many factors, including, but not limited to: security market conditions; general economic climate; regulatory approvals; the ability to meet covenant issuance restrictions; the level of the Company's earnings, cash flows and financial position; and the competitive pricing offered by financing sources.

Unitil has a revolving credit facility with a group of banks that extends to October 8, 2013. The borrowing limit under the revolving credit facility is $80.0 million. There was $46.3 million and $64.5 million in short-term debt outstanding through bank borrowings under the revolving credit facility at September 30, 2010 and December 31, 2009, respectively. The total amount of credit available under the Company's revolving credit facility was $33.7 million and $15.5 million at September 30, 2010 and December 31, 2009, respectively. The revolving credit facility contains customary terms and conditions for credit facilities of this type, including, without limitation, covenants restricting the Company's ability to incur liens, merge or consolidate with another entity or change its line of business. The revolving credit agreement also contains a covenant restricting the Company's ability to permit funded debt to exceed 65% of capitalization at the end of each fiscal quarter. As of September 30, 2010, the Company was in compliance with the financial covenants contained in the revolving credit agreement.

On October 8, 2010, the Company entered into the Fourth Amendment Agreement with Bank of America, N.A., as administrative agent, and a syndicate of other lenders party thereto (the "Fourth Amendment Agreement"), further amending the credit agreement dated as of November 26, 2008 among Unitil, Bank of America, N.A., as administrative agent, and a syndicate of other lenders party thereto. The credit agreement was previously amended on January 2, 2009, March 16, 2009, and October 13, 2009 to, among other things, increase the maximum borrowings under the facility to $80.0 million. The Fourth Amendment Agreement extends the scheduled termination date of the credit agreement to October 8, 2013 and provides for two conditional one-year extensions subsequent to the October 8, 2013 termination date (if agreed to among the lenders and Unitil). The Fourth Amendment Agreement also provides the Company a mechanism to request an increase in maximum borrowings of $20.0 million (in increments of not less than $5.0 million). The Fourth Amendment Agreement also provides a new letter of credit sub-facility pursuant to which up to $25.0 million of the credit agreement may be used for the purpose of issuing letters of credit for Unitil or its subsidiaries. Also, see Credit Arrangements in Note 4.

Northern Utilities enters into asset management agreements under which Northern Utilities releases certain natural gas pipeline and storage assets, resells the natural gas storage inventory to an asset manager and subsequently repurchases the inventory over the course of the natural gas heating season at the same price at which it sold the natural gas inventory to the asset manager. There was $12.3 million, $7.6 million and $10.0 million outstanding at September 30, 2010, September 30, 2009 and December 31, 2009, respectively, related to these asset management agreements.

The Company also provides limited guarantees on certain energy and natural gas storage management contracts entered into by the three distribution utilities. The Company's policy is to limit these guarantees to two years or less. As of September 30, 2010 there are $34.5 million of guarantees outstanding and the longest of these guarantees extends through February 29, 2012. Of this amount, $12.0 million is related to Unitil's guarantee of payment for the term of the Northern Utilities' gas storage agreement discussed above.

The Company also guarantees the payment of principal, interest and other amounts payable on the notes issued by Unitil Realty and Granite. As of September 30, 2010, the principal amount outstanding for the 8% Unitil Realty notes was $4.0 million. On December 15, 2008, the Company entered into a guarantee for the payment of principal, interest and other amounts payable on the $10 million Granite notes due 2018. As of September 30, 2010, the principal amount outstanding for the 7.15% Granite notes was $10.0 million.

Off-Balance Sheet Arrangements

The Company and its subsidiaries do not currently use, and are not dependent on the use of, off-balance sheet financing arrangements such as securitization of receivables or obtaining access to assets or cash through special purpose entities or variable interest entities. Unitil's subsidiaries conduct a portion of their operations in leased facilities and also lease some of their vehicles, machinery and office equipment under both capital and operating lease arrangements.

Cash Flows

Unitil's utility operations, taken as a whole, are seasonal in nature and are therefore subject to seasonal fluctuations in cash flows. The tables below summarize the major sources and uses of cash (in millions) for the nine months ended September 30, 2010 compared to the same period in 2009.

	Nine Months Ended September 30,	
	2010	2009
Cash Provided by Operating Activities	**$ 21.5**	$ 45.4

Cash Provided by Operating Activities – Cash Provided by Operating Activities was $21.5 million for the first nine months of 2010 compared to $45.4 million in the same period of 2009. In the first nine months of 2010 as compared to the first nine months of 2009, net sources of cash flow from Net Income, adjusted for non-cash charges to depreciation, amortization and deferred taxes decreased by $9.3 million, changes in working capital items decreased $30.0 million, and changes in all other Operating Activities increased $15.4 million. A portion of the $30.0 million decrease in changes in working capital items resulted from a decrease in sources of cash from gas inventory of $19.4 million driven by changes in natural gas prices. The Company finances its gas inventory requirements with asset management agreements (see Credit Arrangements in Note 4), and reflects this activity in Cash Provided by Financing Activities.

	Nine Months Ended September 30,	
	2010	2009
Cash (Used in) Investing Activities	**$ (33.8)**	$ (49.8)

Cash (Used in) Investing Activities – Cash (Used in) Investing Activities was ($33.8) million for the nine months ended September 30, 2010 compared to ($49.8) million for the same period in 2009. In the first nine months of 2010, the Company recorded ($1.3) million in capital expenditures related to the February 2010 wind storm. Capital spending in the same period of 2009 included ($8.2) million related to the December 2008 ice storm and ($6.8) million of acquisition costs related to the acquisitions of Northern Utilities and Granite. All other remaining capital spending is representative of normal distribution utility capital expenditures and was ($32.5) million in the first nine months of 2010 compared to ($34.8) million compared to the same period of 2009. Capital expenditures are projected to be approximately ($55.0) million for 2010 and ($60.0) million for 2011, reflecting normal electric and gas utility system additions.

	Nine Months Ended September 30,	
	2010	2009
Cash Provided by Financing Activities	**$ 12.6**	$ 1.9

Cash Provided by Financing Activities – Cash Provided by Financing Activities was $12.6 million for the nine months ended September 30, 2010 compared to $1.9 million for the same period in 2009. In March 2010, Unitil Energy and Northern Utilities closed long-term debt financings of $15.0 million and $25.0 million, respectively. The net proceeds of $39.7 million from these financings were used to refinance short-term borrowings. Short-term borrowings were reduced by ($18.2) million in the first nine months of 2010. Other uses of cash include ($11.3) million for quarterly dividend payments compared to ($9.4) million for the same period in 2009. Proceeds from issuances of common stock and gas inventory financing provided a source of cash of $0.7 million and $2.3 million, respectively. All other uses of cash were ($0.6) million.

CRITICAL ACCOUNTING POLICIES

The preparation of the Company's financial statements in conformity with generally accepted accounting principles in the United States of America requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, the Company is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgment, the financial position of the Company could be materially affected and the results of operations of the Company could be materially different than reported. The following is a summary of the Company's most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company's significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 10, 2010.

Regulatory Accounting – The Company's principal business is the distribution of electricity and natural gas by the three distribution utilities: Unitil Energy, Fitchburg and Northern Utilities. Unitil Energy and Fitchburg are subject to regulation by the FERC. Fitchburg is also regulated by the MDPU, Unitil Energy is regulated by the NHPUC and Northern Utilities is regulated by the MPUC and NHPUC. Granite, the Company's natural gas transmission pipeline, is regulated by the FERC. Accordingly, the Company uses the Regulated Operations guidance as set forth in the FASB Codification. The Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

Regulatory Assets consist of the following (millions)

	September 30,		December 31,
	2010	**2009**	**2009**
Energy Supply Contract Obligations	**$ 24.3**	$ 38.1	$ 34.7
Deferred Restructuring Costs	**25.8**	27.7	28.3
Generation-related Assets	**—**	0.2	—
Subtotal – Restructuring Related Items	**50.1**	66.0	63.0
Retirement Benefit Obligations	**43.6**	46.3	43.7
Income Taxes	**13.2**	15.1	14.5
Environmental Obligations	**20.6**	21.4	22.7
Deferred Storm Charges	**21.0**	14.1	14.6
Other	**10.1**	8.2	7.9
Total Regulatory Assets	**$ 158.6**	$ 171.1	$ 166.4
Less: Current Portion of Regulatory Assets(1)	**16.6**	20.5	21.9
Regulatory Assets – noncurrent	**$ 142.0**	$ 150.6	$ 144.5

(1) Reflects amounts included in Accrued Revenue on the Company's Consolidated Balance Sheets.

The Company receives a return on investment on its regulated assets for which a cash outflow has been made. Regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. The Company believes it is probable that its regulated distribution and transmission utilities will recover their investments in long-lived assets, including regulatory assets. If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of the FASB Codification topic on Regulated Operations. If unable to continue to apply the FASB Codification provisions for Regulated Operations, the Company would be required to apply the provisions for the Discontinuation of Rate-Regulated Accounting included in the FASB Codification. In the Company's opinion, its regulated operations will be subject to the FASB Codification provisions for Regulated Operations for the foreseeable future.

Utility Revenue Recognition – Regulated utility revenues are based on rates and charges approved by federal and state regulatory commissions. Revenues related to the sale of electric and gas service are recorded when service is rendered or energy is delivered to customers. However, the determination of energy sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts – The Company recognizes a provision for doubtful accounts each month based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior years. At the end of each month, an analysis of the delinquent receivables is performed which takes into account an assumption about the cash recovery of delinquent receivables. The analysis also calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company's distribution utilities are authorized by regulators to recover the costs of their energy commodity portion of bad debts through rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis, including expected fuel assistance payments from governmental authorities and the level of customers enrolling in payment plans with the Company. It has been the Company's experience that the assumptions it has used in evaluating the adequacy of the Allowance for Doubtful Accounts have proven to be reasonably accurate.

Retirement Benefit Obligations – The Company sponsors the Unitil Corporation Retirement Plan (Pension Plan), which is a defined benefit pension plan covering substantially all of its employees. The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (SERP), covering certain executives of the Company and an employee 401(k) savings plan. Additionally, the Company sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan), primarily to provide health care and life insurance benefits to retired employees.

The Company records on its balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas rates.

The Company's reported costs of providing retirement benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. The Company's RBO are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future costs.

The Company's RBO may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the Company's RBO. If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's financial statements. The discount rate assumptions used in determining retirement plan costs and retirement plan obligations are based on a market average of long-term bonds that receive one of the two highest ratings given by a recognized rating agency. For the years ended December 31, 2009 and 2008, a change in the discount rate of 0.25% would have resulted in an increase or decrease of approximately $300,000 and $200,000, respectively, in the Net Periodic Benefit Cost for the Pension Plan. For the years ended December 31, 2009 and 2008, a 1.0% increase in the assumption of health care cost trend rates would have resulted in increases in the Net Periodic Benefit Cost for the PBOP Plan of $735,000 and $675,000, respectively. Similarly, a 1.0% decrease in the assumption of health care cost trend rates for those same time periods would have resulted in decreases in the Net Periodic Benefit Cost for the PBOP Plan of $576,000 and $531,000, respectively. See Note 9 to the accompanying Consolidated Financial Statements.

Income Taxes – Provisions for income taxes are calculated in each of the jurisdictions in which the Company operates for each period for which a statement of earnings is presented. This process involves estimating the Company's current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deductions of expenses and recognition of taxable income for tax and book accounting purposes. These temporary differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets.

Depreciation – Depreciation expense is calculated on a group straight-line basis based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company's fixed assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements.

Commitments and Contingencies – The Company's accounting policy is to record and/or disclose commitments and contingencies in accordance with the FASB Codification as it applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. As of September 30, 2010, the Company is not aware of any material commitments or contingencies other than those disclosed in the Commitments and Contingencies footnote to the Company's consolidated financial statements below.

Refer to "Recently Issued Accounting Pronouncements in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

As of September 30, 2010, the Company and its subsidiaries had 437 employees. The Company considers its relationship with employees to be good and has not experienced any major labor disruptions.

As of September 30, 2010, 150 of the Company's employees were represented by labor unions. These employees are covered by four separate collective bargaining agreements which expire on March 31, 2012, May 31, 2012, May 31, 2013 and June 5, 2014. The agreements provide discreet salary adjustments, established work practices and uniform benefit packages. The Company expects to negotiate new agreements prior to their expiration dates.

INTEREST RATE RISK

As discussed above, Unitil meets its external financing needs by issuing short-term and long-term debt. The majority of debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new issuances of long-term debt securities. In addition, short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease interest expense in future periods. For example, if the average amount of short-term debt outstanding was $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000. The average interest rates on the Company's short-term borrowings for the three months ended September 30, 2010 and September 30, 2009 were 2.32% and 2.05%, respectively. The average interest rates on the Company's short-term borrowings for the nine months ended September 30, 2010 and September 30, 2009 were 2.30% and 3.82%, respectively.

MARKET RISK

Although Unitil's three distribution utilities are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

UNITIL CORPORATION AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations – Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (Unitil Energy), Fitchburg Gas and Electric Light Company (Fitchburg), Northern Utilities, Inc. (Northern Utilities), Granite State Gas Transmission, Inc. (Granite), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. (collectively, "Usource") are subsidiaries of Unitil Resources.

On December 1, 2008, the Company purchased: (i) all of the outstanding capital stock of Northern Utilities, a natural gas distribution utility serving customers in Maine and New Hampshire, from Bay State Gas Company (Bay State) and (ii) all of the outstanding capital stock of Granite, an interstate gas transmission pipeline company primarily serving the needs of Northern Utilities, from NiSource, Inc. (NiSource) pursuant to the Stock Purchase agreement dated as of February 15, 2008 by and among NiSource, Bay State, and Unitil (the "Acquisitions"). The final purchase price allocation is disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2009 as filed with the Securities and Exchange Commission on February 10, 2010.

Unitil's principal business is the local distribution of electricity in the southeastern seacoast and state capital regions of New Hampshire and the greater Fitchburg area of north central Massachusetts and the local distribution of natural gas in southeastern New Hampshire, portions of southern and central Maine and in the greater Fitchburg area of north central Massachusetts. Unitil has three distribution utility subsidiaries, Unitil Energy, which operates in New Hampshire, Fitchburg, which operates in Massachusetts and Northern Utilities, which operates in New Hampshire and Maine (collectively referred to as the distribution utilities).

Granite is a natural gas transportation pipeline, operating 87 miles of underground gas transmission pipeline primarily located in Maine, New Hampshire and Massachusetts. Granite provides Northern Utilities with interconnection to three major natural gas pipelines and access to domestic natural gas supplies in the south and Canadian natural gas supplies in the north. Granite derives its revenues principally from the transportation services provided to Northern Utilities and, to a lesser extent, third –party marketers.

A fifth utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for Unitil Energy. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of Unitil Energy on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve Unitil Energy's customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service; Unitil Realty; and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology, energy management and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-regulated subsidiary. Usource is a wholly-owned subsidiary of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three and nine months ended September 30, 2010 are not necessarily indicative of results to be expected for the year ending December 31, 2010. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2009, as filed with the Securities and Exchange Commission (SEC) on February 10, 2010, for a description of the Company's Basis of Presentation.

Between December 2008 and June 2009 the Company issued 5.0 million common shares to complete the Acquisitions. As a result of the Acquisitions and the issuance of new common shares, consolidated results for the Company in the current period may not be directly comparable to prior period results until such time as the Acquisitions and stock issuance is fully reflected in both reporting periods. Also, the Company's results are expected to reflect the seasonal nature of the acquired natural gas businesses. Accordingly, the Company expects that results of operations will be positively affected during the first and fourth quarters, when sales of natural gas are typically higher, and negatively affected during the second and third quarters, when gas operating and maintenance expenses usually exceed sales margins in the period.

Derivatives – The Company has a regulatory approved hedging program for Northern Utilities designed to fix a portion of its gas supply costs for the coming year of service. In order to fix these costs, the Company purchases natural gas futures contracts on the New York Mercantile Exchange (NYMEX) that correspond to the associated delivery month. Any gains or losses resulting from the change in the fair value of these derivatives are passed through to ratepayers directly through a regulatory commission approved recovery mechanism. The fair value of these derivatives is determined using Level 2 inputs (valuations based on quoted prices available in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are directly observable, and inputs derived principally from market data), specifically based on the NYMEX closing prices for outstanding contracts as of the balance sheet date. As a result of the ratemaking process, the Company records gains and losses resulting from the change in fair value of the derivatives as regulatory liabilities or assets, then reclassifies these gains or losses into Purchased Gas when the gains and losses are passed through to customers in accordance with rate reconciling mechanisms.

As of September 30, 2010, September 30, 2009 and December 31, 2009, the Company had 1.3 billion, 2.1 billion and 1.9 billion cubic feet (BCF), respectively, outstanding in natural gas purchase contracts under its hedging program.

Liability Derivatives ($ millions)

The tables below show derivatives, which are part of the regulatory approved hedging program, that are not designated as hedging instruments, under FASB ASC 815-20. As discussed above, the change in fair value related to these derivatives is recorded initially as a Regulatory Asset then reclassified to Purchased Gas in accordance with the recovery mechanism. The tables below include disclosure of the Regulatory Asset and reclassifications from the Regulatory Asset into Purchased Gas.

Fair Value Amount Offset in Regulatory Assets, as of:

Description	Balance Sheet Location	Fair Value September 30, 2010	Fair Value September 30, 2009	Fair Value December 31, 2009
Natural Gas Futures Contracts	Other Current Liabilities	$ 1.7	$ 3.6	$ 2.2
Natural Gas Futures Contracts	Other Noncurrent Liabilities	0.3	—	0.1
Total		$ 2.0	$ 3.6	$ 2.3

	Three Months Ended September 30, 2010	Three Months Ended September 30, 2009	Nine Months Ended September 30, 2010	Nine Months Ended September 30, 2009
Amount of (Gain) / Loss Recognized in Regulatory Assets for Derivatives:				
Natural Gas Futures Contracts	$ 0.7	$ (1.9)	$ 3.6	$ 3.7
Amount of Loss Reclassified into Consolidated Statements of Earnings[(1)]:				
Purchased Gas	$ —	$ —	$ 3.9	$ 5.8

(1) These amounts are offset in the Consolidated Statements of Earnings with Accrued Revenue and therefore there is no effect on earnings.

Subsequent Events – The Company has evaluated all events or transactions through the date of this filing. During this period, the Company did not have any material subsequent events that impacted its consolidated financial statements.

Reclassifications – Certain amounts previously reported have been reclassified to improve the financial statements' presentation and to conform to current year presentation.

Recently Issued Pronouncements – There are no recently issued pronouncements that the Company has not already adopted.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount
09/22/10	11/15/10	11/01/10	$0.345
06/17/10	08/16/10	08/02/10	$0.345
03/25/10	05/14/10	04/30/10	$0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

Common Stock

The Company's common stock trades under the symbol "UTL".

On September 10, 2008, the Company's shareholders, at a Special Meeting of Shareholders, approved an increase in the number of authorized shares of the Company's common stock. Shareholders approved an amendment to the Company's Articles of Incorporation to increase the authorized number of shares of the Company's common stock, from 8,000,000 shares to 16,000,000 shares in the aggregate. The Company had 10,879,741, 10,827,061 and 10,836,759 of common shares outstanding at September 30, 2010, September 30, 2009 and December 31, 2009, respectively.

Unitil Corporation Common Stock Offering – Between December 2008 and June 2009, the Company sold 4,970,000 shares of its common stock at a price of $20.00 per share in registered public offerings. The Company used the net proceeds of $93.1 million from these offerings primarily to complete the acquisitions of Northern Utilities and Granite. Please see Note 3 to the Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2009 as filed with the SEC on February 10, 2010 for additional information.

Dividend Reinvestment and Stock Purchase Plan – During the first nine months of 2010, the Company sold 30,934 shares of its Common Stock, at an average price of $21.68 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans, resulting in net proceeds of approximately $671,000.

During the first nine months of 2009, the Company sold 33,184 shares of its Common Stock, at an average price of $20.88 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans, resulting in net proceeds of approximately $693,000.

Restricted Stock Plan – The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 5, 2010, 12,520 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $262,920. There were 33,608 and 40,153 non-vested shares under the Plan as of September 30, 2010 and 2009, respectively. The weighted average grant date fair value of these shares was $21.92 and $22.87, respectively. The compensation expense associated with the issuance of shares under the Plan is being recognized over the vesting period and was $0.4 million and $0.4 million for the nine months ended September 30, 2010 and 2009, respectively. At September 30, 2010, there was approximately $0.9 million of total unrecognized compensation cost under the Plan which is expected to be recognized over approximately 2.5 years. There were 472 restricted shares forfeited under the Plan during the nine months ended September 30, 2010. There were no cancellations under the Plan during the nine months ended September 30, 2010.

Less: Current Portion	**0.5**	0.4	0.4
Total Long-term Debt, Less Current Portion	**$ 288.5**	$ 249.0	$ 248.9

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at September 30, 2010 is estimated to be approximately $329 million, before considering any costs, including prepayment costs, which generally require a "make-whole" payment, to market the Company's debt. Currently, the Company believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

On March 2, 2010, Unitil Energy completed the sale of $15 million of First Mortgage Bonds through a private placement to institutional investors. The First Mortgage Bonds have a maturity of ten years and a coupon rate of 5.24%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

On March 2, 2010, Northern Utilities completed the sale of $25 million of Senior Unsecured Notes through a private placement to institutional investors. The Senior Unsecured Notes have a maturity of ten years and a coupon rate of 5.29%. The Company used the proceeds from this long-term financing to repay short-term debt and for general corporate purposes.

Credit Arrangements

At September 30, 2010, the Company had $46.3 million in short-term debt outstanding through bank borrowings under its revolving credit facility which extends through October 8, 2013. The borrowing limit under the revolving credit facility is $80.0 million. The total amount of credit available under the Company's revolving credit facility at September 30, 2010 was $33.7 million. The revolving credit facility contains customary terms and conditions for credit facilities of this type, including, without limitation, covenants restricting the Company's ability to incur liens, merge or consolidate with another entity or change its line of business. The revolving credit agreement also contains a covenant restricting the Company's ability to permit funded debt to exceed 65% of capitalization at the end of each fiscal quarter. As of September 30, 2010, the Company was in compliance with the financial covenants contained in the revolving credit agreement.

On October 8, 2010, the Company entered into the Fourth Amendment Agreement with Bank of America, N.A., as administrative agent, and a syndicate of other lenders party thereto (the "Fourth Amendment Agreement"), further amending the credit agreement dated as of November 26, 2008 among Unitil, Bank of America, N.A., as administrative agent, and a syndicate of other lenders party thereto. The credit agreement was previously amended on January 2, 2009, March 16, 2009, and October 13, 2009 to, among other things, increase the maximum borrowings under the facility to $80.0 million. The Fourth Amendment Agreement extends the scheduled termination date of the credit agreement to October 8, 2013 and provides for two conditional one-year extensions subsequent to the October 8, 2013 termination date (if agreed to among the lenders and Unitil). The Fourth Amendment Agreement also provides the Company a mechanism to request an increase in maximum borrowings of $20.0 million (in increments of not less than $5.0 million). The Fourth Amendment Agreement also provides a new letter of credit sub-facility pursuant to which up to $25.0 million of the credit agreement may be used for the purpose of issuing letters of credit for Unitil or its subsidiaries.

Northern Utilities enters into asset management agreements under which Northern Utilities releases certain natural gas pipeline and storage assets, resells the natural gas storage inventory to an asset manager and subsequently repurchases the inventory over the course of the natural gas heating season at the same price at which it sold the natural gas inventory to the asset manager. There was $12.3 million, $7.6 million and $10.0 million outstanding at September 30, 2010, September 30, 2009 and December 31, 2009, respectively, related to these asset management agreements.

Guarantees

The Company also provides limited guarantees on certain energy and natural gas storage management contracts entered into by the three distribution utilities. The Company's policy is to limit these guarantees to two years or less. As of September 30, 2010 there are $34.5 million of guarantees outstanding and the longest of these guarantees extends through October 31, 2011. Of this amount, $12.0 million is related to Unitil's guarantee of payment for the term of the Northern Utilities' gas storage agreement discussed above.

The Company also guarantees the payment of principal, interest and other amounts payable on the notes issued by Unitil Realty and Granite. As of September 30, 2010, the principal amount outstanding for the 8% Unitil Realty notes was $4.0 million. On December 15, 2008, the Company entered into a guarantee for the payment of principal, interest and other amounts payable on the $10 million Granite notes due

2018. As of September 30, 2010, the principal amount outstanding for the 7.15% Granite notes was $10.0 million. This guarantee will terminate if Granite reorganizes and merges with and into Northern Utilities.

NOTE 5 – SEGMENT INFORMATION

The following table provides significant segment financial data for the three and nine months ended September 30, 2010 and September 30, 2009 (Millions):

	Electric	Gas	Other	Non-Regulated	Total
Three Months Ended September 30, 2010

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED MORE FULLY IN NOTE 7 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2009 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 10, 2010.

Legal Proceedings

A putative class action Complaint was filed against Fitchburg on January 7, 2009 in Worcester Superior Court in Worcester, Massachusetts, captioned Bellerman v. Fitchburg Gas and Electric Light Company. On April 1, 2009 an Amended Complaint was filed in Worcester Superior Court and served on Fitchburg. The Amended Complaint seeks an unspecified amount of damages including the cost of temporary housing and alternative fuel sources, emotional and physical pain and suffering and property damages allegedly incurred by customers in connection with the loss of electric service during the ice storm in Fitchburg's service territory in December, 2008. The Amended Complaint includes M.G.L. ch. 93A claims for purported unfair and deceptive trade practices related to the December 2008 Storm. On September 4, 2009, the Superior Court issued its order on the Company's Motion to Dismiss the Complaint, granting it in part and denying it in part. The Company anticipates that the court will decide whether the lawsuit is appropriate for class action treatment in the fall of 2011. The Company continues to believe the suit is without merit, and will defend itself vigorously.

Regulatory Matters

Unitil Energy Rate Case Filing – On April 15, 2010, Unitil Energy filed a proposed base rate increase of $10.1 million, an increase of 6.5 percent above present rates. In addition, Unitil Energy requested adjustments for a Rate Year Step Adjustment, a Large Capital Project Step Adjustment and a long-term rate plan establishing step adjustments associated with the Company's Reliability Enhancement Plan and Vegetation Management Plan. On June 29, 2010, the NHPUC issued an order approving a temporary rate increase for Unitil Energy of $5.2 million (annual) effective July 1, 2010 which is being collected by a uniform per kilowatt-hour (kWh) surcharge of $0.00438 on each of Unitil Energy's current rate schedules. Of the $5.2 million rate increase, $500,000 of the increase is intended to permit Unitil Energy to annually recover expenses incurred during the December 2008 ice storm and another $500,000 of the increase is intended to fund higher planned vegetation management program expenditures. Once permanent rates are approved by the NHPUC, they will be reconciled to the date temporary rates were ordered, July 1, 2010. Final review and approval by the NHPUC of Unitil Energy's permanent base rate increase request is scheduled to be completed by February 2011.

Major Ice Storm – On December 11 and 12, 2008, a severe ice storm (December 2008 Ice Storm) struck the New England region. The Company spent approximately $23.3 million for the repair and replacement of electric distribution systems damaged during the storm, including $8.3 million related to capital construction and $15.0 million, including carrying charges, which has been deferred as a regulatory asset, based on orders issued by the MDPU and NHPUC, discussed below. Also, the Company expensed $3.0 million for professional fees related to the ice storm, in addition to normal anticipated expenditures related to emergency storm preparedness. The Company does not believe these storm restoration expenditures and the timing of cost recovery will have a material adverse impact on the Company's financial condition or results of operations. However, if it were ultimately determined that certain of these costs were not recoverable in rates, and/or the Company were required to incur additional costs to defend itself, there may be a significant impact on the Company's results of operations in future periods.

The MDPU conducted an investigation of Fitchburg's preparation for and response to the December 2008 Ice Storm during the first half of 2009. On November 2, 2009, the MDPU issued its order with respect to its investigation, finding that Fitchburg's preparation for, and response to, the December 2008 Ice Storm constituted a failure of the Company to meet its public service obligation to provide safe and reliable service, and ordered several remedial actions. First, the MDPU ordered a comprehensive independent management audit of Fitchburg's management practices. The management audit, which will be performed by Jacobs Consultancy Inc., will begin in the fourth quarter of 2010. Second, the MDPU directed Fitchburg to implement a series of operational and capital improvements which had been identified and recommended through the Company's self-assessment review. All of these operational and capital improvements have either been completed or are currently underway, and remain subject to MDPU review. Finally, the MDPU noted that the costs incurred by Fitchburg for the December 2008 Ice Storm would be subject to review in Fitchburg's next electric rate case, along with Fitchburg's rate of return.

On December 30, 2009, the MDPU approved Fitchburg's petition to defer and record as a regulatory asset costs associated with the repair of its electric distribution system from damage caused by the December 2008 Ice Storm for future recovery in rates. The order of approval made no findings as to whether the subject expenses were reasonable or whether they can be recovered from ratepayers, and confirmed that the MDPU will consider the subsequent ratemaking treatment of the expense as part of Fitchburg's next rate case. As of September 30, 2010, Fitchburg has deferred approximately $13.0 million, including carrying charges, associated with the repair of its electric distribution system for future recovery in rates.

On November 9, 2009, the NHPUC granted Unitil Energy's petition to defer and record as a regulatory asset costs associated with electric distribution system damage from the December 2008 Ice Storm until such time as the Commission issues a final order in Unitil Energy's pending base rate case. The Order clarified that the issues of the appropriate amount of the storm related expenses to be recovered, the timing and manner of recovery, and what, if any, return should be applied to the unrecovered balance are to be reviewed in the rate case. As of September 30, 2010, Unitil Energy has deferred approximately $2.0 million, including carrying charges, associated with the repair of its electric distribution system for future recovery in rates.

On January 8, 2010, the NHPUC opened a docket to consider Unitil Energy's response to the December 2008 Ice Storm, including the timing of its response, its restoration priorities and strategies and the procurement and allocation of its resources in New Hampshire and Massachusetts. On September 24, 2010, the NHPUC issued its final order in this matter and closed its investigation, accepting the NHPUC Staff's Report finding that UES had acted reasonably.

Fitchburg – Electric Operations – On November 25, 2009, Fitchburg submitted to the MDPU its annual (2009) reconciliation of costs and revenues for Transition and Transmission under its restructuring plan (the Annual Reconciliation Filing). The rates were approved effective January 1, 2010, subject to reconciliation pending further investigation by the MDPU. This matter remains pending. A final order approving Fitchburg's 2008 Annual Reconciliation Filing was issued on April 12, 2010.

On November 12, 2009, the Governor of Massachusetts signed House Bill 4329. The bill (i) requires the MDPU to establish regulations for utilities to respond to emergencies, (ii) requires utilities to file with the MDPU annual emergency response plans, (iii) authorizes the MDPU to impose penalties for a utility's failure to comply with the MDPU's regulations, and (iv) allows the chair of the MDPU to issue operational and management directives during an emergency. The bill also authorizes the Massachusetts Attorney General to bring a court action for receivership of a small investor-owned utility where an emergency exists and the utility has materially violated the MDPU's standards for responding to emergencies. On February 2, 2010, the MDPU issued an order adopting regulations concerning the items required by House Bill 4329. Fitchburg has complied with the requirements concerning the filing of its emergency response plans and has met with MDPU Staff to review them. On July 30, 2010, the MDPU approved Fitchburg's electric and gas Emergency Response Plans.

Fitchburg – Gas Operations – On November 2, 2009 the MDPU issued an order finding that Fitchburg engaged in certain price stabilization practices for the 2007 / 2008 and 2008 / 2009 heating seasons without the MDPU's prior approval and that Fitchburg's gas purchasing practices were imprudent. As a result, the MDPU required Fitchburg to refund $4.6 million of natural gas costs, plus an appropriate carrying charge based on the prime lending rate, to its gas customers. The Company recorded a pre-tax charge of $4.9 million in the fourth quarter of 2009 based on the MDPU's order. On November 30, 2009, the MDPU approved Fitchburg's proposal to amortize its refund of natural gas costs to customers over a five-year period. Fitchburg has appealed the gas procurement order to the Massachusetts Supreme Judicial Court. Fitchburg believes that its gas-procurement practices were consistent with those of other Massachusetts natural gas distribution companies and all relevant MDPU rules and orders and Massachusetts law. This appeal remains pending before the Massachusetts Supreme Judicial Court. Immediately after the MDPU opened its investigation of this matter in March 2009, Fitchburg ceased making the gas procurement purchases in question and filed a request with the MDPU for approval of a gas procurement plan for future gas purchases. This matter remains pending before the MDPU.

Fitchburg – Other – On July 16, 2008, the MDPU issued an order establishing a comprehensive plan for Revenue Decoupling to be adopted by gas and electric distribution utilities on a going-forward basis, through company-specific rate cases. Revenue decoupling is generally defined as a ratemaking mechanism designed to eliminate or reduce the dependence of a utility's distribution revenues on sales, and is intended to remove the disincentive a utility has to promote efforts to reduce energy consumption by its customers or to facilitate installation of distributed generation to displace electricity delivered by the utility. It is anticipated that, with limited exceptions, all distribution companies will be operating under decoupling plans by year-end 2012.

On February 11, 2009, the Massachusetts Supreme Judicial Court (SJC) issued its decision in the Attorney General's (AG) appeal of the MDPU orders relating to Fitchburg's recovery of bad debt expense. The SJC agreed with the AG that the MDPU was required to hold hearings regarding changes in Fitchburg's tariff and rates, and on that basis vacated the MDPU orders. The Court, however, declined to rule on an appropriate remedy, and remanded the cases back to the MDPU for consideration of that issue. This matter remains pending before the MDPU.

On July 2, 2008, the Governor of Massachusetts signed into law "The Green Communities Act" (the GC Act), an energy policy statute designed to substantially increase energy efficiency and the development of renewable energy resources in Massachusetts. The GC Act provides for utilities to recover in rates the incremental costs associated with its various mandated programs. Several regulatory proceedings have been initiated to implement various provisions of the GC Act, including provisions for each distribution company to file enhanced three year energy efficiency investment plans, plans to establish smart grid pilot programs, proposals to purchase long-term contracts for renewable energy, special tariffs to allow the net metering of customer-owned renewable generation, and terms and conditions for purchasing supplier receivables. Three year energy efficiency investment plans, plans to establish smart grid pilot programs, and net metering tariffs have been approved by the MDPU. Proposals to purchase long-term contracts for renewable energy and terms and conditions for purchasing supplier receivables are under review in a separately designated docket.

On March 1, 2010, Fitchburg submitted its annual filing to the MDPU of the 2009 Service Quality Reports for its gas division. On October 20, 2010, the MDPU issued its Order on the 2009 Service Quality Reports of the Massachusetts local gas distribution utilities and noted that Fitchburg met or exceeded its established benchmarks in all Service Quality penalty measures. Fitchburg's Service Quality performance was consistent with the MDPU's Service Quality Guidelines and Fitchburg's respective Service Quality plan.

Unitil Energy – Other – In July 2008, the State of New Hampshire enacted legislation that allows electric utilities to make investments in distributed energy resources, including energy efficiency and demand reduction technologies, as well as clean cogeneration and renewable generation. On August 5, 2009 Unitil Energy filed a plan for approval of investment in and rate recovery for Distributed Energy Resources. An order approving a settlement agreement for a time-of-use pilot program was issued on February 26, 2010. On June 11, 2010, the NHPUC issued an order on the remaining two proposed projects and cost recovery. The NHPUC denied one of the two projects, citing that the costs outweighed the benefits but found the other project to be in the public interest. Unitil Energy plans to file adjustments to base distribution rates to collect actual costs associated with authorized DER projects.

On February 25, 2010, a significant wind storm struck portions of the New England region, causing extensive damage to electric facilities and loss of service to significant numbers of customers of several utilities. An estimated one million electric customers in the region were affected, including approximately 85% of the Company's customers. Unitil Energy was able to restore power to 96% percent of its customers by day three, and its final customers, including those with individual service problems, were restored by day four. The Company spent approximately $7.3 million for the repair and replacement of electric distribution systems damaged during the storm, including $1.3 million related to capital construction and $6.0 million which has been deferred as a regulatory asset. Unitil Energy, in its base rate case filing discussed above, has requested recovery in rates for the costs associated with the emergency repair of its electric distribution system for damage caused by this storm. The amount and timing of the cost recovery of the storm restoration expenditures will be determined in the base rate case proceeding. The Company does not believe these storm restoration expenditures and the timing of cost recovery will have a material adverse impact on the Company's financial condition or results of operations. However, if it were ultimately determined that certain of these costs were not recoverable in rates, and/or the Company were required to incur additional costs to defend itself, there may be a significant impact on the Company's results of operations in future periods.

On June 17, 2010, Unitil Energy made its annual reconciliation and rate filing with the NHPUC under its restructuring plan, for rates effective August 1, 2010, including reconciliation of prior year costs and revenues. On July 30, 2010, the NHPUC approved the rate filing and reconciliation.

Northern Utilities – On November 21, 2008, the MPUC issued an order approving a settlement agreement resolving a number of Notices of Probable Violation ("NOPVs") of certain safety related procedures and rules by Northern Utilities. Under the Settlement, Northern Utilities will incur total expenditures of approximately $3.8 million for safety related improvements to Northern's distribution system to ensure compliance with the relevant state and federal gas safety laws, for which no rate recovery will be allowed. These compliance costs were accrued by Northern Utilities prior to the acquisition date and the remaining amount on the Company's balance sheet at September 30, 2010 was $0.7 million.

On June 27, 2008 the MPUC opened an investigation of Northern Utilities' cast iron pipe replacement activities and the benefits of an accelerated replacement program for cast iron distribution pipe remaining in portions of Northern Utilities' Maine service areas. An Agreement resolving this matter, filed on behalf of Northern Utilities, the Maine Office of the Public Advocate, and several state legislator intervenors, was filed with the MPUC on July 6, 2010. Under the Agreement, Northern Utilities will proceed with a comprehensive upgrade and replacement program (the "Program"), which will provide for the systematic replacement of cast iron, wrought iron and bare steel pipe in Northern Utilities' natural gas distribution system in Portland and Westbrook, Maine and the conversion of the system to intermediate pressure. The Agreement establishes the objective of completing the Program by the end of the 2024 construction season. Under the Agreement, the parties agreed to support a cost recovery mechanism that will provide for the timely recovery of prudently-incurred costs of the Program. The features of this cost recovery mechanism will be finalized during Northern Utilities' next base rate case proceeding, which is anticipated to be filed in early 2011. On July 30, 2010, the MPUC issued its Final Order approving the Settlement Agreement.

Granite State Gas Transmission, Inc. – Base Rate Case Filing – On June 29, 2010, Granite filed a base transportation rate increase which would provide for an initial increase of approximately $2.3 million in annual revenue with the FERC. This represents Granite's first filing for a rate change since its last general rate case in 1997. The effect of this initial rate increase would result in an approximate increase of two percent in the total annual bill to an average residential natural gas heating customer served by Northern Utilities. In addition to its request for new base transportation rates, Granite is seeking FERC approval to implement a capital cost surcharge that would allow Granite to implement a rate surcharge annually to recover certain projected capital expenditures in future periods. On July 30, 2010, the FERC ordered the rate increase to be effective on January 1, 2011, subject to refund and hearing and settlement procedures that are in progress.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED MORE FULLY IN NOTE 7 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2009 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 10, 2010.

The Company's past and present operations include activities that are generally subject to extensive and complex federal and state environmental laws and regulations. The Company believes it is in compliance with applicable environmental and safety laws and regulations, and the Company believes that as of September 30, 2010, there were no material losses reasonably likely to be incurred in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Included in Environmental Obligations on the Company's Consolidated Balance Sheet at September 30, 2010 are accrued liabilities totaling $12.0 million related to estimated future clean up costs for permanent remediation of a former manufactured gas plant (MGP) site at Sawyer Passway, located in Fitchburg, Massachusetts. The amounts recorded do not assume any amounts are recoverable from insurance companies or other third parties. Also included in Environmental Obligations on the Company's Consolidated Balance Sheet at September 30, 2010 are accrued liabilities totaling $2.3 million associated with Northern Utilities' environmental remediation obligations for former MGP sites. In addition to the amounts noted above, there are $0.2 million of accrued liabilities in Other Current Liabilities on the Company's Consolidated Balance Sheet at September 30, 2010 associated with Northern Utilities' environmental remediation obligations for former MGP sites. Corresponding Regulatory Assets were recorded to reflect that the future recovery of these environmental remediation costs is expected based on regulatory precedent and established practices.

NOTE 8: INCOME TAXES

The Company bills its customers sales tax in Massachusetts and Maine and consumption tax in New Hampshire. These taxes are remitted to the appropriate departments of revenue in each state and are excluded from revenues on the Company's Consolidated Statements of Earnings.

The Company evaluated its tax positions at December 31, 2009 and for the current interim reporting period ended September 30, 2010 in accordance with the FASB Codification, and has concluded that no adjustment for recognition, derecognition, settlement and foreseeable future events to any unrecognized tax liabilities or assets as defined by the FASB Codification is required. The Company does not have any unrecognized tax positions for which it is reasonably possible that the total amounts recognized will significantly change within the next 12 months. The Company classifies penalty and interest expense related to income tax liabilities as an income tax expense. There are no material interest and penalties recognized in the statement of earnings or accrued on the balance sheet.

During the third quarter of 2010, the Company changed its method of tax accounting for certain construction-related costs previously capitalized as depreciable assets, to accounting for those expenditures as repairs expense deductions under Sections 162 and 263(a) of the Internal Revenue Code. In applying the new tax accounting method, certain costs which were previously capitalized and recognized as depreciation deductions over various useful lives for tax accounting purposes are now to be deducted in the year incurred. The Company applied the change retroactively for additional deductions of $20.4 million related to the tax accounting method change in its 2009 federal and state returns.

The Company remains subject to examination by Federal, Massachusetts and New Hampshire tax authorities for the tax periods ended December 31, 2006; December 31, 2007; and December 31, 2008. Income tax filings for the year ended December 31, 2009 were filed with the Internal Revenue Service (IRS) in September 2010. In its Federal Income Tax return filings for the year ended December 31, 2008, the Company recognized net operating loss (NOL) carrybacks against its Federal Income Tax returns for the years ended December 31, 2006 and 2007 in the amounts of $5.0 million and $6.7 million, respectively. These NOL carrybacks resulted in a refund to the Company of $4.0 million which was received in November 2009. According to Internal Revenue Code rules, NOL refunds in excess of $2.0 million fall under the jurisdiction of the Joint Committee of Congress (Joint Committee) and are subject to review by the IRS and attorneys of the Joint Committee. As a result, on December 30, 2009, the Company received notice that its Federal Income Tax return filings for the years ended December 31, 2006, December 31, 2007, and December 31, 2008 are under examination by the IRS. The IRS is currently performing fieldwork as part of their audit procedures. Currently, the Company believes that the ultimate resolution of this examination will not result in a material adverse effect to the Company's financial position or results of operations.

NOTE 9: RETIREMENT BENEFIT OBLIGATIONS

The Company co-sponsors the Unitil Corporation Retirement Plan (Pension Plan), the Unitil Retiree Health and Welfare Benefits Plan (PBOP Plan), and the Unitil Corporation Supplemental Executive Retirement Plan (SERP) to provide certain pension and postretirement benefits for its retirees and current employees. Please see Note 9 to the Consolidated Financial Statements in the Company's Form 10-K for the year ended December 31, 2009 as filed with the SEC on February 10, 2010 for additional information regarding these plans.

Table of Contents

The following table includes the key weighted average assumptions used in determining the Company's benefit plan costs and obligations:

	2010	2009
Used to Determine Plan Costs		
Discount Rate	**5.75%**	6.25%
Rate of Compensation Increase	**3.50%**	3.50%
Expected Long-term rate of return on plan assets	**8.50%**	8.50%
Health Care Cost Trend Rate Assumed for Next Year	**7.50%**	8.00%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year that Ultimate Health Care Cost Trend Rate is reached	**2017**	2017

The following tables provide the components of the Company's Retirement plan costs ($000's):

	Pension Plan		PBOP Plan		SERP	
Three Months Ended September 30,	**2010**	**2009**	**2010**	**2009**	**2010**	**2009**
Service Cost	**$ 653**	$ 571	**$ 366**	$ 357	**$ 71**	$ 54
Interest Cost	**1,114**	1,073	**504**	578	**56**	46
Expected Return on Plan Assets	**(1,045)**	(1,108)	**(150)**	(89)	**—**	—
Prior Service Cost Amortization	**63**	66	**395**	428	**—**	—
Transition Obligation Amortization	**—**	—	**5**	5	**—**	—
Actuarial Loss Amortization	**601**	399	**—**	—	**34**	17
Sub-total	**1,386**	1,001	**1,120**	1,279	**161**	117
Amounts Capitalized and Deferred	**(522)**	(388)	**(231)**	(486)	**—**	—

Amounts Capitalized and Deferred	**(1,625)**	(1,034)	**(818)**	(1,286)	**—**	—
Net Periodic Benefit Cost Recognized	**$ 2,533**	$ 1,970	**$ 2,544**	$ 2,552	**$ 485**	$ 350

Employer Contributions

On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA were new minimum funding rules which went into effect for plan years beginning in 2008. The funding target was 100% of a plan's liability (as determined under the PPA) with any shortfall amortized over seven years, with lower (92%—100%) funding targets available to well-funded plans during the transition period. Due to the significant declines in the valuation of capital markets during 2008, the Worker, Retiree, and Employer Recovery Act of 2008 (Recovery Act) was signed into law on December 23, 2008. Included in the Recovery Act are temporary modifications to the minimum funding rules set forth in the PPA such that all plans, except those that were subject to deficit reduction contribution requirements in 2007, are allowed to amortize any shortfall from the lower funding targets, rather than the 100% target, for the 2008—2010 plan years. This did not affect the Company's Pension Plan in 2009 as its Pension Plan was 94% funded under the requirements of the Employee Retirement Income Security Act of 1974 (ERISA) as of January 1, 2008 and met the exemption from the shortfall amortization. As of September 30, 2010, the Company had made $3.7 million of contributions to the Pension Plan in 2010. The Company presently anticipates contributing an additional $0.6 million to fund its Pension Plan in 2010.

As of September 30, 2010, the Company had made $2.6 million and $40,000 of contributions to the PBOP and SERP Plans, respectively, in 2010. The Company presently anticipates contributing an additional $0.9 million and $13,000 to the PBOP and SERP Plans, respectively, in 2010.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. Controls and Procedures

Management of the Company, under the supervision and with the participation of the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of September 30, 2010. Based upon this evaluation, the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded as of September 30, 2010 that the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15(d)-15(e)) are effective.

There have been no changes in the Company's internal controls over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15(d)-15(f) during the fiscal quarter covered by this Form 10-Q that have affected, or are reasonably likely to affect, the Company's internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2009 as filed with the SEC on February 10, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no sales of unregistered equity securities by the Company for the fiscal period ended September 30, 2010.

Pursuant to the written trading plan under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended (the Exchange Act), adopted by the Company on March 25, 2010, the Company will periodically repurchase shares of its Common Stock on the open market related to Employee Length of Service Awards and the stock portion of the Directors' annual retainer. There is no pool or maximum number of shares related to these purchases; however, the trading plan will automatically terminate when $80,700 in value of shares have been purchased, or, if sooner, on March 25, 2011.

The Company may suspend or terminate this trading plan at any time, so long as the suspension or termination is made in good faith and not as part of a plan or scheme to evade the prohibitions of Rule 10b-5 under the Exchange Act, or other applicable securities laws.

The Company's repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs
7/1/10 – 7/31/10	—	—	—
8/1/10 – 8/31/10	—	—	—
9/1/10 – 9/30/10	218	$ 21.50	218
Total	218	$ 21.50	218

Item 5. Other Information

On October 25, 2010, the Company issued a press release announcing its results of operations for the three- and nine-month periods ended September 30, 2010. The press release is furnished with this Quarterly Report on Form 10-Q as Exhibit 99.1.

EXHIBIT 11

UNITIL CORPORATION AND SUBSIDIARY COMPANIES

COMPUTATION OF EARNINGS PER WEIGHTED AVERAGE COMMON SHARE OUTSTANDING

(Millions except common shares and per share data)

(UNAUDITED)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	**2009**	**2010**	**2009**
Net Income (Loss)	**$ (0.1)**	**$ (0.6)**	**$ 4.4**	$ 8.8
Less: Dividend Requirements on Preferred Stock	**—**	**—**	**0.1**	0.1
Net Income Applicable to Common Stock	**$ (0.1)**	**$ (0.6)**	**$ 4.3**	$ 8.7
Weighted Average Number of Common Shares Outstanding – Basic (000's)	**10,830**	**10,767**	**10,817**	9,267
Dilutive Effect of Stock Options and Restricted Stock (000's)	**—**	**—**	**1**	—
Weighted Average Number of Common Shares Outstanding – Diluted (000's)	**10,830**	**10,767**	**10,818**	9,267
Earnings Per Share – Basic and Diluted	**$ (0.01)**	**$ (0.06)**	**$ 0.40**	$ 0.94

Weighted average options to purchase 33,000 and 66,500 shares of common stock were outstanding during the three month periods ended September 30, 2010 and September 30, 2009, respectively, but were not included in the computation of Weighted Average Common Shares Outstanding for purposes of computing diluted earnings per share, because the effect would have been antidilutive. Also, 5,460 and 12,250 weighted average non-vested restricted shares for the three month periods ended September 30, 2010 and September 30, 2009, respectively were not included in the above computation because the effect would have been antidilutive. Additionally, 28,148 and 23,888 weighted average non-vested restricted shares for the three month periods ended September 30, 2010 and September 30, 2009, respectively were not included in the above computation because the Company was in a net loss position for those periods.

Weighted average options to purchase 33,000 and 66,500 shares of common stock were outstanding during the nine month periods ended September 30, 2010 and September 30, 2009, respectively, but were not included in the computation of Weighted Average Common Shares Outstanding for purposes of computing diluted earnings per share, because the effect would have been antidilutive. Additionally, 6,867 and 35,302 weighted average non-vested restricted shares for the nine month periods ended September 30, 2010 and September 30, 2009, respectively were not included in the above computation because the effect would have been antidilutive.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f))for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Unitil Reports Third Quarter Results

Hampton, NH – October 25, 2010: Unitil Corporation ("Company") (NYSE: UTL) (www.unitil.com) today announced a net loss of ($0.1) million for the third quarter of 2010, an improvement of $0.5 million compared to the third quarter of 2009. For the nine months ended September 30, 2010, the Company reported net income of $4.3 million compared to $8.7 million for the same period of 2009. Results for the third quarter were driven primarily by higher electric sales margins reflecting favorable summer weather and higher rates, partially offset by increases in operating and interest costs.

Earnings (loss) per common share (EPS) were ($0.01) and $0.40 for the three and nine month periods ended September 30, 2010 compared with ($0.06) and $0.94 for the same periods of 2009. The Company's EPS for 2010 are not directly comparable with 2009 due to the issuance of 5.0 million common shares between December 2008 and June 2009 to complete the financing of the Company's acquisition of Northern Utilities Inc. (Northern Utilities) and Granite State Gas Transmission, Inc. (Granite), the ("Acquisition").

"We continue to make good progress on our regulatory agenda with a target of completing a reset of rates in each of our regulatory jurisdictions within the next twelve months," said Bob Schoenberger, Unitil's Chairman and Chief Executive Officer. "We are also pleased to see a rebound in electric sales and margin in the quarter due to favorable summer weather and an uptick in overall economic activity."

Natural gas sales margin was unchanged in the third quarter of 2010 compared to the same period in 2009. For the nine month period ended September 30, 2010, gas sales margin was $3.8 million lower compared to the same period in 2009. Total natural gas therm sales were 2.7% and 5.5% lower in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. Lower gas therm sales in the Company's utility service territories reflect the effect of milder winter temperatures earlier in 2010, where there were approximately 13% fewer Heating Degree Days in the nine month period, compared to the prior year.

Electric sales margin increased $2.4 million and $2.5 million in the three and nine months ended September 30, 2010 compared to the same periods in 2009, reflecting higher electric kilowatt-hour (kWh) sales and an electric rate increase implemented in July 2010 for the Company's New Hampshire electric distribution utility. Total kWh sales increased 11.1% and 4.9% in the three and nine months ended September 30, 2010, respectively, compared to the same periods in 2009 reflecting increased sales to all customer groups. The increased sales reflect above average summer temperatures in the Company's utility service territories in 2010. According to ISO-New England, the grid operator for the New England region, July was the second-hottest July in New England since 1960 and New England's all-time electricity consumption for one month was recorded in that month.

The Company filed two base rate cases in the second quarter of 2010, one for its New Hampshire electric distribution utility, Unitil Energy Systems, Inc. (Unitil Energy) and one for its interstate natural gas transmission pipeline subsidiary, Granite. The New Hampshire Public Utilities Commission (NHPUC) has approved a temporary rate increase of $5.2 million on an annual basis, including recovery of 2008 ice storm costs, for Unitil Energy effective July 1, 2010. The Company expects the NHPUC to issue its final decision in this rate proceeding in the first quarter of 2011. On June 29, 2010 Granite filed a rate proposal with the Federal Energy Regulatory

Commission for an initial annual increase in revenues of approximately $2.3 million. Granite's initial proposed rate increase is effective January 1, 2011, subject to refund and the outcome of hearing and settlement procedures that are in progress. Additionally, the Company's two other distribution utilities, Fitchburg Gas and Electric Light Company and Northern Utilities, are currently preparing base rate cases and anticipate completing them with their respective state regulatory commissions within the next twelve months.

Selected Financial Data for 2010 and 2009 is presented in the following table:

Unitil Corporation – Condensed Consolidated Financial Data

(Millions, except Per Share data)(Unaudited)

	Three Months Ended Sept. 30,			Nine Months Ended Sept. 30,		
	2010	**2009**	**Change**	**2010**	**2009**	**Change**
Gas Therm Sales:						
Residential	2.5	2.9	(13.8%)	26.9	29.1	(7.6%)

Earnings (Loss) Applicable to Common Shareholders:	**$ (0.1)**	**$ (0.6)**	**$ 0.5**	**$ 4.3**	**$ 8.7**	**$ (4.4)**
Earnings (Loss) Per Share	**$ (0.01)**	**$ (0.06)**	**$ 0.05**	**$ 0.40**	**$ 0.94**	**$ (0.54)**

Operation and Maintenance (O&M) expenses increased $1.1 million and $2.5 million for the three and nine months ended September 30, 2010, respectively, compared to 2009. The changes in O&M expenses reflect higher utility operating costs and professional fees. O&M expenses reflect the full integration of Northern Utilities and Granite into the Company's consolidated operating results.

Depreciation and Amortization expense decreased $0.4 million and increased $1.1 million in the three and nine months ended September 30, 2010, respectively, compared to the same periods in 2009, reflecting higher depreciation on normal utility plant additions partially offset by lower amortization expense in the current year.

Interest Expense, Net increased $0.7 million and $1.0 million in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009. In March 2010, Unitil Energy and Northern Utilities collectively issued $40 million of long-term debt which is contributing to the higher interest expense in the three and nine month periods.

Federal and State Income Taxes decreased by $2.1 million for the nine month period due to lower pre-tax income in 2010 compared to 2009.

All other expenses increased $0.3 million and $0.8 million in the three and nine month periods ended September 30, 2010, respectively, compared to the same periods in 2009, primarily reflecting higher property and payroll taxes.

In the third quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

EPS for the nine months ended September 30, 2010 reflect a higher number of average shares outstanding year over year. Between December 2008 and June 2009 the Company issued 5.0 million common shares to complete the Acquisition. As a result of the Acquisition and the issuance of new common shares, consolidated results for the Company in the current period may not be directly comparable to prior period results until such time as the Acquisition and stock issuance is fully reflected in both reporting periods. Additionally, the Company's results are expected to reflect the seasonal nature of the acquired natural gas businesses. Accordingly, the Company expects that results of operations will be positively affected during the first and fourth quarters, when sales of natural gas are typically higher, and negatively affected during the second and third quarters, when gas operating and maintenance expenses usually exceed sales margins in the period.

The Company will hold a quarterly conference call to discuss third quarter 2010 results on Monday, October 25, 2010 at 5:30 p.m. Eastern Time. This call is being webcast by Thomson Financial and can be accessed in the Investor Relations section of Unitil Corporation's website, www.unitil.com.

About Unitil

Unitil provides for the necessities of life, safely and reliably delivering natural gas and electricity throughout northern New England. We are committed to the communities we serve and to developing people, business practices, and technologies that lead to dependable, more efficient energy. Unitil is a public utility holding company with affiliates that include Unitil Energy Systems, Inc., Fitchburg Gas and Electric Light Company, Northern Utilities, Inc., and Granite State Gas Transmission, Inc. Together, Unitil's operating utilities serve approximately 100,500 electric customers and 70,000 natural gas customers. Other subsidiaries include Unitil Service Corp. and Usource, Unitil's non-regulated business segment. For more information about our people, technologies, and community involvement please visit www.unitil.com.

This press release contains forward-looking statements, which are subject to the inherent uncertainties in predicting future results and conditions. All statements, other than statements of historical fact, are forward-looking statements. Certain factors that could cause the actual results to differ materially from those projected in these forward-looking statements include, but are not limited to the following: variations in weather; changes in the regulatory environment; customers' preferences on energy sources; general economic conditions; increased competition; fluctuations in supply, demand, transmission capacity and prices for energy commodities; and other uncertainties, all of which are difficult to predict, and many of which are beyond the control of Unitil Corporation.

Pursuant to Puc 1604.01(a)

In accordance with PUC 1604.01(a), please provide:

(25) If a utility is a subsidiary, duplicates of all items required by this section for the parent company except as provided in (26) below;

(25.14) List of officers and directors of the utility and their compensation for the last 2 years.

Response:
Unitil Corporation was incorporated under the laws of the State of New Hampshire in 1984. Unitil Corporation is a public utility holding company, and is the parent company of Northern Utilities, Inc. ("Northern"). The list below identifies the members of the Board of Directors of Unitil Corporation and their total annual compensation for service on the Unitil Corporation Board of Directors for the past two years:

	2009 [1]		**2010** [1]	
	Compensation	**Common Stock**	**Compensation**	**Common Stock**
William D. Adams	14,600	5,479	18,500	5,492
Robert V. Antonucci	22,600	5,479	23,500	5,492
David P. Brownell	28,600	5,479	29,700	5,492
Michael J. Dalton	25,600	5,479	22,700	5,492
Albert H. Elfner, III	38,600	5,479	36,200	5,492
Edward F. Godfrey	30,100	5,479	39,200	5,492
Michael B. Green	22,600	5,479	24,700	5,492
Eben S. Moulton	36,600	5,479	36,200	5,492
M. Brian O'Shaughnessy	28,600	5,479	26,300	5,492
Robert G. Schoenberger [2]	N/A	N/A	N/A	N/A
Charles H. Tenney III [3]	7,000	--	--	--
Sarah P. Voll	22,600	5,479	21,700	5,492

(1) Includes compensation for service on the Board of Directors for Unitil Corporation and its four utility subsidiaries, Unitil Energy Systems, Inc. ("UES"), Fitchburg Gas and Electric Light Company ("FG&E"), Northern, and Granite State Gas Transmission, Inc. ("GSG"). Unitil Corporation Board of Directors compensation for Unitil Corporation Board meetings is allocated to Unitil Corporation's subsidiaries through the Unitil Service Corp. billing system.
(2) Employee Directors are not compensated for Board service.
(3) Charles H. Tenney III passed away on March 12, 2009.

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

SAFE HARBOR CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for the Company’s future operations, are forward-looking statements.

These statements include declarations regarding Management’s beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as “may,” “will,” “should,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “potential” or “continue” or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include the following:

? Variations in weather;
? Changes in the regulatory environment;
? Customers’ preferences on energy sources;
? Interest rate fluctuation and credit market concerns;
? General economic conditions;
? Increased competition; and
? Fluctuations in supply, demand, transmission capacity and prices for energy commodities.

Many of these risks are beyond the Company’s control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements.

RESULTS OF OPERATIONS

Earnings Overview

One of the warmest winters on record in the United States adversely affected the Company’s sales of electricity and natural gas in the first quarter of 2006. The National Oceanic and Atmospheric Administration reported that the United States experienced the warmest January on record in 2006. On average, heating degree days were 12% below the first quarter of 2005 in the Company’s utility service territories.

The Company’s Earnings Applicable to Common Shareholders (Net Income) was $2.0 million for the first quarter of 2006, a decrease of $0.7 million compared to the same period in 2005. Earnings per common share were $0.36 for the first quarter of 2006, a decrease of $0.12 per share compared with earnings of $0.48 per share for the first quarter of 2005. Earnings for the first quarter of 2006 reflect lower unit sales of electricity and natural gas in 2006 compared to the first quarter of 2005 largely due to a milder winter heating season in 2006. Unitil also recorded higher operating costs in the first quarter of 2006 compared to the same period a year earlier.

Total electric kWh sales decreased 1.2% in the three months ended March 31, 2006 compared to the same period in 2005 primarily due to the milder winter heating season in 2006. The weather in the Company's service territories in the first quarter of 2006 was approximately 12% warmer than in the same period for 2005.

Gross electric sales margin decreased $0.9 million in the three month period ended March 31, 2006 compared to the same period in 2005. The decrease in electric margin is due to lower sales volume ($0.2 million) and electric service rate changes ($0.7 million) in the current period compared to the same three month period a year earlier. In particular, in the fourth quarter of 2005, a rate surcharge on Regulatory Assets, the Seabrook Amortization Surcharge (SAS), expired. As a result, the revenues from the SAS are no longer included in electric sales margin. The decrease in revenues resulting from expiration of the SAS is offset by a corresponding decrease in amortization expense related to this Regulatory Asset. The SAS was being collected from customers of the Company's Massachusetts utility operating subsidiary, Fitchburg Gas and Electric Light Company (FG&E) to recover the FG&E's former investment in Seabrook Station, which became fully amortized in 2005.

The Company's New Hampshire utility operating subsidiary, Unitil Energy Systems, Inc. (UES) filed a request for a base rate increase of $4.65 million with the New Hampshire Public Utilities Commission (NHPUC) which established temporary rate relief at current rate levels, effective January 1, 2006. Any rate change ultimately awarded by the NHPUC will be retroactive to January 1, 2006. The overall rate filing is currently under review, with a NHPUC order anticipated before the end of 2006. The Company has evaluated the gain contingency criteria under Financial Accounting Standards Board (FASB) Statement No. 5, "Accounting for Contingencies" (SFAS No. 5) and will continue to recognize UES' utility revenues at current rates until such time as the outcome of the rate case can be more clearly determined.

The milder weather caused unit sales of natural gas to residential customers to decline 11.7% in the three months ended March 31, 2006 compared to the same period in 2005. Gas sales to commercial and industrial (C&I) customers were up 8.0% in the three months ended March 31, 2006 compared to the same period in 2005, primarily due to a new special contract with a large industrial customer. Absent the sales associated with this special contract, sales to C&I customers were down 13.8%, reflecting the milder weather.

Gross gas sales margin decreased $0.8 million in the three month period ended March 31, 2006 compared to the same period in 2005. The decrease in gas sales margin is attributable to the lower gas sales volume, as discussed above. A portion of the margin earned by the Company under the new special contract discussed above is deferred for recognition pending the final review of the contract by the Massachusetts Department of Telecommunications and Energy (MDTE) and so the favorable impact on gas firm therm sales due to this contract is not matched by a similar increase in gross gas sales margin.

Total Operation & Maintenance expense increased $0.2 million, or 2.9%, in the three month period ended March 31, 2006 compared to the same period in 2005. The increase reflects higher salaries and compensation costs of $0.2 million, higher retiree and employee benefit costs of $0.1 million, partially offset by lower audit and legal fees of $0.1 million.

Depreciation and Amortization expense decreased $0.9 million for the three month period ended March 31, 2006 compared to the same period in 2005. This decrease was primarily due to lower amortization on regulatory assets. As discussed above, the Company's regulatory assets related to its former abandoned property investment in Seabrook Station became fully-amortized in the fourth quarter of 2005.

Interest Expense, net increased by $0.2 million in the three month period ended March 31, 2006 as compared to the same period in 2005. The change in Interest Expense, net was primarily driven by a higher weighted average cost of debt in the first quarter of 2006 compared to the same period in 2005.

Operating Revenues — Electric

Electric Operating Revenues - Total Electric Operating Revenues, increased by $9.6 million, or 20.5%, in the three month period ended March 31, 2006 compared to the same period in 2005. Total Electric Operating Revenues include the recovery of costs of electric sales, which are recorded as Purchased Electricity and Conservation & Load Management (C&LM) in Operating Expenses. The net increase in Total Electric Operating

Revenues reflects higher Purchased Electricity costs $10.6 million, offset by lower sales margin of $0.9 million and lower C&LM revenues of $0.1 million.

As discussed above, the Company has evaluated the gain contingency criteria under SFAS No. 5 regarding the base rate case currently in process with the NHPUC and will continue to recognize UES' utility revenues at current rates until such time as the outcome of the rate case can be more clearly determined.

Purchased Electricity and C&LM revenues increased a net $10.5 million, or 22.4% of Total Electric Operating Revenues in the three month period ended March 31, 2006 compared to the same period in 2005, reflecting higher electric commodity prices and decreased spending on energy efficiency programs that were implemented during those periods. Purchased Electricity revenues include the recovery of the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Gross electric sales margin (Total Electric Operating Revenues less cost of electric sales) was $12.8 million in the three month period ended March 31, 2006. This represents a decrease of $0.9 million, or 1.9% of Total Electric Operating revenues in the three month period compared to the same period in 2005. The lower sales margin reflects $0.2 million related to lower sales volume and $0.7 million related to lower SAS and other utility service revenues. This decrease in SAS revenues reflects the expiration in the fourth quarter of 2005 of the SAS surcharge on Regulatory Assets, which is offset by a corresponding decrease in amortization expenses on Regulatory Assets (see discussion of Depreciation & Amortization below).

The following table details total Electric Operating Revenues and Sales Margin for the three months ended March 31, 2006 and 2005:

Electric Operating Revenues and Sales Margin (000's)

	Three Months Ended March 31,			
	2006	2005	$ Change	% Change[1]
Electric Operating Revenue:				
Residential	**$ 24,221**	$ 20,992	$ 3,229	6.9%
Commercial / Industrial	**32,209**	25,820	6,389	13.6%
Total Electric Operating Revenue	**$ 56,430**	$ 46,812	$ 9,618	20.5%
Cost of Electric Sales:				
Purchased Electricity	**$ 42,912**	$ 32,326	$ 10,586	22.6%
Conservation & Load Management	**738**	800	(62)	(0.2%)
Gross Electric Sales Margin	**$ 12,780**	$ 13,686	$ (906)	(1.9%)

[1] Represents change as a percent of Total Electric Operating Revenue.

Kilowatt-hour Sales – On a composite basis, Unitil's total electric kWh sales decreased 1.2% in the three months ended March 31, 2006 compared to the same period in 2005 primarily due to the milder winter heating season in 2006 compared to 2005. The weather in the Company's service territories in the first quarter of 2006 was approximately 12% warmer than in the same period for 2005. Sales to residential customers and commercial and industrial (C&I) customers decreased 1.9% and 0.8%, respectively in the three month period as compared to the prior year period.

The following table details total kWh sales for the three months ended March 31, 2006 and 2005 by major customer class:

kWh Sales (000's)	Three Months Ended March 31,			
	2006	2005	Change	% Change
Residential	**183,164**	186,716	(3,552)	(1.9%)
Commercial/Industrial	**267,841**	269,958	(2,117)	(0.8%)
Total	**451,005**	456,674	(5,669)	(1.2%)

Operating Revenues - Gas

Gas Operating Revenues – Total Gas Operating Revenues increased $1.0 million, or 7.9% in the three month period ended March 31, 2006 compared to the same period in 2005. Total Gas Operating Revenues include the recovery of the costs of gas sales, which are recorded as Purchased Gas and C&LM in Operating Expenses. The net increase in Gas Operating Revenues reflects higher Purchased Gas costs $1.8 million, offset by lower sales margin of $0.8 million related to lower sales volume.

Purchased Gas and C&LM revenues increased a net $1.8 million, or 13.8% of Total Gas Operating Revenues in the three month period ended March 31, 2006 compared to the same period in 2005, reflecting higher gas commodity prices and an increase in spending on energy efficiency programs that were implemented during those periods. Purchased Gas revenues include the recovery of the cost of gas supply as well as the other energy supply related costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Gross gas sales margin (Total Gas Operating Revenue less the costs of gas sales) was $3.4 million in the three month period ended March 31, 2006. This represents a decrease of $0.8 million, or 5.9% of Total Gas Operating Revenues in the three month period compared to the same period in 2005 and is attributable to lower firm therm sales volume, as discussed below.

The following table details total Gas Operating Revenues and Sales Margin for the three months ended March 31, 2006 and 2005:

Gas Operating Revenues and Sales Margin (000's)

	Three Months Ended March 31,			
	2006	2005	$ Change	% Change[1]
Gas Operating Revenue:				
Residential	**$ 7,845**	$ 7,475	$ 370	2.9%
Commercial / Industrial	**5,735**	5,205	530	4.2%
Total Firm Gas Revenue	**$ 13,580**	$ 12,680	$ 900	7.1%
Interruptible Gas Revenue	**106**	7	99	0.8%
Total Gas Operating Revenue	**$ 13,686**	$ 12,687	$ 999	7.9%
Cost of Gas Sales:				
Purchased Gas	**$ 10,186**	$ 8,424	$ 1,762	13.9%
Conservation & Load Management	**59**	71	(12)	(0.1%)
Gross Gas Sales Margin	**$ 3,441**	$ 4,192	$ (751)	(5.9%)

(1) Represents change as a percent of Total Gas Operating Revenue.

***Therm Sales* –** Firm therm sales of natural gas declined 1.9% in the three months ended March 31, 2006 compared to the same period in 2005. Sales to residential customers were 11.7% lower in the first quarter of 2006 compared to the same period in 2005 due to the extremely mild winter heating season in 2006. Sales to C&I customers were 8.0% higher in the current quarter, primarily due to a new special contract with a large industrial customer. Absent the sales associated with this new special contract, sales to C&I customers were down 13.8%, primarily reflecting the extremely mild winter weather in the first quarter of 2006 compared to the same period in 2005. The weather in the Company's service territories in the first quarter of 2006 was approximately 12% warmer than in the same period for 2005, as the United States experienced a record warm January.

The following table details total firm therm sales for the three months ended March 31, 2006 and 2005, by major customer class:

Firm Therm Sales (000's)

	Three Months Ended March 31,			
	2006	2005	Change	% Change
Residential	**4,902**	5,551	(649)	(11.7%)
Commercial/Industrial	**5,934**	5,495	439	8.0%
Total	**10,836**	11,046	(210)	(1.9%)

Operating Revenue - Other

Total Other Revenue increased $0.1 million, or 17.2%, in the three month period ended March 31, 2006 compared to the same period in 2005. The increase was the result of growth in revenues from the Company's unregulated energy brokering business, Usource.

The following table details total Other Revenue for the three months ended March 31, 2006 and 2005:

Other Revenue (000's)	Three Months Ended March 31,			
	2006	2005	$ Change	% Change
Other	**$ 587**	$ 501	$ 86	17.2%
Total Other Revenue	**$ 587**	$ 501	$ 86	17.2%

Operating Expenses

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as the other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity increased $10.6 million, or 32.7%, in the three month period ended March 31, 2006 compared to the same period in 2005, reflecting higher electric commodity prices. The Company recovers the costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas increased $1.8 million, or 20.9%, in the three month period ended March 31, 2006 compared to the same period in 2005, reflecting higher gas commodity costs. The Company recovers the costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Operation and Maintenance (O&M) - O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total O&M expense increased $0.2 million, or 2.9%, in the three month period ended March 31, 2006 compared to the same period in 2005. The increase reflects higher salaries and compensation costs of $0.2 million, due to annual salary and wage increases, and higher retiree and employee benefit costs of $0.1 million, partially offset by lower audit and legal fees of $0.1 million.

Conservation & Load Management – C&LM expenses are associated with the development, management, and delivery of the Company's Energy Efficiency programs. Energy Efficiency programs are designed, in conformity with state regulatory requirements, to help consumers use electricity and natural gas more efficiently and thereby decrease their energy costs. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 90% of these costs are related to electric operations and 10% to gas operations.

Total C&LM expenses decreased by $0.1 million, or 8.5%, in three month period ended March 31, 2006 compared to the same period in 2005. The decrease reflects the timing of spending on the implementation of Energy Efficiency programs. These costs are collected from customers on a pass through basis and therefore, fluctuations in program costs have no impact on Net Income.

Depreciation, Amortization and Taxes

Depreciation and Amortization - Depreciation and Amortization expense decreased $0.9 million, or 17.5%, for the three month period ended March 31, 2006 compared to the same period in 2005. This decrease was primarily due to lower amortization on regulatory assets. The Company's regulatory asset related to its former abandoned property investment in Seabrook Station became fully-amortized in the third quarter of 2005.

Local Property and Other Taxes - Local Property and Other Taxes increased by less than $0.1 million, or less than 1.0% for the three month period ended March 31, 2006 compared to the same period in 2005. This increase was due to higher payroll taxes partially offset by lower property tax rates.

Federal and State Income Taxes - Federal and State Income Taxes are lower by $0.3 million for the months ended March 31, 2006 compared to the same period in 2005 reflecting lower pre-tax earnings.

Interest Expense, net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. Certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

The Company operates a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the Company's tariff, interest is accrued on these balances and will produce either interest income or interest expense. Interest income is recorded on an under-collection of costs, which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, net (000's)	**Three Months Ended March 31,**	
	2006	2005
Interest Expense		
Long-term Debt	**$ 2,320**	$ 2,102
Short-term Debt	**305**	216
Regulatory Liabilities	**42**	39
Subtotal Interest Expense	**2,667**	2,357
Interest Income		
Regulatory Assets	**(728)**	(587)
AFUDC and Other	**(26)**	(15)
Subtotal Interest Income	**(754)**	(602)
Total Interest Expense, net	**$ 1,913**	$ 1,755

Interest Expense, net increased by $0.2 million, or 9.0% in the three month period ended March 31, 2006 compared to the same period in 2005. Interest expense on long-term borrowings in the three month period ended March 31, 2006 increased $0.2 million compared to the prior year period due to the refinancing of variable rate short-term debt with fixed rate long-term debt. In December 2005 Unitil's Massachusetts utility subsidiary, FG&E issued $15 million of unsecured long-term notes to institutional investors. Interest expense on short-term debt increased $0.1 million in the three month period ended March 31, 2006 compared to the same period in 2005 primarily due to higher average short-term interest rates. These increases in interest expense were partially offset by an increase in interest income on regulatory assets of $0.1 million primarily due to higher carrying charges on regulatory assets.

CAPITAL REQUIREMENTS

Cash provided by operating activities was $0.7 million during the First Quarter of 2006, a decrease of $8.1 million over the comparable period in 2005. Net Income was $0.7 million lower in the first quarter of 2006 compared to 2005. Cash required for Accounts Payable increased $4.9 million compared to last year mainly due to the higher costs of purchasing electricity and natural gas for our customers. Cash from Accrued Revenue decreased $2.0 million quarter over quarter mainly due to higher energy costs, which will be collected from customers in future periods. During the First Quarter of 2006 as compared to the same quarter in the prior year, Taxes Payable declined by $1.5 million dollars, reflecting higher estimated tax payments in 2006 compared to the refunds received in the first quarter of 2005. In addition, uses of cash for Deferred Restructuring Costs declined by $1.7 million in the first quarter of 2006 compared to the same quarter last year. Deferred Restructuring Costs are regulatory assets that will be recovered from customers in future periods. All other changes in cash flows from operating activities were a net decrease of $0.7 million in cash provided by operating activities.

Cash used in investing activities was $5.6 million for the three months ended March 31, 2006 and increased by $1.2 million over the comparable period in 2005. Annual capital expenditures are presently budgeted to be $37.2 million in 2006 compared to $24.4 million expended in 2005. These 2006 capital expenditures include approximately $9.5 million of cash outlays for the Automated Meter Infrastructure projects, which are expected to be completed in 2007. Capital expenditure projections are subject to changes during the fiscal year.

Cash flows provided by financing activities were $3.9 million in the first three months of 2006. In the comparable period of 2005 cash used in financing activities amounted to $3.2 million, a net change between the two periods of $7.2 million. Cash provided for financing activities in the current period includes the proceeds from short-term bank borrowings of $6.0 million as compared to the repayment of $1.4 million of short-term bank borrowings during the same period in 2005. The current period reflects the early repurchase of $0.2 million of preferred stock. Both periods reflect the payment of dividends to shareholders of approximately $2.0 million. During the First Quarter of 2006 and 2005, normal sinking fund payments amounted to approximately $0.1 million during both periods. Both periods include the proceeds of approximately $0.3 million received from the sale of Unitil Common Stock through the Dividend Reinvestment and Stock Purchase Plan and 401(k) plans.

At March 31, 2006 Unitil had an aggregate of $44.0 million in unsecured revolving lines of credit through three banks. The Company expects to renew its lines of credit annually on or about June 30, 2006 and anticipates that it will be able to secure, renew or replace its revolving lines of credit in the future in accordance with its projected requirements. Average daily short-term borrowings during the first three months of 2006 were approximately $23.5 million, a decrease of approximately $2.0 million over the comparable period in 2005. At March 31, 2006, the Company had available approximately $19.3 million of unused bank lines of credit and had short-term debt outstanding through bank borrowings of approximately $24.7 million. In addition, Unitil had $2.2 million in cash at March 31, 2006.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to two years or less. As of March 31, 2006, there are $6.0 million of guarantees outstanding and the longest term guarantee extends through October 24, 2007.

Critical Accounting Policies

The preparation of the Company's financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, management is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgments, the financial statements of the Company could be materially different than reported. The following is a summary of the Company's most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company's significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 22, 2006.

Regulatory Accounting - The Company's principal business is the distribution of electricity and natural gas by the retail distribution companies: UES and FG&E. Both UES and FG&E are subject to regulation by the FERC and FG&E is regulated by the MDTE and UES is regulated by the NHPUC. Accordingly, the Company uses the provisions of Financial Accounting Standards Board (FASB) Statement No. 71, "Accounting for the Effects of Certain Types of Regulation." (SFAS No. 71). In accordance with SFAS No. 71, the Company has recorded

Regulatory Assets and Regulatory Liabilities which will be recovered or refunded in future electric and gas retail rates.

SFAS No. 71 specifies the economic effects that result from the cause and effect relationship of costs and revenues in the rate-regulated environment and how these effects are to be accounted for by a regulated enterprise. Revenues intended to cover some costs may be recorded either before or after the costs are incurred. If regulation provides assurance that incurred costs will be recovered in the future, these costs would be recorded as deferred charges or "regulatory assets" under SFAS No. 71. If revenues are recorded for costs that are expected to be incurred in the future, these revenues would be recorded as deferred credits or "regulatory liabilities" under SFAS No. 71.

The Company's principal regulatory assets and liabilities are detailed on the Company's Consolidated Balance Sheet. The Company is currently receiving or being credited with a return on all of its regulatory assets for which a cash outflow has been made. The Company is currently paying or being charged with a return on all of its regulatory liabilities for which a cash inflow has been received. The Company's regulatory assets and liabilities will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

The application of SFAS No. 71 results in the deferral of costs as regulatory assets that, in some cases, have not yet been approved for recovery by the applicable regulatory commission. Management must conclude that any costs deferred as regulatory assets are probable of future recovery in rates. However, regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. Management believes it is probable that the Company's regulated utility companies will recover their investments in long-lived assets, including regulatory assets. The Company also has commitments under long-term contracts for the purchase of electricity and natural gas from various suppliers. The annual costs under these contracts are included in Purchased Electricity and Purchased Gas in the Consolidated Statements of Earnings and these costs are recoverable in current and future rates under various orders issued by the FERC, MDTE and NHPUC.

If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of SFAS No. 71. If unable to continue to apply the provisions of SFAS No. 71, the Company would be required to apply the provisions of FASB Statement No. 101, "Regulated Enterprises – Accounting for the Discontinuation of Application of Financial Accounting Standards Board Statement No. 71." In management's opinion, the Company's regulated operations will be subject to SFAS No. 71 for the foreseeable future.

Utility Revenue Recognition - Regulated utility revenues are based on rates approved by state and federal regulatory commissions. These regulated rates are applied to customers' accounts based on their actual or estimated use of energy. Energy sales to customers are based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts - The Company recognizes a Provision for Doubtful Accounts each month. The amount of the monthly Provision is based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior years. Account write-offs, net of recoveries, are processed monthly. At the end of each month, an analysis of the delinquent receivables is performed and the adequacy of the Allowance for Doubtful Accounts is reviewed. The analysis takes into account an assumption about the cash recovery of delinquent receivables and also uses calculations related to customers who have chosen payment plans to resolve their arrears. The analysis also calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis. Also, the Company has experienced periods when state regulators have extended the periods during which certain standard credit and collection activities of utility companies are suspended. In periods when account write-offs exceed estimated levels, the Company adjusts the Provision for Doubtful Accounts to maintain an adequate Allowance for Doubtful Accounts balance.

Pension and Postretirement Benefit Obligations - The Company has a defined benefit pension plan covering substantially all its employees and also provides certain other post-retirement benefits (PBOP), primarily medical and life insurance benefits to retired employees. The Company also has a Supplemental Executive Retirement Plan (SERP) covering certain executives of the Company. The Company accounts for these benefits in accordance with FASB Statement No. 87, "Employers' Accounting for Pensions" and FASB Statement No. 106, "Employers' Accounting for Postretirement Benefits other than Pensions." In applying these accounting policies, the Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. For each of these plans, the development of the benefit obligation, fair value of plan assets, funded status and net periodic benefit cost is based on several significant assumptions.

The Company's reported costs of providing pension and PBOP benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company's health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. Pension and PBOP costs (collectively "postretirement costs") are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future postretirement costs. Postretirement costs may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the postretirement costs and benefit obligations. If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's consolidated financial statements. See Note 8.

Pension expense is calculated based upon a number of actuarial assumptions, including an expected long-term rate of return on Plan assets. In developing the expected long-term rate of return assumption, the Company evaluated input from actuaries and investment managers. The Company's expected long-term rate of return on Plan assets is based on target asset allocation assumptions of 60% in common stock equities and 40% in fixed income securities. The Company will continue to evaluate the actuarial assumptions, including the expected rate of return, at least annually, and will adjust the appropriate assumptions as necessary.

Income Taxes - Income tax expense is calculated in each of the jurisdictions in which the Company operates for each period for which a statement of income is presented. This process involves estimating the Company's actual current tax liabilities as well as assessing temporary and permanent differences resulting from differing treatment of items, such as timing of the deduction of expenses for tax and book accounting purposes. These differences result in deferred tax assets and liabilities, which are included in the consolidated balance sheets. The Company must also assess the likelihood that the deferred tax assets will be recovered from future taxable income, and to the extent that recovery is not likely, a valuation allowance must be established. Significant management judgment is required in determining income tax expense, deferred tax assets and liabilities and valuation allowances. The Company accounts for deferred taxes under FASB Statement No. 109, "Accounting for Income Taxes." The Company does not currently have any valuation allowances against its recorded deferred tax amounts.

Depreciation - Depreciation expense is calculated based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company's fixed assets.

Commitments and Contingencies - The Company's accounting policy is to record and/or disclose commitments and contingencies in accordance with SFAS No. 5. SFAS No. 5 applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible gain or loss that will ultimately be resolved when one or more future events occur or fail to occur.

Refer to "Recently Issued Accounting Pronouncements" in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

There are approximately 100 employees of the Company represented by labor unions. In May 2005, the Company reached agreements with its bargaining units for new five-year contracts, effective June 1, 2005. These agreements replace contracts that expired on May 31, 2005.

INTEREST RATE RISK

The majority of the Company's debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new long-term debt securities issued by the Company. In addition, the Company's short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease the Company's interest expense in future periods. For example, if the Company had an average amount of short-term debt outstanding of $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000 (pre-tax). The average interest rates on the Company's short-term borrowings for the three months ended March 31, 2006 and March 31, 2005 were 5.00% and 3.05%, respectively.

MARKET RISK

Although Unitil's utility operating companies are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

UNITIL CORPORATION AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

NOTE 1 – SUMMARY OF SIGNIFICA NT ACCOUNTING POLICI ES

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three months ended March 31, 2006 are not necessarily indicative of results to be expected for the year ending December 31, 2006. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2005, as filed with the SEC on February 22, 2006, for a description of the Company's Basis of Presentation.

Nature of Operations - Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the Securities and Exchange Commission (SEC). As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (UES) (formed in 2002 by the combination and merger of Unitil's former utility subsidiaries Concord Electric Company and Exeter & Hampton Electric Company), Fitchburg Gas and Electric Light Company (FG&E), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

Unitil's principal business is the retail distribution of electricity in the southeastern seacoast and capital city areas of New Hampshire and the retail distribution of both electricity and natural gas in the greater Fitchburg area of north central Massachusetts, through the Company's two wholly owned subsidiaries, UES and FG&E, collectively referred to as the retail distribution utilities.

A third utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for UES. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of UES on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve UES' customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service, Unitil Realty and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-utility unregulated subsidiary that provides consulting and management related services. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Recently Issued Pronouncements – In February 2006, the FASB issued FASB Statement No. 155, "Accounting for Certain Hybrid Financial Instruments", (SFAS No. 155), which amends FASB Statement No. 133, "Accounting for Derivative Instruments and Hedging Activities", (SFAS No.133) and FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", (SFAS No. 140), effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133. Additionally, SFAS No. 155 establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation and clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives. SFAS No. 155 also amends SFAS No. 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. The Company will adopt SFAS No. 155 and does not expect that it will have an impact on the Company's Consolidated Financial Statements.

In February 2006, the FASB issued FASB Staff Position No. FAS 123(R)-4, (FSP 123(R)-4), "Classification of Options and Similar Instruments Issued as Employee Compensation That Allow for Cash Settlement Upon the Occurrence of a Contingent Event". FSP 123(R)-4 addresses the classification of options and similar instruments issued as employee compensation that allow for cash settlement upon the occurrence of a contingent event and amends paragraphs 32 and A229 of revised FASB Statement No. 123(R), "Share-Based Payment", (SFAS No. 123(R)), which was issued in December 2004. SFAS No. 123(R) requires all entities to recognize the fair value of share-based payment awards classified in equity, unless they are unable to reasonably estimate the fair value of the award. The Company uses the fair value method for share-based payment awards and therefore the provisions of SFAS No. 123(R) will have no impact on the Consolidated Financial Statements. The Company has adopted the provisions of FSP 123(R)-4 and it did not have an impact on the Company's Consolidated Financial Statements.

In January 2003, the FASB issued Interpretation No. 46, "Consolidation of Variable Interest Entities" (FIN 46) and in December 2003 issued a revised FIN 46. This interpretation clarified the application of Accounting Research Bulletin No. 51, "Consolidated Financial Statements," and replaced the current accounting guidance relating to the consolidation of variable interest entities (VIE's) established on the basis of contractual, ownership or other monetary interests. The Company reviewed its investments and affiliations and determined that it had a variable interest in the Unitil Retiree Trust (URT), a special purpose entity established January 1993. URT was an organization of retirees, incorporated in 1993 to provide social, health and welfare benefits to its members, who are eligible former employees of the Company. URT was under the direction of an independent Board of Trustees whose voting members were comprised of former employees of the Company, elected by and from the membership of URT. In the fourth quarter of 2003, URT was dissolved by a vote of its trustees and the Company assumed the obligations of URT as of October 1, 2003. There are no other entities identified by the Company that qualify as VIE's under FIN 46.

Reclassifications - Certain amounts previously reported have been reclassified to conform to current year - presentation.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount

01/13/05	02/15/05	02/01/05	$ 0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

During the first quarter of 2006, the Company sold 9,967 shares of its Common Stock, at an average price of $24.60 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $245,000 were used to reduce short-term borrowings.

During the first quarter of 2005, the Company sold 10,921 shares of its Common Stock, at an average price of $27.38 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of $299,045 were used to reduce short-term borrowings.

On April 17, 2003, the Company's shareholders ratified and approved a Restricted Stock Plan (the Plan) which had been approved by the Company's Board of Directors at its January 16, 2003 meeting. Participants in the Plan are selected by the Compensation Committee of the Board of Directors from the eligible Participants to receive an annual award of restricted shares of Company Common Stock. The Compensation Committee has the power to determine the sizes of awards; determine the terms and conditions of awards in a manner consistent with the Plan; construe and interpret the Plan and any agreement or instrument entered into under the Plan as they apply to participants; establish, amend, or waive rules and regulations for the Plan's administration as they apply to participants; and, subject to the provisions of the Plan, amend the terms and conditions of any outstanding award to the extent such terms and conditions are within the discretion of the Compensation Committee as provided in the Plan. Awards fully vest over a period of four years at a rate of 25% each year. During the vesting period, dividends on restricted shares underlying the Award may be credited to the participant's account. Awards may be grossed up to offset the participant's tax obligations in connection with the Award. Prior to the end of the vesting period, the restricted shares are subject to forfeiture if the participant ceases to be employed by the Company other than due to the participant's death. The maximum number of shares of Restricted Stock available for awards to participants under the Plan is 177,500. The maximum aggregate number of shares of Restricted Stock that may be awarded in any one calendar year to any one participant is 20,000. In the event of any change in capitalization of the Company, the Compensation Committee is authorized to make proportionate adjustments to prevent dilution or enlargement of rights, including, without limitation, an adjustment in the maximum number and kinds of shares available for awards and in the annual award limit. On February 16, 2006, 14,375 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $366,563. On March 8, 2005, 10,900 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $299,423. On April 29, 2004, 10,700 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $293,715. On May 12, 2003, 10,600 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $259,170. The compensation expense associated with the issuance of shares under the Plan is being accrued on a monthly basis over the vesting period.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to two years or less. As of March 31, 2006 there are $6.0 million of guarantees outstanding and these guarantees extend through October 24, 2007. These guarantees are not required to be recorded under the provisions of FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others."

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2005 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 22, 2006.

Overview – Unitil and its subsidiaries are subject to regulation as a holding company system by the FERC under the Energy Policy Act of 2005 in regards to certain bookkeeping, accounting and reporting requirements. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the SEC with respect to various matters, including: the issuance of securities, capital structure, and certain acquisitions and dispositions of assets. As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. Unitil's utility operations related to wholesale and interstate business activities are also regulated by FERC. The retail distribution utilities, UES and FG&E, are subject to regulation by the NHPUC and the MDTE, respectively, in regards to their rates, issuance of securities and other accounting and operational matters. Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in our franchise areas, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on a historical test year, in addition to earning a return on their capital investment in utility assets. As a result of a restructuring of the utility industry in Massachusetts and New Hampshire, Unitil's customers have the opportunity to purchase their electric or natural gas supplies from third-party vendors. Most customers, however, continue to purchase such supplies through UES and FG&E as the provider of last resort. UES and FG&E purchase electricity or natural gas from unaffiliated wholesale suppliers and recover the actual costs of these supplies, without profit or markup, through reconciling, pass-through rate mechanisms that are periodically adjusted.

In connection with the implementation of retail choice, Unitil Power and FG&E divested their long-term power supply contracts through the sale of the entitlements to the electricity sold under those contracts. UES and FG&E recover in their rates all the costs associated with the divestiture of their power supply portfolios and have secured regulatory approval from the NHPUC and MDTE, respectively, for the recovery of power supply-related stranded costs and other restructuring-related regulatory assets. The remaining balance of these assets, to be recovered principally over the next five to seven years, is $146.1 million as of March 31, 2006 and is included in Regulatory Assets on the Company's Consolidated Balance Sheet. Unitil's retail distribution companies have a continuing obligation to submit filings in both states that demonstrate their compliance with regulatory mandates and provide for timely recovery of costs in accordance with their approved restructuring plans.

FG&E – Electric Division – FG&E's primary business is providing electric distribution service. Its current retail electric distribution rates were approved by the MDTE in 2002. FG&E is required, as the provider of last resort, to purchase and provide power through Default Service for retail customers who chose not to buy, or were unable to purchase, energy from a competitive supplier. Prices for Default Service are set periodically based on market solicitations as approved by the MDTE. As of March 31, 2006, approximately 56 percent of FG&E's electric load was served by Default Service. The remaining portion was served by competitive third party suppliers.

As a result of the restructuring and the divestiture of FG&E's owned generation assets and buyout of FG&E's power supply obligations, Regulatory Assets on the Company's balance sheets include the following three categories: Power Supply Buyout Obligations associated with the divestiture of its long-term purchase power obligations; Recoverable Deferred Restructuring Charges resulting from the restructuring legislation's seven year rate cap; and Recoverable Generation-related Assets associated with the divestiture of its owned generation plant. FG&E earns carrying charges on the majority of the unrecovered balances of the Recoverable Deferred Restructuring Charges. The value of FG&E's Recoverable Deferred Restructuring Charges and Recoverable Generation-related Assets was approximately $38.3 million at March 31, 2006, and $35.9 million at March 31, 2005, and is expected to be recovered in FG&E's rates over the next five to seven years. In addition, as of March 31, 2006, FG&E had recorded on its balance sheets $55.9 million as Power Supply Buyout Obligations and corresponding Regulatory Assets associated with the divestiture of its long-term purchase power contracts, which are included in Unitil's consolidated financial statements, and on which carrying charges are not earned as the timing of cash disbursements and cash receipts associated with these long-term obligations is matched through rates.

Recovery of the deferred amounts described above will be made pursuant to a Settlement Agreement among FG&E, the Massachusetts Office of the Attorney General (Attorney General), and representatives of industrial and low-income customers. The Settlement Agreement, which was approved by the MDTE in 2005, provides for a rate path to allow recovery of FG&E's deferred stranded costs.

On March 7, 2006, the MDTE approved FG&E's 2003 and 2004 annual reconciliation of costs and revenues for Transition, Transmission, Standard Offer Service, and Default Service filed under its restructuring plan. FG&E's 2005 filing, which is subject to investigation, is pending. Management believes that this filing will be approved without material changes or adjustments.

FG&E – Gas Division – FG&E provides natural gas delivery service to its customers on a firm or interruptible basis under unbundled distribution rates approved by the MDTE. Its current retail distribution rates were approved by the MDTE in 2002. FG&E's customers may purchase gas supplies from third-party vendors or purchase their gas from FG&E as the provider of last resort. FG&E collects its gas supply costs through a seasonal reconciling CGAC and recovers other related costs through a reconciling Local Distribution Adjustment Clause.

FG&E – Other – On October 27, 2004, the MDTE approved FG&E's request for a reconciliation rate adjustment mechanism to provide for the recovery of costs associated with the Company's employee pension benefits and PBOP expenses. FG&E is allowed to record a regulatory asset in lieu of taking a charge to expense for the difference between the level of pension and PBOP expenses that are included in its base rates and the amounts that are required to be recorded in accordance with SFAS No. 87 and SFAS No. 106, since the effective date of its last base rate change. This mechanism provides for an annual filing and rate adjustment with the MDTE. As of March 31, 2006, FG&E has recorded a regulatory asset of $2.7 million which is included as part of Regulatory Assets in the Company's Consolidated Balance Sheets.

On November 30, 2005, the MDTE announced a change in its method for recovery of gas cost-related bad debt, and determined that it would allow for full recovery of these costs on a reconciling basis. On December 15, 2005, FG&E filed a revised CGAC tariff reflecting this change which was approved effective January 1, 2006. FG&E also requested approval to recover its under-recovered gas cost-related bad debt for 2005 of approximately $164,000. On February 24, 2006, FG&E made a similar filing for its electric division, seeking approval to recover its actual electric supply-related bad debt through Default Service rates, effective January 1, 2006, and to recover its under-recovered electric supply-related bad debt for 2005 of approximately $84,000. On April 7, 2006, the MDTE consolidated the gas and electric requests for simultaneous review. A decision on these requests is expected in 2006.

UES – UES provides electric distribution service to its customers pursuant to rates approved by the NHPUC. Its current retail electric distribution rates were established under a 2002 restructuring settlement agreement. On May 1, 2004, these distribution rates were increased by $1.0 million to provide for the recovery of PBOP costs. As the provider of last resort, UES also provides its customers with electric power through either Transition or Default Service at rates which reflect UES' costs for wholesale supply with no profit or markup. UES' Transition Service supply obligation for all rate classes ends on April 30, 2006. On May 1, 2006, customers previously on Transition Service will automatically be placed on Default Service. Under a NHPUC approved settlement with the Office of the Consumer Advocate and the NHPUC Staff, UES will procure Default Service power for its larger commercial and industrial customers on a quarterly basis, and for its smaller commercial and residential customers through a portfolio of longer term contracts on a semi-annual basis. UES recovers its costs for this service on a pass-through basis through reconciling rate mechanisms. As of March 31, 2006, approximately 86 percent of UES' electric load was served by Transition Service. The remaining portion was served by competitive third party suppliers.

In the 2002 restructuring settlement, the NHPUC approved the divestiture of the long-term power supply portfolio by Unitil Power and tariffs for UES for stranded cost recovery and Transition and Default Service, including certain charges that are subject to annual or periodic reconciliation or future review. As of March 31, 2006, UES had recorded on its balance sheets $51.8 million as Power Supply Contract Obligations and corresponding Regulatory Assets associated with these long-term purchase power stranded costs, which are included in Unitil Corporation's consolidated financial statements. These Power Supply Contract Obligations are expected to be recovered principally over a period of approximately five years. The Company does not earn carrying charges on these regulatory assets as the timing of cash receipts and cash disbursements associated with these long-term obligations is matched through rates.

On March 17, 2006, UES made its third annual reconciliation and rate filing with the NHPUC under its restructuring plan, effective May 1, 2006, including reconciliation of prior year costs and revenues for the Transition Service Charge, Default Service Charge, Stranded Cost Charge, and External Delivery Charge. The NHPUC's review of this filing is pending.

On December 11, 2004, UES filed with the NHPUC a Petition for an accounting order to defer certain pension costs above those included in its base rates, until UES filed its next base rate case, which, pursuant to the last base rate case settlement, was required to be filed no later than October 2007 (also see Note 8 below). On April 7, 2005, the NHPUC issued an order denying UES' Petition for an accounting order. In its analysis denying UES' request, the NHPUC indicated that pension expense is an ordinary category of expense included in the revenue requirement for a utility under traditional cost of service ratemaking principles and that the size and impact of increased pension expense is not clear and that a full examination of UES' income and expenses would be undertaken when UES files a rate case. As discussed below, the Company filed a full base rate case on November 4, 2005, which included a request for recovery of Pension/PBOP costs through a reconciling mechanism, the Pension/PBOP Adjustment Charge (PAC). UES' regulatory history with the NHPUC regarding this issue taken together with ratemaking precedent concerning pension cost recovery leads management to conclude that the pension costs are probable of recovery under the requirements of Paragraph 9 of Statement of Financial Accounting Standards No. 71, Accounting for the Effects of Certain Types of Regulation. As of March 31, 2006, UES has recorded deferred pension costs of $1.2 million.

On November 4, 2005, UES filed a request for a base rate increase of $4.65 million with the NHPUC. The filing includes a request to recover pension and PBOP costs through an annual reconciling rate mechanism, and a step adjustment for certain future rate base additions. The filing also requested that temporary rates be established at current rate levels effective December 4, 2005. On February 3, 2006, the NHPUC issued an order approving the request for temporary rates. Any rate change ultimately awarded by the NHPUC will be retroactive to January 1, 2006. The overall rate filing is currently under review, with an NHPUC order anticipated before November 2006. It is anticipated that the final determination of the amount and method of recovering UES' pension and PBOP costs will be decided in the pending base rate case. The Company cannot determine the ultimate outcome of this proceeding.

FERC – Wholesale Power Market Restructuring – FG&E, UES and Unitil Power are members of the NEPOOL, formed in 1971 to assure reliable operation of the bulk power system in the most economic manner for the region. NEPOOL is governed by the NEPOOL Agreement that is filed with and subject to the jurisdiction of the FERC. The regional bulk power system is operated by an independent corporate entity, the ISO-NE, in order to avoid any opportunity for conflicting financial interests between the system operator and the market-driven participants.

As of February 1, 2005, a RTO was established in New England. ISO-NE became the entity responsible for operating the RTO. The market rules and requirements to participate in the markets previously covered under the NEPOOL Agreement were transferred to the new RTO structure under control of ISO-NE. FERC approved the formation of the RTO effective February 1, 2005. Several parties have appealed various issues associated with the FERC's approval of the RTO to Federal District Court of Appeals. Those proceedings are ongoing.

On March 1, 2004, ISO-NE filed a proposal to implement LICAP in New England to allow for the imposition of incentive pricing for transmission constrained areas. UES and FG&E intervened in the proceeding. On April 11, 2006, a contested Settlement was submitted by the FERC Settlement Judge to the FERC. The Settlement would resolve the LICAP proceeding. It proposes transition payments for capacity until a Forward Capacity Market can be implemented, possibly by 2010. The Settlement requests action by the FERC by June 30, 2006, for implementation by December 2006. This case continues to be contested at the FERC.

The formation of an RTO, LICAP and other wholesale market changes, including changes to transmission rates, is not expected to have a material impact on Unitil's operations because of the cost recovery mechanisms for wholesale energy costs approved by the MDTE and NHPUC. It is possible, however, that retail rates will be significantly increased over the next several years if LICAP is implemented consistent with the Initial Decision.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2005 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 22, 2006.

The Company's past and present operations include activities that are generally subject to extensive federal and state environmental laws and regulations. The Company is in general compliance with all applicable environmental and safety laws and regulations, and management believes that as of March 31, 2006, there are no material losses reasonably possible in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Sawyer Passway MGP Site – The Company continues to work with environmental regulatory agencies to identify and assess environmental issues at the former manufactured gas plant (MGP) site at Sawyer Passway, located in Fitchburg, Massachusetts. FG&E proceeded with site remediation work as specified on the Tier 1B permit issued by the Massachusetts Department of Environmental Protection (DEP), which allows the Company to work towards temporary remediation of the site. Work performed in 2002 was associated with the five-year review of the Temporary Solution submittal (Class C Response Action Outcome) under the Massachusetts Contingency Plan (MCP) that was filed for the site in 1997. Completion of this work has confirmed the Temporary Solution status of the site for an additional five years, to January 2008. A status of temporary closure requires FG&E to monitor the site until a feasible permanent remediation alternative can be developed and completed.

FG&E is in the process of developing a long range plan for a Permanent Solution for the site, including alternatives for re-use of the site.

On May 13, 2004 FG&E discovered an unauthorized excavation by another property owner on the site at Sawyer Passway in which tainted soils related to MGP by-products were exposed and relocated onto property owned by FG&E. FG&E promptly reported this discovery to the DEP and subsequently received a Notice of Responsibility on May 20, 2004. FG&E has properly disposed of the relocated materials and taken other steps in accordance with DEP directives to remedy the situation. The Completion Report for this release was submitted May 9, 2005.

Since 1991, FG&E has recovered the environmental response costs incurred at this former MGP site pursuant to an MDTE approved settlement agreement between the Massachusetts Attorney General and the natural gas utilities of the Commonwealth of Massachusetts (Agreement). The Agreement allows FG&E to amortize and recover from gas customers over succeeding seven-year periods the environmental response costs incurred each year. Environmental response costs are defined to include liabilities related to manufactured gas sites, waste disposal sites or other sites onto which hazardous material may have migrated as a result of the operation or decommissioning of Massachusetts gas manufacturing facilities from 1822 through 1978. In addition, any recovery that FG&E receives from insurance or third parties with respect to environmental response costs, net of the unrecovered costs associated therewith, are split equally between FG&E and its gas customers. The total annual charge for such costs assessed to gas customers cannot exceed five percent of FG&E's total revenue for firm gas sales during the preceding year. Costs in excess of five percent will be deferred for recovery in subsequent years.

Note 8: Pension and Postretirement Benefit Plans

The Company provides certain pension and postretirement benefit plans for its retirees and current employees including defined benefit plans, postretirement health and welfare plans, a supplemental executive retirement plan and an employee 401(k) savings plan.

Defined Benefit Pension Plan – The Company sponsors the Unitil Corporation Retirement Plan (the Plan), a defined benefit pension plan covering substantially all its employees. Under the Plan retirement benefits are based upon an employee's level of compensation and length of service. The Company records annual expense and accounts for its defined benefit pension plan in accordance with FASB Statement No. 87, "Employers' Accounting for Pensions", (SFAS No. 87).

In December 2003 and 2002, UES and FG&E filed requests with their respective state regulatory commissions for approval of accounting orders to mitigate certain accounting requirements related to pension plan assets which had been triggered by the substantial decline in the capital markets. UES and FG&E were granted approval of this regulatory accounting treatment in January 2003 and 2004. As a result of these approvals, the Company has recorded as a Regulatory Asset the amount of the Plan's unfunded Accumulated Benefit Obligation (ABO) plus one dollar. These approvals allow UES and FG&E to treat their Additional Minimum Liability (AML) as Regulatory Assets under FASB Statement No. 71, "Accounting for the Effects of Certain Types of Regulation", (SFAS No. 71) and avoid the reduction in equity through other comprehensive income that would otherwise be required by SFAS No. 87.

On October 27, 2004 the MDTE approved FG&E's request for a reconciliation rate adjustment mechanism, the Pension / PBOP Adjustment Factor (PAF), to recover the costs associated with the Company's pension, and postretirement benefits other than pensions (PBOP), costs on an annually reconciling basis. As a result of this order, FG&E records a regulatory asset to recognize the deferral for the difference between the level of pension and PBOP expenses that are currently included in its base rates and the amounts that are required to be recorded in accordance with SFAS No. 87 and FASB Statement No. 106, "Employers' Accounting for Postretirement Benefits other than Pensions", (SFAS No. 106) and amortizes increases and /or decreases in that deferral balance into the PAF for recovery over a three year period. The PAF provides for an annual filing and rate adjustment with the MDTE and requires that carrying charges on prepaid or (accrued) pension and PBOP assets and liabilities be collected from, or refunded to, utility customers. In 2005, FG&E received approval of its first annual filing and rate adjustment.

The Company initiated similar discussions for a reconciling rate mechanism for the pension costs of UES with the NHPUC. On December 11, 2004, UES filed with the NHPUC a Petition for an Accounting Order to defer certain pension costs above those included in its base rates until UES filed its next base rate case, which, pursuant to the last base rate case settlement, was required to be filed no later than October 2007. On April 7, 2005, the NHPUC issued an order denying UES' Petition for an accounting order. In its analysis denying UES' request, the NHPUC indicated that pension expense is an ordinary category of expense included in the revenue requirement for a utility under traditional cost of service ratemaking principles and that the size and impact of increased pension expense is not clear and that a full examination of UES' income and expenses would be undertaken when UES files a rate case. As discussed below, the Company filed a full base rate case on November 4, 2005, which included a request for recovery of Pension/PBOP costs through a reconciling mechanism, the PAC. UES' regulatory history with the NHPUC regarding this issue taken together with ratemaking precedent concerning pension cost recovery leads management to conclude that the pension costs are probable of recovery under the requirements of Paragraph 9 of Statement of Financial Accounting Standards No. 71, Accounting for the Effects of Certain Types of Regulation. As of March 31, 2006, UES has recorded deferred pension costs of $1.2 million.

On November 4, 2005, UES filed a request for a base rate increase of $4.65 million with the NHPUC. The filing includes a request to recover pension and PBOP costs through an annual reconciling rate mechanism, and a step adjustment for certain future rate base additions. The filing also requested that temporary rates be established at current rate levels effective December 4, 2005. On February 3, 2006, the NHPUC issued an order approving the request for temporary rates. Any rate change ultimately awarded by the NHPUC will be retroactive to January 1, 2006. The overall rate filing is currently under review, with an NHPUC order anticipated before November 2006. It is anticipated that the final determination of the amount and method of recovering UES' pension and PBOP costs will be decided in the pending base rate case. The Company cannot determine the ultimate outcome of this proceeding.

The following tables show the components of net periodic pension cost (income), (NPPC), as well as key actuarial assumptions used in determining the various pension plan values:

	Three Months Ended March 31, 2006	2005
Components of NPPC (000's)		
Service Cost	**$ 450**	$ 347
Interest Cost	**787**	756
Expected Return on Plan Assets	**(912)**	(865)
Amortization of Prior Service Cost	**27**	25
Amortization of Net (Gain) Loss	**355**	222
Subtotal NPPC	**707**	485
Amounts Capitalized and Deferred	**(577)**	(397)
NPPC Recognized	**$ 130**	$ 88

Included in the amounts above for Amounts Capitalized and Deferred are $307,000 and $213,000 recorded as Regulatory Assets on the Company's Balance Sheets for 2005 and 2004, respectively. The remaining amounts represent amounts capitalized to construction overheads.

Key Assumptions (Weighted Average)	**2006**	2005
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	6.50% (1)
Rate of Compensation Increase	**3.50%**	3.50%
Used to Determine NPPC:		
Discount Rate	**5.50%**	6.50% (1)
Expected Long-Term Rate of Return on Plan Assets	**8.50%**	8.50%
Rate of Compensation Increase	**3.50%**	3.50%

(1) In May 2005, the Company reached agreements with its union labor bargaining units for new five-year contracts, effective June 1, 2005, which resulted in amendments to the Plan. Effective for the period of June 1, 2005 through December 31, 2005, the Company lowered the assumed discount rate to 6.00%.

Employer Contributions – As of March 31, 2006, the Company has not yet made any contributions to the Plan for 2006. The Company is required to make a minimum contribution to its pension plan this year in the amount of $0.8 million. The Company contributed $2.5 million in 2005.

Postretirement Benefits - The Company also sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan) primarily to provide health care and life insurance benefits to active employees. Prior to October 1, 2003, the Company funded certain postretirement benefits through the Unitil Retiree Trust (URT). URT was an organization of retirees, incorporated in 1993 to provide social, health and welfare benefits to its members, who are eligible former employees of the Company. Effective January 1, 2004, the PBOP Plan was amended to provide certain healthcare and life insurance benefits, which were previously provided by the URT. The Company has established Voluntary Employee Benefit Trusts, into which it funds contributions to the PBOP Plan.

In January 2004 and May 2004, the FASB issued, respectively, Statement No. 106-1 (SFAS No. 106-1) and Statement No. 106-2 (SFAS No. 106-2), "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003", (the Act). The Act includes a subsidy to a plan sponsor that is based on 28 percent of an individual beneficiary's annual prescription drug costs between $250 and $5,000 and the opportunity for a retiree to obtain a prescription drug benefit under Medicare. SFAS No. 106-1 and SFAS No. 106-2 require the disclosure of the effects, if any, of the Act on the reported measure of the accumulated postretirement benefit obligation and how that effect has been, or will be, reflected in the net postretirement benefit costs of current or subsequent periods. On January 28, 2005, the final Medicare Part D Prescription Drug Rules were posted to the Federal Register. Based on these rules, the Company's estimated

PBOP Projected Benefit Obligation was reduced by $5.1 million. Also, the Company has estimated that its annual PBOP costs will be reduced by $0.4 million under the Act. These reductions are reflected in the Company's Consolidated Financial Statements. The Company's health care insurance provider has concluded that the Company's PBOP Plan is equal to or better than standard Medicare Part D coverage. Additionally, the Company's recognition of the Act is not expected to have any impact on the rate of participation in the PBOP Plan or per capita claims.

As discussed above, on October 27, 2004 the MDTE approved FG&E's request for a reconciliation rate adjustment mechanism, the PAF, to recover the costs associated with the Company's pension and PBOP costs on an annually reconciling basis.

On March 15, 2004 UES filed a petition with the NHPUC for recovery of PBOP costs. UES proposed an increase to its distribution base rates of $1.0 million to provide for the recovery of these costs, effective May 1, 2004. The NHPUC approved this filing, effective May 1, 2004.

As discussed above, on November 4, 2005, UES filed a request for a base rate increase of $4.65 million. The filing includes a request to recover pension and PBOP costs through an annual reconciling rate mechanism, and a step adjustment for certain future rate base additions. The filing also requested that temporary rates be established at current rate levels effective December 4, 2005. On February 3, 2006, the NHPUC issued an order approving this request. Any rate change ultimately awarded by the NHPUC will be retroactive to January 1, 2006. The overall rate filing is currently under review, with an NHPUC order anticipated before November 2006. It is anticipated that the final determination of the amount and method of recovering UES' pension and PBOP costs will be decided in the base rate case. The Company cannot determine the ultimate outcome of this proceeding.

The following tables show the components of net periodic postretirement benefit cost (NPPBC), as well as key actuarial assumptions used in determining the various PBOP Plan values:

	Three Months Ended March 31,	
	2006	2005
Components of NPPBC (000's)		
Service Cost	**$ 292**	$ 222
Interest Cost	**450**	456
Expected Return on Plan Assets	**(28)**	(15)
Amortization of Prior Service Cost	**340**	365
Amortization of Transition (Asset) Obligation	**5**	5
Amortization of Net (Gain) Loss	**---**	(16)
Subtotal NPPBC	**1,059**	1,017
Amounts Capitalized and Deferred	**(482)**	(482)
NPPBC Recognized	**$ 577**	$ 535

Included in the amounts above for Amounts Capitalized and Deferred are $71,000 and $83,000 recorded as Regulatory Assets on the Company's Balance Sheets for 2005 and 2004, respectively. The remaining amounts represent amounts capitalized to construction overheads.

Weighted-Average Assumptions	**2006**	2005
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	6.50% (1)
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	7.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2013
Used to Determine NPPBC:		
Discount Rate	**5.50%**	6.50% (1)
Expected Long-Term Rate of Return on Plan Assets	**8.50%/5.50%** (2)	8.50%/5.50% (2)
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	8.00%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2013

(1) In May 2005, the Company reached agreements with its union labor bargaining units for new five-year contracts, effective June 1, 2005, which resulted in amendments to the Plan. Effective for the period of June 1, 2005 through December 31, 2005, the Company lowered the assumed discount rate to 6.00%.

(2) Funding of the PBOP Plan is made into two VEBT's; one is a union VEBT and the other is a non-union VEBT. The expected long-term rate of return on plan assets for the union VEBT is 8.50%. The non-union VEBT is subject to income taxes and therefore the expected long-term rate of return on plan assets is 5.50%, reflecting the effect of taxes.

Employer Contributions – As of March 31, 2006, the Company has made $0.5 million of contributions to the PBOP Plan. The Company presently anticipates contributing an additional $2.1 million to fund the Plan in 2006 for an estimated total of $2.6 million. The Company contributed $2.5 million in 2005.

Supplemental Executive Retirement Plan - The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (the SERP), with participation limited to executives selected by the Board of Directors.

The components of net periodic SERP cost are as follows:

	Three Months Ended March 31,	
	2006	2005
Components of NPPC (000's)		
Service Cost	**$ 36**	$ 24
Interest Cost	**26**	20
Expected Return on Plan Assets	**---**	---
Amortization of Prior Service Cost	**---**	---
Amortization of Transition Obligation	**4**	4
Amortization of Net Loss	**10**	1
Net Periodic SERP Cost	**$ 76**	$ 49

Employer Contributions – As of March 31, 2006, the Company has made payments of $18,000 to beneficiaries. The Company presently anticipates making additional benefit payments of $54,000 in 2006 for a total of $72,000.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the “Interest Rate Risk” and “Market Risk” sections of Item 2. “Management’s Discussion and Analysis of Financial Condition and Results of Operations” (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company’s Form 10-K for the year-ended December 31, 2005 as filed with the Securities and Exchange Commission on February 22, 2006.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) There were no sales of unregistered equity securities by the Company for the fiscal period ended March 31, 2006.

(b) Not applicable.

(c) Issuer repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(1)
1/1/06 – 1/31/06	---	---	---	n/a
2/1/06 – 2/28/06	---	---	---	n/a
3/1/06 – 3/31/06	122	$25.70	122	n/a
Total	122	$25.70	122	n/a

(1) Represents Common Stock purchased on the open market related to Board of Director Retainer Fees and Employee Length of Service Awards. Shares are not purchased as part of a specific plan or program and therefore there is no pool or maximum number of shares related to these purchases.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f))for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Unitil Reports First Quarter Earnings

Hampton, NH – April 28, 2006: Unitil Corporation (AMEX: UTL) (www.unitil.com) today announced net income of $2.0 million for the first quarter of 2006. Earnings per common share were $0.36 for the first quarter of 2006 compared with $0.48 in the first quarter of 2005, primarily reflecting lower gas and electric unit sales due to milder winter temperatures in 2006. The National Oceanic and Atmospheric Administration reported that the United States experienced the warmest January on record in 2006. Heating degree days in the Company's service territories in the first quarter of 2006 were 12% lower than in the same period for 2005.

The milder weather caused unit sales of natural gas to residential customers to decline 11.7% in the three months ended March 31, 2006 compared to the same period in 2005. Gas sales to commercial and industrial ("C&I") customers were up 8.0% in the three months ended March 31, 2006 compared to the same period in 2005, primarily due to a new special contract with a large industrial customer. Absent the sales associated with this special contract, sales to C&I customers were down 13.8%, reflecting the milder weather.

Total electric kWh sales, which are less sensitive to weather than natural gas sales, decreased 1.2% in the three months ended March 31, 2006 compared to the same period in 2005. Sales to residential customers and C&I customers were down 1.9% and 0.8%, respectively, in the three months ended March 31, 2006 compared to the same period in 2005.

"Our first quarter results reflect the significant impact weather has on our business," said Unitil Chairman, President and Chief Executive Officer Robert G. Schoenberger. "The diversity of our service territories and underlying growth in our distribution business are mitigating factors in what should be the short-term impact of the unpredictable New England weather cycle."

Total O&M expense increased $0.2 million, or 2.9%, in the three month period ended March 31, 2006 compared to the same period in 2005. The increase reflects higher salaries and compensation costs of $0.2 million and higher retiree and employee benefit costs of $0.1 million, partially offset by lower audit and legal fees of $0.1 million.

Depreciation, Amortization, Taxes and Other decreased $1.2 million in the first three months of 2006 compared to the same period in 2005, primarily due to lower amortization on regulatory assets and lower income taxes. The Company's regulatory asset related to its former abandoned property investment in Seabrook Station became fully-amortized in the fourth quarter of 2005. In the first three months of 2006, Interest Expense, net, increased by $0.2 million as compared to the same period in 2005 due to higher borrowings and interest rates compared to last year.

Unitil's New Hampshire utility operating subsidiary, Unitil Energy Systems, Inc. ("UES") filed a request for a base rate increase of $4.65 million with the New Hampshire Public Utilities Commission ("NHPUC") which established temporary rate relief at current rate levels, effective January 1, 2006. Any rate change ultimately awarded by the NHPUC will be retroactive to January 1, 2006. The overall rate filing is currently under review, with a NHPUC order anticipated before the end of 2006. The Company will continue to recognize UES' utility revenues at current rates until such time as the outcome of the rate case can be more clearly determined.

Also in the first quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

Unitil is a public utility holding company with subsidiaries providing electric service in New Hampshire and electric and gas service in Massachusetts and energy services throughout the Northeast. Its subsidiaries include Unitil Energy Systems, Inc., Fitchburg Gas and Electric Light Company, Unitil Power Corp., Unitil Realty Corp., Unitil Service Corp. and its unregulated business segment Unitil Resources, Inc. Usource L.L.C. is a subsidiary of Unitil Resources, Inc.

This press release contains forward-looking statements, which are subject to the inherent uncertainties in predicting future results and conditions. All statements, other than statements of historical fact, are forward-looking statements. Certain factors that could cause the actual results to differ materially from those projected in these forward-looking statements include, but are not limited to the following: variations in weather; changes in the regulatory environment; customers' preferences on energy sources; general economic conditions; increased competition; fluctuations in supply, demand, transmission capacity and prices for energy commodities; and other uncertainties, all of which are difficult to predict, and many of which are beyond the control of Unitil Corporation.

The following table details total kilowatt-hour (kWh) sales of electricity for the three months ended March 31, 2006 and 2005, by major customer class.

kWh Sales (000's)	**Three Months Ended March 31,**		
	2006	2005	% Change
Residential	183,164	186,716	(1.9%)
Commercial/Industrial	267,841	269,958	(0.8%)
Total	451,005	456,674	(1.2%)

The following table details total firm therm sales of natural gas for the three months ended March 31, 2006 and 2005, by major customer class.

Firm Therm Sales (000's)	**Three Months Ended March 31,**		
	2006	2005	% Change
Residential	4,902	5,551	(11.7%)
Commercial/Industrial	5,934	5,495	8.0%
Total	10,836	11,046	(1.9%)

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

SAFE HARBOR CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for the Unitil Corporation and subsidiaries' (Unitil or the Company) future operations, are forward-looking statements.

These statements include declarations regarding Management's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include the following:

? Variations in weather;
? Changes in the regulatory environment;
? Customers' preferences on energy sources;
? Interest rate fluctuation and credit market concerns;
? General economic conditions;
? Increased competition; and
? Fluctuations in supply, demand, transmission capacity and prices for energy commodities.

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements.

RESULTS OF OPERATIONS

Earnings Overview

The Company's Earnings Applicable to Common Shareholders (Net Income) was $1.4 million for the second quarter of 2006, a decrease of $0.1 million compared to the same period in 2005. Earnings per common share were $0.25 for the second quarter of 2006, a decrease of $0.02 per share compared with earnings of $0.27 per share for the second quarter of 2005. Earnings for the second quarter of 2006 reflect higher interest and net operating expenses and lower gas sales margins, partially offset by improved margins on electric sales due to the recognition, in the second quarter of 2006, of estimated rate relief for the Company's New Hampshire utility subsidiary.

For the six month period ended June 30, 2006, net income was $3.4 million compared to $4.2 million in the first six months of 2005. Through the first six months, earnings per share were $0.61 for 2006 compared with $0.75 per share for 2005, reflecting higher net operating expenses and interest expense and lower electric and gas sales margins in 2006.

Total electric sales in the three and six months ended June 30, 2006 were down 0.3% and 0.8%, respectively, in the Company's utility service territories. Sales to residential customers increased 0.8% in the three month period ended June 30, 2006 compared to the prior year but decreased 0.7% overall in the six month period compared to the prior year primarily due to a significantly milder winter heating season in 2006. Sales to commercial and industrial (C&I) customers decreased 1.0% and 0.9% in the three and six month periods, respectively, compared to the prior year periods due to lower consumption for heating and production purposes.

The Company's New Hampshire utility operating subsidiary, Unitil Energy Systems, Inc. (UES) filed a request for a base rate increase of $4.65 million with the New Hampshire Public Utilities Commission (NHPUC) which established temporary rate relief at current rate levels, effective January 1, 2006. Any rate change ultimately awarded by the NHPUC will be retroactive to January 1, 2006. The rate filing is currently under review, with a NHPUC order anticipated before the end of 2006. Based on the temporary rate order and the current status of proceedings, management has recorded an estimate of expected revenue and expenses for the first six months of 2006. The estimate includes $1.7 million in estimated revenue and $1.0 million in estimated operating expenses and taxes, a net increase to operating income of $0.7 million.

Electric sales margin increased $0.5 million in the three month period ended June 30, 2006 compared to the same period in 2005. For the six month period ended June 30, 2006, electric sales margin decreased $0.3 million compared to the same period in 2005. The lower electric margin for the six months ended June 30, 2006 reflects decreases of $1.8 million related to lower Seabrook Amortization Surcharge (SAS) and other revenues and $0.2 million related to lower sales volume offset by the recognition of $1.7 million of revenue based on the Company's pending rate filing in New Hampshire, discussed above. This decrease in SAS revenues reflects the expiration in the fourth quarter of 2005 of the SAS tariff on Regulatory Assets, which is largely matched by a decrease in amortization expenses on Regulatory Assets (see discussion of Depreciation & Amortization below).

Total sales of natural gas increased 28.9% in the three months ended June 30, 2006 compared to the same period in 2005 and increased 7.7% in the six months ended June 30, 2006 compared to the same period in 2005. The increases in both of these periods were due to a new contract with a large industrial customer. Absent the sales from this new contract, sales to C&I customers were approximately 9.1% and 11.7% lower for the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. Gas sales to residential customers were 13.0% and 11.5% lower for the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. The declines in residential and C&I sales reflect lower average energy usage by customers during a period of higher energy prices and significantly milder winter weather in 2006. The weather in the Company's service territories in the first quarter of 2006 was approximately 12% warmer than in the same period for 2005, and the country as a whole experienced a record warm January.

Gas sales margin decreased $0.3 million and $0.9 million in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. The decreases in gas margin are attributable to lower sales volume on C&I and residential sales, as discussed above. The Massachusetts Department of Telecommunications and Energy (MDTE) is in the process of approving the margin earned by the Company under the new contract, discussed above. Accordingly, pending the results of this proceeding, the Company is recording revenue from this contract on a reduced basis and therefore the significant increase in gas sales due to this contract is not matched by a similar increase in sales margin.

Total O&M expense increased $1.0 million and $1.1 million, respectively, in the three and six month periods ended June 30, 2006, compared to the same periods in 2005. On a year to date basis through June 30, 2006, the increase reflects higher retiree and employee benefit costs of $0.9 million, higher salaries and compensation expenses of $0.4 million and higher utility operating costs of $0.1 million, partially offset by lower audit and legal fees of $0.2 million and all other expenses, net of $0.1 million compared to 2005.

Depreciation and Amortization expense decreased $0.6 million and $1.5 million for the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. These decreases were primarily due to lower amortization on regulatory assets, partially offset by depreciation on normal utility plant additions. The Company's regulatory asset related to its former abandoned property investment in Seabrook Station became fully-amortized in the third quarter of 2005.

Interest Expense, Net increased by $0.2 million and $0.4 million in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. The change in Interest Expense, Net was primarily driven by a higher weighted average cost of debt in 2006 compared to 2005.

Operating Revenues — Electric

Electric Operating Revenues – Total Electric Operating Revenues, increased by $7.3 million, or 15.8%, and by $17.0 million, or 18.3%, in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. Total Electric Operating Revenues include the recovery of costs of electric sales, which are recorded as Purchased Electricity and Conservation & Load Management (C&LM) in Operating Expenses. The net increase in Total Electric Operating Revenues in the three month period reflects higher Purchased Electricity costs of $6.8 million and higher sales margin of $0.5 million. The net increase in Total Electric Operating Revenues in the six month period reflects higher Purchased Electricity costs of $17.4 million, offset by lower sales margin of $0.3 million and lower C&LM revenues of $0.1 million. As discussed above, the Company has recognized $1.7 million of revenues in the six months ended June 30, 2006 based on the temporary rate order, effective January 1, 2006.

Purchased Electricity and C&LM revenues increased a net $6.8 million, or 14.8%, and $17.4 million, or 18.8%, of Total Electric Operating Revenues in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005, reflecting higher electric commodity prices and lower spending on energy efficiency programs that were implemented during those periods. Purchased Electricity revenues include the recovery of the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin (Total Electric Operating Revenues less Cost of Electric Sales) was $14.4 million and $27.3 million in the three and six month periods ended June 30, 2006, respectively. This represents an increase of $0.5 million in the three month period and a decrease of $0.3 million in the six month period, compared to the same periods in 2005. The lower sales margin for the six months ended June 30, 2006, reflects decreases of $1.8 million related to lower SAS and other revenues and $0.2 million related to lower sales volume offset by the recognition of $1.7 million of revenue based on the Company's pending rate filing in New Hampshire, discussed above. The decrease in SAS revenues reflects the expiration in the fourth quarter of 2005 of the SAS tariff on Regulatory Assets, which is largely matched by a decrease in amortization expenses on Regulatory Assets (see discussion of Depreciation & Amortization below).

The following table details total Electric Operating Revenues and Sales Margin for the three and six month periods ended June 30, 2006 and 2005:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2006	2005	$ Change	% Change[1]	**2006**	2005	$ Change	% Change[1]

Purchased Electricity	**$ 37.8**	$ 31.0	$ 6.8	14.8%	**$ 80.7**	$ 63.3	$ 17.4	18.8%
Conservation & Load Management	**1.1**	1.1	---	---	**1.8**	1.9	(0.1)	(0.1%)
Electric Sales Margin	**$ 14.4**	$ 13.9	$ 0.5	1.0%	**$ 27.3**	$ 27.6	$ (0.3)	(0.4%)

(1) Represents change as a percent of Total Electric Operating Revenue.

Kilowatt-hour Sales - Unitil's total electric kWh sales were 0.3% and 0.8% lower in the three and six months ended June 30, 2006, respectively, compared with the same periods in 2005, reflecting customer growth offset by milder weather and a decline in average energy usage as customers appear to be reacting to higher energy prices by better managing their energy consumption. The weather in the Company's service territories in the first quarter of 2006 was approximately 12% warmer than in the same period for 2005, resulting in lower consumption of electricity for heating. In the second quarter of 2006 the weather in the Company's service territories was approximately 54% cooler than in the same period for 2005, resulting in lower consumption of electricity for cooling. Sales to residential customers increased 0.8% in the three month period as compared to the prior year period and decreased 0.7% in the six month period as compared to the prior year period. Sales to commercial and industrial (C&I) customers decreased 1.0% and 0.9% in the three and six month periods, respectively, as compared to the prior year periods.

The following table details total kWh sales for the three and six months ended June 30, 2006 and 2005 by major customer class:

kWh Sales (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2006	2005	Change	% Change	**2006**	2005	Change	% Change
Residential	**149.7**	148.5	1.2	0.8%	**332.9**	335.3	(2.4)	(0.7%)
Commercial / Industrial	**262.8**	265.4	(2.6)	(1.0%)	**530.6**	535.4	(4.8)	(0.9%)
Total	**412.5**	413.9	(1.4)	(0.3%)	**863.5**	870.7	(7.2)	(0.8%)

Operating Revenues - Gas

Gas Operating Revenues – Total Gas Operating Revenues increased $1.3 million, or 26.0%, and $2.4 million, or 13.7%, in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. Total Gas Operating Revenues include the recovery of the cost of sales, which are recorded as Purchased Gas and C&LM in Operating Expenses. The net increase in Total Gas Operating Revenues in the three month period reflects higher Purchased Gas costs of $1.6 million, partially offset by lower sales margin of $0.3 million. The net increase in Total Gas Operating Revenues in the six month period reflects higher Purchased Gas costs of $3.3 million, offset by lower sales margin of $0.9 million.

Purchased Gas and C&LM revenues increased a net $1.6 million, or 32.0%, and $3.3 million, or 18.8%, of Total Gas Operating Revenues in the three and six month periods ended June 30, 2006, respectively, compared to the same period in 2005, reflecting higher gas commodity prices, higher unit sales and relatively flat spending on energy efficiency programs that were implemented during those periods. Purchased Gas revenues include the recovery of the cost of gas supply as well as the other energy supply related costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Gas sales margin (Total Gas Operating Revenue less the Cost of Gas Sales) was $1.8 million and $5.2 million in the three and six month periods ended June 30, 2006, respectively. This represents decreases of $0.3 million, or 6.0%, and $0.9 million, or 5.1%, of Total Gas Operating Revenue in the three and six month periods compared to the same periods in 2005, respectively.

For the three month period, approximately $0.2 million of the decrease in gas sales margin is due to lower gas sales. Overall, gas sales were 28.9% higher in the second quarter of 2006 than in the same period of 2005, but this increase in gas sales is due to a new contract with a large industrial customer. Absent the sales from this new contract, gas sales were approximately 11.1% lower for the three month period ended June 30, 2006, compared to the same period in 2005. The Massachusetts Department of Telecommunications and Energy (MDTE) is in the process of approving the margin earned by the Company under the new contract, discussed above. Pending the results of this proceeding, the Company is recording revenue from this contract on a reduced basis and therefore the significant increase in gas sales due to this contract is not matched by a similar increase in sales margin. The remainder of the decrease in gas sales margin in the three month period is due to changes in the mix of customer billings period over period.

For the six month period, approximately $0.7 million of the decrease in gas sales margin is due to lower gas sales. Gas sales were 7.7% higher in the six months ended June 30, 2006 than in the same period of 2005. This increase in sales is due to the new transportation contract with a large industrial customer discussed above. Absent the sales from this new contract, gas sales were approximately 11.6% lower for the six months ended June 30, 2006 compared to the same period in 2005. The remainder of the decrease in gas sales margin in the six month period is due to changes in the mix of customer billings period over period.

The following table details total Gas Operating Revenues and Sales Margin for the three and six months ended June 30, 2006 and 2005:

Gas Operating Revenues and Sales Margin (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2006	2005	$ Change	% Change[(1)]	**2006**	2005	$ Change	% Change[(1)]
Gas Operating Revenue:								
Residential	**$ 3.2**	$ 3.0	$ 0.2	4.0%	**$ 11.0**	$ 10.5	$ 0.5	2.8%
Commercial / Industrial	**2.1**	1.8	0.3	6.0%	**7.8**	7.0	0.8	4.6%
Total Firm Gas Revenue	**$ 5.3**	$ 4.8	$ 0.5	10.0%	**$ 18.8**	$ 17.5	$ 1.3	7.4%
Interruptible Gas Revenue	**1.0**	0.2	0.8	16.0%	**1.2**	0.1	1.1	6.3%
Total Gas Operating Revenue	**$ 6.3**	$ 5.0	$ 1.3	26.0%	**$ 20.0**	$ 17.6	$ 2.4	13.7%
Cost of Gas Sales:								
Purchased Gas	**$ 4.4**	$ 2.8	$ 1.6	32.0%	**$ 14.6**	$ 11.3	$ 3.3	18.8%
Conservation & Load Management	**0.1**	0.1	---	---	**0.2**	0.2	---	---
Gas Sales Margin	**$ 1.8**	$ 2.1	$ (0.3)	(6.0%)	**$ 5.2**	$ 6.1	$ (0.9)	(5.1%)

(1) Represents change as a percent of Total Gas Operating Revenue.

Therm Sales – Unitil's total gas sales increased 28.9% in the three months ended June 30, 2006 compared to the same period in 2005 and increased 7.7% in the six months ended June 30, 2006 compared to the same period in 2005. The increases in both of these periods were due to a new gas sales contract with a large industrial customer. Absent the sales from this new contract, sales to C&I customers were approximately 9.1% and 11.7% lower for the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. Gas sales to residential customers were 13.0% and 11.5% lower for the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. The declines in residential and C&I sales reflect lower average energy usage by customers during a period of higher energy prices and significantly milder winter weather in 2006. The weather in the Company's service territories in the first quarter of 2006 was approximately 12% warmer than in the same period for 2005, and the country as a whole experienced a record warm January.

The following table details total firm therm sales for the three and six months ended June 30, 2006 and 2005, by major customer class:

Therm Sales (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2006	2005	Change	% Change	**2006**	2005	Change	% Change
Residential	**2.0**	2.3	(0.3)	(13.0%)	**6.9**	7.8	(0.9)	(11.5%)
Commercial / Industrial	**3.8**	2.2	1.6	72.7%	**9.8**	7.7	2.1	27.3%
Total	**5.8**	4.5	1.3	28.9%	**16.7**	15.5	1.2	7.7%

Operating Revenue - Other

Total Other Revenue increased $0.2 million, or 35.4%, and $0.2 million, or 25.8% in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. These increases were the result of growth in revenues from the Company's unregulated energy brokering business, Usource.

The following table details total Other Revenue for the three and six months ended June 30, 2006 and 2005:

Other Revenue (000's)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2006	2005	$ Change	% Change	**2006**	2005	$ Change	% Change
Other	**$ 612**	$ 452	160	35.4%	**$ 1,199**	$ 953	$ 246	25.8%
Total Other Revenue	**$ 612**	$ 452	$ 160	35.4%	**$ 1,199**	$ 953	$ 246	25.8%

Operating Expenses

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity increased $6.8 million, or 22.0%, and $17.4 million, or 27.5%, in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005, reflecting higher electric commodity prices. The Company recovers the costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas increased $1.5 million, or 54.2%, and $3.3 million, or 29.3%, in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. These increases in Purchased Gas are attributable to increased therm sales and higher gas commodity costs. The Company recovers the costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Operation and Maintenance (O&M) - O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total O&M expense increased $1.0 million and $1.1 million in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. For the six month period, the increase reflects higher retiree and employee benefit costs of $0.9 million, higher salaries and compensation expenses of $0.4 million and higher utility operating costs of $0.1 million, partially offset by lower audit and legal fees of $0.2 million and all other expenses, net of $0.1 million.

Conservation & Load Management – C&LM expenses are associated with the development, management, and delivery of the Company's Energy Efficiency programs. Energy Efficiency programs are designed, in conformity with state regulatory requirements, to help consumers use natural gas and electricity more efficiently and thereby decrease their energy costs. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 90% of these costs are related to electric operations and 10% to gas operations.

Total C&LM expenses decreased less than $0.1 million, or 0.7%, and $0.1 million, or 4.0%, in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. The decreases reflect the timing of spending on the implementation of Energy Efficiency programs. These costs are collected from customers on a pass through basis and therefore, fluctuations in program costs have no impact on Net Income.

Depreciation, Amortization and Taxes

Depreciation and Amortization - Depreciation and Amortization expense decreased $0.6 million, or 11.7% and $1.5 million, or 14.6%, for the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. These decreases were due to lower amortization on regulatory assets, partially offset by depreciation on normal utility plant additions. The Company's regulatory asset related to its former abandoned property investment in Seabrook Station became fully-amortized in the third quarter of 2005.

Local Property and Other Taxes - Local Property and Other Taxes increased by $0.1 million, or 5.9%, and $0.1 million, or 3.2%, for the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. The increase in the three month period was due to higher local property tax rates and higher payroll taxes. The increase in the six month period was due to higher payroll taxes.

Federal and State Income Taxes - Federal and State Income Taxes were lower by $0.1 million and $0.4 million in the three and six months ended June 30, 2006, respectively, compared to the same periods in 2005 reflecting lower pre-tax earnings.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. Certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

The Company operates a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the Company's tariff, interest is accrued on these balances and will produce either interest income or interest expense. Interest income is recorded on an under-collection of costs, which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (000's)	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	**2006**	2005
Interest Expense				
Long-term Debt	$ **2,303**	$ 2,100	$ **4,622**	$ 4,202
Short-term Debt	**411**	225	**716**	441
Regulatory Liabilities	**67**	63	**109**	102
Subtotal Interest Expense	**2,781**	2,388	**5,447**	4,745
Interest Income				
Regulatory Assets	**(759)**	(637)	**(1,486)**	(1,225)
AFUDC and Other	**(56)**	(19)	**(82)**	(33)
Subtotal Interest Income	**(815)**	(656)	**(1,568)**	(1,258)
Total Interest Expense, Net	$ **1,966**	$ 1,732	$ **3,879**	$ 3,487

Interest Expense, Net increased by $0.2 million and $0.4 million in the three and six month periods ended June 30, 2006, respectively, compared to the same periods in 2005. Interest expense on long-term borrowings increased in both the three and six month periods in 2006 compared to 2005 due to the issuance of fixed rate long-term debt. In December 2005 Unitil's Massachusetts utility subsidiary, FG&E issued $15 million of unsecured long-term notes to institutional investors. Interest expense on short-term debt increased in both the three and six month periods in 2006 compared to 2005 primarily due to higher average short-term interest rates. These increases in interest expense were partially offset by an increase in interest income on regulatory assets primarily due to higher carrying charges on regulatory assets.

CAPITAL REQUIREMENTS

Cash provided by operating activities was $11.0 million during the first six months of 2006, a decrease of $2.8 million over the comparable period in 2005. Net Income was $0.8 million lower in the first half of 2006 compared to 2005. Depreciation and Amortization declined by $1.5 million in the six months ended June 30, 2006 as compared to the same period in 2005 reflecting a lower amortization on regulatory assets. The Deferred Tax Provision increased by $1.7 million during the first half of 2006 compared to the same period in 2005, reflecting a net change between current and deferred income taxes related to changes in Accrued Revenue balances. Cash sources from Accrued Revenue decreased by $3.9 million period over period due to higher energy costs, which will be collected from customers in future periods. Taxes Payable declined by $2.3 million, reflecting higher tax payments in 2006 compared to 2005. Cash uses for Accounts Payable decreased by $1.5 million compared to last year reflecting a higher level of funding of energy obligations in 2005. In addition, uses of cash for Deferred Restructuring Costs declined by $2.3 million in the first six months of 2006 compared to the same period last year. Deferred Restructuring Costs are regulatory assets that will be recovered from customers in future periods. All other changes in cash flows from operating activities were a net increase of $0.2 million in cash provided by operating activities.

Cash used in investing activities was $14.4 million for the six months ended June 30, 2006 an increase of $4.9 million over the comparable period in 2005. Annual capital expenditures are presently budgeted to be $33.4 million in 2006 compared to $24.4 million expended in 2005. These 2006 capital expenditures include approximately $6.6 million of cash outlays for the Automated Metering Infrastructure projects, which are expected to be completed in May 2007. Capital expenditure projections are subject to changes during the fiscal year.

Cash flows provided by financing activities were $4.1 million in the first six months of 2006. In the comparable period of 2005 cash used in financing activities amounted to $4.0 million, a net change between the two periods of $8.1 million. Cash provided for financing activities in the current period includes the proceeds from short-term bank borrowings of $8.0 million compared to the repayment of $0.2 million of short-term bank borrowings during the same period in 2005. The current period reflects the early repurchase of $0.2 million of preferred stock. Both periods reflect the payment of dividends to shareholders of approximately $3.9 million. During the first six months of 2006 and 2005, normal sinking fund payments amounted to approximately $0.2 million during both periods. Both periods include the proceeds of approximately $0.5 million received from the sale of Unitil Common Stock through the Dividend Reinvestment and Stock Purchase Plan and 401(k) plans. During the first half of 2005 the Company repaid capital lease obligations of $0.2 million.

Unitil’s subsidiary, UES expects to conclude a $15 million First Mortgage Bond issuance on or about September 30, 2006. This transaction is subject to the approval of the NHPUC and the final approval of UES’ Board of Directors. The proceeds from this financing will be used principally to reduce short-term debt, and for other corporate purposes. Accordingly, as discussed below, the Company reduced its unsecured credit lines by $4.0 million as of June 30, 2006.

At June 30, 2006, Unitil had completed the successful renewal of $40.0 million in unsecured revolving lines of credit through three banks. This represents a reduction from previously unsecured credit lines of $4.0 million. Average daily short-term borrowings during the first six months of 2006 were approximately $25.0 million, an increase of approximately $0.8 million over the comparable period in 2005. At June 30, 2006, the Company had available approximately $13.3 million of unused bank lines of credit and had short-term debt outstanding through bank borrowings of approximately $26.7 million. In addition, Unitil had $3.9 million in cash at June 30, 2006.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company’s policy is to limit these guarantees to two years or less. As of June 30, 2006, there are $8.0 million of guarantees outstanding and the longest term guarantee extends through May 31, 2008.

Critical Accounting Policies

The preparation of the Company’s financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, management is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgments, the financial statements of the Company could be materially different than reported. The following is a summary of the Company’s most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company’s significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company’s Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 22, 2006.

Regulatory Accounting - The Company’s principal business is the distribution of electricity and natural gas by the retail distribution companies: UES and FG&E. Both UES and FG&E are subject to regulation by the FERC and FG&E is regulated by the MDTE and UES is regulated by the NHPUC. Accordingly, the Company uses the provisions of Financial Accounting Standards Board (FASB) Statement No. 71, “Accounting for the Effects of Certain Types of Regulation.” (SFAS No. 71). In accordance with SFAS No. 71, the Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered or refunded in future electric and gas retail rates.

SFAS No. 71 specifies the economic effects that result from the cause and effect relationship of costs and revenues in the rate-regulated environment and how these effects are to be accounted for by a regulated enterprise. Revenues intended to cover some costs may be recorded either before or after the costs are incurred. If regulation provides assurance that incurred costs will be recovered in the future, these costs would be recorded as deferred charges or "regulatory assets" under SFAS No. 71. If revenues are recorded for costs that are expected to be incurred in the future, these revenues would be recorded as deferred credits or "regulatory liabilities" under SFAS No. 71.

The Company’s principal regulatory assets and liabilities are detailed on the Company's Consolidated Balance Sheet. The Company is currently receiving or being credited with a return on all of its regulatory assets for which a cash outflow has been made. The Company is currently paying or being charged with a return on all of its regulatory liabilities for which a cash inflow has been received. The Company's regulatory assets and liabilities will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

The application of SFAS No. 71 results in the deferral of costs as regulatory assets that, in some cases, have not yet been approved for recovery by the applicable regulatory commission. Management must conclude that any costs deferred as regulatory assets are probable of future recovery in rates. However, regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. Management believes it is probable that the Company's regulated utility companies will recover their investments in long-lived assets, including regulatory assets. The Company also has commitments under long-term contracts for the purchase of electricity and natural gas from various suppliers. The annual costs under these contracts are included in Purchased Electricity and Purchased Gas in the Consolidated Statements of Earnings and these costs are recoverable in current and future rates under various orders issued by the FERC, MDTE and NHPUC.

If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of SFAS No. 71. If unable to continue to apply the provisions of SFAS No. 71, the Company would be required to apply the provisions of FASB Statement No. 101, "Regulated Enterprises – Accounting for the Discontinuation of Application of Financial Accounting Standards Board Statement No. 71." In management's opinion, the Company's regulated operations will be subject to SFAS No. 71 for the foreseeable future.

Utility Revenue Recognition - Regulated utility revenues are based on rates approved by state and federal regulatory commissions. These regulated rates are applied to customers' accounts based on their actual or estimated use of energy. Energy sales to customers are based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

As discussed above, the Company's New Hampshire utility operating subsidiary, UES, filed a request for a base rate increase of $4.65 million with the New Hampshire Public Utilities Commission (NHPUC) which established temporary rate relief at current rate levels, effective January 1, 2006. Any rate change ultimately awarded by the NHPUC will be retroactive to January 1, 2006. The rate filing is currently under review, with a NHPUC order anticipated before the end of 2006. Based on the temporary rate order and the current status of proceedings, management has recorded an estimate of expected revenue and expenses for the first six months of 2006.

Allowance for Doubtful Accounts - The Company recognizes a Provision for Doubtful Accounts each month. The amount of the monthly Provision is based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior years. Account write-offs, net of recoveries, are processed monthly. At the end of each month, an analysis of the delinquent receivables is performed and the adequacy of the Allowance for Doubtful Accounts is reviewed. The analysis takes into account an assumption about the cash recovery of delinquent receivables and also uses calculations related to customers who have chosen payment plans to resolve their arrears. The analysis also calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis. Also, the Company has experienced periods when state regulators have extended the periods during which certain standard credit and collection activities of utility companies are suspended. In periods when account write-offs exceed estimated levels, the Company adjusts the Provision for Doubtful Accounts to maintain an adequate Allowance for Doubtful Accounts balance.

Pension and Postretirement Benefit Obligations - The Company has a defined benefit pension plan covering substantially all its employees and also provides certain other post-retirement benefits (PBOP), primarily medical and life insurance benefits to retired employees. The Company also has a Supplemental Executive Retirement Plan (SERP) covering certain executives of the Company. The Company accounts for these benefits in accordance with FASB Statement No. 87, "Employers' Accounting for Pensions" (SFAS No. 87) and FASB Statement No. 106, "Employers' Accounting for Postretirement Benefits other than Pensions" (SFAS No. 106). In applying these accounting policies, the Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. For each of these plans, the development of the benefit obligation, fair value of plan assets, funded status and net periodic benefit cost is based on several significant assumptions.

The Company’s reported costs of providing pension and PBOP benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company’s health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. Pension and PBOP costs (collectively "postretirement costs") are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future postretirement costs. Postretirement costs may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the postretirement costs and benefit obligations. If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's consolidated financial statements. See Note 8.

Pension expense is calculated based upon a number of actuarial assumptions, including an expected long-term rate of return on Plan assets. In developing the expected long-term rate of return assumption, the Company evaluated input from actuaries and investment managers. The Company's expected long-term rate of return on Plan assets is based on target asset allocation assumptions of 60% in common stock equities and 40% in fixed income securities. The Company will continue to evaluate the actuarial assumptions, including the expected rate of return, at least annually, and will adjust the appropriate assumptions as necessary.

Income Taxes - Income tax expense is calculated in each of the jurisdictions in which the Company operates for each period for which a statement of income is presented. This process involves estimating the Company’s actual current tax liabilities as well as assessing temporary and permanent differences resulting from differing treatment of items, such as timing of the deduction of expenses for tax and book accounting purposes. These differences result in deferred tax assets and liabilities, which are included in the consolidated balance sheets. The Company must also assess the likelihood that the deferred tax assets will be recovered from future taxable income, and to the extent that recovery is not likely, a valuation allowance must be established. Significant management judgment is required in determining income tax expense, deferred tax assets and liabilities and valuation allowances. The Company accounts for deferred taxes under FASB Statement No. 109, "Accounting for Income Taxes." The Company does not currently have any valuation allowances against its recorded deferred tax amounts.

Depreciation - Depreciation expense is calculated based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company’s fixed assets.

Commitments and Contingencies - The Company’s accounting policy is to record and/or disclose commitments and contingencies in accordance with FASB Statement No. 5, “Accounting for Contingencies” (SFAS No. 5). SFAS No. 5 applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible gain or loss that will ultimately be resolved when one or more future events occur or fail to occur.

Refer to “Recently Issued Accounting Pronouncements” in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

There are approximately 100 employees of the Company represented by labor unions. In May 2005, the Company reached agreements with its bargaining units for new five-year contracts, effective June 1, 2005. These agreements replace contracts that expired on May 31, 2005.

INTEREST RATE RISK

The majority of the Company's debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new long-term debt securities issued by the Company. In addition, the Company's short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease the Company's interest expense in future periods. For example, if the Company had an average amount of short-term debt outstanding of $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000 (pre-tax). The average interest rates on the Company's short-term borrowings for the three months ended June 30, 2006 and June 30, 2005 were 5.46% and 3.51%, respectively. The average interest rates on the Company's short-term borrowings for the six months ended June 30, 2006 and June 30, 2005 were 5.24% and 3.27%, respectively.

MARKET RISK

Although Unitil's utility operating companies were subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of power and gas costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making which involves the pre-approval of the commodity prices included in rates. Additionally, as discussed below in Regulatory Matters, the Company has divested its long-term commodity-related contracts and therefore, has further reduced its exposure to commodity risk. In recent periods, the energy markets have experienced significant volatility, with unprecedented increases in energy prices. The Company is working with the regulatory commissions to address the issue of increasing energy prices and help the Company's customers work through this difficult period. The regulatory commissions in Massachusetts and New Hampshire have continued to approve full collection of these costs by Unitil's utility operating companies. However, the risk exists that the regulatory commissions would require the Company to finance, through deferrals, a portion of these costs for a period of time.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three and six months ended June 30, 2006 are not necessarily indicative of results to be expected for the year ending December 31, 2006. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2005, as filed with the SEC on February 22, 2006, for a description of the Company's Basis of Presentation.

Nature of Operations – Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the Securities and Exchange Commission (SEC). As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (UES) (formed in 2002 by the combination and merger of Unitil's former utility subsidiaries Concord Electric Company and Exeter & Hampton Electric Company), Fitchburg Gas and Electric Light Company (FG&E), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

Unitil's principal business is the retail distribution of electricity in the southeastern seacoast and capital city areas of New Hampshire and the retail distribution of both electricity and natural gas in the greater Fitchburg area of north central Massachusetts, through the Company's two wholly owned subsidiaries, UES and FG&E, collectively referred to as the retail distribution utilities.

A third utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for UES. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of UES on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve UES' customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service, Unitil Realty and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-utility unregulated subsidiary that provides consulting and management related services. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Recently Issued Pronouncements – In June 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48). This interpretation clarified the accounting for uncertainty in income taxes recognized in accordance with FASB Statement No. 109, "Accounting for Income Taxes" (SFAS No. 109). Specifically, FIN 48 clarifies the application of SFAS No. 109 by defining a criterion that an individual tax position must meet for any part of the benefit of that position to be recognized in an enterprise's financial statements. Additionally, FIN 48 provides guidance on measurement, derecognition, classification, interest and penalties, accounting in interim periods of income taxes, as well as the required disclosure and transition. This interpretation is effective for fiscal years beginning after December 15, 2006. The Company is in the process of completing its analysis of FIN 48 as it applies to the Company's operations and it does not expect that the adoption of FIN 48 will have a significant impact on the Company's Consolidated Financial Statements.

In March 2006, the FASB issued a Proposed Statement of Financial Accounting Standards (SFAS), "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans." The Proposed SFAS would amend SFAS No. 87, SFAS No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits," SFAS No. 106 and SFAS No. 132(R), "Employers' Disclosures about Pensions and Other Postretirement Benefits." The Proposed SFAS would require companies to record on their balance sheets pension assets and liabilities, based on projected benefit obligations, and transition assets and obligations. Additionally, the Proposed SFAS would require companies to recognize in their statements of earnings actuarial gains and losses and prior service costs and credits which have not yet been recorded as expense. The effective date of the Proposed SFAS is proposed to be December 15, 2006. The Company is currently assessing the impact the Proposed SFAS would have on the Company's results of operations and financial position.

In February 2006, the FASB issued FASB Statement No. 155, "Accounting for Certain Hybrid Financial Instruments", (SFAS No. 155), which amends FASB Statement No. 133, "Accounting for Derivative Instruments and Hedging Activities", (SFAS No.133) and FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", (SFAS No. 140), effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133. The Company has adopted SFAS No. 155 and it did not have an impact on the Company's Consolidated Financial Statements.

In February 2006, the FASB issued FASB Staff Position No. FAS 123(R)-4, (FSP 123(R)-4), "Classification of Options and Similar Instruments Issued as Employee Compensation That Allow for Cash Settlement Upon the Occurrence of a Contingent Event". FSP 123(R)-4 addresses the classification of options and similar instruments issued as employee compensation that allow for cash settlement upon the occurrence of a contingent event and amends paragraphs 32 and A229 of revised FASB Statement No. 123(R), "Share-Based Payment", (SFAS No. 123(R)), which was issued in December 2004. SFAS No. 123(R) requires all entities to recognize the fair value of share-based payment awards classified in equity, unless they are unable to reasonably estimate the fair value of the award. The Company uses the fair value method for share-based payment awards and therefore the provisions of SFAS No. 123(R) have no impact on the Consolidated Financial Statements. The Company has adopted the provisions of FSP 123(R)-4.

Reclassifications - Certain amounts previously reported have been reclassified to conform to current year presentation.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount
06/22/06	08/15/06	08/01/06	$ 0.345

01/13/05	02/15/05	02/01/05	$ 0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

During the second quarter of 2006, the Company sold 10,849 shares of its Common Stock, at an average price of $24.68 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $268,000 were used to reduce short-term borrowings.

During the second quarter of 2005, the Company sold 9,274 shares of its Common Stock, at an average price of $26.63 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $247,000 were used to reduce short-term borrowings.

The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 16, 2006, 14,375 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $366,563. On March 8, 2005, 10,900 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $299,423. On April 29, 2004, 10,700 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $293,715. On May 12, 2003, 10,600 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $259,170. The compensation expense associated with the issuance of shares under the Plan is being accrued on a monthly basis over the vesting period.

Unitil Realty Corp.:			
Senior Secured Notes:			
8.00% Notes, Due August 1, 2017	**5,522**	5,819	5,673
Total	**125,522**	110,819	125,673
Less: Installments due within one year	**323**	296	308
Total Long-term Debt	**$ 125,199**	$ 110,523	$ 125,365

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at June 30, 2006 is estimated to be in a range of up to approximately $134 million, before considering any costs, including prepayment costs, to market the Company's debt. Currently, management believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to two years or less. As of June 30, 2006 there are $8.0 million of guarantees outstanding and these guarantees extend through May 31, 2008. These guarantees are not required to be recorded under the provisions of FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others."

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2005 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 22, 2006.

Overview – Unitil and its subsidiaries are subject to regulation as a holding company system by the FERC under the Energy Policy Act of 2005 in regards to certain bookkeeping, accounting and reporting requirements. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the SEC with respect to various matters, including: the issuance of securities, capital structure, and certain acquisitions and dispositions of assets. As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. Unitil's utility operations related to wholesale and interstate business activities are also regulated by FERC. The retail distribution utilities, UES and FG&E, are subject to regulation by the NHPUC and the MDTE, respectively, in regards to their rates, issuance of securities and other accounting and operational matters. Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in our franchise areas, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on an historical test year, in addition to earning a return on their capital investment in utility assets. As a result of a restructuring of the utility industry in Massachusetts and New Hampshire, Unitil's customers have the opportunity to purchase their electric or natural gas supplies from third-party vendors. Most small and medium-sized customers, however, continue to purchase such supplies through UES and FG&E as the provider of last resort. UES and FG&E purchase electricity or natural gas from unaffiliated wholesale suppliers and recover the actual costs of these supplies, without profit or markup, through reconciling, pass-through rate mechanisms that are periodically adjusted.

In connection with the implementation of retail choice, Unitil Power and FG&E divested their long-term power supply contracts through the sale of the entitlements to the electricity sold under those contracts. UES and FG&E recover in their rates all the costs associated with the divestiture of their power supply portfolios and have secured regulatory approval from the NHPUC and MDTE, respectively, for the recovery of power supply-related stranded costs and other restructuring-related regulatory assets. The remaining balance of these assets, to be recovered principally over the next five to seven years, is $140.3 million as of June 30, 2006 and is included in Regulatory Assets on the Company's Consolidated Balance Sheet. Unitil's retail distribution companies have a continuing obligation to submit filings in both states that demonstrate their compliance with regulatory mandates and provide for timely recovery of costs in accordance with their approved restructuring plans.

FG&E – Electric Division – FG&E's primary business is providing electric distribution service. Its current retail electric distribution rates were approved by the MDTE in 2002. FG&E is required, as the provider of last resort, to purchase and provide power through Default Service for retail customers who chose not to buy, or were unable to purchase, energy from a competitive supplier. Prices for Default Service are set periodically based on market solicitations as approved by the MDTE. As of June 30, 2006, approximately 53 percent of FG&E's electric load was served by Default Service. The remaining portion was served by competitive third party suppliers.

As a result of the restructuring and the divestiture of FG&E's owned generation assets and buyout of FG&E's power supply obligations, Regulatory Assets on the Company's balance sheets include the following three categories: Power Supply Buyout Obligations associated with the divestiture of its long-term purchase power obligations; Recoverable Deferred Restructuring Charges resulting from the restructuring legislation's seven year rate cap; and Recoverable Generation-related Assets associated with the divestiture of its owned generation plant. FG&E earns carrying charges on the majority of the unrecovered balances of the Recoverable Deferred Restructuring Charges. The value of FG&E's Recoverable Deferred Restructuring Charges and Recoverable Generation-related Assets was approximately $37.9 million at June 30, 2006, and $35.9 million at June 30, 2005, and is expected to be recovered in FG&E's rates over the next five to seven years. In addition, as of June 30, 2006, FG&E had recorded on its balance sheets $54.0 million as Power Supply Buyout Obligations and corresponding Regulatory Assets associated with the divestiture of its long-term purchase power contracts, which are included in Unitil's consolidated financial statements, and on which carrying charges are not earned as the timing of cash disbursements and cash receipts associated with these long-term obligations is matched through rates.

Recovery of the deferred amounts described above will be made pursuant to a Settlement Agreement among FG&E, the Massachusetts Office of the Attorney General (Attorney General), and representatives of industrial and low-income customers. The Settlement Agreement, which was approved by the MDTE in 2005, provides for a rate path to allow recovery of FG&E's deferred stranded costs.

On March 7, 2006, the MDTE approved FG&E's 2003 and 2004 annual reconciliation of costs and revenues for Transition, Transmission, Standard Offer Service, and Default Service filed under its restructuring plan. FG&E's 2005 filing, which is subject to investigation, is pending. Management believes that this filing will be approved without material changes or adjustments.

FG&E – Gas Division – FG&E provides natural gas delivery service to its customers on a firm or interruptible basis under unbundled distribution rates approved by the MDTE. Its current retail distribution rates were approved by the MDTE in 2002. FG&E's customers may purchase gas supplies from third-party vendors or purchase their gas from FG&E as the provider of last resort. FG&E collects its gas supply costs through a seasonal reconciling CGAC and recovers other related costs through a reconciling Local Distribution Adjustment Clause.

FG&E – Other – On October 27, 2004, the MDTE approved FG&E's request for a reconciliation rate adjustment mechanism to provide for the recovery of costs associated with the Company's employee pension benefits and PBOP expenses. FG&E is allowed to record a regulatory asset in lieu of taking a charge to expense for the difference between the level of pension and PBOP expenses that are included in its base rates and the amounts that are required to be recorded in accordance with SFAS No. 87 and SFAS No. 106, since the effective date of its last base rate change. This mechanism provides for an annual filing and rate adjustment with the MDTE. As of June 30, 2006, FG&E has a regulatory asset of $2.9 million which is included as part of Regulatory Assets in the Company's Consolidated Balance Sheets.

On November 30, 2005, the MDTE announced a change in its method for recovery of gas cost-related bad debt, and determined that it would allow for full recovery of these costs on a reconciling basis. On December 15, 2005, FG&E filed a revised CGAC tariff reflecting this change which was approved effective January 1, 2006. FG&E also requested approval to recover its under-recovered gas cost-related bad debt for 2005 of approximately $164,000. On February 24, 2006, FG&E made a similar filing for its electric division, seeking approval to recover its actual electric supply-related bad debt through Default Service rates, effective January 1, 2006, and to recover its under-recovered electric supply-related bad debt for 2005 of approximately $84,000. On April 7, 2006, the MDTE consolidated the gas and electric requests for simultaneous review. A decision on these requests is expected in 2006. As of June 30, 2006, FG&E has regulatory assets for supply-related bad debt costs of $1.0 million.

UES – UES provides electric distribution service to its customers pursuant to rates approved by the NHPUC. Its current retail electric distribution rates were established under a 2002 restructuring settlement agreement. On May 1, 2004, these distribution rates were increased by $1.0 million to provide for the recovery of PBOP costs. As the provider of last resort, UES also provides its customers with electric power through Default Service at rates which reflect UES' costs for wholesale supply with no profit or markup. UES also provided a Transition Service supply for all rate classes through April 30, 2006. On May 1, 2006, customers previously on Transition Service were automatically placed on Default Service. Under a NHPUC approved settlement with the Office of the Consumer Advocate and the NHPUC Staff, UES procures Default Service power for its larger commercial and industrial customers on a quarterly basis, and for its smaller commercial and residential customers through a portfolio of longer term contracts on a semi-annual basis. UES recovers its costs for this service on a pass-through basis through reconciling rate mechanisms. As of June 30, 2006, approximately 83 percent of UES' electric load was served by Default Service. The remaining portion was served by competitive third party suppliers.

In the 2002 restructuring settlement, the NHPUC approved the divestiture of the long-term power supply portfolio by Unitil Power and tariffs for UES for stranded cost recovery and Transition and Default Service, including certain charges that are subject to annual or periodic reconciliation or future review. As of June 30, 2006, UES had recorded on its balance sheets $48.3 million as Power Supply Contract Obligations and corresponding Regulatory Assets associated with these long-term purchase power stranded costs, which are included in Unitil Corporation's consolidated financial statements. These Power Supply Contract Obligations are expected to be recovered principally over a period of approximately four years. The Company does not earn carrying charges on these regulatory assets as the timing of cash receipts and cash disbursements associated with these long-term obligations is matched through rates.

On March 17, 2006, UES made its third annual reconciliation and rate filing with the NHPUC under its restructuring plan, effective May 1, 2006, including reconciliation of prior year costs and revenues for the Transition Service Charge, Default Service Charge, Stranded Cost Charge, and External Delivery Charge. The NHPUC approved the filing on April 28, 2006.

On December 11, 2004, UES filed with the NHPUC a Petition for an accounting order to defer certain pension costs above those included in its base rates, until UES filed its next base rate case, which, pursuant to the last base rate case settlement, was required to be filed no later than October 2007 (also see Note 8 below). On April 7, 2005, the NHPUC issued an order denying UES' Petition for an accounting order. In its analysis denying UES' request, the NHPUC indicated that pension expense is an ordinary category of expense included in the revenue requirement for a utility under traditional cost of service ratemaking principles and that the size and impact of increased pension expense is not clear and that a full examination of UES' income and expenses would be undertaken when UES files a rate case. As discussed below, the Company filed a full base rate case on November 4, 2005, which included a request for recovery of Pension/PBOP costs through a reconciling mechanism, the Pension/PBOP Adjustment Charge (PAC). As of June 30, 2006, UES has recorded deferred pension costs of $1.0 million.

On November 4, 2005, UES filed a request for a base rate increase of $4.65 million with the NHPUC. The filing includes a request to recover pension and PBOP costs through an annual reconciling rate mechanism, and a step adjustment for certain future rate base additions. The filing also requested that temporary rates be established at current rate levels effective December 4, 2005. On February 3, 2006, the NHPUC issued an order approving the request for temporary rates. Any rate change ultimately awarded by the NHPUC will be retroactive to January 1, 2006. The overall rate filing is currently under review, with an NHPUC order anticipated before November 2006. It is anticipated that the final determination of the amount and method of recovering UES' pension and PBOP costs will be decided in the pending base rate case. The Company cannot determine the ultimate outcome of this proceeding. Based on the temporary rate order and the current status of proceedings, management has recorded an estimate of expected revenue and expenses for the first six months of 2006. The estimate includes $1.7 million in estimated revenue and $1.0 million in estimated operating expenses and taxes, a net increase to operating income of $0.7 million. The impact of this estimated increase in operating income on previously reported first quarter results has been determined to be immaterial.

FERC – Wholesale Power Market Restructuring – FG&E, UES and Unitil Power are members of NEPOOL, formed in 1971 to assure reliable operation of the bulk power system in the most economic manner for the region. NEPOOL is governed by the NEPOOL Agreement that is filed with and subject to the jurisdiction of the FERC. The regional bulk power system is operated by an independent corporate entity, ISO-NE, in order to avoid any opportunity for conflicting financial interests between the system operator and the market-driven participants.

As of February 1, 2005, a RTO was established in New England. ISO-NE became the entity responsible for operating the RTO. The market rules and requirements to participate in the markets previously covered under the NEPOOL Agreement were transferred to the new RTO structure under control of ISO-NE. FERC approved the formation of the RTO effective February 1, 2005. Several parties have appealed various issues associated with the FERC's approval of the RTO to Federal District Court of Appeals. Those proceedings are ongoing.

On March 1, 2004, ISO-NE filed a proposal to implement LICAP in New England to allow for the imposition of incentive pricing for transmission constrained areas. UES and FG&E intervened in the proceeding. On April 11, 2006, a contested Settlement to resolve the LICAP proceeding was submitted by the FERC Settlement Judge to the FERC. It proposed transition payments for capacity until a Forward Capacity Market can be implemented, possibly by 2010. On June 16, 2006 the FERC approved the Settlement, for implementation December 1, 2006. This case is subject to a Request for Rehearing at FERC and may be subject to subsequent appeal to the Federal Courts.

The formation of an RTO, LICAP and other wholesale market changes, including changes to transmission rates, is not expected to have a material impact on Unitil's operations because of the cost recovery mechanisms for wholesale energy costs approved by the MDTE and NHPUC. It is likely, that retail rates will be significantly increased over the next several years as the Settlement is implemented.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2005 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 22, 2006.

The Company's past and present operations include activities that are generally subject to extensive federal and state environmental laws and regulations. The Company is in general compliance with all applicable environmental and safety laws and regulations, and management believes that as of June 30, 2006, there are no material losses reasonably possible in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Sawyer Passway MGP Site – The Company continues to work with environmental regulatory agencies to identify and assess environmental issues at the former manufactured gas plant (MGP) site at Sawyer Passway, located in Fitchburg, Massachusetts. FG&E proceeded with site remediation work as specified on the Tier 1B permit issued by the Massachusetts Department of Environmental Protection (DEP), which allows the Company to work towards temporary remediation of the site. Work performed in 2002 was associated with the five-year review of the Temporary Solution submittal (Class C Response Action Outcome) under the Massachusetts Contingency Plan (MCP) that was filed for the site in 1997. Completion of this work has confirmed the Temporary Solution status of the site for an additional five years, to January 2008. A status of temporary closure requires FG&E to monitor the site until a feasible permanent remediation alternative can be developed and completed. FG&E is in the process of developing a long range plan for a Permanent Solution for the site, including alternatives for re-use of the site.

On May 13, 2004 FG&E discovered an unauthorized excavation by another property owner on the site at Sawyer Passway in which tainted soils related to MGP by-products were exposed and relocated onto property owned by FG&E. FG&E promptly reported this discovery to the DEP and subsequently received a Notice of Responsibility on May 20, 2004. FG&E has properly disposed of the relocated materials and taken other steps in accordance with DEP directives to remedy the situation. The Completion Report for this release was submitted May 9, 2005.

Since 1991, FG&E has recovered the environmental response costs incurred at this former MGP site pursuant to an MDTE approved settlement agreement between the Massachusetts Attorney General and the natural gas utilities of the Commonwealth of Massachusetts (Agreement). The Agreement allows FG&E to amortize and recover from gas customers over succeeding seven-year periods the environmental response costs incurred each year. Environmental response costs are defined to include liabilities related to manufactured gas sites, waste disposal sites or other sites onto which hazardous material may have migrated as a result of the operation or decommissioning of Massachusetts gas manufacturing facilities from 1822 through 1978. In addition, on June 9, 2006, FG&E filed suit against several of its former insurance carriers seeking coverage for past and future environmental response costs at the site. Any recovery that FG&E receives from insurance or third parties with respect to environmental response costs, net of the unrecovered costs associated therewith, are split equally between FG&E and its gas customers. The total annual charge for such costs assessed to gas customers cannot exceed five percent of FG&E’s total revenue for firm gas sales during the preceding year. Costs in excess of five percent will be deferred for recovery in subsequent years.

Note 8: Pension and Postretirement Benefit Plans

The Company provides certain pension and postretirement benefit plans for its retirees and current employees including defined benefit plans, postretirement health and welfare plans, a supplemental executive retirement plan and an employee 401(k) savings plan.

Defined Benefit Pension Plan – The Company sponsors the Unitil Corporation Retirement Plan (the Plan), a defined benefit pension plan covering substantially all its employees. Under the Plan retirement benefits are based upon an employee’s level of compensation and length of service. The Company records annual expense and accounts for its defined benefit pension plan in accordance with SFAS No. 87.

In December 2003 and 2002, UES and FG&E filed requests with their respective state regulatory commissions for approval of accounting orders to mitigate certain accounting requirements related to pension plan assets which had been triggered by the substantial decline in the capital markets. UES and FG&E were granted approval of this regulatory accounting treatment in January 2003 and 2004. As a result of these approvals, the Company has recorded as a Regulatory Asset the amount of the Plan’s unfunded Accumulated Benefit Obligation (ABO) plus one dollar. These approvals allow UES and FG&E to treat their Additional Minimum Liability (AML) as Regulatory Assets under SFAS No. 71 and avoid the reduction in equity through other comprehensive income that would otherwise be required by SFAS No. 87.

On October 27, 2004 the MDTE approved FG&E’s request for a reconciliation rate adjustment mechanism (the Pension / PBOP Adjustment Factor (PAF)) to recover the costs associated with the Company's pension and postretirement benefits other than pensions (PBOP), costs on an annually reconciling basis. As a result of this order, FG&E records a regulatory asset to recognize the deferral for the difference between the level of pension and PBOP expenses that are currently included in its base rates and the amounts that are required to be recorded in accordance with SFAS No. 87 and SFAS No. 106 and amortizes increases and /or decreases in that deferral balance into the PAF for recovery over a three year period. The PAF provides for an annual filing and rate adjustment with the MDTE and requires that carrying charges on prepaid or (accrued) pension and PBOP assets and liabilities be collected from, or refunded to, utility customers. In 2005, FG&E received approval of its first annual filing and rate adjustment.

The Company initiated similar discussions for a reconciling rate mechanism for the pension costs of UES with the NHPUC. On December 11, 2004, UES filed with the NHPUC a Petition for an Accounting Order to defer certain pension costs above those included in its base rates until UES filed its next base rate case, which, pursuant to the last base rate case settlement, was required to be filed no later than October 2007. On April 7, 2005, the NHPUC issued an order denying UES' Petition for an accounting order. In its analysis denying UES' request, the NHPUC indicated that pension expense is an ordinary category of expense included in the revenue requirement for a utility under traditional cost of service ratemaking principles and that the size and impact of increased pension expense is not clear and that a full examination of UES' income and expenses would be undertaken when UES files a rate case. As discussed above, the Company filed a full base rate case on November 4, 2005, which included a request for recovery of Pension/PBOP costs through a reconciling mechanism, the PAC. UES' regulatory history with the NHPUC regarding this issue taken together with ratemaking precedent concerning pension cost recovery leads management to conclude that the pension costs are probable of recovery under SFAS No. 71. As of June 30, 2006, UES has recorded deferred pension costs of $1.0 million.

The following tables show the components of net periodic pension cost, (NPPC), as well as key actuarial assumptions used in determining the various pension plan values:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	**2006**	2005
Components of NPPC (000's)				
Service Cost	**$ 450**	$ 332	**$ 900**	$ 679
Interest Cost	**790**	792	**1,577**	1,548
Expected Return on Plan Assets	**(976)**	(837)	**(1,887)**	(1,702)
Amortization of Prior Service Cost	**27**	25	**53**	51
Amortization of Net (Gain) Loss	**306**	261	**662**	482
Subtotal NPPC	**597**	573	**1,305**	1,058
Net Amounts Capitalized and Deferred	**(68)**	(381)	**(644)**	(684)
NPPC Recognized	**$ 529**	$ 192	**$ 661**	$ 374

Included in the 2006 amounts above for Amounts Capitalized and Deferred are approximately ($164,000) and $143,000 for the three and six months ended June 30, 2006, respectively, recorded as increases (decreases) to Regulatory Assets on the Company's Balance Sheet. Included in the 2005 amounts above for Amounts Capitalized and Deferred are approximately $209,000 and $366,000 for the three and six months ended June 30, 2005, respectively, recorded as increases to Regulatory Assets on the Company's Balance Sheet. The remaining amounts represent amounts capitalized to construction overheads. Included in the above pension expense amounts for 2006 are estimated expenditures to be recognized in the Company's rate proceeding in New Hampshire, as discussed above.

Key Assumptions (Weighted Average)	2006	2005
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	6.50% (1)
Rate of Compensation Increase	**3.50%**	3.50%
Used to Determine NPPC:		
Discount Rate	**5.50%**	6.50% (1)
Expected Long-Term Rate of Return on Plan Assets	**8.50%**	8.50%
Rate of Compensation Increase	**3.50%**	3.50%

(1) In May 2005, the Company reached agreements with its union labor bargaining units for new five-year contracts, effective June 1, 2005, which resulted in amendments to the Plan. Effective for the period of June 1, 2005 through December 31, 2005, the Company lowered the assumed discount rate to 6.00%.

Employer Contributions – As of June 30, 2006, the Company has not yet made any contributions to the Plan for 2006. The Company is required to make a minimum contribution to its pension plan this year in the amount of $0.8 million. The Company contributed $2.5 million in 2005.

Postretirement Benefits - The Company also sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan) primarily to provide health care and life insurance benefits to active employees. Prior to October 1, 2003, the Company funded certain postretirement benefits through the Unitil Retiree Trust (URT). URT was an organization of retirees, incorporated in 1993 to provide social, health and welfare benefits to its members, who are eligible former employees of the Company. Effective January 1, 2004, the PBOP Plan was amended to provide certain healthcare and life insurance benefits, which were previously provided by the URT. The Company has established Voluntary Employee Benefit Trusts, into which it funds contributions to the PBOP Plan.

In January 2004 and May 2004, the FASB issued, respectively, Statement No. 106-1 (SFAS No. 106-1) and Statement No. 106-2 (SFAS No. 106-2), "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003", (the Act). The Act includes a subsidy to a plan sponsor that is based on 28 percent of an individual beneficiary's annual prescription drug costs between $250 and $5,000 and the opportunity for a retiree to obtain a prescription drug benefit under Medicare. SFAS No. 106-1 and SFAS No. 106-2 require the disclosure of the effects, if any, of the Act on the reported measure of the accumulated postretirement benefit obligation and how that effect has been, or will be, reflected in the net postretirement benefit costs of current or subsequent periods. On January 28, 2005, the final Medicare Part D Prescription Drug Rules were posted to the Federal Register. Based on these rules, the Company's estimated PBOP Projected Benefit Obligation was reduced by $5.1 million. Also, the Company has estimated that its annual PBOP costs will be reduced by $0.4 million under the Act. These reductions are reflected in the Company's Consolidated Financial Statements. The Company's health care insurance provider has concluded that the Company's PBOP Plan is equal to or better than standard Medicare Part D coverage. Additionally, the Company's recognition of the Act is not expected to have any impact on the rate of participation in the PBOP Plan or per capita claims.

As discussed above, on October 27, 2004 the MDTE approved FG&E's request for a reconciliation rate adjustment mechanism, the PAF, to recover the costs associated with the Company's pension and PBOP costs on an annually reconciling basis. On March 15, 2004 UES filed a petition with the NHPUC for recovery of PBOP costs. UES proposed an increase to its distribution base rates of $1.0 million to provide for the recovery of these costs, effective May 1, 2004. The NHPUC approved this filing, effective May 1, 2004. As discussed above, on November 4, 2005, UES filed a request for a base rate increase of $4.65 million. The filing includes a request to recover pension and PBOP costs through an annual reconciling rate mechanism. It is anticipated that the final determination of the amount and method of recovering UES' pension and PBOP costs will be decided in the base rate case. The Company cannot determine the ultimate outcome of this proceeding.

The following tables show the components of net periodic postretirement benefit cost (NPPBC), as well as key actuarial assumptions used in determining the various PBOP Plan values:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	**2006**	2005
Components of NPPBC (000's)				
Service Cost	**$ 350**	$ 222	**$ 641**	$ 444
Interest Cost	**563**	456	**1,014**	912
Expected Return on Plan Assets	**(69)**	(15)	**(97)**	(30)
Amortization of Prior Service Cost	**340**	365	**680**	730
Amortization of Transition (Asset) Obligation	**5**	5	**11**	10
Amortization of Net (Gain) Loss	**80**	(16)	**80**	(32)
Subtotal NPPBC	**1,269**	1,017	**2,329**	2,034
Amounts Capitalized and Deferred	**(631)**	(474)	**(1,113)**	(948)
NPPBC Recognized	**$ 638**	$ 543	**$ 1,216**	$ 1,086

Included in the 2006 amounts above for Amounts Capitalized and Deferred are approximately $167,000 and $237,000 for the three and six months ended June 30, 2006, respectively, recorded as increases to Regulatory Assets on the Company's Balance Sheet. Included in the 2005 amounts above for Amounts Capitalized and Deferred are approximately $139,000 and $278,000 for the three and six months ended June 30, 2005, respectively, recorded as increases to Regulatory Assets on the Company's Balance Sheet. The remaining amounts represent amounts capitalized to construction overheads.

Weighted-Average Assumptions	**2006**	2005
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	6.50% (1)
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	7.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%

Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2013

(1) In May 2005, the Company reached agreements with its union labor bargaining units for new five-year contracts, effective June 1, 2005, which resulted in amendments to the Plan. Effective for the period of June 1, 2005 through December 31, 2005, the Company lowered the assumed discount rate to 6.00%.

Employer Contributions – As of June 30, 2006, the Company has made $0.8 million of contributions to the PBOP Plan during 2006. The Company presently anticipates contributing an additional $1.8 million to fund the Plan in 2006 for an estimated total of $2.6 million. The Company contributed $2.5 million in 2005.

Supplemental Executive Retirement Plan - The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (the SERP), with participation limited to executives selected by the Board of Directors.

The components of net periodic SERP cost are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	**2006**	2005
Components of NPSC (000's)				
Service Cost	**$ 36**	$ 24	**$ 72**	$ 48
Interest Cost	**26**	20	**52**	40
Amortization of Transition Obligation	**4**	4	**8**	8
Amortization of Net Loss	**10**	1	**20**	2
Net Periodic SERP Cost	**$ 76**	$ 49	**$ 152**	$ 98

Employer Contributions – As of June 30, 2006, the Company has made payments of $36,000 to beneficiaries during 2006. The Company presently anticipates making additional benefit payments of $36,000 in 2006 for a total of $72,000.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2005 as filed with the Securities and Exchange Commission on February 22, 2006.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) There were no sales of unregistered equity securities by the Company for the fiscal period ended June 30, 2006.

(b) Not applicable.

(c) Issuer repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(1)
4/1/06 – 4/30/06	---	---	---	n/a
5/1/06 – 5/31/06	168	$24.65	168	n/a
6/1/06 – 6/30/06	---	---	---	n/a
Total	168	$24.65	168	n/a

(1) Represents Common Stock purchased on the open market related to Board of Director Retainer Fees and Employee Length of Service Awards. Shares are not purchased as part of a specific plan or program and therefore there is no pool or maximum number of shares related to these purchases.

Item 6. Exhibits

(a) Exhibits

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

SAFE HARBOR CAUTIONARY STATEM ENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for the Unitil Corporation and subsidiaries' (Unitil or the Company) future operations, are forward-looking statements.

These statements include declarations regarding Management's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include the following:

? Variations in weather;
? Changes in the regulatory environment;
? Customers' preferences on energy sources;
? Interest rate fluctuation and credit market concerns;
? General economic conditions;
? Increased competition; and
? Fluctuations in supply, demand, transmission capacity and prices for energy commodities.

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements.

RESULTS OF OPERATIONS

Earnings Overview

The Company's Earnings Applicable to Common Shareholders was $1.8 million for the third quarter of 2006, an increase of $0.2 million compared to the same period in 2005. The improvement in earnings was primarily driven by the recent approval of new electric distribution base rates for Unitil Energy Systems, Inc. (UES), Unitil's New Hampshire electric utility subsidiary. Earnings per common share were $0.32 for the third quarter of 2006, an improvement of $0.04 per share compared with earnings of $0.28 per share for the third quarter of 2005.

For the nine month period ended September 30, 2006, earnings were $5.2 million compared to $5.7 million in 2005. Through the first nine months, earnings per share were $0.93 for 2006 compared with $1.03 per share for 2005. This decrease in earnings for the nine-month period reflects lower gas and electric sales primarily due to milder weather this year compared to 2005. The impact of the New Hampshire electric distribution base case is reflected in the Company's consolidated financial statements for both the three and nine month periods ending September 30, 2006.

On October 6, 2006, UES received approval from the New Hampshire Public Utilities Commission (NHPUC) of a settlement agreement, resolving all issues in its electric distribution base rate case filed in November 2005. Included in this Settlement Agreement is an increase in UES' electric base distribution rates of $2.3 million applied as of January 1, 2006; two future step increases to base rates totaling approximately $0.5 million related to utility plant additions in 2006; the recovery of $0.3 million of supply related costs through default service energy rates; a reduction of approximately $0.6 million in annual depreciation expense; and, the resolution of the recovery in rates of pension and other postretirement benefit costs and other operating costs.

Total electric kWh sales were 3.2% and 1.7% lower in the three and nine months ended September 30, 2006, respectively, reflecting milder weather and a decline in average energy usage per customer during the period of higher energy prices. The weather in the Company's service territories in the winter of 2006 was approximately 12% warmer than in the same period for 2005, resulting in lower consumption of electricity for heating related purposes. During the summer of 2006 the weather in the Company's service territories was approximately 11% cooler than in the same period for 2005, resulting in lower consumption of electricity for air conditioning purposes. Although the Company established a new record for peak electricity demand use by its customers in early August of 2006, the duration of very hot weather during this period was shorter than the extended period of very hot weather experienced during the summer of 2005. As a result, weather sensitive electric kWh sales in 2006 lagged behind same period sales in 2005.

Electric sales margin was lower in the three and nine month periods ended September 30, 2006, primarily reflecting a decrease in revenue related to the expiration of the Seabrook Amortization Surcharge (SAS) in late 2005. This decrease in SAS revenue is largely matched with a corresponding decrease in amortization expenses on Regulatory Assets, and therefore has no material impact on net income (see discussion on Depreciation and Amortization below). Absent the decrease in SAS revenues, electric sales margin increased $0.3 million and $2.2 million in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. The higher sales margins in the three and nine months ended September 30, 2006, primarily reflect the Company's recently approved base rate increase in New Hampshire.

Total therm sales of natural gas increased 32.0% and 11.7% in the three and nine months ended September 30, 2006, respectively, compared to the same periods in 2005. The increases in both of these periods were due to a new gas sales contract with a large industrial customer. Absent the sales from this new special contract, total gas therm sales were approximately 5.6% and 9.8% lower for the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. The declines in sales, absent the sales from the new contract discussed above, reflect significantly milder winter weather in 2006 and lower average energy usage by customers during a period of higher energy prices. The weather in the Company's service territories in the winter of 2006 was approximately 12% warmer than in the same period for 2005, and the region as a whole experienced a record warm January.

Gas sales margin for the three month period ended September 30, 2006 was flat to the same period in 2005 and decreased $0.6 million in the nine month period ended September 30, 2006 compared to the same period in 2005. The decrease in gas margin is attributable to lower therm sales volume to customers as discussed above. Margin sharing under the special contract with a large industrial customer discussed above is currently pending approval from the MDTE. Accordingly, pending the results of this proceeding, the Company is recording revenue from this contract on a reduced basis and therefore the significant increase in gas sales due to this contract is not matched by a similar increase in sales margin.

Total Operation and Maintenance expenses decreased $0.2 million in the three month period ended September 30, 2006 compared to the same period in 2005. For the nine month period ended September 30, 2006, Operation and Maintenance expenses increased $1.3 million compared to the same period in 2005, reflecting higher retiree and employee benefit costs of $0.7 million, higher salaries and compensation expenses of $0.6 million and an increase in all other operating expenses of $0.2 million, net, partially offset by lower audit and legal fees of $0.2 million.

Depreciation and Amortization expense decreased $1.4 million and $2.9 million for the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. These decreases were due to lower utility plant depreciation rates resulting from the New Hampshire rate settlement and lower amortization on regulatory assets as a result of the expiration of the SAS, discussed above, partially offset by increased depreciation on normal utility plant additions.

Interest Expense, Net increased by $0.4 million and $0.7 million in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. The change in Interest Expense, Net was primarily driven by a higher weighted average cost of debt in 2006 compared to 2005. Unitil's subsidiary, UES issued and sold $15 million of Series O, 6.32% First Mortgage Bonds to institutional investors on September 26, 2006. The proceeds from this financing were used principally to permanently finance long-lived utility plant additions that had been previously financed on an interim basis with short-term bank borrowings.

Operating Revenues — Electric

Electric Operating Revenues – Total Electric Operating Revenues, increased by $8.6 million, or 16.4%, and by $25.5 million, or 17.5%, in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. Total Electric Operating Revenues include the recovery of costs of electric sales, which are recorded as Purchased Electricity and Conservation & Load Management (C&LM) in Operating Expenses. The net increase in Total Electric Operating Revenues in the three month period reflects higher Purchased Electricity costs of $9.4 million, offset by lower sales margin of $0.8 million. The net increase in Total Electric Operating Revenues in the nine month period reflects higher Purchased Electricity costs of $26.6 million, offset by lower sales margin of $1.0 million and lower C&LM revenues of $0.1 million.

Purchased Electricity and C&LM revenues increased a net $9.4 million, or 17.9%, and $26.6 million, or 18.3%, of Total Electric Operating Revenues in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005, reflecting higher electric commodity prices and lower spending on energy efficiency programs that were implemented during those periods. Purchased Electricity revenues include the recovery of the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin was lower in the three and nine month periods ending September 30, 2006, primarily reflecting a decrease in revenue related to the expiration of the Seabrook Amortization Surcharge (SAS) in late 2005. This decrease in SAS revenue is largely matched with a corresponding decrease in amortization expenses on Regulatory Assets, and therefore has no material impact on net income (see discussion on Depreciation and Amortization below). Absent the decrease in SAS revenues, electric sales margin increased $0.3 million and $2.2 million in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. The higher sales margins in the three and nine months ended September 30, 2006, primarily reflect the Company's recently approved base rate increase in New Hampshire.

The following table details total Electric Operating Revenues and Sales Margin for the three and nine month periods ended September 30, 2006 and 2005:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2006	2005	$ Change	% Change(1)	**2006**	2005	$ Change	% Change(1)
Electric Operating Revenue:								
Residential	**$ 29.3**	$ 22.4	$ 6.9	13.1%	**$ 76.9**	$ 62.0	$ 14.9	10.2%

(1) Represents change as a percent of Total Electric Operating Revenue.

Kilowatt-hour Sales - Unitil's total electric kWh sales were 3.2% and 1.7% lower in the three and nine months ended September 30, 2006, respectively, reflecting milder weather and a decline in average energy usage per customer during the period of higher energy prices. The weather in the Company's service territories in the winter of 2006 was approximately 12% warmer than in the same period for 2005, resulting in lower consumption of electricity for heating related purposes. During the summer of 2006 the weather in the Company's service territories was approximately 11% cooler than in the same period for 2005, resulting in lower consumption of electricity for air conditioning purposes. Although the Company established a new record for peak electricity demand use by its customers in early August of 2006, the duration of very hot weather during this period was shorter than the extended period of very hot weather experienced during the summer of 2005. As a result, weather sensitive electric kWh sales in 2006 lagged behind same period sales in 2005.

The following table details total kWh sales for the three and nine months ended September 30, 2006 and 2005 by major customer class:

kWh Sales (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2006	2005	Change	% Change	**2006**	2005	Change	% Change
Residential	**188.6**	193.8	(5.2)	(2.7%)	**521.5**	529.0	(7.5)	(1.4%)
Commercial / Industrial	**294.9**	305.5	(10.6)	(3.5%)	**825.5**	840.9	(15.4)	(1.8%)
Total	**483.5**	499.3	(15.8)	(3.2%)	**1,347.0**	1,369.9	(22.9)	(1.7%)

Operating Revenues - Gas

Gas Operating Revenues – Total Gas Operating Revenues increased $0.9 million, or 25.7%, and $3.3 million, or 15.6%, in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. Total Gas Operating Revenues include the recovery of the cost of sales, which are recorded as Purchased Gas and C&LM in Operating Expenses. The net increase in Total Gas Operating Revenues in the three month period reflects higher Purchased Gas costs of $0.9 million. The net increase in Total Gas Operating Revenues in the nine month period reflects higher Purchased Gas costs of $3.9 million, offset by lower sales margin of $0.6 million.

Purchased Gas and C&LM revenues increased a net $0.9 million, or 25.7%, and $3.9 million, or 18.4%, of Total Gas Operating Revenues in the three and nine month periods ended September 30, 2006, respectively, compared to the same period in 2005, reflecting higher gas commodity prices, higher unit sales and relatively flat spending on energy efficiency programs that were implemented during those periods. Purchased Gas revenues include the recovery of the cost of gas supply as well as the other energy supply related costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Gas sales margin for the three month period ended September 30, 2006 was flat to the same period in 2005 and decreased $0.6 million in the nine month period ended September 30, 2006 compared to the same period in 2005. The decrease in gas margin is attributable to lower therm sales volume to customers. Margin sharing under the special contract with a large industrial customer discussed above is currently pending approval from the MDTE. Accordingly, pending the results of this proceeding, the Company is recording revenue from this contract on a reduced basis and therefore the significant increase in gas sales due to this contract is not matched by a similar increase in sales margin.

The following table details total Gas Operating Revenues and Sales Margin for the three and nine months ended September 30, 2006 and 2005:

Gas Operating Revenues and Sales Margin (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2006	2005	$ Change	% Change(1)	**2006**	2005	$ Change	% Change(1)
Gas Operating Revenue:

(1) Represents change as a percent of Total Gas Operating Revenue.

Therm Sales – Unitil's total therm sales of natural gas increased 32.0% and 11.7% in the three and nine months ended September 30, 2006, respectively, compared to the same periods in 2005. The increases in both of these periods were due to a new gas sales contract with a large industrial customer. Absent the sales from this new contract, total sales were approximately 5.6% and 9.8% lower for the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. The declines in sales, absent the sales from the new contract discussed above, reflect significantly milder winter weather in 2006 and lower average energy usage by customers during a period of higher energy prices. The weather in the Company's service territories in the winter of 2006 was approximately 12% warmer than in the same period for 2005, and the region as a whole experienced a record warm January.

The following table details total firm therm sales for the three and nine months ended September 30, 2006 and 2005, by major customer class:

Therm Sales (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2006	2005	Change	% Change	**2006**	2005	Change	% Change
Residential	**0.7**	0.7	---	---	**7.7**	8.6	(0.9)	(10.5%)
Commercial / Industrial	**2.6**	1.8	0.8	44.4%	**12.4**	9.4	3.0	31.9%
Total	**3.3**	2.5	0.8	32.0%	**20.1**	18.0	2.1	11.7%

Operating Revenue - Other

Total Other Revenue increased $0.2 million, or 28.7%, and $0.4 million, or 26.8% in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. These increases were the result of growth in revenues from the Company's unregulated energy brokering business, Usource. Usource's revenues are primarily derived from fees and charges billed to suppliers as customers take delivery of energy from these suppliers under term contracts brokered by Usource. The Company will also realize future fees, estimated at the end of September, of $3.7 million from executed energy supply contracts running 2007 through 2011.

The following table details total Other Revenue for the three and nine months ended September 30, 2006 and 2005:

Other Revenue (000's)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2006	2005	$ Change	% Change	**2006**	2005	$ Change	% Change
Other	**$ 678**	$ 527	151	28.7%	**$ 1,877**	$ 1,480	$ 397	26.8%
Total Other Revenue	**$ 678**	$ 527	$ 151	28.7%	**$ 1,877**	$ 1,480	$ 397	26.8%

Operating Expenses

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity increased $9.4 million, or 25.5%, and $26.6 million, or 26.5%, in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005, reflecting higher electric commodity prices. The Company recovers the costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas increased $0.9 million, or 45.9%, and $4.0 million, or 30.2%, in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. These increases in Purchased Gas are attributable to increased therm sales and higher gas commodity costs. The Company recovers the costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Operation and Maintenance (O&M) – O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total Operation and Maintenance expenses decreased $0.2 million in the three month period ended September 30, 2006 compared to the same period in 2005. For the nine month period ended September 30, 2006, Operation and Maintenance expenses increased $1.3 million compared to the same period in 2005, reflecting higher retiree and employee benefit costs of $0.7 million, higher salaries and compensation expenses of $0.6 million and an increase in all other operating expenses of $0.2 million, net, partially offset by lower audit and legal fees of $0.2 million.

Conservation & Load Management – C&LM expenses are associated with the development, management, and delivery of the Company's Energy Efficiency programs. Energy Efficiency programs are designed, in conformity with state regulatory requirements, to help consumers use natural gas and electricity more efficiently and thereby decrease their energy costs. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 90% of these costs are related to electric operations and 10% to gas operations.

Total C&LM expenses decreased less than $0.1 million, or 1.8%, and $0.1 million, or 3.3%, in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. The decreases reflect the timing of spending on the implementation of Energy Efficiency programs. These costs are collected from customers on a pass through basis and therefore, fluctuations in program costs have no impact on Net Income.

Depreciation, Amortization and Taxes

Depreciation and Amortization - Depreciation and Amortization expense decreased $1.4 million, or 28.8%, and $2.9 million, or 19.3%, for the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. These decreases were primarily due to lower depreciation rates on utility plant resulting from the NHPUC's order in UES' base rate case, and lower amortization on regulatory assets, partially offset by depreciation on normal utility plant additions. The Company's regulatory asset related to its former abandoned property investment in Seabrook Station became fully-amortized in the third quarter of 2005.

Local Property and Other Taxes - Local Property and Other Taxes increased by less than $0.1 million, or 2.0%, and $0.1 million, or 3.0%, for the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. The increase in the three month period was principally due to higher local property tax rates. The increase in the nine month period was principally due to higher payroll taxes.

Federal and State Income Taxes - Federal and State Income Taxes were higher by $0.4 million in the three months ended September 30, 2006 compared to the same period in 2005 reflecting higher pre-tax earnings. Federal and State Income Taxes in the nine months ended September 30, 2006 were flat compared to the same period in 2005, reflecting a higher effective income tax rate in 2006 due to the expiration of book/tax differences related to the Seabrook regulatory asset discussed above.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. Certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

The Company operates a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the Company's rate tariff, interest is accrued on these balances and will produce either interest income or interest expense. Interest income is recorded on an under-collection of costs, which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (000's)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	**2006**	2005
Interest Expense				
Long-term Debt	$ **2,339**	$ 2,099	$ **6,962**	$ 6,301
Short-term Debt	**479**	282	**1,194**	723
Regulatory Liabilities	**80**	---	**189**	97
Subtotal Interest Expense	**2,898**	2,381	**8,345**	7,121
Interest Income				
Regulatory Assets	**(820)**	(755)	**(2,306)**	(1,975)
AFUDC and Other	**(131)**	(33)	**(213)**	(66)
Subtotal Interest Income	**(951)**	(788)	**(2,519)**	(2,041)
Total Interest Expense, Net	$ **1,947**	$ 1,593	$ **5,826**	$ 5,080

Interest Expense, Net increased by $0.4 million and $0.7 million in the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. Interest expense on long-term borrowings increased in both the three and nine month periods in 2006 compared to 2005 due to the issuance of new fixed rate long-term debt. In December 2005 Unitil's Massachusetts utility subsidiary, FG&E issued $15 million of unsecured long-term notes to institutional investors. The notes have a term of 25 years and a coupon rate of 5.90%. Unitil's New Hampshire subsidiary, UES issued and sold $15 million of Series O, 6.32% First Mortgage Bonds to institutional investors on September 26, 2006. The proceeds from these long-term financings were used principally to permanently finance long-lived utility plant additions that had been previously financed on an interim basis with short-term bank borrowings. Interest expense on short-term debt increased in both the three and nine month periods in 2006 compared to 2005 primarily due to higher average short-term interest rates. These increases in interest expense were partially offset by an increase in interest income primarily due to higher carrying charges on regulatory assets.

Capital Requirements

Cash provided by operating activities was $17.1 million during the first nine months of 2006, a decrease of $3.9 million over the comparable period in 2005. Net Income was $0.5 million lower in the first nine months of 2006 compared to 2005. Depreciation and Amortization declined by $2.9 million in the three quarters ended September 30, 2006 as compared to the same period in 2005 reflecting the expiration of the Seabrook Amortization Surcharge in late 2005 (See Depreciation and Amortization above) and lower amortization on other regulatory assets, as well as, lower average book depreciation rates authorized for UES in its recently approved base rate case in New Hampshire. The Deferred Taxes provided an additional $1.5 million during the first nine months of 2006 as compared to the same period in 2005, reflecting a net change between current and deferred income taxes related principally to changes in the Accrued Revenue balances. Accounts Receivable provided $2.5 million over the current three quarters of 2006 and the comparable period in 2005. Cash sources from Accrued Revenue decreased by $6.3 million period over period due to higher energy costs and the recording of UES base rate relief for the January through September 2006 period, both of which will be collected from customers in future periods. Refundable Taxes declined by $1.1 million, reflecting higher tax payments in 2006 compared to 2005. Cash flow from Accounts Payable decreased by $1.4 million compared to last year reflecting a higher level of funding of energy costs and other operating expenses in 2006. In addition, cash used to fund Deferred Restructuring Costs declined by $5.3 million in the first nine months of 2006 as compared to the same period last year, reflecting a significant improvement in net cash inflows for the recovery of previously deferred costs related to industry restructuring. All other changes in cash flows from operating activities were a net decrease of $1.0 million in uses of cash in the nine months ended September 30, 2006 compared to the same period in 2005.

Cash used in investing activities was $24.7 million for the nine months ended September 30, 2006 an increase of $8.0 million over the comparable period in 2005. Annual capital expenditures are presently projected to be $33.5 million in 2006 compared to $24.4 million expended in fiscal 2005. These 2006 capital expenditures include approximately $6.7 million of cash outlays for the Automated Metering Infrastructure project, the first year of a two-year investment in the Company's metering infrastructure, expected to be completed in June 2007. Capital expenditure projections are subject to changes during the fiscal year.

Cash flows provided by financing activities were $8.1 million in the first nine months of 2006. In the comparable period of 2005 cash used in financing activities amounted to $3.8 million, a net change between the two periods of $11.9 million. Cash provided for financing activities in the current period included the issuance and sale of $15 million of First Mortgage Bonds, described below. Cash used in both periods reflect the payment of dividends to shareholders of approximately $5.9 million. Cash used for financing activities during the current period includes the repayment of $1.1 of short-term bank borrowings in 2006. The current period also reflects the repurchase of approximately $0.2 million of preferred stock. During the first nine months of 2006 and 2005, normal long-term note sinking fund payments amounted to approximately $0.2 million during both periods. Both the current and comparable prior last year included receipt of $0.8 million from the sale of Unitil Common Stock through the Dividend Reinvestment and Stock Purchase Plan and 401(k) plans. During the first nine months of 2006 and 2005, the Company repaid capital lease obligations of $0.1 million and $0.3, respectively.

Unitil's subsidiary, UES issued and sold $15 million of Series O, 6.32% First Mortgage Bonds to institutional investors on September 26, 2006 The proceeds from these long-term financings were used principally to permanently finance long-lived utility plant additions that had been previously financed on an interim basis with short-term bank borrowings.

At September 30, 2006 and December 31, 2005, Unitil had an aggregate of $40.0 million and $44.0 million, respectively, in unsecured revolving bank lines of credit through three banks. Unitil renews its lines of credit annually, and on June 30, 2006 at its annual renewal, Unitil reduced its lines of credit by $4 million due to lower projected borrowing requirements. Average daily short-term borrowings during the first nine months of 2006 were approximately $25.4 million, an increase of approximately $1.0 million over the comparable period in 2005. At September 30, 2006, the Company had available approximately $22.4 million of unused bank lines of credit and had short-term debt outstanding through bank borrowings of approximately $17.6 million. In addition, Unitil had $3.8 million in cash at September 30, 2006.

On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA are new minimum funding rules which will go into effect for plan years beginning in 2008. The funding target will be 100% of a plan’s liability with any shortfall amortized over seven years, with lower (92% - 100%) funding targets available to well-funded plans during the transition period. The Company will be consulting with its actuary to assess the impact of these new funding rules, along with the other provisions of the PPA, on its pension plan.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company’s policy is to limit these guarantees to two years or less. As of September 30, 2006, there were $8.0 million of guarantees outstanding and the longest term guarantee extends through May 31, 2008.

Critical Accounting Policies

The preparation of the Company’s financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, management is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgments, the financial statements of the Company could be materially different than reported. The following is a summary of the Company’s most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company’s significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company’s Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 22, 2006.

***Regulatory Accounting* -** The Company’s principal business is the distribution of electricity and natural gas by the retail distribution companies: UES and FG&E. Both UES and FG&E are subject to regulation by the Federal Energy Regulatory Commission (FERC) and FG&E is regulated by the MDTE and UES is regulated by the NHPUC. Accordingly, the Company uses the provisions of Financial Accounting Standards Board (FASB) Statement No. 71, “Accounting for the Effects of Certain Types of Regulation.” (SFAS No. 71). In accordance with SFAS No. 71, the Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered or refunded in future electric and gas retail rates.

SFAS No. 71 specifies the economic effects that result from the cause and effect relationship of costs and revenues in the rate-regulated environment and how these effects are to be accounted for by a regulated enterprise. Revenues intended to cover some costs may be recorded either before or after the costs are incurred. If regulation provides assurance that incurred costs will be recovered in the future, these costs would be recorded as deferred charges or "regulatory assets" under SFAS No. 71. If revenues are recorded for costs that are expected to be incurred in the future, these revenues would be recorded as deferred credits or "regulatory liabilities" under SFAS No. 71.

The Company’s principal regulatory assets and liabilities are detailed on the Company's Consolidated Balance Sheet. The Company is currently receiving or being credited with a return on all of its regulatory assets for which a cash outflow has been made. The Company is currently paying or being charged with a return on all of its regulatory liabilities for which a cash inflow has been received. The Company's regulatory assets and liabilities will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

The application of SFAS No. 71 results in the deferral of costs as regulatory assets that, in some cases, have not yet been approved for recovery by the applicable regulatory commission. Management must conclude that any costs deferred as regulatory assets are probable of future recovery in rates. However, regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. Management believes it is probable that the Company's regulated utility companies will recover their investments in long-lived assets, including regulatory assets. The Company also has commitments under long-term contracts for the purchase of electricity and natural gas from various suppliers. The annual costs under these contracts are included in Purchased Electricity and Purchased Gas in the Consolidated Statements of Earnings and these costs are recoverable in current and future rates under various orders issued by the FERC, MDTE and NHPUC.

If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of SFAS No. 71. If unable to continue to apply the provisions of SFAS No. 71, the Company would be required to apply the provisions of FASB Statement No. 101, "Regulated Enterprises – Accounting for the Discontinuation of Application of Financial Accounting Standards Board Statement No. 71." In management's opinion, the Company's regulated operations will be subject to SFAS No. 71 for the foreseeable future.

***Utility Revenue Recognition* -** Regulated utility revenues are based on rates approved by state and federal regulatory commissions. These regulated rates are applied to customers' accounts based on their actual or estimated use of energy. Energy sales to customers are based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

***Allowance for Doubtful Accounts* -** The Company recognizes a Provision for Doubtful Accounts each month. The amount of the monthly Provision is based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior years. Account write-offs, net of recoveries, are processed monthly. At the end of each month, an analysis of the delinquent receivables is performed and the adequacy of the Allowance for Doubtful Accounts is reviewed. The analysis takes into account an assumption about the cash recovery of delinquent receivables and also uses calculations related to customers who have chosen payment plans to resolve their arrears. The analysis also calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company is authorized by regulators to recover the supply-related portion of its written-off accounts from customers through periodically reconciling rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis. Also, the Company has experienced periods when state regulators have extended the periods during which certain standard credit and collection activities of utility companies are suspended. In periods when account write-offs exceed estimated levels, the Company adjusts the Provision for Doubtful Accounts to maintain an adequate Allowance for Doubtful Accounts balance.

***Pension and Postretirement Benefit Obligations* -** The Company has a defined benefit pension plan covering substantially all its employees and also provides certain other post-retirement benefits (PBOP), primarily medical and life insurance benefits to retired employees. The Company also has a Supplemental Executive Retirement Plan (SERP) covering certain executives of the Company. The Company accounts for these benefits in accordance with FASB Statement No. 87, "Employers' Accounting for Pensions" (SFAS No. 87) and FASB Statement No. 106, "Employers' Accounting for Postretirement Benefits other than Pensions" (SFAS No. 106). In applying these accounting policies, the Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. For each of these plans, the development of the benefit obligation, fair value of plan assets, funded status and net periodic benefit cost is based on several significant assumptions.

In September 2006, the FASB issued FASB Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", (SFAS No. 158), an amendment of SFAS No. 87, SFAS No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination

Benefits," SFAS No. 106 and SFAS No. 132(R), "Employers' Disclosures about Pensions and Other Postretirement Benefits." SFAS No. 158 requires companies to record on their balance sheets the overfunded or underfunded status of their pension and postretirement benefits other than pension plans. For pension plans, the benefit obligation will be measured using the projected benefit obligation while the accumulated benefit obligation will be used to measure the obligation for postretirement benefits other than pension. Additionally, SFAS No. 158 requires companies to recognize in their statements of earnings actuarial gains and losses and prior service costs and credits which have not yet been recorded as expense. The effective date of SFAS No. 158 is December 15, 2006. The Company has a Defined Benefit Pension Plan and a Postretirement Benefits Other than Pension (PBOP) Plan (See Note 8). The Company expects that the implementation of SFAS No. 158 will have a significant impact on the recognition of pension and PBOP assets and liabilities on the Company's Balance Sheet and is currently assessing the recording of these items for the year ending December 31, 2006.

On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA are new minimum funding rules which will go into effect for plan years beginning in 2008. The funding target will be 100% of a plan's liability with any shortfall amortized over seven years, with lower (92% - 100%) funding targets available to well-funded plans during the transition period. The Company will be consulting with its actuary to assess the impact of these new funding rules, along with the other provisions of the PPA, on its pension plan.

The Company's reported costs of providing pension and PBOP benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company's health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. Pension and PBOP costs (collectively "postretirement costs") are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future postretirement costs. Postretirement costs may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the postretirement costs and benefit obligations. If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's consolidated financial statements. See Note 8.

Pension expense is calculated based upon a number of actuarial assumptions, including an expected long-term rate of return on Plan assets. In developing the expected long-term rate of return assumption, the Company evaluated input from actuaries and investment managers. The Company's expected long-term rate of return on Plan assets is based on target asset allocation assumptions of 60% in common stock equities and 40% in fixed income securities. The Company will continue to evaluate the actuarial assumptions, including the expected rate of return, at least annually, and will adjust the appropriate assumptions as necessary.

***Income Taxes* -** Income tax expense is calculated in each of the jurisdictions in which the Company operates for each period for which a statement of income is presented. This process involves estimating the Company's current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deduction of expenses for tax and book accounting purposes. These differences result in deferred tax assets and liabilities, which are included in the consolidated balance sheets. The Company must also assess the likelihood that the deferred tax assets will be recovered from future taxable income, and to the extent that recovery is not likely, a valuation allowance must be established. Significant management judgment is required in determining income tax expense, deferred tax assets and liabilities and valuation allowances. The Company accounts for deferred taxes under FASB Statement No. 109, "Accounting for Income Taxes." The Company does not currently have any valuation allowances against its recorded deferred tax amounts.

***Depreciation* -** Depreciation expense is calculated based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company's fixed assets. The depreciation rates ultimately determined from this process are approved by state regulators.

***Commitments and Contingencies* -** The Company's accounting policy is to record and/or disclose commitments and contingencies in accordance with FASB Statement No. 5, "Accounting for Contingencies" (SFAS No. 5).

SFAS No. 5 applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible gain or loss that will ultimately be resolved when one or more future events occur or fail to occur.

Refer to “Recently Issued Accounting Pronouncements” in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

There are approximately 100 employees of the Company represented by labor unions. In May 2005, the Company reached agreements with its bargaining units for new five-year contracts, effective June 1, 2005. These agreements replace contracts that expired on May 31, 2005.

INTEREST RATE RISK

The majority of the Company’s debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new long-term debt securities issued by the Company. In addition, the Company’s short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease the Company’s interest expense in future periods. For example, if the Company had an average amount of short-term debt outstanding of $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000 (pre-tax). The average interest rates on the Company’s short-term borrowings for the three months ended September 30, 2006 and September 30, 2005 were 5.82% and 4.01%, respectively. The average interest rates on the Company’s short-term borrowings for the nine months ended September 30, 2006 and September 30, 2005 were 5.44% and 3.51%, respectively.

MARKET RISK

Although Unitil's utility operating companies were subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of power and gas costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making which involves the pre-approval of the commodity prices included in rates. Additionally, as discussed below in Regulatory Matters, the Company has divested its long-term commodity-related contracts and therefore, has further reduced its exposure to commodity risk. In recent periods, the energy markets have experienced significant volatility, with unprecedented increases in energy prices. The Company is working with the regulatory commissions to address the issue of increasing energy prices and help the Company’s customers work through this difficult period. The regulatory commissions in Massachusetts and New Hampshire have continued to approve full collection of these costs by Unitil's utility operating companies. However, the risk exists that the regulatory commissions would require the Company to finance, through deferrals, a portion of these costs for a period of time.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTER S

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

NOTE 1 – SUMMARY OF SIGNIFICA NT ACCOUNTING POLICI ES

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three and nine months ended September 30, 2006 are not necessarily indicative of results to be expected for the year ending December 31, 2006. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2005, as filed with the SEC on February 22, 2006, for a description of the Company's Basis of Presentation.

Nature of Operations – Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the Securities and Exchange Commission (SEC). As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (UES) (formed in 2002 by the combination and merger of Unitil's former utility subsidiaries Concord Electric Company and Exeter & Hampton Electric Company), Fitchburg Gas and Electric Light Company (FG&E), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

Unitil's principal business is the retail distribution of electricity in the southeastern seacoast and capital city areas of New Hampshire and the retail distribution of both electricity and natural gas in the greater Fitchburg area of north central Massachusetts, through the Company's two wholly owned subsidiaries, UES and FG&E, collectively referred to as the retail distribution utilities.

A third utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for UES. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of UES on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve UES' customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service, Unitil Realty and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-utility unregulated subsidiary that provides consulting and management related services. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Recently Issued Pronouncements – In September 2006, the FASB issued FASB Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", (SFAS No. 158), an amendment of SFAS No. 87, SFAS No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits," SFAS No. 106 and SFAS No. 132(R), "Employers' Disclosures about Pensions and Other Postretirement Benefits." SFAS No. 158 requires companies to record on their balance sheets the overfunded or underfunded status of their pension and postretirement benefits other than pension plans. For pension plans, the benefit obligation will be measured using the projected benefit obligation while the accumulated benefit obligation will be used to measure the obligation for postretirement benefits other than pension. Additionally, SFAS No. 158 requires companies to recognize in their statements of earnings actuarial gains and losses and prior service costs and credits which have not yet been recorded as expense. The effective date of SFAS No. 158 is December 15, 2006. The Company has a Defined Benefit Pension Plan and a Postretirement Benefits Other than Pension (PBOP) Plan. The Company expects that the implementation of SFAS No. 158 will have a significant impact on the recognition of pension assets and liabilities on the Company's Balance Sheet and is currently assessing the impact of recording these items for the year ending December 31, 2006.

In September 2006, the FASB issued FASB Statement No. 157, "Fair Value Measurements", (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company does not expect SFAS No. 157 to have an impact on the Company's Consolidated Financial Statements.

In June 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48). This interpretation clarified the accounting for uncertainty in income taxes recognized in accordance with FASB Statement No. 109, "Accounting for Income Taxes" (SFAS No. 109). Specifically, FIN 48 clarifies the application of SFAS No. 109 by defining a criterion that an individual tax position must meet for any part of the benefit of that position to be recognized in an enterprise's financial statements. Additionally, FIN 48 provides guidance on measurement, derecognition, classification, interest and penalties, accounting in interim periods of income taxes, as well as the required disclosure and transition. This interpretation is effective for fiscal years beginning after December 15, 2006. The Company is in the process of completing its analysis of FIN 48 as it applies to the Company's operations and it does not expect that the adoption of FIN 48 will have a significant impact on the Company's Consolidated Financial Statements.

In February 2006, the FASB issued FASB Statement No. 155, "Accounting for Certain Hybrid Financial Instruments", (SFAS No. 155), which amends FASB Statement No. 133, "Accounting for Derivative Instruments and Hedging Activities", (SFAS No.133) and FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", (SFAS No. 140), effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133. The Company does not expect SFAS No. 155 have an impact on the Company's Consolidated Financial Statements.

In February 2006, the FASB issued FASB Staff Position No. FAS 123(R)-4, (FSP 123(R)-4), "Classification of Options and Similar Instruments Issued as Employee Compensation That Allow for Cash Settlement Upon the Occurrence of a Contingent Event". FSP 123(R)-4 addresses the classification of options and similar instruments issued as employee compensation that allow for cash settlement upon the occurrence of a contingent event and amends paragraphs 32 and A229 of revised FASB Statement No. 123(R), "Share-Based Payment", (SFAS No. 123(R)), which was issued in December 2004. SFAS No. 123(R) requires all entities to recognize the fair value of share-based payment awards classified in equity, unless they are unable to reasonably estimate the fair value of the award. The Company uses the fair value method for share-based payment awards and therefore the provisions of SFAS No. 123(R) have no impact on the Consolidated Financial Statements. The Company has adopted the provisions of FSP 123(R)-4.

Reclassifications - Certain amounts previously reported have been reclassified to conform to current year presentation. Most significant has been the reclassification of certain expenses between Purchased Electricity, Purchased Gas and Operation and Maintenance expenses.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount
09/29/06	11/15/06	11/01/06	$ 0.345

01/13/05	02/15/05	02/01/05	$ 0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

During the first nine months of 2006, the Company sold 30,782 shares of its Common Stock, at an average price of $24.59 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $757,000 were used to reduce short-term borrowings.

During the first nine months of 2005, the Company sold 29,484 shares of its Common Stock, at an average price of $27.34 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $806,000 were used to reduce short-term borrowings.

The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 16, 2006, 14,375 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $366,563. On March 8, 2005, 10,900 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $299,423. On April 29, 2004, 10,700 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $293,715. On May 12, 2003, 10,600 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $259,170. The compensation expense associated with the issuance of shares under the Plan is being accrued on a monthly basis over the vesting period.

Less: Installments due within one year	**329**	302	308
Total Long-term Debt	**$ 140,114**	$ 110,445	$ 125,365

On September 26, 2006 UES issued and sold $15 million of Series O 6.32% First Mortgage Bonds, due September 15, 2036, to institutional investors in the form of a private placement. The proceeds from this long-term financing were used principally to permanently finance long-lived utility plant additions that had been previously financed on an interim basis with short-term bank borrowings. This issuance is reflected in the table above.

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at September 30, 2006 is estimated to be in a range of up to approximately $154 million, before considering any costs, including prepayment costs, to market the Company's debt. Currently, management believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to two years or less. As of September 30, 2006 there are $8.0 million of guarantees outstanding and these guarantees extend through May 31, 2008. These guarantees are excluded from the recognition provisions of FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others."

NOTE 5 – SEGMENT INFORMATION

The following table provides significant segment financial data for the three and nine months ended September 30, 2006 and September 30, 2005 (unaudited):

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2005 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 22, 2006.

Overview – Unitil and its subsidiaries are subject to regulation as a holding company system by the FERC under the Energy Policy Act of 2005 in regards to certain bookkeeping, accounting and reporting requirements. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the SEC with respect to various matters, including: the issuance of securities, capital structure, and certain acquisitions and dispositions of assets. As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. Unitil's utility operations related to wholesale and interstate business activities are also regulated by FERC. The retail distribution utilities, UES and FG&E, are subject to regulation by the NHPUC and the Massachusetts Department of Telecommunications and Energy (MDTE), respectively, in regards to their rates, issuance of securities and other accounting and operational matters. Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in our franchise areas, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on an historical test year, in addition to earning a return on their capital investment in utility assets. As a result of a restructuring of the utility industry in Massachusetts and New Hampshire, all of Unitil's customers have the opportunity to purchase their electric or natural gas supplies from third-party vendors. Most small and medium-sized customers, however, continue to purchase such supplies through UES and FG&E as the provider of last resort. UES and FG&E purchase electricity or natural gas from unaffiliated wholesale suppliers and recover the actual costs of these supplies, without profit or markup, through reconciling, pass-through rate mechanisms that are periodically adjusted.

In connection with the implementation of retail choice, Unitil Power and FG&E divested their long-term power supply contracts through the sale of the entitlements to the electricity sold under those contracts. UES and FG&E recover in their rates all the costs associated with the divestiture of their power supply portfolios and have secured regulatory approval from the NHPUC and MDTE, respectively, for the recovery of power supply-related stranded costs and other restructuring-related regulatory assets. The remaining balance of these assets, to be recovered principally over the next five to seven years, is $134.1 million as of September 30, 2006 and is included in Regulatory Assets on the Company's Consolidated Balance Sheet. Unitil's retail distribution companies have a continuing obligation to submit filings in both states that demonstrate their compliance with regulatory mandates and provide for timely recovery of costs in accordance with their approved restructuring plans.

FG&E – Electric Division – FG&E provides electric distribution service to customers under unbundled distribution rates approved by the MDTE. Its current retail electric distribution rates were approved by the MDTE in 2002. FG&E is required, as the provider of last resort, to purchase and provide power through Default Service for retail customers who chose not to buy, or were unable to purchase, energy from a competitive supplier. Prices for Default Service are set periodically based on market solicitations as approved by the MDTE. As of September 30, 2006, approximately 55 percent of FG&E's electric load was served by Default Service. The remaining portion was served by competitive third party suppliers.

As a result of the restructuring and the divestiture of FG&E's owned generation assets and buyout of FG&E's power supply obligations, Regulatory Assets on the Company's balance sheets include the following three categories: Power Supply Buyout Obligations associated with the divestiture of its long-term purchase power obligations; Recoverable Deferred Restructuring Charges resulting from the restructuring legislation's seven year rate cap; and Recoverable Generation-related Assets associated with the divestiture of its owned generation plant. FG&E earns carrying charges on the majority of the unrecovered balances of the Recoverable Deferred Restructuring Charges. The value of FG&E's Recoverable Deferred Restructuring Charges and Recoverable Generation-related Assets was approximately $36.6 million at September 30, 2006, and $36.7 million at September 30, 2005, and is expected to be recovered in FG&E's rates over the next five to seven years. In addition, as of September 30, 2006, FG&E had recorded on its balance sheets $52.0 million as Power Supply Buyout Obligations and corresponding Regulatory Assets associated with the divestiture of its long-term purchase power contracts, which are included in Unitil's consolidated financial statements, and on which carrying charges are not earned as the timing of cash disbursements and cash receipts associated with these long-term obligations is matched through rates.

Recovery of the deferred amounts described above will be made pursuant to a Settlement Agreement among FG&E, the Massachusetts Office of the Attorney General (Attorney General), and representatives of industrial and low-income customers. The Settlement Agreement, which was approved by the MDTE in 2005, provides for a rate path to allow recovery of FG&E's deferred stranded costs.

On March 7, 2006, the MDTE approved FG&E's 2003 and 2004 annual reconciliation of costs and revenues for Transition, Transmission, Standard Offer Service, and Default Service filed under its restructuring plan. FG&E's 2005 filing, which is subject to investigation, is pending. Management expects that this filing will be approved without material changes or adjustments.

FG&E – Gas Division – FG&E provides natural gas delivery service to its customers on a firm or interruptible basis under unbundled distribution rates approved by the MDTE. Its current retail distribution rates were approved by the MDTE in 2002. FG&E's customers may purchase gas supplies from third-party vendors or purchase their gas from FG&E as the provider of last resort. FG&E collects its gas supply costs through a seasonal reconciling CGAC and recovers other related costs through a reconciling Local Distribution Adjustment Clause.

FG&E – Other – On October 27, 2004, the MDTE approved FG&E's request for a reconciliation rate adjustment mechanism, the Pension / PBOP Adjustment Factor (PAF), to provide for the recovery of costs associated with the Company's employee pension benefits and PBOP expenses. FG&E is allowed to record a regulatory asset in lieu of taking a charge to expense for the difference between the level of pension and PBOP expenses that are included in its base rates and the amounts that are required to be recorded in accordance with SFAS No. 87 and SFAS No. 106, since the effective date of its last base rate change. This mechanism provides for an annual filing and rate adjustment with the MDTE. As of September 30, 2006, FG&E has a regulatory asset of $3.1 million which is included as part of Regulatory Assets in the Company's Consolidated Balance Sheets.

On November 30, 2005, the MDTE announced a change in its method for recovery of gas cost-related bad debt, and determined that it would allow for full recovery of these costs on a reconciling basis. Following this change in policy, FG&E made filings with the MDTE seeking approval to recover its actual gas and electric supply-related bad debt through appropriate reconciling rate mechanisms consistent with the MDTE's ruling. On September 7, 2006, the MDTE issued an order allowing FG&E to recover its actual gas and electric supply-related bad debt effective December 1, 2005. Prior to this final approval, FG&E had recovered supply related bad debt based on a fixed rate formula that was resulting in a significant underrecovery of these costs. On September 27, 2006, the Attorney General filed a Petition for Appeal with the Massachusetts Supreme Judicial Court seeking to set aside the MDTE's order of September 7, 2006. FG&E intends to support the MDTE's order but management can not predict the outcome of the Attorney General's appeal at this time.

UES – UES provides electric distribution service to its customers pursuant to rates approved by the NHPUC. Its current retail electric distribution rates were approved by the NHPUC in 2006 under the Settlement Agreement discussed above. As the provider of last resort, UES also provides its customers with electric power through Default Service at rates which reflect UES' costs for wholesale supply with no profit or markup. UES also provided a Transition Service supply for all rate classes through April 30, 2006. On May 1, 2006, customers previously on Transition Service were automatically placed on Default Service. Under a NHPUC approved settlement with the Office of the Consumer Advocate and the NHPUC Staff, UES procures Default Service power for its larger commercial and industrial customers on a quarterly basis, and for its smaller commercial and residential customers through a portfolio of longer term contracts on a semi-annual basis. UES recovers its costs for this service on a pass-through basis through reconciling rate mechanisms. As of September 30, 2006, approximately 82 percent of UES' electric load was served by Default Service. The remaining portion was served by competitive third party suppliers.

In the 2002 restructuring settlement, the NHPUC approved the divestiture of the long-term power supply portfolio by Unitil Power and tariffs for UES for stranded cost recovery and Transition and Default Service, including certain charges that are subject to annual or periodic reconciliation or future review. As of September 30, 2006, UES had recorded on its balance sheets $45.3 million as Power Supply Contract Obligations and corresponding Regulatory Assets associated with these long-term purchase power stranded costs, which are included in Unitil Corporation's consolidated financial statements. These Power Supply Contract Obligations are expected to be recovered principally over a period of approximately four years. The Company does not earn carrying charges on these regulatory assets as the timing of cash receipts and cash disbursements associated with these long-term obligations is matched through rates.

On March 17, 2006, UES made its third annual reconciliation and rate filing with the NHPUC under its restructuring plan, effective May 1, 2006, including reconciliation of prior year costs and revenues for the Transition Service Charge, Default Service Charge, Stranded Cost Charge, and External Delivery Charge. The NHPUC approved the filing on April 28, 2006.

On November 4, 2005, UES filed a request for a rate increase of $4.65 million with the NHPUC. The filing included a request to recover pension and PBOP costs through an annual reconciling rate mechanism, and the inclusion of a step adjustment for certain future rate base additions. The filing also requested that temporary rates be established at current rate levels effective December 4, 2005. On February 3, 2006, the NHPUC issued an order approving the request for temporary rates to be effective January 1, 2006. On August 24, 2006 a settlement agreement resolving all base rate issues among UES, the Office of the Consumer Advocate, and the NHPUC Staff was filed, and on October 6, 2006, the agreement was approved by the NHPUC. The terms of the settlement agreement provide for an increase in base distribution rates of $2.3 million annually, effective as of January 1, 2006. Additionally, the approved settlement agreement authorizes two future step increases in base distribution rates, related to utility plant additions in 2006, of approximately $400,000 and $130,000 annually, effective as of November 1, 2006 and May 1, 2007, respectively. Also, the settlement agreement provides for the recovery of over $300,000 annually of supply-related operating and administrative costs through default energy service rates and a reduction of approximately $600,000 in annual depreciation expense, primarily reflecting an increase in utility plant and equipment average service lives. The stipulated rate of return under the settlement is 8.70%, including a return on equity of 9.67%. As part of the Settlement Agreement, UES is allowed to recover its pension and PBOP expenses in base rates. Under the Settlement Agreement UES will amortize its deferred pension costs as these amortization costs are recovered over a six year period in base rates. UES had originally sought to recover pension and PBOP expenses in a reconciling mechanism similar to the PAF, described above. The approved settlement also authorizes a temporary rate surcharge for recovery of rate case expense and recoupment of the authorized distribution rate increase from January through October 2006.

FERC – Wholesale Power Market Restructuring – FG&E, UES and Unitil Power are members of NEPOOL, formed in 1971 to assure reliable operation of the bulk power system in the most economic manner for the region. NEPOOL is governed by the NEPOOL Agreement that is filed with and subject to the jurisdiction of the FERC. The regional bulk power system is operated by an independent corporate entity, ISO-NE, in order to avoid any opportunity for conflicting financial interests between the system operator and the market-driven participants.

As of February 1, 2005, a Regional Transmission Organization (RTO) was established in New England. ISO-NE became the entity responsible for operating the RTO. The market rules and requirements to participate in the markets previously covered under the NEPOOL Agreement were transferred to the new RTO structure under control of ISO-NE. FERC approved the formation of the RTO effective February 1, 2005. Several parties have appealed various issues associated with the FERC's approval of the RTO to Federal District Court of Appeals. Those proceedings are ongoing.

On March 1, 2004, ISO-NE filed a proposal to implement Locational Installed Capacity (LICAP) in New England to allow for the imposition of incentive pricing for transmission constrained areas. UES and FG&E intervened in the proceeding. On April 11, 2006, a contested Settlement to resolve the LICAP proceeding was submitted by the FERC Settlement Judge to the FERC. It proposed transition payments for capacity until a Forward Capacity Market can be implemented, possibly by 2010. On June 16, 2006 the FERC approved the Settlement, for implementation December 1, 2006. This case is subject to a Request for Rehearing at FERC and may be subject to subsequent appeal to the Federal Courts. The Company projects that that retail rates will be significantly increased over the next several years as the LICAP Settlement above is implemented.

The formation of an RTO, LICAP and other wholesale market changes, including changes to transmission rates, is not expected to have a material impact on Unitil's operations because of the cost recovery mechanisms for wholesale energy costs approved by the MDTE and NHPUC.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2005 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 22, 2006.

The Company's past and present operations include activities that are generally subject to extensive federal and state environmental laws and regulations. The Company is in general compliance with all applicable environmental and safety laws and regulations, and management believes that as of September 30, 2006, there are no material losses reasonably possible in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Sawyer Passway MGP Site – The Company continues to work with environmental regulatory agencies to identify and assess environmental issues at the former manufactured gas plant (MGP) site at Sawyer Passway, located in Fitchburg, Massachusetts. FG&E proceeded with site remediation work as specified on the Tier 1B permit issued by the Massachusetts Department of Environmental Protection (DEP), which allows the Company to work towards temporary remediation of the site. Work performed in 2002 was associated with the five-year review of the Temporary Solution submittal (Class C Response Action Outcome) under the Massachusetts Contingency Plan (MCP) that was filed for the site in 1997. Completion of this work has confirmed the Temporary Solution status of the site for an additional five years, to January 2008. A status of temporary closure requires FG&E to monitor the site until a feasible permanent remediation alternative can be developed and completed. FG&E is in the process of developing a long range plan for a Permanent Solution for the site, including alternatives for re-use of the site.

Since 1991, FG&E has recovered the environmental response costs incurred at this former MGP site pursuant to an MDTE approved settlement agreement between the Massachusetts Attorney General and the natural gas utilities of the Commonwealth of Massachusetts (Agreement). The Agreement allows FG&E to amortize and recover from gas customers over succeeding seven-year periods the environmental response costs incurred each year. Environmental response costs are defined to include liabilities related to manufactured gas sites, waste disposal sites or other sites onto which hazardous material may have migrated as a result of the operation or decommissioning of Massachusetts gas manufacturing facilities from 1822 through 1978. In addition, on June 9, 2006, FG&E filed suit against several of its former insurance carriers seeking coverage for past and future environmental response costs at the site. Any recovery that FG&E receives from insurance or third parties with respect to environmental response costs, net of the unrecovered costs associated therewith, are split equally between FG&E and its gas customers. The total annual charge for such costs assessed to gas customers cannot exceed five percent of FG&E's total revenue for firm gas sales during the preceding year. Costs in excess of five percent will be deferred for recovery in subsequent years.

Note 8: Pension and Postretirement Benefit Plans

The Company provides certain pension and postretirement benefit plans for its retirees and current employees including defined benefit plans, postretirement health and welfare plans, a supplemental executive retirement plan and an employee 401(k) savings plan.

In September 2006, the FASB issued SFAS No. 158, an amendment of SFAS No. 87, SFAS No. 88, SFAS No. 106 and SFAS No. 132(R). SFAS No. 158 requires companies to record on their balance sheets the overfunded or underfunded status of their pension and postretirement benefits other than pension plans. For pension plans, the benefit obligation will be measured using the projected benefit obligation while the accumulated benefit obligation will be used to measure the obligation for postretirement benefits other than pension. Additionally, SFAS No. 158 requires companies to recognize in their statements of earnings actuarial gains and losses and prior service costs and credits which have not yet been recorded as expense. The effective date of SFAS No. 158 is December 15, 2006. The Company has a Defined Benefit Pension Plan and a Postretirement Benefits Other than Pension (PBOP) Plan as discussed below. The Company expects that the implementation of SFAS No. 158 will have a significant impact on the recognition of pension and PBOP assets and liabilities on the Company's Balance Sheet and is currently assessing the impact of recording these items for the year ending December 31, 2006.

Defined Benefit Pension Plan – The Company sponsors the Unitil Corporation Retirement Plan (the Plan), a defined benefit pension plan covering substantially all its employees. Under the Plan retirement benefits are based upon an employee's level of compensation and length of service. The Company records annual expense and accounts for its defined benefit pension plan in accordance with SFAS No. 87.

In December 2003 and 2002, UES and FG&E filed requests with their respective state regulatory commissions for approval of accounting orders to mitigate certain accounting requirements related to pension plan assets which had been triggered by the substantial decline in the capital markets. UES and FG&E were granted approval of this regulatory accounting treatment in January 2003 and 2004. As a result of these approvals, the Company has recorded as a Regulatory Asset the amount of the Plan's unfunded Accumulated Benefit Obligation (ABO) plus one dollar. These approvals allow UES and FG&E to treat their Additional Minimum Liability (AML) as Regulatory Assets under SFAS No. 71 and avoid the reduction in equity through other comprehensive income that would otherwise be required by SFAS No. 87. With the implementation of SFAS No. 158 for the year ending December 31, 2006, as discussed above, this treatment under SFAS No. 71 will no longer apply.

On October 27, 2004 the MDTE approved FG&E's request for a reconciliation rate adjustment mechanism (the Pension / PBOP Adjustment Factor (PAF)) to recover the costs associated with the Company's pension and PBOP costs on an annually reconciling basis. As a result of this order, FG&E records a regulatory asset to recognize the deferral for the difference between the level of pension and PBOP expenses that are currently included in its base rates and the amounts that are required to be recorded in accordance with SFAS No. 87 and SFAS No. 106 and amortizes increases and /or decreases in that deferral balance into the PAF for recovery over a three year period. The PAF provides for an annual filing and rate adjustment with the MDTE and requires that carrying charges on prepaid or (accrued) pension and PBOP assets and liabilities be collected from, or refunded to, utility customers. In 2005, FG&E received approval of its first annual filing and rate adjustment.

As discussed above, on October 6, 2006, the NHPUC approved a Settlement Agreement, resolving all issues in UES' electric distribution base rate case filed in November 2005. As part of the Settlement Agreement, UES is allowed to recover its pension and PBOP expenses in base rates. Under the Settlement Agreement UES will amortize its deferred pension costs as these amortization costs are recovered over a six year period in base rates. UES had originally sought to recover pension and PBOP expenses in a reconciling mechanism similar to the PAF, described above.

The following tables show the components of net periodic pension cost, (NPPC), as well as key actuarial assumptions used in determining the various pension plan values:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	**2006**	2005
Components of NPPC (000's)				
Service Cost	**$ 450**	$ 415	**$ 1,350**	$ 1,094
Interest Cost	**788**	765	**2,365**	2,314
Expected Return on Plan Assets	**(944)**	(851)	**(2,831)**	(2,553)
Amortization of Prior Service Cost	**27**	29	**80**	80
Amortization of Net Loss	**331**	377	**993**	859
Subtotal NPPC	**652**	735	**1,957**	1,794
Net Amounts Capitalized and Deferred	**(127)**	(366)	**(772)**	(1,050)
NPPC Recognized	**$ 525**	$ 369	**$ 1,185**	$ 744

Included in the 2006 amounts above for Amounts Capitalized and Deferred are approximately ($142,000) and $2,000 for the three and nine months ended September 30, 2006, respectively, recorded as increases (decreases) to Regulatory Assets on the Company's Balance Sheet. Included in the 2005 amounts above for Amounts Capitalized and Deferred are approximately $3,000 and $369,000 for the three and nine months ended September 30, 2005, respectively, recorded as increases to Regulatory Assets on the Company's Balance Sheet. The remaining amounts represent amounts capitalized to construction overheads.

Key Assumptions (Weighted Average)	**2006**	2005
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	6.50% (1)
Rate of Compensation Increase	**3.50%**	3.50%
Used to Determine NPPC:		
Discount Rate	**5.50%**	6.50% (1)
Expected Long-Term Rate of Return on Plan Assets	**8.50%**	8.50%
Rate of Compensation Increase	**3.50%**	3.50%

(1) In May 2005, the Company reached agreements with its union labor bargaining units for new five-year contracts, effective June 1, 2005, which resulted in amendments to the Plan. Effective for the period of June 1, 2005 through December 31, 2005, the Company lowered the assumed discount rate to 6.00%.

Employer Contributions – As of September 30, 2006, the Company has not yet made any contributions to the Plan for 2006. The Company is required to make a minimum contribution to its pension plan this year in the amount of $2.5 million. The Company contributed $2.5 million in 2005. On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA are new minimum funding rules which will go into effect for plan years beginning in 2008. The funding target will be 100% of a plan's liability with any shortfall amortized over seven years, with lower (92% - 100%) funding targets available to well-funded plans during the transition period. The Company will be consulting with its actuary to assess the impact of these new funding rules, along with the other provisions of the PPA, on its pension plan.

Postretirement Benefits - The Company also sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan) primarily to provide health care and life insurance benefits to active employees. The Company has established Voluntary Employee Benefit Trusts, into which it funds contributions to the PBOP Plan.

In January 2004 and May 2004, the FASB issued, respectively, Statement No. 106-1 (SFAS No. 106-1) and Statement No. 106-2 (SFAS No. 106-2), "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003", (the Act). The Act includes a subsidy to a plan sponsor that is based on 28 percent of an individual beneficiary's annual prescription drug costs between $250 and $5,000 and the opportunity for a retiree to obtain a prescription drug benefit under Medicare. SFAS No. 106-1 and SFAS No. 106-2 require the disclosure of the effects, if any, of the Act on the reported measure of the accumulated postretirement benefit obligation and how that effect has been, or will be, reflected in the net postretirement benefit costs of current or subsequent periods. On January 28, 2005, the final Medicare Part D Prescription Drug Rules were posted to the Federal Register. Based on these rules, the Company's estimated PBOP Projected Benefit Obligation was reduced by $5.1 million. Also, the Company has estimated that its annual PBOP costs will be reduced by $0.4 million under the Act. These reductions are reflected in the Company's Consolidated Financial Statements. The Company's health care insurance provider has concluded that the Company's PBOP Plan is equal to or better than standard Medicare Part D coverage. Additionally, the Company's recognition of the Act is not expected to have any impact on the rate of participation in the PBOP Plan or per capita claims.

As discussed above, on October 27, 2004 the MDTE approved FG&E's request for a reconciliation rate adjustment mechanism, the PAF, to recover the costs associated with the Company's pension and PBOP costs on an annually reconciling basis. As discussed above, on October 6, 2006, the NHPUC approved a Settlement Agreement, resolving all issues in UES' electric distribution base rate case filed in November 2005. As part of the Settlement Agreement, UES is allowed to recover its pension and PBOP expenses in base rates. UES had originally sought to recover pension and PBOP expenses in a reconciling mechanism similar to the PAF, described above.

The following tables show the components of net periodic postretirement benefit cost (NPPBC), as well as key actuarial assumptions used in determining the various PBOP Plan values:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	**2006**	2005
Components of NPPBC (000's)				
Service Cost	**$ 321**	$ 300	**$ 962**	$ 745
Interest Cost	**507**	435	**1,522**	1,346
Expected Return on Plan Assets	**(49)**	(1)	**(146)**	(31)
Amortization of Prior Service Cost	**340**	322	**1,020**	1,051
Amortization of Transition (Asset) Obligation	**5**	5	**16**	16
Amortization of Net (Gain) Loss	**40**	33	**120**	---
Subtotal NPPBC	**1,164**	1,094	**3,494**	3,127
Amounts Capitalized and Deferred	**(559)**	(726)	**(1,673)**	(1,674)
NPPBC Recognized	**$ 605**	$ 368	**$ 1,821**	$ 1,453

Included in the 2006 amounts above for Amounts Capitalized and Deferred are approximately $119,000 and $357,000 for the three and nine months ended September 30, 2006, respectively, recorded as increases to Regulatory Assets on the Company's Balance Sheet. Included in the 2005 amounts above for Amounts Capitalized and Deferred are approximately $196,000 and $474,000 for the three and nine months ended September 30, 2005, respectively, recorded as increases to Regulatory Assets on the Company's Balance Sheet. The remaining amounts represent amounts capitalized to construction overheads.

Weighted-Average Assumptions	**2006**	2005
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	6.50% (1)
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	7.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2013
Used to Determine NPPBC:		
Discount Rate	**5.50%**	6.50% (1)
Expected Long-Term Rate of Return on Plan Assets – Union	**8.50%**	8.50%
Expected Long-Term Rate of Return on Plan Assets – Non-Union	**5.50%**	5.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	8.00%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2013

(1) In May 2005, the Company reached agreements with its union labor bargaining units for new five-year contracts, effective June 1, 2005, which resulted in amendments to the Plan. Effective for the period of June 1, 2005 through December 31, 2005, the Company lowered the assumed discount rate to 6.00%.

Employer Contributions – As of September 30, 2006, the Company has made $1.1 million of contributions to the PBOP Plan during 2006. The Company presently anticipates contributing an additional $1.5 million to fund the Plan in 2006 for an estimated total of $2.6 million. The Company contributed $2.5 million in 2005.

Supplemental Executive Retirement Plan - The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (the SERP), with participation limited to executives selected by the Board of Directors.

The components of net periodic SERP cost are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	**2006**	2005
Components of NPSC (000's)				
Service Cost	**$ 36**	$ 24	**$ 110**	$ 71
Interest Cost	**26**	20	**78**	61
Amortization of Transition Obligation	**4**	4	**12**	13
Amortization of Net Loss	**10**	1	**29**	3
Net Periodic SERP Cost	**$ 76**	$ 49	**$ 229**	$ 148

Employer Contributions – As of September 30, 2006, the Company has made payments of $54,000 to beneficiaries during 2006. The Company presently anticipates making additional benefit payments of $18,000 in 2006 for a total of $72,000.

Note 9: Subsequent Event

On October 6, 2006, UES received approval from the NHPUC of a Settlement Agreement, discussed above, resolving all issues in its electric distribution base rate case filed in November 2005. The key provisions of the Settlement Agreement approved by the Commission include:

? an increase in electric base distribution rates of $2,266,966 annually, effective as of January 2006;

? a stipulated overall rate of return of 8.70%, including a return on equity of 9.67%, applied to a proforma rate base of $96,046,267;

? two additional future step increases in electric base distribution rates, related to utility plant additions in 2006, of approximately $400,000 and $130,000 annually, effective as of November 1, 2006 and May 1, 2007, respectively;

? the recovery of over $300,000 annually of supply-related operating and administrative costs through default energy service rates;

? a reduction of approximately $600,000 in annual depreciation expense, primarily reflecting an increase in utility plant and equipment average service lives;

? the resolution of a multi-year effort by UES to recover in rates the rapidly escalating costs of pension and other postretirement benefit costs - the Settlement Agreement provides for the recovery of the costs sought by UES in the rate case as a component of base distribution rates;

? a comprehensive agreement on several rate design issues, including the allocation of the revenue increase to each customer class, the capping of the increase to low use residential customers and the maintenance of a discounted initial 250 kWh block for residential customers, and agreement on customer, volumetric and demand charges for each rate class;

? a provision for a temporary rate surcharge to provide for recovery of rate case expense and recoupment of the authorized distribution rate increase from January through October 2006.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the “Interest Rate Risk” and “Market Risk” sections of Item 2. “Management’s Discussion and Analysis of Financial Condition and Results of Operations” (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2005 as filed with the Securities and Exchange Commission on February 22, 2006.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) There were no sales of unregistered equity securities by the Company for the fiscal period ended September 30, 2006.

(b) Not applicable.

(c) Issuer repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(1)
7/1/06 – 7/31/06	---	---	---	n/a
8/1/06 – 8/31/06	92	$24.77	92	n/a
9/1/06 – 9/30/06	---	---	---	n/a
Total	92	$24.77	92	n/a

(1) Represents Common Stock purchased on the open market related to Board of Director Retainer Fees and Employee Length of Service Awards. Shares are not purchased as part of a specific plan or program and therefore there is no pool or maximum number of shares related to these purchases.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f))for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Unitil Reports Third Quarter Earnings

Hampton, NH – October 26, 2006: Unitil Corporation (AMEX: UTL) (www.unitil.com) today announced earnings of $1.8 million for the third quarter of 2006, up $0.2 million compared to the third quarter of 2005. The improvement in earnings was primarily driven by the recent approval of new electric distribution base rates for Unitil Energy Systems, Inc. ("UES"), Unitil's New Hampshire electric utility subsidiary. Earnings per common share were $0.32 for the third quarter of 2006, an improvement of $0.04 per share compared with earnings of $0.28 per share for the third quarter of 2005.

The new distribution base rates for UES were approved by the New Hampshire Public Utilities Commission (the "Commission") on October 6, 2006. The Commission's rate order approved a comprehensive settlement agreement which provides for an increase in UES' base rates of $2.3 million to be applied as of January 1, 2006, together with other rate increases related to utility plant investments in 2006 and the recovery of energy supply-related administrative costs. In addition, the settlement agreement resolves the recovery in rates of employee and retiree pension and other post-retirement benefit costs and other utility operating expenses.

For the nine month period ended September 30, 2006, earnings were $5.2 million compared to $5.7 million in 2005. Through the first nine months, earnings per share were $0.93 for 2006 compared with $1.03 per share for 2005. This decrease in earnings reflects lower gas and electric sales primarily due to milder weather this year compared to the same nine-month period in 2005. The impacts of the New Hampshire electric distribution base rate case are reflected in the Company's consolidated financial statements for both the three and nine month periods ending September 30, 2006.

"We are pleased with our third quarter results which reflect the favorable financial impact of the Company's recently approved electric rate settlement in New Hampshire," said Robert G. Schoenberger, Unitil's Chairman, President and Chief Executive Officer. "We are also making good progress on other business initiatives, including implementation of a system-wide advanced metering system for both our gas and electric utility operations and the continued growth of our Usource energy brokering business."

Total electric sales in the three and nine months ended September 30, 2006 were down 3.2% and 1.7%, respectively, in the Company's utility service territories compared to the same periods in 2005. The declines in sales reflect significantly milder weather in both the winter heating season and summer cooling season and a continued trend toward lower average monthly energy usage by customers during a period of higher energy prices.

Total sales of natural gas increased 32.0% and 11.7% in the three and nine months ended September 30, 2006, respectively, compared to the same periods in 2005, primarily due to a new firm transportation contract with a large industrial customer. Absent the sales from this new contract, total gas sales were approximately 5.6% and 9.8% lower for the three and nine month periods ended September 30, 2006, respectively, compared to the same periods in 2005. These lower gas sales also reflect the significantly milder winter weather in 2006 as well as the trend towards lower average monthly energy usage by customers during a period of higher energy prices. The weather in the Company's service territories in the winter of 2006 was approximately 12% warmer than in the same period for 2005, and included a record warm January.

Total Operation and Maintenance expenses decreased $0.2 million in the three month period ended September 30, 2006 compared to the same period in 2005. For the nine month period ended September 30, 2006, Operation and Maintenance expenses increased $1.3 million compared to the same period in 2005, reflecting higher retiree and employee benefit costs of $0.7 million, higher salaries and compensation expenses of $0.6 million and an increase in all other operating expenses of $0.2 million, net, partially offset by lower audit and legal fees of $0.2 million.

Depreciation, Amortization, Taxes and Other expenses decreased $1.0 million and $2.7 million, respectively, in the three and nine month periods ended September 30, 2006 compared to 2005, due to lower utility plant depreciation rates resulting from the New Hampshire rate settlement and lower amortization on regulatory assets, partially offset by increased depreciation on normal utility plant additions.

Interest Expense, Net increased $0.4 million and $0.7 million in the three and nine month periods ended September 30, 2006, respectively, due to higher borrowings and interest rates compared to last year.

Usource, our unregulated energy brokerage business, recorded revenue of $1.9 million in the first nine months of 2006, an increase of more than 25% over the same period last year. Usource's revenues are primarily derived from fees and charges billed to suppliers as customers take delivery of energy from these suppliers under term contracts brokered by Usource. The Company will also realize future fees estimated at the end of September 2006 of $3.7 million from executed energy supply term contracts running 2007 through 2011.

In the third quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

Unitil is a public utility holding company with subsidiaries providing electric service in New Hampshire and electric and gas service in Massachusetts and energy services throughout the Northeast. Its subsidiaries include Unitil Energy Systems, Inc., Fitchburg Gas and Electric Light Company, Unitil Power Corp., Unitil Realty Corp., Unitil Service Corp. and its unregulated business segment Unitil Resources, Inc. Usource L.L.C. is a subsidiary of Unitil Resources, Inc.

This press release contains forward-looking statements, which are subject to the inherent uncertainties in predicting future results and conditions. All statements, other than statements of historical fact, are forward-looking statements. Certain factors that could cause the actual results to differ materially from those projected in these forward-looking statements include, but are not limited to the following: variations in weather; changes in the regulatory environment; customers' preferences on energy sources; general economic conditions; increased competition; fluctuations in supply, demand, transmission capacity and prices for energy commodities; and other uncertainties, all of which are difficult to predict, and many of which are beyond the control of Unitil Corporation.

The following table details total kilowatt-hour (kWh) sales of electricity for the three and nine months ended September 30, 2006 and 2005, by major customer class.

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil's principal business is the retail distribution of electricity and natural gas through two utility subsidiaries: Unitil Energy System's Inc. (UES) and Fitchburg Gas and Electric Light Company (FG&E). UES is an electric utility with an operating franchise in the southeastern seacoast and capital city areas of New Hampshire. FG&E is a combination gas and electric utility with an operating franchise in the greater Fitchburg area of north central Massachusetts.

Unitil's two retail distribution utilities serve approximately 99,300 electric customers and 15,000 natural gas customers in their franchise areas. The retail distribution companies are local "pipes and wires" utilities with a combined investment in net utility plant of $237.7 million at March 31, 2007. Substantially all of Unitil's revenue and earnings are derived from regulated utility operations.

Unitil also conducts non-regulated operations principally through its Usource subsidiary. Usource provides energy brokering and consulting services to large commercial and industrial customers in the northeastern United States. Unitil's other subsidiaries include Unitil Service and Unitil Realty, which provide centralized facilities, management and administrative services to Unitil's affiliated companies. Unitil's consolidated net income includes the earnings of the holding company and these subsidiaries.

RATES AND REGULATION

Unitil's utility operations related to wholesale and interstate business activities are regulated by FERC. The retail distribution utilities, UES and FG&E, are subject to regulation by the New Hampshire Public Utilities Commission (NHPUC) and the Massachusetts Department of Public Utilities (MDPU), formerly the Massachusetts Department of Telecommunications and Energy, respectively, in regards to their rates, issuance of securities and other accounting and operational matters. Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in their franchise areas, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on a historical test year, in addition to earning a return on their capital investment in utility assets.

As a result of the implementation of retail choice in New Hampshire and Massachusetts, Unitil's customers are free to contract for their supply of electricity with third-party suppliers. The retail distribution utilities provide for the delivery of that supply of electricity over their distribution systems at regulated rates. Both UES and FG&E continue to provide basic or default electric supply service to those customers who do not obtain their supply from third-party suppliers, with the costs associated with electricity supplied by the Company being recovered on a pass-through basis under periodically-adjusted rates.

As a result of the introduction of retail choice for all natural gas customers in Massachusetts, FG&E's customers are free to contract for their supply of natural gas with third-party suppliers. FG&E continues to provide natural gas supply services to those customers who do not obtain their supply from third-party suppliers. The costs associated with natural gas supplied by FG&E are recovered on a pass-through basis under periodically adjusted rates.

CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without

limitation, statements regarding the financial position, business strategy and other plans and objectives for the Company's future operations, are forward-looking statements.

These statements include declarations regarding the Company's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include the following:

? Variations in weather;
? Changes in the regulatory environment;
? Customers' preferences on energy sources;
? Interest rate fluctuation and credit market concerns;
? General economic conditions;
? Fluctuations in supply, demand, transmission capacity and prices for energy commodities;
? Increased competition; and
? Customers' future performance under multi-year energy brokering contracts.

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements. There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2006 as filed with the Securities and Exchange Commission on February 21, 2007.

RESULTS OF OPERATIONS

The following section of MD&A compares the results of operations for each of the two fiscal quarters ended March 31, 2007 and March 31, 2006 and should be read in conjunction with the accompanying Consolidated Financial Statements and the accompanying Notes to Consolidated Financial Statements included in Item 1 of this report.

Earnings Overview

The Company's Earnings Applicable to Common Shareholders (Net Income) was $2.6 million for the first quarter of 2007, an increase of $0.6 million over Net Income for the first quarter of 2006. Earnings per common share (EPS) were $0.46 for the three months ended March 31, 2007, an improvement of $0.10 per share, or 28%, over the first quarter of 2006.

Unitil's improved first quarter earnings in 2007 over 2006 were driven by higher electric and gas base distribution rates and higher total gas sales. Unitil's non-regulated business, Usource, also realized higher revenues in 2007 which further contributed to the Company's overall improved earnings. These favorable factors were partially offset by higher operating expenses and higher interest expense in the current year.

The following table presents the significant items contributing to the improvement in earnings per share in the first quarter of 2007:

		Earnings Per Share
Three Months Ended March 31, 2006:	**$**	**0.36**
Electric Sales Margin		0.06
Gas Sales Margin		0.08
Usource Sales Margin		0.03
Operation & Maintenance Expense		(0.02)
Depreciation & Amortization		(0.03)
Interest Expense, net		(0.02)
Three Months Ended March 31, 2007:	**$**	**0.46**

In the first quarter of 2007, Unitil's electric kWh sales to residential customers increased 0.4% while sales to Commercial and Industrial (C&I) customers decreased 0.8% compared to the same period in 2006. Gas sales to residential customers remained level in the first quarter of 2007 compared to the same period in 2006 while sales to C&I customers were 15.0% higher in the current quarter, primarily due to a special contract with a large industrial customer.

Electric and Gas sales margin increased $0.6 million and $0.9 million, respectively, in the three months ended March 31, 2007 compared to the same period in 2006. Usource, our non-regulated energy brokering business, recorded increased sales margin of $0.3 million in the first quarter of 2007, an increase of 50% over the first quarter of 2006.

In the three months ended March 31, 2007 operating expenses increased by $1.0 million including higher Operation and Maintenance expenses of $0.2 million and higher Depreciation, Amortization, Taxes and Other increased $0.8 million. In the first three months of 2007, Interest Expense, Net, increased by $0.2 million compared to the same period in 2006, due to higher interest rates and higher average borrowings in 2007.

In 2006, Unitil's annual common dividend was $1.38, representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock. At its January, 2007 and March, 2007 meetings, the Unitil Board of Directors declared quarterly dividends on the Company's common stock of $0.345 per share.

A more detailed discussion of the Company's results of operations for the three months ended March 31, 2007 and a period-to-period comparison of changes in financial position are presented below.

Balance Sheet

Regulatory Assets increased $19.7 million as of March 31, 2007 compared to March 31, 2006, primarily reflecting the recording of Regulatory Assets for Retirement Benefit Obligations in accordance with newly issued Federal Accounting Standards Board (FASB) Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", (SFAS No. 158) (See Note 8) and the recording of a Regulatory Asset for future environmental remediation obligations associated with the Company's former manufactured gas plant site at Sawyer Passway, located in Fitchburg, Massachusetts (See Note 7), partially offset by a decrease in Regulatory Assets related to current year cost recoveries.

Long-Term Debt increased $14.7 million as of March 31, 2007 compared to March 31, 2006, reflecting the issuance and sale on September 26, 2006 by UES of $15.0 million of Series O 6.32% First Mortgage Bonds, due September 15, 2036, to institutional investors in the form of a private placement.

Deferred Income Taxes decreased $16.9 million as of March 31, 2007 compared to March 31, 2006, primarily reflecting the recording of deferred tax assets related to Retirement Benefit Obligations, discussed below.

Retirement Benefit Obligations increased $39.1 million as of March 31, 2007 compared to March 31, 2006, primarily reflecting the recording of pension, PBOP and SERP obligations.

Environmental Obligations increased $12.0 million as of March 31, 2007 compared to March 31, 2006, reflecting the recording of a liability for future environmental remediation obligations associated with the Company's former manufactured gas plant site at Sawyer Passway, discussed above.

Electric Sales, Revenues and Margin

Kilowatt-hour Sales – In the first quarter of 2007, Unitil's total electric kWh sales decreased 0.3% compared to the first quarter of 2006. Sales to residential customers increased 0.4% while sales to C&I customers decreased 0.8%.

The following table details total kWh sales for the three months ended March 31, 2007 and 2006 by major customer class:

kWh Sales (millions)

	Three Months Ended March 31,			
	2007	2006	Change	% Change
Residential	**184.0**	183.2	0.8	0.4%
Commercial/Industrial	**265.6**	267.8	(2.2)	(0.8%)
Total	**449.6**	451.0	(1.4)	(0.3%)

Electric Operating Revenues and Sales Margin - The following table details total Electric Operating Revenues and Sales Margin for the three months ended March 31, 2007 and 2006:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended March 31,			
	2007	2006	$ Change	% Change[1]
Electric Operating Revenue:				
Residential	**$ 31.5**	$ 24.2	$ 7.3	12.9%
Commercial / Industrial	**31.2**	32.2	(1.0)	(1.8%)
Total Electric Operating Revenue	**$ 62.7**	$ 56.4	$ 6.3	11.1%
Cost of Electric Sales:				
Purchased Electricity	**$ 48.2**	$ 42.8	$ 5.4	9.6%
Conservation & Load Management	**1.0**	0.7	0.3	0.5%
Electric Sales Margin	**$ 13.5**	$ 12.9	$ 0.6	1.2%

(1) Represents change as a percent of Total Electric Operating Revenue.

Total Electric Operating Revenues increased by $6.3 million, or 11.1%, in the three months ended March 31, 2007 compared to the same period in 2006. Total Electric Operating Revenues include the recovery of costs of electric sales, which are recorded as Purchased Electricity and Conservation & Load Management (C&LM) in Operating Expenses. The net increase in Total Electric Operating Revenues in the three months ended March 31, 2007 reflects higher Purchased Electricity costs of $5.4 million, higher C&LM revenues of $0.3 million and higher sales margin of $0.6 million.

Purchased Electricity and C&LM revenues increased a combined $5.7 million, or 10.1%, of Total Electric Operating Revenues in the three months ended March 31, 2007 compared to the same period in 2006, reflecting higher electric commodity prices. Purchased Electricity revenues include the recovery of the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin increased by $0.6 million in the three months ended March 31, 2007 compared to the same period in 2006, reflecting a rate increase in New Hampshire approved by regulators in fourth quarter of 2006 of $0.7 million, partially offset by the decline in sales units, $0.1 million.

Gas Sales, Revenues and Margin

Therm Sales – Therm sales of natural gas increased 8.3% in the three months ended March 31, 2007 compared to the same period in 2006. Sales to residential customers remained level in the first quarter of 2007 compared to the same period in 2006. Sales to C&I customers were 15.0% higher in the current quarter, primarily due to a new special contract with a large industrial customer.

The following table details total firm therm sales for the three months ended March 31, 2007 and 2006, by major customer class:

Therm Sales (millions)

	Three Months Ended March 31,			
	2007	2006	Change	% Change
Residential	**4.9**	4.9	---	---
Commercial/Industrial	**6.9**	6.0	0.9	15.0%
Total	**11.8**	10.9	0.9	8.3%

Gas Operating Revenues and Sales Margin – The following table details total Gas Operating Revenues and Sales Margin for the three months ended March 31, 2007 and 2006:

Gas Operating Revenues and Sales Margin (millions)	Three Months Ended March 31,			
	2007	2006	$ Change	% Change[1]
Gas Operating Revenue:				
Residential	**$ 8.5**	$ 7.9	$ 0.6	4.4%
Commercial / Industrial	**5.7**	5.8	(0.1)	(0.7%)
Total Gas Operating Revenue	**$ 14.2**	$ 13.7	$ 0.5	3.7%
Cost of Gas Sales:				
Purchased Gas	**$ 9.8**	$ 10.1	$ (0.3)	(2.2%)
Conservation & Load Management	**---**	0.1	(0.1)	(0.7%)
Gas Sales Margin	**$ 4.4**	$ 3.5	$ 0.9	6.6%

(1) Represents change as a percent of Total Gas Operating Revenue.

Total Gas Operating Revenues increased $0.5 million, or 3.7%, in the three months ended March 31, 2007 compared to the same period in 2006. Total Gas Operating Revenues include the recovery of the cost of sales, which are recorded as Purchased Gas and C&LM in Operating Expenses. The net increase in Total Gas Operating Revenues in three months ended March 31, 2007 reflects higher sales margin of $0.9 million, offset by lower Purchased Gas costs of $0.3 million and lower C&LM revenues of $0.1 million.

Purchased Gas and C&LM revenues decreased a combined $0.4 million, or 2.9%, of Total Gas Operating Revenues in 2007 compared to 2006, primarily reflecting an increase in the amount of natural gas purchased by customers from third-party suppliers. Purchased Gas revenues include the recovery of the cost of gas supply as well as the other energy supply related costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Gas sales margin increased $0.9 million in the three months ended March 31, 2007 compared to the same period in 2006 due to higher rates approved and implemented in early 2007and higher sales to large C&I customers, including sales to a large industrial customer under a special contract.

Operating Revenue - Other

The following table details total Other Revenue for the three months ended March 31, 2007 and 2006:

Other Revenue (Millions)	Three Months Ended March 31,			
	2007	2006	$ Change	% Change
Other	**$ 0.9**	$ 0.6	$ 0.3	50.0%
Total Other Revenue	**$ 0.9**	$ 0.6	$ 0.3	50.0%

Total Other Revenue increased $0.3 million, or 50.0%, in the three month period ended March 31, 2007 compared to the same period in 2006. The increase was the result of growth in revenues from the Company's non-regulated energy brokering business, Usource.

Operating Expenses

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as the other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity increased $5.4 million, or 12.6%, in the three month period ended March 31, 2007 compared to the same period in 2006, reflecting higher electric commodity prices. The Company recovers the costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas decreased $0.3 million, or 3.0%, in the three month period ended March 31, 2007 compared to the same period in 2006, reflecting an increase in the amount of natural gas purchased by customers from third-party suppliers. The Company recovers the costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Operation and Maintenance (O&M) - O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total O&M expense increased $0.2 million in the three months ended March 31, 2007 compared to the same period in 2006. This increase was due to higher retiree and employee benefit costs of $0.3 million, driven by higher pension and post retirement benefit expenses, higher bad debt expenses of $0.1 million and higher salaries and compensation expenses of $0.1 million, partially offset by lower utility operating expenses of $0.1 million, lower outside services expenses of $0.1 million and all other operating expenses of $0.1 million, net.

Conservation & Load Management – C&LM expenses are associated with the development, management, and delivery of the Company's Energy Efficiency programs. Energy Efficiency programs are designed, in conformity with state regulatory requirements, to help consumers use electricity and natural gas more efficiently and thereby decrease their energy costs. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 90% of these costs are related to electric operations and 10% to gas operations.

Total C&LM expenses increased by $0.2 million, or 25.0%, in three month period ended March 31, 2007 compared to the same period in 2006. The increase reflects the timing of spending on the implementation of Energy Efficiency programs. These costs are collected from customers on a pass through basis and therefore, fluctuations in program costs have no impact on Net Income.

Depreciation, Amortization and Taxes

Depreciation and Amortization - Depreciation and Amortization expense increased $0.3 million, or 7.1%, for the three month period ended March 31, 2007 compared to the same period in 2006. This increase was higher depreciation on normal utility plant additions.

Local Property and Other Taxes - Local Property and Other Taxes increased by less than $0.1 million, or 1.6% for the three month period ended March 31, 2007 compared to the same period in 2006. This increase was due to higher property tax rates.

Federal and State Income Taxes - Federal and State Income Taxes are higher by $0.4 million for the three months ended March 31, 2007 compared to the same period in 2006 reflecting higher pre-tax earnings.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. Certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

The Company operates a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the Company's tariff, interest is accrued on these balances and will produce either interest income or interest expense. Interest income is recorded on an under-collection of costs, which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (millions)	**Three Months Ended March 31,**		
	2007	2006	Change
Interest Expense			
Long-term Debt	**$ 2.6**	$ 2.3	$ 0.3
Short-term Debt	**0.4**	0.3	0.1
Regulatory Liabilities	**---**	---	---
Subtotal Interest Expense	**3.0**	2.6	0.4
Interest Income			
Regulatory Assets	**(0.8)**	(0.7)	(0.1)
AFUDC and Other	**(0.1)**	---	(0.1)
Subtotal Interest Income	**(0.9)**	(0.7)	(0.2)
Total Interest Expense, Net	**$ 2.1**	$ 1.9	$ 0.2

Interest Expense, Net increased by $0.2 million in the three month period ended March 31, 2007 compared to the same period in 2006. Interest expense on long-term borrowings increased due to the issuance of new fixed rate long-term debt. Unitil's New Hampshire subsidiary, UES, issued and sold $15 million of Series O 6.32% First Mortgage Bonds to institutional investors on September 26, 2006. The proceeds from this long-term financing were used principally to finance utility plant additions that had been previously financed on an interim basis with short-term bank borrowings. Interest expense on short-term debt increased in the three month period ended March 31, 2007 compared to the same period in 2006 due to higher short-term interest rates and higher levels of short-term borrowings. These increases in interest expense were partially offset by an increase in interest income due to higher earnings on funds used for capital projects and higher carrying charges earned on regulatory assets.

CAPITAL REQUIREMENTS

Sources of Capital

Unitil requires capital to fund utility plant additions, working capital and other utility expenditures recovered in subsequent and future periods through regulated rates. The capital necessary to meet these requirements is derived primarily from internally-generated funds, which consist of cash flows from operating activities, excluding payment of dividends. The Company initially supplements internally generated funds through bank borrowings, as needed, under unsecured short-term bank lines. At March 31, 2007 Unitil had an aggregate of $41.0 million in unsecured revolving bank lines of credit through three banks. Average daily short-term borrowings during the first three months of 2007 were approximately $26.2 million, an increase of approximately $2.7 million over the comparable period in 2006.

The maximum amount of short-term borrowings that may be incurred by Unitil and its subsidiaries has been subject to periodic regulatory oversight. At March 31, 2007, Unitil had regulatory authorization to incur total short-term bank borrowings up to a maximum of $55 million, and UES and FG&E had regulatory authorizations to borrow up to a maximum of $16 million and $35 million, respectively.

The continued availability of these methods of financing, as well as the Company's choice of a specific form of security, will depend on many factors, including, but not limited to: security market conditions; general economic climate; regulatory approvals; the ability to meet covenant issuance restrictions, if any; the level of the Company's earnings, cash flows and financial position; and the competitive pricing offered by financing sources.

On April 2007, Unitil agreed to privately place up to $20 million of long-term Notes, subject to market and other conditions, with institutional investors. The terms of the Notes will be determined between the Company and the purchasers of the Notes. The Notes are expected to have a maturity of up to 15 years and an interest rate of 6.33%. The Company intends to use the proceeds from the long-term financing to make capital contributions to its principal utility affiliates, UES and FG&E, to enable them to refinance existing short-term debt and for general corporate purposes of the Company and its subsidiaries.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to two years or less. As of March 31, 2007, there were $10 million of guarantees outstanding and the longest term guarantee extends through March 13, 2009.

The tables below summarize the major sources and uses of cash (in millions) for the three months ended March 31, 2007 compared to the same period in 2006.

Cash Provided by Operating Activities	**$**	**6.1**	$	0.8

Cash Provided by Operating Activities - Cash Provided by Operating Activities was $6.1 million during the three months ended March 31, 2007, an increase of $5.3 million over the comparable period in 2006. Sources of cash from Net Income were $0.6 million higher in the first three months of 2007 compared to 2006. Sources of cash from Depreciation, Amortization and Deferred Taxes increased by $1.2 million in the current quarter compared to the same period in 2006. Working Capital related cash flows increased by $1.1 million during the first quarter of 2007 compared to the same period in 2006. All other changes in operating activities were a net $2.4 in sources of cash in the first three months of 2007 compared to 2006.

Cash (Used in) Investing Activities	**$**	**(9.6)**	$	(5.6)

Cash (Used in) Investing Activities - Cash (Used in) Investing Activities was $9.6 million for the three months ended March 31, 2007, an increase of $4.0 million over the comparable period in 2006. Annual capital expenditures are projected to be $32.4 million in 2007 compared to $33.6 million expended in fiscal 2006. These 2007 projected capital expenditures include approximately $5.5 million of cash outlays for the Automated Metering Infrastructure (AMI) project, the second year of a two-year investment in the Company's metering infrastructure. The Company's AMI expenditures were $2.8 during the first quarter of 2007 compared to $0.4 during the comparable period in 2006. Capital expenditure projections are subject to changes during the fiscal year.

Cash Provided by Financing Activities	**$ 1.7**	$ 3.8

Cash Provided by Financing Activities - Cash Provided by Financing Activities was $1.7 million in the three months ended March 31, 2007, a decrease of $2.1 million over the comparable period in 2006. Cash provided from financing activities from the proceeds of short-term bank borrowings was $2.3 million lower in the current period. All other cash flows provided from financing activities were a net $0.2 million higher in the first three months of 2007 compared to 2006.

CRITICAL ACCOUNTING POLICIES

The preparation of the Company's financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, management is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgments, the financial statements of the Company could be materially different than reported. The following is a summary of the Company's most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company's significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 21, 2007.

Regulatory Accounting - The Company's principal business is the distribution of electricity and natural gas by the retail distribution companies: UES and FG&E. Both UES and FG&E are subject to regulation by the FERC and FG&E is regulated by the MDTE and UES is regulated by the NHPUC. Accordingly, the Company uses the provisions of FASB Statement No. 71, "Accounting for the Effects of Certain Types of Regulation." (SFAS No. 71). In accordance with SFAS No. 71, the Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

The Company's principal regulatory assets and liabilities are detailed on the Company's Consolidated Balance Sheet. Generally, the Company is currently receiving or being credited with a return on all of its regulatory assets for which a cash outflow has been made. Generally, the Company is currently paying or being charged with a return on all of its regulatory liabilities for which a cash inflow has been received.

Regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. The Company believes it is probable that its regulated utility companies will recover their investments in long-lived assets, including regulatory assets. The Company also has commitments under long-term contracts for the purchase of electricity and natural gas from various suppliers. The annual costs under these contracts are included in Purchased Electricity and Purchased Gas in the Consolidated Statements of Earnings and these costs are recoverable in current and future rates under various orders issued by the FERC, MDTE and NHPUC.

If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of SFAS No. 71. If unable to continue to apply the provisions of SFAS No. 71, the Company would be required to apply the provisions of FASB Statement No. 101, "Regulated Enterprises – Accounting for the Discontinuation of Application of Financial Accounting Standards Board Statement No. 71." In the Company's opinion, its regulated operations will be subject to SFAS No. 71 for the foreseeable future.

Utility Revenue Recognition - Regulated utility revenues are based on rates and charges approved by federal and state regulatory commissions. Revenues related to the sale of electric and gas service are recorded when service is rendered or energy is delivered to customers. The determination of energy sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts - The Company recognizes a Provision for Doubtful Accounts each month. The amount of the monthly Provision is based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior periods. Account write-offs and recoveries, are processed monthly. At the end of each month, an analysis of the delinquent receivables is performed and the adequacy of the Allowance for Doubtful Accounts is reviewed. The analysis calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company is authorized by regulators to recover the supply-related portion of its written-off accounts from customers through periodically reconciling rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis. Also, the Company has experienced periods when state regulators have extended the periods during which certain standard credit and collection activities of utility companies are suspended. In periods when account write-offs exceed estimated levels, the Company adjusts the Provision for Doubtful Accounts to maintain an adequate Allowance for Doubtful Accounts balance.

Retirement Benefit Obligations - The Company sponsors the Unitil Corporation Retirement Plan (Pension Plan), which is a defined benefit pension plan covering substantially all of its employees. The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (SERP), covering certain executives of the Company. Additionally, the Company sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan), primarily to provide health care and life insurance benefits to retired employees.

In September 2006, the FASB issued FASB Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", (SFAS No. 158), an amendment of SFAS No. 87, "Employers' Accounting for Pensions", SFAS No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits," SFAS No. 106, "Employers' Accounting for Postretirement Benefits other than Pensions" and SFAS No. 132(R), "Employers' Disclosures about Pensions and Other Postretirement Benefits." SFAS No. 158 requires companies to record on their balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas retail rates.

The Company's reported costs of providing retirement benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. The Company's health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. The Company's RBO are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future costs. The Company's RBO may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the Company's RBO. If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's financial statements (See Note 8.)

Income Taxes - Provisions for income taxes are calculated in each of the jurisdictions in which the Company operates for each period for which a statement of income is presented. This process involves estimating the Company's current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deductions of expenses and recognition of taxable income for tax and book accounting purposes. These temporary differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets. The Company accounts for income tax assets, liabilities and expenses in accordance with FASB Statement No. 109, “Accounting for Income Taxes” (SFAS No. 109) which is the authoritative pronouncement on accounting for and reporting income taxes.

In June 2006, the FASB issued Interpretation No. 48, “Accounting for Uncertainty in Income Taxes” (FIN 48), an interpretation of FAS 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in enterprise’s financial statements. FIN 48 prescribes a “more-likely-than-not” recognition threshold for the recognition and measurement of the benefits of a tax position taken or expected to be taken. FIN 48 is now the primary guidance in accounting for uncertainty in income taxes. Under FIN 48, tax positions accounted for under FAS 109 will be evaluated for recognition, derecognition and classification. The Company adopted FIN 48 as of January 1, 2007, as required. The adoption of FIN 48 did not have a significant impact on the Company’s financial position and results of operations.

Depreciation - Depreciation expense is calculated based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company’s fixed assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements.

Commitments and Contingencies - The Company’s accounting policy is to record and/or disclose commitments and contingencies in accordance with SFAS No. 5. SFAS No. 5 applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. As of March 31, 2007, the Company is not aware of any material commitments or contingencies other than those disclosed in the Commitments and Contingencies footnote to the Company’s consolidated financial statements below.

Refer to “Recently Issued Accounting Pronouncements’ in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

There are approximately 100 employees of the Company represented by labor unions. In May 2005, the Company reached agreements with its bargaining units for new five-year contracts, effective June 1, 2005. These agreements replace contracts that expired on May 31, 2005.

INTEREST RATE RISK

The majority of the Company’s debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new long-term debt securities issued by the Company. In addition, the Company’s short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease the Company’s interest expense in future periods. For example, if the Company had an average amount of short-term debt outstanding of $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000 (pre-tax). The average interest rates on the Company’s short-term borrowings for the three months ended March 31, 2007 and March 31, 2006 were 5.77% and 5.00%, respectively.

MARKET RISK

Although Unitil's utility operating companies are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

UNITIL CORPORATION AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three months ended March 31, 2007 are not necessarily indicative of results to be expected for the year ending December 31, 2007. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2006, as filed with the SEC on February 21, 2007, for a description of the Company's Basis of Presentation.

Nature of Operations - Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the Securities and Exchange Commission (SEC). As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (UES), Fitchburg Gas and Electric Light Company (FG&E), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

Unitil's principal business is the retail distribution of electricity in the southeastern seacoast and capital city areas of New Hampshire and the retail distribution of both electricity and natural gas in the greater Fitchburg area of north central Massachusetts, through the Company's two wholly-owned subsidiaries, UES and FG&E, collectively referred to as the retail distribution utilities.

A third utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for UES. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of UES on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve UES' customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service, Unitil Realty and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-regulated subsidiary. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Recently Issued Pronouncements – In February 2007, the FASB issued FASB Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." (SFAS No. 159), effective for fiscal years beginning after November 15, 2007. SFAS No. 159 includes an amendment of FASB Statement No. 115, "Accounting for Certain Investments in Debt and Equity Securities." SFAS No. 159 permits entities to choose, at specified election dates, to measure eligible items at fair value and requires unrealized gains and losses on items for which the fair value option has been elected to be reported in earnings. The Company does not expect SFAS No. 159 to have a material impact on the Company's Consolidated Financial Position.

In June 2006, the FASB issued Interpretation No. 48, “Accounting for Uncertainty in Income Taxes” (FIN 48), an interpretation of FAS 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in enterprise’s financial statements. FIN 48 prescribes a “more-likely-than-not” recognition threshold for the recognition and measurement of the benefits of a tax position taken or expected to be taken. FIN 48 is now the primary guidance in accounting for uncertainty in income taxes. Under FIN 48, tax positions accounted for under FAS 109 will be evaluated for recognition, derecognition, and classification. The Company adopted FIN 48 as of January 1, 2007, as required. The adoption of FIN 48 did not have a significant impact on the Company’s financial position and results of operations. See Note 9.

In September 2006, the FASB issued FASB Statement No. 157, “Fair Value Measurements”, (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company does not expect SFAS No. 157 to have an impact on the Company’s Consolidated Financial Statements.

In February 2006, the FASB issued FASB Statement No. 155, “Accounting for Certain Hybrid Financial Instruments”, (SFAS No. 155), which amends SFAS No.133 and FASB Statement No. 140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities”, (SFAS No. 140), effective for all financial instruments acquired or issued after the beginning of an entity’s first fiscal year that begins after September 15, 2006. SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133. The Company’s adoption of SFAS No. 155 did not have an impact on the Company’s Consolidated Financial Statements.

Reclassifications - Certain amounts previously reported have been reclassified to conform to current year - presentation. The Company reclassified retirement benefit obligations from Other Noncurrent Liabilities to Retirement Benefit Obligations on the balance sheet for presentation purposes.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount
03/22/07	05/15/07	05/01/07	$ 0.345
01/18/07	02/15/07	02/01/07	$ 0.345
09/29/06	11/15/06	11/01/06	$ 0.345
06/22/06	08/15/06	08/01/06	$ 0.345
03/23/06	05/15/06	05/01/06	$ 0.345
01/12/06	02/15/06	02/01/06	$ 0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

During the first quarter of 2007, the Company sold 9,628 shares of its Common Stock, at an average price of $26.19 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $252,000 were used to fund capital expenditures.

During the first quarter of 2006, the Company sold 9,967 shares of its Common Stock, at an average price of $24.60 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $245,000 were used to fund capital expenditures.

The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company’s shareholders. On February 9, 2007, 9,020 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $230,461. Compensation expense associated with shares issued under the Plan is recognized on a monthly basis as the shares vest and was $0.1 million and $0.1

million for three months ended March 31, 2007 and 2006, respectively. At March 31, 2007, there was approximately $0.9 million of total unrecognized compensation cost related to non-vested shares under the Plan which is expected to be recognized over approximately 2.8 years as the shares vest.

Details on preferred stock at March 31, 2007, March 31, 2006 and December 31, 2006 are shown below:

(Amounts in Millions)

	(Unaudited) March 31,		December 31,

8.00% Series, $100 Par Value	**1.0**	1.0	1.0
Total Preferred Stock	**$ 2.1**	$ 2.1	$ 2.1

NOTE 4 – LONG-TERM DEBT

On April 16, 2007, Unitil Corporation agreed to privately place up to $20 million of long-term Notes, subject to market and other conditions, with institutional investors. The terms of the Notes will be determined by negotiations between the Company and the purchasers of the Notes. The Notes are expected to have a maturity of up to 15 years and an interest rate of 6.33%. The Company intends to use the proceeds from this long-term financing to make capital contributions to its principal affiliates, Unitil Energy Systems, Inc. and Fitchburg Gas and Electric Light Company, to enable them to refinance existing short-term debt and for general corporate purposes of the Company and its subsidiaries.

Details on long-term debt at March 31, 2007, March 31, 2006 and December 31, 2006 are shown below:

(Amounts in Millions)

	(Unaudited) March 31, 2007	**March 31, 2006**	December 31, 2006
Unitil Energy Systems, Inc.:

Less: Installments due within one year	**0.3**	0.3	0.3
Total Long-term Debt	**$ 140.0**	$ 125.3	$ 140.0

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at March 31, 2007 is estimated to be in a range of up to approximately $156 million, before considering any costs, including prepayment costs, to market the Company's debt. Currently, the Company believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to two years or less. As of March 31, 2007 there are $10 million of guarantees outstanding and these guarantees extend through March 13, 2009. These guarantees are not required to be recorded under the provisions of FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others."

NOTE 5 – SEGMENT INFORMATION

The following table provides significant segment financial data for the three months ended March 31, 2007 and March 31, 2006:

Three Months Ended March 31, 2007 (Millions)	**Electric**	**Gas**	**Other**	**Non-Regulated**	**Total**

Identifiable Segment Assets	319.2	101.9	21.5	1.3	443.9
Capital Expenditures	5.2	0.4	---	---	5.6

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2006 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 21, 2007.

Overview – Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in our franchise areas, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on an historical test year, in addition to earning a return on their capital investment in utility assets. As a result of a restructuring of the utility industry in Massachusetts and New Hampshire, all of Unitil's customers have the opportunity to purchase their electric or natural gas supplies from third-party suppliers. Most small and medium-sized customers, however, continue to purchase such supplies through UES and FG&E as the providers of basic or default service energy supply. UES and FG&E purchase electricity or natural gas for basic or default service from unaffiliated wholesale suppliers and recover the actual costs of these supplies, without profit or markup, through reconciling, pass-through rate mechanisms that are periodically adjusted.

In connection with the implementation of retail choice, Unitil Power and FG&E divested their long-term power supply contracts through the sale of the entitlements to the electricity sold under those contracts. UES and FG&E recover in their rates all the costs associated with the divestiture of their power supply portfolios and have secured regulatory approval from the New Hampshire Public Utilities Commission (NHPUC) and Massachusetts Department of Public Utilities (MDPU) formerly the Massachusetts Department of Telecommunications and Energy, respectively, for the recovery of power supply-related stranded costs and other restructuring-related regulatory assets. The remaining balance of these assets, to be recovered principally over the next three to five years, is $120.8 million as of March 31, 2007 and is included in Regulatory Assets on the Company's Consolidated Balance Sheet. Unitil's retail distribution companies have a continuing obligation to submit filings in both states that demonstrate their compliance with regulatory mandates and provide for timely recovery of costs in accordance with their approved restructuring plans.

FG&E – Electric Division – FG&E provides electric distribution service to customers under unbundled distribution rates approved by the MDPU. Its current retail electric distribution rates were approved by the MDPU in 2002. FG&E is required, as the provider of last resort, to purchase and provide power through Default Service for retail customers who chose not to buy, or were unable to purchase, energy from a competitive supplier. Prices for Default Service are set periodically based on market solicitations as approved by the MDPU. As of March 31, 2007, approximately 57 percent of FG&E's electric load was served by Default Service. The remaining portion was served by competitive third party suppliers. The vast majority of customers being served by competitive third party suppliers are large commercial and industrial (C&I) customers. Most residential and small commercial customers continue to purchase their electric supply through the retail distribution utilities. The concentration of the competitive retail market on higher use customers within FG&E's service area in Massachusetts has been a common experience throughout the New England electricity market.

As a result of the restructuring and the divestiture of FG&E's owned generation assets and buyout of FG&E's power supply obligations, Regulatory Assets on the Company's balance sheets include the following three categories: Power Supply Buyout Obligations associated with the divestiture of its long-term purchase power obligations; Recoverable Deferred Restructuring Charges resulting from the restructuring legislation's seven year rate cap; and Recoverable Generation-related Assets associated with the divestiture of its owned generation plant. FG&E earns carrying charges on the majority of the unrecovered balances of the Recoverable Deferred Restructuring Charges. The value of FG&E's Recoverable Deferred Restructuring Charges and Recoverable Generation-related Assets was approximately $33.1 million at March 31, 2007, and $35.1 million at March 31, 2006, and is expected to be recovered in FG&E's rates over the next three to five years. In addition, as of March 31, 2007, FG&E had recorded on its balance sheet $48.0 million as Power Supply Buyout Obligations and corresponding Regulatory Assets associated with the divestiture of its long-term purchase power contracts, which are included in Unitil's consolidated financial statements, and on which carrying charges are not earned as the timing of cash disbursements and cash receipts associated with these long-term obligations is matched through rates.

On December 1, 2006, FG&E submitted its annual reconciliation of costs and revenues for Transition, Transmission, Standard Offer Service, and Default Service filed under its restructuring plan. This filing and FG&E's 2005 filing are pending, subject to investigation. The Company expects that these filings will be approved without material changes or adjustments.

FG&E – Gas Division – FG&E provides natural gas delivery service to its customers on a firm or interruptible basis under unbundled distribution rates approved by the MDTE. Its current retail distribution rates were approved by the MDPU in 2007. FG&E's customers may purchase gas supplies from third-party vendors or purchase their gas from FG&E as the provider of last resort. FG&E collects its gas supply costs through a seasonal reconciling Cost of Gas Adjustment Clause and recovers other related costs through a reconciling Local Distribution Adjustment Clause.

On January 26, 2007, the MDPU approved a rate Settlement Agreement (Settlement) between FG&E and the Attorney General of Massachusetts for FG&E's Gas Division. Under the Settlement, FG&E will phase-in gas distribution rate changes with an initial rate increase of $1.2 million as of February 1, 2007, and an additional $1.0 million increase on November 1, 2007. The Settlement also includes agreement on several other rate matters and service quality performance measures for the company's Gas Division in the areas of safety, customer service and satisfaction.

On September 7, 2006, the MDPU issued an order allowing FG&E to recover the costs of its actual gas and electric supply-related bad debt effective December 1, 2005. Prior to this final approval, FG&E had recovered supply-related bad debt costs based on a fixed rate formula that produced a significant under-recovery of these costs. On September 27, 2006, the Attorney General filed a Petition for Appeal with the Massachusetts Supreme Judicial Court seeking to set aside the MDPU's order of September 7, 2006. FG&E intends to support the MDPU's order but the Company cannot predict the outcome of the Attorney General's appeal at this time.

UES – UES provides electric distribution service to its customers pursuant to rates approved by the NHPUC. Its current retail electric distribution rates were approved by the NHPUC in 2006 under the Settlement Agreement discussed below. As the provider of last resort, UES also provides its customers with electric power through Default Service at rates which reflect UES' costs for wholesale supply with no profit or markup. UES procures Default Service power for its larger commercial and industrial customers on a quarterly basis, and for its smaller commercial and residential customers through a portfolio of longer term contracts on a semi-annual basis. UES recovers its costs for this service on a pass-through basis through reconciling rate mechanisms. As of March 31, 2007, approximately 79 percent of UES' electric load was served by Default Service. The remaining portion was served by competitive third party suppliers. The vast majority of customers being served by competitive third party suppliers are large C&I customers. Most residential and small commercial customers continue to purchase their electric supply through the retail distribution utilities. The concentration of the competitive retail market on higher use customers within UES' service area in New Hampshire has been a common experience throughout the New England electricity market.

In the 2002 restructuring settlement, the NHPUC approved the divestiture of the long-term power supply portfolio by Unitil Power and tariffs for UES for stranded cost recovery, including certain charges that remain subject to annual or periodic reconciliation or future review. As of March 31, 2007, UES had recorded on its balance sheets $39.6 million as Power Supply Contract Obligations and corresponding Regulatory Assets associated with these long-term purchase power stranded costs, which are included in Unitil Corporation's consolidated financial statements. These Power Supply Contract Obligations are expected to be recovered principally over a period of approximately three years. The Company does not earn carrying charges on these regulatory assets as the timing of cash receipts and cash disbursements associated with these long-term obligations is matched through rates.

On March 16, 2007, UES made its annual reconciliation and rate filing with the NHPUC under its restructuring plan, effective May 1, 2007, including reconciliation of prior year costs and revenues, power supply and power supply-related stranded costs. The filing is pending, subject to investigation.

On October 6, 2006, UES received approval from the NHPUC of a Settlement Agreement (Agreement) resolving its electric distribution base rate case filed in November, 2005. The terms of the Agreement provide for an increase in base distribution rates of $2.3 million annually, effective as of January 1, 2006. Additionally, the Agreement authorizes two step increases in base distribution rates, related to utility plant additions in 2006, of approximately $0.4 million and $0.1 million annually, effective as of November 1, 2006 and May 1, 2007, respectively. Also, the Agreement provides for the recovery of approximately $0.3 million annually of supply-related operating and administrative costs through default energy service rates and a reduction of approximately $0.6 million in annual depreciation expense, primarily reflecting an increase in utility plant and equipment average service lives. The stipulated rate of return under the settlement is 8.70%, including a return on equity of 9.67%. The Agreement also authorized a temporary rate surcharge for recovery of certain rate case expenses and recoupment of the authorized distribution rate increase from January through October 2006.

FERC – Wholesale Power Markets – FG&E, UES and Unitil Power, as well as virtually all New England electric utilities, are participants in ISO New England Inc., the RTO in New England. The regional bulk power system is operated by an independent corporate entity, ISO-NE. The purpose of ISO-NE is to assure reliable operation of the bulk power system in the most economic manner for the region. Substantially all operation and dispatching of electric generation and bulk transmission capacity in New England are performed on a regional basis. The ISO-NE Tariff imposes generating capacity and reserve obligations, and provides for the use of major transmission facilities and support payments associated therewith. The most notable benefits of the ISO-NE are coordinated power system operation in a reliable manner and a supportive business environment for the development of a competitive electric marketplace. The formation of an RTO and other wholesale market changes are not expected to have a material impact on Unitil's operations because of the cost recovery mechanisms for wholesale energy and transmission costs approved by the MDPU and NHPUC.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2006 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 21, 2007.

The Company's past and present operations include activities that are generally subject to extensive federal and state environmental laws and regulations. The Company believes it is in compliance with all applicable environmental and safety laws and regulations, and the Company believes that as of March 31, 2007, there are no material losses reasonably possible in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Sawyer Passway MGP Site – FG&E continues to work with environmental regulatory agencies to identify and assess environmental issues at the former manufactured gas plant (MGP) site at Sawyer Passway, located in Fitchburg, Massachusetts. FG&E has proceeded with site remediation work as specified on the Tier 1B permit issued by the Massachusetts Department of Environmental Protection (DEP), which allows FG&E to work towards temporary closure of the site. A status of temporary closure requires FG&E to monitor the site until a feasible permanent remediation alternative can be developed and completed.

FG&E has recovered the environmental response costs incurred at this former MGP site in gas rates pursuant to an MDTE approved settlement agreement between the Massachusetts Attorney General and the natural gas utilities of the Commonwealth of Massachusetts (Agreement). The Agreement allows FG&E to amortize and recover environmental response costs from gas customers over succeeding seven-year periods, without carrying costs. In addition FG&E has filed suit against several of its former insurance carriers seeking coverage for past and future environmental response costs at the site. Any recovery that FG&E receives from insurance or third parties with respect to environmental response costs, net of the unrecovered costs associated therewith, are split equally between FG&E and its gas customers.

FG&E is in the process of developing long range plans for a feasible permanent remediation solution for the Sawyer Passway site, including alternatives for re-use of the site. Included on the Company's Consolidated Balance Sheet at March 31, 2007 in Environmental Obligations is $12.0 million related to estimated future clean up costs for permanent remediation of the site. A corresponding regulatory asset was recorded to reflect the future rate recovery for these costs. The amounts recorded do not assume any amounts are recoverable from insurance companies or other third parties.

The Company's ultimate liability for future environmental remediation costs may vary from estimates, which may be adjusted as new information or future developments become available. Based on the Company's current assessment of its environmental responsibilities, existing legal requirements and regulatory policies, the Company does not believe that these environmental costs will have a material adverse effect on the Company's consolidated financial position or results of operations.

NOTE 8: RETIREMENT BENEFIT OBLIGATIONS

The Company provides certain pension and postretirement benefit plans for its retirees and current employees including defined benefit pension plans, postretirement health and welfare plans, a supplemental executive retirement plan and an employee 401(k) savings plan.

In September 2006, the FASB issued SFAS No. 158 which requires companies to record on their balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas retail rates.

Pension Plan – The Company's defined benefit pension plan covers substantially all of its employees. Under the Pension Plan, retirement benefits are based upon an employee's level of compensation and length of service.

FG&E recovers the costs associated with its pension and PBOP costs on an annually reconciling basis through a rate adjustment mechanism (the Pension / PBOP Adjustment Factor (PAF). FG&E records a regulatory asset to recognize the deferral for the difference between the level of pension and PBOP expenses that are currently included in its base rates and the amounts that are required to be recorded in accordance with SFAS No. 87 and

SFAS No. 106 and amortizes increases and/or decreases in that deferral balance into the PAF for recovery over a three year period.

UES recovers its pension and PBOP expenses in base rates and amortizes deferred pension costs as these costs are recovered over a six year period in base rates.

The following tables show the components of net periodic pension cost, (NPPC), as well as key actuarial assumptions used in determining the various pension plan values:

	Three Months Ended March 31,			
		2007		2006
Components of NPPC (000's)				
Service Cost	**$**	**492**	$	450
Interest Cost		**834**		787
Expected Return on Plan Assets		**(1,047)**		(912)
Amortization of Prior Service Cost		**27**		27
Amortization of Net (Gain) Loss		**336**		355
Subtotal NPPC		**642**		707
Amounts Capitalized and Deferred		**(217)**		(577)
NPPC Recognized	**$**	**425**	$	130

Key Assumptions (Weighted Average)	**2007**	2006
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	5.50%
Rate of Compensation Increase	**3.50%**	3.50%
Used to Determine NPPC:		
Discount Rate	**5.50%**	5.50%
Expected Long-Term Rate of Return on Plan Assets	**8.50%**	8.50%
Rate of Compensation Increase	**3.50%**	3.50%

Employer Contributions – On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA are new minimum funding rules which will go into effect for plan years beginning in 2008. The funding target will be 100% of a plan's liability with any shortfall amortized over seven years, with lower (92% - 100%) funding targets available to well-funded plans during the transition period. As of March 31, 2007, the Company has not yet made any contributions to the Plan for 2007. The Company expects to contribute approximately $4.4 million to fund its pension plan in 2007. The Company contributed $2.5 million in 2006.

PBOP Plan - The Company sponsors the PBOP Plan, primarily to provide health care and life insurance benefits to employees and retirees. The Company has established Voluntary Employee Benefit Trusts (VEBT), into which it funds contributions to the PBOP Plan.

As discussed above, on October 27, 2004 the MDTE approved FG&E's request for a reconciliation rate adjustment mechanism, the PAF, to recover the costs associated with the Company's pension and PBOP costs on an annually reconciling basis. As discussed above, on October 6, 2006, the NHPUC approved a Settlement Agreement, resolving all issues in UES' electric distribution base rate case filed in November 2005. As part of the Settlement Agreement, UES is allowed to recover its pension and PBOP expenses in base rates.

The following tables show the components of net periodic postretirement benefit cost (NPPBC), as well as key actuarial assumptions used in determining the various PBOP Plan values:

	Three Months Ended March 31,	
	2007	2006
Components of NPPBC (000's)		
Service Cost	**$ 358**	$ 292
Interest Cost	**514**	450
Expected Return on Plan Assets	**(61)**	(28)
Amortization of Prior Service Cost	**340**	340
Amortization of Transition (Asset) Obligation	**5**	5
Amortization of Net (Gain) Loss	**17**	---
Subtotal NPPBC	**1,173**	1,059
Amounts Capitalized and Deferred	**(513)**	(482)
NPPBC Recognized	**$ 660**	$ 577

Weighted-Average Assumptions	**2007**	2006
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	5.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	8.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2016
Used to Determine NPPBC:		
Discount Rate	**5.50%**	5.50%
Expected Long-Term Rate of Return on Plan Assets	**8.50%/5.50%[(1)]**	8.50%/5.50% [(1)]
Health Care Cost Trend Rate Assumed for Next Year	**9.00%**	8.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2016

[(1)] Funding of the PBOP Plan is made into two VEBT's; one is a union VEBT and the other is a non-union VEBT. The expected long-term rate of return on plan assets for the union VEBT is 8.50%. The non-union VEBT is subject to income taxes and therefore the expected long-term rate of return on plan assets is 5.50%, reflecting the effect of taxes.

Employer Contributions – As of March 31, 2007, the Company has made $0.5 million of contributions to the PBOP Plan. The Company presently anticipates contributing an additional $1.7 million to fund the Plan in 2007 for an estimated total of $2.2 million. The Company contributed $2.2 million in 2006.

SERP - The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (the SERP), with participation limited to executives selected by the Board of Directors.

The components of net periodic SERP cost are as follows:

	Three Months Ended March 31,			
		2007		2006
Components of NPPC (000's)				
Service Cost	**$**	**41**	$	36
Interest Cost		**29**		26
Amortization of Transition Obligation		**---**		4
Amortization of Net Loss		**11**		10
Net Periodic SERP Cost	**$**	**81**	$	76

Employer Contributions – As of March 31, 2007, the Company has made payments of $18,000 to beneficiaries. The Company presently anticipates making additional benefit payments of $54,000 in 2007 for a total of $72,000.

NOTE 9: INCOME TAXES

The Company evaluated its tax positions at December 31, 2006 and for the current interim reporting period ended March 31, 2007 in accordance with FIN 48, and has concluded that no adjustment for recognition, derecognition, settlement and foreseeable future events to any unrecognized tax liabilities or assets as defined by FIN 48 is required. The Company does not have any unrecognized tax positions for which it is reasonably possible that the total amounts recognized will significantly change within the next 12 months. The Company remains subject to examination by Federal, Massachusetts and New Hampshire tax authorities for the tax periods ended December 31, 2003; December 31, 2004; and December 31, 2005. Income tax filings for the year ended December 31, 2006 have been extended and are due September 15, 2007. The Company classifies penalty and interest expense related to income tax liabilities as an income tax expense. There are no interest and penalties recognized in the statement of earnings or accrued on the balance sheet.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2006 as filed with the Securities and Exchange Commission on February 21, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) There were no sales of unregistered equity securities by the Company for the fiscal period ended March 31, 2007.

(b) Not applicable.

(c) Issuer repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(1)
1/1/07 – 1/31/07	1,163 995	$25.463 $25.500	1,163 995	n/a n/a
2/1/07 – 2/28/07	---	---	---	n/a
3/1/07 – 3/31/07	289	$27.095	289	n/a
Total	2,447	$25.671	2,447	n/a

(1) Represents Common Stock purchased on the open market related to Board of Director Retainer Fees and Employee Length of Service Awards. Shares are not purchased as part of a specific plan or program and therefore there is no pool or maximum number of shares related to these purchases.

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil's principal business is the retail distribution of electricity and natural gas through two utility subsidiaries: Unitil Energy System's Inc. (UES) and Fitchburg Gas and Electric Light Company (FG&E). UES is an electric utility with an operating franchise in the southeastern seacoast and capital city areas of New Hampshire. FG&E is a combination gas and electric utility with an operating franchise in the greater Fitchburg area of north central Massachusetts.

Unitil's two retail distribution utilities serve approximately 99,400 electric customers and 15,000 natural gas customers in their franchise areas. The retail distribution companies are pure distribution utilities with a combined investment in net utility plant of $243.8 million at June 30, 2007. Substantially all of Unitil's revenue and earnings are derived from regulated utility operations.

Unitil also conducts non-regulated operations principally through its Usource subsidiary. Usource provides energy brokering and consulting services to large commercial and industrial customers in the northeastern United States. Unitil's other subsidiaries include Unitil Service and Unitil Realty, which provide centralized facilities, management and administrative services to Unitil's affiliated companies. Unitil's consolidated net income includes the earnings of the holding company and these subsidiaries.

RATES AND REGULATION

Unitil's utility operations related to wholesale and interstate business activities are regulated by FERC. The retail distribution utilities, UES and FG&E, are subject to regulation by the New Hampshire Public Utilities Commission (NHPUC) and the Massachusetts Department of Public Utilities (MDPU), formerly the Massachusetts Department of Telecommunications and Energy, respectively, in regards to their rates, issuance of securities and other accounting and operational matters. Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in their franchise areas, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on a historical test year, in addition to earning a return on their capital investment in utility assets.

As a result of the implementation of retail choice in New Hampshire and Massachusetts, Unitil's customers are free to contract for their supply of electricity with third-party suppliers. The retail distribution utilities provide for the delivery of that supply of electricity over their distribution systems at regulated rates. Both UES and FG&E continue to provide basic or default electric supply service to those customers who do not obtain their supply from third-party suppliers, with the costs associated with electricity supplied by the Company being recovered on a pass-through basis under periodically-adjusted rates.

As a result of the introduction of retail choice for all natural gas customers in Massachusetts, FG&E's customers are free to contract for their supply of natural gas with third-party suppliers. FG&E continues to provide natural gas supply services to those customers who do not obtain their supply from third-party suppliers. The costs associated with natural gas supplied by FG&E are recovered on a pass-through basis under periodically adjusted rates.

CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for the Company's future operations, are forward-looking statements.

These statements include declarations regarding the Company's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include the following:

- Variations in weather;
- Changes in the regulatory environment;
- Customers' preferences on energy sources;
- Interest rate fluctuation and credit market concerns;
- General economic conditions;
- Fluctuations in supply, demand, transmission capacity and prices for energy commodities;
- Increased competition; and
- Customers' future performance under multi-year energy brokering contracts.

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements. There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2006 as filed with the Securities and Exchange Commission on February 21, 2007.

RESULTS OF OPERATIONS

The following section of MD&A compares the results of operations for each of the two fiscal periods ended June 30, 2007 and June 30, 2006 and should be read in conjunction with the accompanying Consolidated Financial Statements and the accompanying Notes to Consolidated Financial Statements included in Item 1 of this report.

Earnings Overview

The Company's Earnings Applicable to Common Shareholders (Net Income) was $1.7 million for the second quarter of 2007, an increase of $0.3 million over the second quarter of 2006. Earnings per common share (EPS) were $0.30 for the three months ended June 30, 2007, an improvement of $0.05 per share, or 20%, over the second quarter of 2006. Unitil's improved second quarter performance was driven by higher gas sales and lower operation and maintenance expenses, which were partially offset by higher interest expense. For the six months ended June 30, EPS were $0.76 for 2007 compared to $0.61 for 2006, an improvement of $0.15, or 25%.

Unitil's non-regulated business, Usource, also continued to realize higher revenues compared to last year, which further contributed to the Company's overall improved earnings.

Table of Contents

The following table presents the significant items (discussed below) contributing to the improvement in earnings per share in the three and six month periods ended June 30, 2007:

2007 Earnings Per Share vs. 2006

	Period Ended June 30,	
	QTD	YTD
2006	**$ 0.25**	**$ 0.61**
Electric Sales Margin	(0.02)	0.04
Gas Sales Margin	0.06	0.14
Usource Sales Margin	0.03	0.06
Operation & Maintenance Expense	0.04	0.02
Depreciation, Amortization & Other	(0.02)	(0.05)
Interest Expense, Net	(0.04)	(0.06)
2007	**$ 0.30**	**$ 0.76**

Unitil's electric kWh sales to residential customers in the three and six month periods ended June 30, 2007 increased 1.5% and 0.9%, respectively, compared to the same periods in 2006 while sales to Commercial and Industrial (C&I) customers decreased 0.1% and 0.5% in those periods compared to the same periods in 2006. Gas sales to residential customers in the three and six month periods ended June 30, 2007 increased 15.0% and 4.3%, respectively, compared to the same periods in 2006 while sales to C&I customers increased 10.5% and 12.2% in those periods compared to the same periods in 2006.

Electric sales margin decreased $0.2 million and increased $0.5 million in the three and six months ended June 30, 2007, respectively, compared to the same periods in 2006. The lower electric sales margin in the second quarter of 2007 is due to the timing of recognition, in the second quarter of 2006, of revenues retroactive to January 1, 2006 associated with higher new electric rates established in the Company's electric rate case settlement in New Hampshire. The overall electric sales margin improvement through the first six months of 2007 compared to 2006 reflects additional step rate increases approved and implemented in the last half of 2006 and the first half of 2007.

Gas sales margin increased $0.5 million and $1.3 million in the three and six months ended June 30, 2007, respectively, compared to the same periods in 2006 reflecting higher gas sales due to more normal winter weather than last year and higher gas revenue from new higher rates approved and implemented in early 2007.

Usource, Unitil's non-regulated energy brokering business, recorded increased sales of $0.3 million and $0.6 million in the three and six month periods ended June 30, 2007 compared to the same periods of 2006, representing increases of 50% over the comparable 2006 periods.

Total Operation and Maintenance (O&M) expenses decreased $0.4 million and $0.2 in the three and six month periods ended June 30, 2007 compared to the same periods in 2006. The decrease in the six month period reflects lower outside services expenses of $0.3 million as well as cost efficiencies achieved in utility operating and all other expenses of $0.3 million, net, partially offset by higher salaries and compensation expenses of $0.3 million and higher retiree and employee benefit costs of $0.1 million.

Depreciation, Amortization, Taxes & Other, net expenses increased $0.3 million and $1.1 million in the three and six month periods ended June 30, 2007 compared to the same periods in 2006 primarily reflecting higher depreciation on utility plant additions and higher income taxes on higher levels of pre-tax earnings in 2007 compared to 2006.

Interest Expense, Net increased $0.4 million and $0.6 million in the three and six month periods ended June 30, 2007 compared to the same periods in 2006 reflecting an increase in the average cost of debt and higher long-term debt outstanding.

Table of Contents

In 2006, Unitil's annual common dividend was $1.38, representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock. At its January, 2007, March, 2007 and June, 2007 meetings, the Unitil Board of Directors declared quarterly dividends on the Company's common stock of $0.345 per share.

A more detailed discussion of the Company's results of operations for the three and six months ended June 30, 2007 and a period-to-period comparison of changes in financial position are presented below.

Balance Sheet

Regulatory Assets increased $19.7 million as of June 30, 2007 compared to June 30, 2006, reflecting the recording of Regulatory Assets for Retirement Benefit Obligations in accordance with newly issued Federal Accounting Standards Board (FASB) Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", (SFAS No. 158) (See Note 8) and the recording of a Regulatory Asset for future environmental remediation obligations associated with the Company's former manufactured gas plant site at Sawyer Passway, located in Fitchburg, Massachusetts (See Note 7), partially offset by a decrease related to current year cost recoveries.

Long-Term Debt increased $34.8 million as of June 30, 2007 compared to June 30, 2006, reflecting the issuance and sale on September 26, 2006 by UES of $15.0 million of Series O 6.32% First Mortgage Bonds, due September 15, 2036, to institutional investors in the form of a private placement and the issuance and sale on May 2, 2007 by Unitil Corporation of $20 million of 6.33% long-term Notes, due May 1, 2022, to institutional investors, also in the form of a private placement.

Deferred Income Taxes decreased $19.1 million as of June 30, 2007 compared to June 30, 2006, primarily reflecting the recording of deferred tax assets related to Retirement Benefit Obligations, discussed below.

Retirement Benefit Obligations increased $38.4 million as of June 30, 2007 compared to June 30, 2006, primarily reflecting the recording of pension, PBOP and SERP obligations in accordance with SFAS No. 158, discussed above.

Environmental Obligations increased $12.0 million as of June 30, 2007 compared to June 30, 2006, reflecting the recording of a liability for future environmental remediation obligations associated with the Company's former manufactured gas plant site at Sawyer Passway, discussed above.

Electric Sales, Revenues and Margin

Kilowatt-hour Sales – Unitil's total electric kWh sales increased 0.5% and 0.1% in the three and six month periods ended June 30, 2007, respectively compared to the same periods in 2006. Electric kWh sales to residential customers in the three and six month periods ended June 30, 2007 increased 1.5% and 0.9%, respectively, compared to the same periods in 2006 while sales to C&I customers decreased 0.1% and 0.5% in those periods compared to the same periods in 2006.

The following table details total kWh sales for the three and six months ended June 30, 2007 and 2006 by major customer class:

kWh Sales (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2007	**2006**	**Change**	**% Change**	**2007**	**2006**	**Change**	**% Change**
Residential	**152.0**	149.7	2.3	1.5%	**335.9**	332.9	3.0	0.9%
Commercial / Industrial	**262.5**	262.8	(0.3)	(0.1%)	**528.2**	530.6	(2.4)	(0.5%)
Total	**414.5**	412.5	2.0	0.5%	**864.1**	863.5	0.6	0.1%

[Table of Contents](#)

Electric Operating Revenues and Sales Margin – The following table details total Electric Operating Revenues and Sales Margin for the three and six month periods ended June 30, 2007 and 2006:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2007	**2006**	**$ Change**	**% Change(1)**	**2007**	**2006**	**$ Change**	**% Change(1)**
Electric Operating Revenue:								
Residential	**$ 24.7**	$ 23.3	$ 1.4	2.6%	**$ 56.2**	$ 47.6	$ 8.6	7.8%
Commercial / Industrial	**27.0**	30.1	(3.1)	(5.8%)	**58.2**	62.2	(4.0)	(3.6%)
Total Electric Operating Revenue	**$ 51.7**	$ 53.4	$ (1.7)	(3.2%)	**$ 114.4**	$ 109.8	$ 4.6	4.2%
Cost of Electric Sales:								
Purchased Electricity	**$ 36.3**	$ 37.7	$ (1.4)	(2.6%)	**$ 84.5**	$ 80.5	$ 4.0	3.6%
Conservation & Load Management	**1.0**	1.1	(0.1)	(0.2%)	**2.0**	1.9	0.1	0.1%
Electric Sales Margin	**$ 14.4**	$ 14.6	$ (0.2)	(0.4%)	**$ 27.9**	$ 27.4	$ 0.5	0.5%

(1) Represents change as a percent of Total Electric Operating Revenue.

Total Electric Operating Revenues, decreased by $1.7 million, or 3.2%, and increased by $4.6 million, or 4.2%, in the three and six month periods ended June 30, 2007, respectively, compared to the same periods in 2006. Total Electric Operating Revenues include the recovery of costs of electric sales, which are recorded as Purchased Electricity and Conservation & Load Management (C&LM) in Operating Expenses. The net decrease in Total Electric Operating Revenues in the three month period reflects lower Purchased Electricity costs of $1.4 million, lower C&LM revenues of $0.1 million, and lower sales margin of $0.2 million. The net increase in Total Electric Operating Revenues in the six month period reflects higher Purchased Electricity costs of $4.0 million, higher C&LM revenues of $0.1 million and higher sales margin of $0.5 million.

Purchased Electricity and C&LM revenues decreased a net $1.5 million, or 2.8%, and increased a net $4.1 million, or 3.7%, of Total Electric Operating Revenues in the three and six month periods ended June 30, 2007, respectively, compared to the same periods in 2006. The decrease in the three month period primarily reflects an increase in the amount of electricity purchased by customers directly from third-party suppliers partially offset by higher electric commodity prices. The increase in the six month period primarily reflects higher electric commodity prices partially offset by an increase in the amount of electricity purchased by customers directly from third-party suppliers. Purchased Electricity revenues include the recovery of the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin decreased $0.2 million and increased $0.5 million in the three and six months ended June 30, 2007, respectively, compared to the same periods in 2006. The lower electric sales margin in the second quarter of 2007 is due to the timing of recognition, in the second quarter of 2006, of revenues retroactive to January 1, 2006 associated with higher new electric rates established in the Company's electric rate case settlement in New Hampshire. The overall electric sales margin improvement through the first six months of 2007 compared to 2006 reflects additional step rate increases approved and implemented in the last half of 2006 and the first half of 2007.

Table of Contents

Gas Sales, Revenues and Margin

Therm Sales – Unitil's total therm sales of natural gas increased 12.1% and 9.0% in the three and six months ended June 30, 2007, respectively, compared to the same periods in 2006. Gas sales to residential customers in the three and six month periods ended June 30, 2007 increased 15.0% and 4.3%, respectively, compared to the same periods in 2006 while sales to C&I customers increased 10.5% and 12.2% in those periods compared to the same periods in 2006, primarily due to a new special contract with a large industrial customer.

The following table details total firm therm sales for the three and six months ended June 30, 2007 and 2006, by major customer class:

Therm Sales (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2007	2006	Change	% Change	2007	2006	Change	% Change
Residential	**2.3**	2.0	0.3	15.0%	**7.2**	6.9	0.3	4.3%
Commercial / Industrial	**4.2**	3.8	0.4	10.5%	**11.0**	9.8	1.2	12.2%
Total	**6.5**	5.8	0.7	12.1%	**18.2**	16.7	1.5	9.0%

Gas Operating Revenues and Sales Margin – The following table details total Gas Operating Revenues and Sales Margin for the three and six months ended June 30, 2007 and 2006:

Gas Operating Revenues and Sales Margin (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2007	2006	$ Change	% Change(1)	2007	2006	$ Change	% Change(1)
Gas Operating Revenue:								
Residential	**$ 3.9**	$ 3.2	$ 0.7	11.1%	**$ 12.4**	$ 11.0	$ 1.4	7.0%
Commercial / Industrial	**2.5**	3.1	(0.6)	(9.5%)	**8.2**	9.0	(0.8)	(4.0%)
Total Gas Operating Revenue	**$ 6.4**	$ 6.3	$ 0.1	1.6%	**$ 20.6**	$ 20.0	$ 0.6	3.0%
Cost of Gas Sales:								
Purchased Gas	**$ 3.9**	$ 4.3	$ (0.4)	(6.3%)	**$ 13.7**	$ 14.4	$ (0.7)	(3.5%)
Conservation & Load Management	**0.1**	0.1	—	—	**0.1**	0.1	—	—
Gas Sales Margin	**$ 2.4**	$ 1.9	$ 0.5	7.9%	**$ 6.8**	$ 5.5	$ 1.3	6.5%

(1) Represents change as a percent of Total Gas Operating Revenue.

Total Gas Operating Revenues increased $0.1 million, or 1.6%, and $0.6 million, or 3.0%, in the three and six month periods ended June 30, 2007, respectively, compared to the same periods in 2006. Total Gas Operating Revenues include the recovery of the cost of sales, which are recorded as Purchased Gas and C&LM in Operating Expenses. The net increase in Total Gas Operating Revenues in the three month period reflects higher sales margin of $0.5 million, offset by lower Purchased Gas costs of $0.4 million. The net increase in Total Gas Operating Revenues in the six month period reflects higher sales margin of $1.3 million, offset by lower Purchased Gas costs of $0.7 million.

[Table of Contents](#)

Purchased Gas and C&LM revenues decreased a net $0.4 million, or 6.3%, and $0.7 million, or 3.5%, of Total Gas Operating Revenues in the three and six month periods ended June 30, 2007, respectively, compared to the same periods in 2006, reflecting lower natural gas commodity prices and an increase in the amount of natural gas purchased by customers directly from third-party suppliers. Purchased Gas revenues include the recovery of the cost of gas supply as well as the other energy supply related costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Gas sales margin increased $0.5 million and $1.3 million in the three and six months ended June 30, 2007, respectively, compared to the same periods in 2006 reflecting higher gas sales due to more normal winter weather than last year and higher gas revenue from new higher rates approved and implemented in early 2007.

Operating Revenue – Other

The following table details total Other Revenue for the three and six months ended June 30, 2007 and 2006:

Other Revenue (000's)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2007	2006	$ Change	% Change	2007	2006	$ Change	% Change
Other	**$ 0.9**	$ 0.6	$ 0.3	50.0%	**$ 1.8**	$ 1.2	$ 0.6	50.0%
Total Other Revenue	**$ 0.9**	$ 0.6	$ 0.3	50.0%	**$ 1.8**	$ 1.2	$ 0.6	50.0%

Total Other Revenue increased $0.3 million, or 50.0%, and $0.6 million, or 50.0% in the three and six month periods ended June 30, 2007, respectively, compared to the same periods in 2006. These increases were the result of growth in revenues from the Company's non-regulated energy brokering business, Usource.

Operating Expenses

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity decreased $1.4 million, or 3.7% and increased $4.0 million, or 5.0%, in the three and six month periods ended June 30, 2007, respectively, compared to the same periods in 2006. The decrease in the three month period reflects an increase in the amount of electricity purchased by customers directly from third-party suppliers partially offset by higher electric commodity prices. The increase in the six month period reflects higher electric commodity prices partially offset by an increase in the amount of electricity purchased by customers directly from third-party suppliers. The Company recovers the costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas decreased $0.4 million, or 9.3%, and $0.7 million, or 4.9%, in the three and six month periods ended June 30, 2007, respectively, compared to the same periods in 2006. These decreases in Purchased Gas are attributable to lower natural gas commodity prices and an increase in the amount of natural gas purchased by customers directly from third-party suppliers. The Company recovers the costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Operation and Maintenance (O&M) – O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total Operation and Maintenance expenses decreased $0.4 million and $0.2 in the three and six month periods ended June 30, 2007 compared to the same periods in 2006. The decrease in the three month period reflects lower medical and other employee benefit costs, of $0.2 million, lower outside services expenses of $0.2 million, lower bad debt expenses of $0.1 million and all other operating expenses of $0.1 million, net, partially offset by higher salaries and compensation expenses of $0.2 million. The three month period ended June 30, 2006 included the recording of O&M costs related to the Company's electric base rate case settlement in New Hampshire and retroactive to January 1, 2006, as discussed above. The decrease in the six month period reflects lower outside services expenses of $0.3 million, lower utility operating expenses of $0.1 million and all other operating expenses of $0.2 million, net, partially offset by higher salaries and compensation expenses of $0.3 million and higher retiree and employee benefit costs of $0.1 million.

Conservation & Load Management – C&LM expenses are associated with the development, management, and delivery of the Company's Energy Efficiency programs. Energy Efficiency programs are designed, in conformity with state regulatory requirements, to help consumers use natural gas and electricity more efficiently and thereby decrease their energy costs. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 90% of these costs are related to electric operations and 10% to gas operations.

Total C&LM expenses decreased $0.1 million, or 8.3%, and increased $0.1 million, or 5.0%, in the three and six month periods ended June 30, 2007, respectively, compared to the same periods in 2006. These changes reflect the timing of spending on the implementation of Energy Efficiency programs. These costs are collected from customers on a pass through basis and therefore, fluctuations in program costs have no impact on Net Income.

Depreciation, Amortization and Taxes

Depreciation and Amortization – Depreciation and Amortization expense for the three month period ended June 30, 2007 was flat compared to the same period in 2006. For the six month period ended June 30, 2007, Depreciation and Amortization expense increased $0.3 million, or 3.5%, compared to the same period in 2006 primarily due to higher utility plant in service on which depreciation is recorded.

Local Property and Other Taxes – Local Property and Other Taxes decreased by less than $0.1 million, or 2.7% for the three month period ended June 30, 2007 compared to the same period in 2006 due primarily to lower payroll and property taxes. Local Property and Other Taxes for the six month period ended June 30, 2007 were flat compared to the same period in 2006 due primarily to lower payroll taxes offset by higher property tax rates.

Federal and State Income Taxes – Federal and State Income Taxes were higher by $0.2 million and $0.6 million in the three and six month periods ended June 30, 2007 compared to the same periods in 2006, respectively, reflecting higher pre-tax earnings.

Other Non-operating Expenses (Income)

Other Non-operating Expenses (Income) changed from income of $0.1 million in both the three and six month periods ended June 30, 2006 to expense of $0.1 million in both the three and six month periods ended June 30, 2007. These changes reflect the recognition in 2006 of a gain on the sale of land and timber harvest revenue.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. Certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

The Company operates a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the Company's rate tariff, interest is accrued on these balances and will produce either interest income or interest expense. Interest income is recorded on an under-collection of costs, which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (Millions)	Three Months Ended June 30,			Six Months Ended June 30,		
	2007	2006	Change	2007	2006	Change
Interest Expense						
Long-term Debt	$ 2.8	$ 2.3	$ 0.5	$ 5.3	$ 4.6	$ 0.7
Short-term Debt	0.3	0.4	(0.1)	0.7	0.7	—
Regulatory Liabilities	0.2	0.1	0.1	0.3	0.2	0.1
Subtotal Interest Expense	3.3	2.8	0.5	6.3	5.5	0.8
Interest Income						
Regulatory Assets	(0.7)	(0.8)	0.1	(1.5)	(1.5)	—
AFUDC and Other	(0.2)	—	(0.2)	(0.3)	(0.1)	(0.2)
Subtotal Interest Income	(0.9)	(0.8)	(0.1)	(1.8)	(1.6)	(0.2)
Total Interest Expense, Net	$ 2.4	$ 2.0	$ 0.4	$ 4.5	$ 3.9	$ 0.6

Interest Expense, Net increased by $0.4 million and $0.6 million in the three and six month periods ended June 30, 2007, respectively, compared to the same periods in 2006 reflecting an increase in the average cost of debt and higher debt outstanding. Interest expense on long-term borrowings increased in both the three and six month periods in 2007 compared to 2006 due to the issuance of new fixed rate long-term debt. UES issued and sold $15 million of Series O, 6.32% First Mortgage Bonds to institutional investors on September 26, 2006. The proceeds from this fixed rate long-term financing were used principally to finance utility plant additions that had been previously financed on an interim basis with variable rate short-term borrowings. On May 2, 2007, Unitil Corporation issued and sold $20 million of 6.33% Senior Long-Term Notes, due May 1, 2022, to institutional investors in the form of a private placement. The proceeds from this fixed rate long-term financing were used to refinance existing variable rate short-term debt and for general corporate purposes of the Company and its subsidiaries. Interest expense on short-term debt decreased $0.1 million in the three month period ended June 30, 2007 compared to the same period in 2006 primarily due to lower average short-term borrowings. For the six month period ended June 30, 2007, interest expense on short-term debt was flat to the same period in 2006. The increases in interest expense were partially offset by an increase in interest income.

CAPITAL REQUIREMENTS

Sources of Capital

Unitil requires capital to fund utility plant additions, working capital and other utility expenditures recovered in subsequent and future periods through regulated rates. The capital necessary to meet these requirements is derived primarily from internally-generated funds, which consist of cash flows from operating activities, excluding payment of dividends. The Company initially supplements internally generated funds through bank borrowings, as needed, under unsecured short-term bank lines. Long-term financings, mainly in the form of first mortgage bonds, unsecured notes and equity, are periodically issued to complement the addition of long-term plant investments and for other corporate purposes.

The continued availability of these methods of financing, as well as the Company's choice of a specific form of security, will depend on many factors, including, but not limited to: security market conditions; general economic climate; regulatory approvals; the ability to meet covenant issuance restrictions, if any; the level of the Company's earnings, cash flows and financial position; and the competitive pricing offered by financing sources.

On June 30, 2007 Unitil renewed $30 million in unsecured revolving lines of credit through three banks. Average daily short-term borrowings during the first six months of 2007 were approximately $20.8 million, a decrease of approximately $4.3 million over the comparable period in 2006, reflecting principally the receipt of the Unitil Note financing in May 2007, described below.

On May 2, 2007, Unitil completed the sale of $20 million of Senior Long-Term Notes, through a private placement to institutional investors. The Notes have a term of 15 years maturity and a coupon rate of 6.33%. The Company utilized the proceeds from the long-term Note financing to refinance existing short-term debt and for other general corporate purposes of the Company's principal utility subsidiaries.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to the duration of the contracts, which range from three months to three years. As of June 30, 2007, there were approximately $12.5 million of guarantees outstanding and the longest term guarantee extends through March 13, 2009.

The tables below summarize the major sources and uses of cash (in millions) for the six months ended June 30, 2007 compared to the same period in 2006.

Cash Provided by Operating Activities	**$ 17.0**	$ 11.0

Cash Provided by Operating Activities – Cash Provided by Operating Activities was $17.0 million during the first six months ended June 30, 2007, an increase of $6.0 million over the comparable period in 2006. Sources of cash from Net Income were $0.9 million higher in the first six months of 2007 compared to 2006. Sources of cash from Depreciation and Amortization increased by $0.3 million in the current period compared to the same period in 2006. An additional $1.3 million of cash was utilized for Deferred Taxes as compared to the comparable period in 2006. Working Capital related cash flows increased by $2.6 million during the first six months of 2007 compared to the same period in 2006. All other changes in operating activities were a net $3.5 million in sources of cash in the first six months of 2007 compared to 2006.

Table of Contents

Cash (Used in) Investing Activities	**$ (19.6)**	$ (14.4)

Cash (Used in) Investing Activities – Cash (Used in) Investing Activities was $19.6 million for the six months ended June 30, 2007, an increase of $5.2 million over the comparable period in 2006. Annual capital expenditures are projected to be $32.4 million in 2007 compared to $33.6 million expended in fiscal 2006. These 2007 projected capital expenditures include approximately $5.5 million of cash outlays for the Automated Metering Infrastructure (AMI) project, the second year of a two-year investment in the Company's advanced metering infrastructure. The Company's AMI expenditures were $5.4 million during the first six months of 2007 compared to $2.0 million during the comparable period in 2006. Capital expenditure projections are subject to changes during the fiscal year.

Cash Provided by Financing Activities	**$ 0.2**	$ 4.1

Cash Provided by Financing Activities – Cash Provided by Financing Activities was $0.2 million in the six months ended June 30, 2007, a decrease of $3.9 million over the comparable period in 2006. Cash provided from short term debt was $24.5 million lower in the first six months of 2007 compared to the same period in 2006, mainly due to the issuance of $20 million in Senior Long-Term Notes, as described above. All other cash flows provided from financing activities were a net $0.6 million higher in the first six months of 2007 compared to 2006.

CRITICAL ACCOUNTING POLICIES

The preparation of the Company's financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, management is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgments, the financial statements of the Company could be materially different than reported. The following is a summary of the Company's most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company's significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 21, 2007.

Regulatory Accounting – The Company's principal business is the distribution of electricity and natural gas by the retail distribution companies: UES and FG&E. Both UES and FG&E are subject to regulation by the FERC and FG&E is regulated by the MDPU and UES is regulated by the NHPUC. Accordingly, the Company uses the provisions of FASB Statement No. 71, "Accounting for the Effects of Certain Types of Regulation." (SFAS No. 71). In accordance with SFAS No. 71, the Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

The Company's principal regulatory assets and liabilities are detailed on the Company's Consolidated Balance Sheet and a summary of the Company's Regulatory Assets is provided below. Generally, the Company is currently receiving or being credited with a return on all of its regulatory assets for which a cash outflow has been made. Generally, the Company is currently paying or being charged with a return on all of its regulatory liabilities for which a cash inflow has been received.

Regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. The Company believes it is probable that its regulated utility companies will recover their investments in long-lived assets, including regulatory assets. The Company also has commitments under long-term contracts for the purchase of electricity and natural gas from various suppliers. The annual costs under these contracts are included in Purchased Electricity and Purchased Gas in the Consolidated Statements of Earnings and these costs are recoverable in current and future rates under various orders issued by the FERC, MDPU and NHPUC.

Regulatory Assets consist of the following (millions)	June 30, 2007	June 30, 2006	December 31, 2006
Power Supply Buyout Obligations	**$ 82.6**	$ 102.2	$ 92.6
Deferred Restructuring Costs	**30.1**	31.6	31.0
Generation-related Assets	**2.1**	2.9	2.5
Subtotal – Restructuring Related Items	**114.8**	136.7	126.1
Retirement Benefit Obligations	**37.2**	9.5	37.1
Income Taxes	**18.3**	16.8	19.1
Environmental Obligations	**13.1**	0.9	13.0
Other	**3.9**	3.7	3.5
Total Regulatory Assets	**$ 187.3**	$ 167.6	$ 198.8

If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of SFAS No. 71. If unable to continue to apply the provisions of SFAS No. 71, the Company would be required to apply the provisions of FASB Statement No. 101, "Regulated Enterprises – Accounting for the Discontinuation of Application of Financial Accounting Standards Board Statement No. 71." In the Company's opinion, its regulated operations will be subject to SFAS No. 71 for the foreseeable future.

Utility Revenue Recognition – Regulated utility revenues are based on rates and charges approved by federal and state regulatory commissions. Revenues related to the sale of electric and gas service are recorded when service is rendered or energy is delivered to customers. The determination of energy sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts – The Company recognizes a Provision for Doubtful Accounts each month. The amount of the monthly Provision is based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior periods. Account write-offs and recoveries, are processed monthly. At the end of each month, an analysis of the delinquent receivables is performed and the adequacy of the Allowance for Doubtful Accounts is reviewed. The analysis calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company is authorized by regulators to recover the supply-related portion of its written-off accounts from customers through periodically reconciling rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis. Also, the Company has experienced periods when state regulators have extended the periods during which certain standard credit and collection activities of utility companies are suspended. In periods when account write-offs exceed estimated levels, the Company adjusts the Provision for Doubtful Accounts to maintain an adequate Allowance for Doubtful Accounts balance.

Retirement Benefit Obligations – The Company sponsors the Unitil Corporation Retirement Plan (Pension Plan), which is a defined benefit pension plan covering substantially all of its employees. The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (SERP), covering certain executives of the Company and an employee 401(k) savings plan. Additionally, the Company sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan), primarily to provide health care and life insurance benefits to retired employees.

In September 2006, the FASB issued FASB Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", (SFAS No. 158), an amendment of SFAS No. 87, "Employers' Accounting for Pensions", SFAS No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits," SFAS No. 106, "Employers' Accounting for Postretirement Benefits other than Pensions" and SFAS No. 132(R), "Employers' Disclosures about Pensions and Other Postretirement Benefits." SFAS No. 158 requires companies to record on their balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas retail rates.

The Company's reported costs of providing retirement benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. The Company's health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. The Company's RBO are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future costs. The Company's RBO may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the Company's RBO. If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's financial statements (See Note 8.)

Income Taxes – Provisions for income taxes are calculated in each of the jurisdictions in which the Company operates for each period for which a statement of income is presented. This process involves estimating the Company's current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deductions of expenses and recognition of taxable income for tax and book accounting purposes. These temporary differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets. The Company accounts for income tax assets, liabilities and expenses in accordance with FASB Statement No. 109, "Accounting for Income Taxes" (SFAS No. 109) which is the authoritative pronouncement on accounting for and reporting income taxes.

In June 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48), an interpretation of FAS 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in enterprise's financial statements. FIN 48 prescribes a "more-likely-than-not" recognition threshold for the recognition and measurement of the benefits of a tax position taken or expected to be taken. FIN 48 is now the primary guidance in accounting for uncertainty in income taxes. Under FIN 48, tax positions accounted for under FAS 109 will be evaluated for recognition, derecognition and classification. The Company adopted FIN 48 as of January 1, 2007, as required. The adoption of FIN 48 did not have a significant impact on the Company's financial position and results of operations.

Depreciation – Depreciation expense is calculated based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company's fixed assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements.

Commitments and Contingencies – The Company's accounting policy is to record and/or disclose commitments and contingencies in accordance with SFAS No. 5. SFAS No. 5 applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. As of March 31, 2007, the Company is not aware of any material commitments or contingencies other than those disclosed in the Commitments and Contingencies footnote to the Company's consolidated financial statements below.

Table of Contents

Refer to "Recently Issued Accounting Pronouncements' in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

There are approximately 100 employees of the Company represented by labor unions. In May 2005, the Company reached agreements with its bargaining units for new five-year contracts, effective June 1, 2005. These agreements replace contracts that expired on May 31, 2005.

INTEREST RATE RISK

The majority of the Company's debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new long-term debt securities issued by the Company. In addition, the Company's short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease the Company's interest expense in future periods. For example, if the Company had an average amount of short-term debt outstanding of $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000 (pre-tax). The average interest rates on the Company's short-term borrowings for the three months ended June 30, 2007 and June 30, 2006 were 5.77% and 5.46%, respectively. The average interest rates on the Company's short-term borrowings for the six months ended June 30, 2007 and June 30, 2006 were 5.77% and 5.24%, respectively.

MARKET RISK

Although Unitil's utility operating companies are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

UNITIL CORPORATION AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three and six months ended June 30, 2007 are not necessarily indicative of results to be expected for the year ending December 31, 2007. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2006, as filed with the SEC on February 21, 2007, for a description of the Company's Basis of Presentation.

Nature of Operations – Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (UES), Fitchburg Gas and Electric Light Company (FG&E), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

Unitil's principal business is the retail distribution of electricity in the southeastern seacoast and capital city areas of New Hampshire and the retail distribution of both electricity and natural gas in the greater Fitchburg area of north central Massachusetts, through the Company's two wholly-owned subsidiaries, UES and FG&E, collectively referred to as the retail distribution utilities.

A third utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for UES. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of UES on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve UES' customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service, Unitil Realty and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-regulated subsidiary. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Recently Issued Pronouncements – In February 2007, the FASB issued FASB Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." (SFAS No. 159), effective for fiscal years beginning after November 15, 2007. SFAS No. 159 includes an amendment of FASB Statement No. 115, "Accounting for Certain Investments in Debt and Equity Securities." SFAS No. 159 permits entities to choose, at specified election dates, to measure eligible items at fair value and requires unrealized gains and losses on items for which the fair value option has been elected to be reported in earnings. The Company does not expect SFAS No. 159 to have a material impact on the Company's Consolidated Financial Position.

In June 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48), an interpretation of FAS 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in enterprise's financial statements. FIN 48 prescribes a "more-likely-than-not" recognition threshold for the recognition and measurement of the benefits of a tax position taken or expected to be taken. FIN 48 is now the primary guidance in accounting for uncertainty in income taxes. Under FIN 48, tax positions accounted for under FAS 109 will be evaluated for recognition, derecognition, and classification. The Company adopted FIN 48 as of January 1, 2007, as required. The adoption of FIN 48 did not have a significant impact on the Company's financial position and results of operations. See Note 9.

Table of Contents

In September 2006, the FASB issued FASB Statement No. 157, "Fair Value Measurements", (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company does not expect SFAS No. 157 to have an impact on the Company's Consolidated Financial Statements.

In February 2006, the FASB issued FASB Statement No. 155, "Accounting for Certain Hybrid Financial Instruments", (SFAS No. 155), which amends SFAS No.133 and FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", (SFAS No. 140), effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133. The Company's adoption of SFAS No. 155 did not have an impact on the Company's Consolidated Financial Statements.

Reclassifications – Certain amounts previously reported have been reclassified to conform to current year presentation. The Company reclassified retirement benefit obligations from Other Noncurrent Liabilities to Retirement Benefit Obligations on the balance sheet and certain expenses between Purchased Electricity, Purchased Gas and Operations and Maintenance Expenses for presentation purposes.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

During the first six months of 2007, the Company sold 19,199 shares of its Common Stock, at an average price of $26.59 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $511,000 were used to reduce short-term borrowings.

During the first six months of 2006, the Company sold 20,816 shares of its Common Stock, at an average price of $24.64 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $513,000 were used to reduce short-term borrowings.

The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 9, 2007, 9,020 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $230,461. Compensation expense associated with annual grants of shares issued under the Plan is recognized on a monthly basis as the shares vest and was $0.2 million and $0.2 million for six months ended June 30, 2007 and 2006, respectively. At June 30, 2007, there was approximately $0.8 million of total unrecognized compensation cost related to non-vested shares under the Plan which is expected to be recognized over approximately 2.6 years as the shares vest.

NOTE 4 – LONG-TERM DEBT

On May 2, 2007, Unitil Corporation issued and sold $20 million of 6.33% Senior Long-Term Notes, due May 1, 2022, to institutional investors in the form of a private placement. The proceeds from this long-term financing were used to refinance existing short-term debt and for general corporate purposes of the Company and its subsidiaries.

Total Long-term Debt	**$ 160.0**	$ 125.2	$ 140.0

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at June 30, 2007 is estimated to be in a range of up to approximately $168 million, before considering any costs, including prepayment costs, to market the Company's debt. Currently, the Company believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to the duration of the contracts, which range from three months to three years. As of June 30, 2007 there are $12.5 million of guarantees outstanding and these guarantees extend through March 13, 2009. These guarantees are not required to be recorded under the provisions of FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others."

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2006 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 21, 2007.

FG&E – Electric Division – On December 1, 2006, FG&E submitted its annual reconciliation of costs and revenues for Transition, Transmission, Standard Offer Service, and Default Service filed under its restructuring plan. This filing is pending, subject to investigation. On May 25, 2007 the MDPU approved FG&E's 2005 filing. The Company expects that its 2006 filing will be approved without material changes or adjustments.

On July 18, 2007, FG&E filed a Notice of Intent to File Rate Schedule Changes for its electric division pursuant to G.L. c. 164, s. 94 and Department Order D.P.U. 19019-A. This notice is required 30 days in advance of when FG&E expects to file for a distribution rate increase.

FG&E – Gas Division – On January 26, 2007, the MDPU approved a rate Settlement Agreement (Settlement) between FG&E and the Attorney General of Massachusetts for FG&E's Gas Division. Under the Settlement, FG&E increased its gas distribution rates by $1.2 million on February 1, 2007, and an additional $1.0 million increase will occur on November 1, 2007. The Settlement also includes agreement on several other rate matters and service quality performance measures for the company's Gas Division in the areas of safety, customer service and satisfaction.

On September 7, 2006, the MDPU issued an order allowing FG&E to recover the costs of its actual gas and electric supply-related bad debt effective December 1, 2005. Prior to this final approval, FG&E had recovered supply-related bad debt costs based on a fixed rate formula that produced a significant under-recovery of these costs. On September 27, 2006, the Attorney General filed a Petition for Appeal with the Massachusetts Supreme Judicial Court seeking to set aside the MDPU's order. FG&E intends to support the MDPU's order but the Company cannot predict the outcome of the Attorney General's appeal at this time.

FG&E – Other – On June 22, 2007, the MDPU opened an investigation to review ratemaking practices for gas and electric utility distribution companies in Massachusetts, and consider whether existing mechanisms may be changed to better align utility companies' financial interests with the need to capture end use efficiencies and foster the advancement of price responsive demand in the wholesale energy market. This matter remains pending.

UES – On March 16, 2007, UES made its annual reconciliation and rate filing with the NHPUC under its restructuring plan, effective May 1, 2007, including reconciliation of prior year costs and revenues, power supply and power supply-related stranded costs. On April 30, 2007 the NHPUC approved UES' filing subject to adjustment and reconciliation depending on the Staff audit and Staff's on-going review with regard to the method for calculating unbilled revenues. No exceptions were noted in the final audit report, which was issued on July 11, 2007.

On October 6, 2006, UES received approval from the NHPUC of a Settlement Agreement (Agreement) resolving its electric distribution base rate case filed in November, 2005. The terms of the Agreement provide for an increase in base distribution rates of $2.3 million effective as of January 1, 2006. Additionally, the Agreement authorizes two step increases in base distribution rates, related to utility plant additions in 2006, of approximately $0.4 million and $0.1 million annually, effective as of November 1, 2006 and May 1, 2007, respectively. Also, the Agreement provides for the recovery of approximately $0.3 million annually of supply-related operating and administrative costs through default energy service rates and a reduction of approximately $0.6 million in annual depreciation expense, primarily reflecting an increase in utility plant and equipment average service lives. The stipulated rate of return under the settlement is 8.70%, including a return on equity of 9.67%. The Agreement also authorized a temporary rate surcharge for recovery of certain rate case expenses and recoupment of the authorized distribution rate increase from January through October 2006.

On June 22, 2007, the NHPUC issued an order in its investigation into implementation of the federal Energy Policy Act of 2005 regarding the adoption of standards for time-based metering and interconnection. This order sets the framework for implementation of time based rates for utility provided default service, though a number of technical issues remain to be resolved. UES is required to file draft tariffs to provide for fixed, time-based pricing of default service for all customer classes no later than November 30, 2007.

On May 14, 2007, the NHPUC issued an order opening an investigation into the merits of instituting, for electric utilities, appropriate rate mechanisms, such as revenue decoupling, which would have the effect of removing obstacles to, and encouraging investment in, energy efficiency. The matter remains pending.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2006 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 21, 2007.

The Company's past and present operations include activities that are generally subject to extensive federal and state environmental laws and regulations. The Company believes it is in compliance with all applicable environmental and safety laws and regulations, and the Company believes that as of June 30, 2007, there are no material losses reasonably possible in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Included on the Company's Consolidated Balance Sheet at June 30, 2007 in Environmental Obligations is $12.0 million related to estimated future clean up costs for permanent remediation of a former manufactured gas plant site at Sawyer Passway, located in Fitchburg, Massachusetss. A corresponding regulatory asset was recorded to reflect the future rate recovery of these costs. As noted above, please refer to Note 5 to the financial statements in Item 8 of Part II of the Company's Form 10-K for December 31, 2006 for additional information.

NOTE 8: RETIREMENT BENEFIT OBLIGATIONS

The Company provides certain pension and postretirement benefit plans for its retirees and current employees including defined benefit pension plans, postretirement health and welfare plans, a supplemental executive retirement plan and an employee 401(k) savings plan.

In September 2006, the FASB issued SFAS No. 158 which requires companies to record on their balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas retail rates.

Pension Plan – The Company's defined benefit pension plan covers substantially all of its employees. Under the Pension Plan, retirement benefits are based upon an employee's level of compensation and length of service.

FG&E recovers the costs associated with its pension and PBOP costs on an annually reconciling basis through a rate adjustment mechanism (the Pension / PBOP Adjustment Factor (PAF). FG&E records a regulatory asset to recognize the deferral for the difference between the level of pension and PBOP expenses that are currently included in its base rates and the amounts that are required to be recorded in accordance with SFAS No. 87 and SFAS No. 106 and amortizes increases and/or decreases in that deferral balance into the PAF for recovery over a three year period.

UES recovers its pension and PBOP expenses in base rates and amortizes deferred pension costs as these costs are recovered over a six year period in base rates.

The following tables show the components of net periodic pension cost, (NPPC), as well as key actuarial assumptions used in determining the various pension plan values:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	**2006**	**2007**	**2006**
Components of NPPC (000's)				
Service Cost	**$ 492**	$ 450	**$ 984**	$ 900
Interest Cost	**834**	790	**1,669**	1,577

Amounts Capitalized and Deferred	**(219)**	(68)	**(436)**	(644)
NPPC Recognized	**$ 420**	$ 529	**$ 845**	$ 661

Key Assumptions (Weighted Average)	2007	2006
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	5.50%
Rate of Compensation Increase	**3.50%**	3.50%
Used to Determine NPPC:		
Discount Rate	**5.50%**	5.50%
Expected Long-Term Rate of Return on Plan Assets	**8.50%**	8.50%
Rate of Compensation Increase	**3.50%**	3.50%

Employer Contributions – On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA are new minimum funding rules which will go into effect for plan years beginning in 2008. The funding target will be 100% of a plan's liability with any shortfall amortized over seven years, with lower (92%—100%) funding targets available to well-funded plans during the transition period. As of June 30, 2007, the Company has made contributions of $1.1 million to the Plan in 2007. The Company presently anticipates contributing an additional $1.7 million to fund the Plan in 2007, for an estimated total of $2.8 million for the year. The Company contributed $2.5 million in 2006.

PBOP Plan – The Company sponsors the PBOP Plan, primarily to provide health care and life insurance benefits to employees and retirees. The Company has established Voluntary Employee Benefit Trusts (VEBT), into which it funds contributions to the PBOP Plan.

The following tables show the components of net periodic postretirement benefit cost (NPPBC), as well as key actuarial assumptions used in determining the various PBOP Plan values:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Components of NPPBC (000's)				
Service Cost	**$ 358**	$ 350	**$ 715**	$ 641
Interest Cost	**514**	563	**1,028**	1,014
Expected Return on Plan Assets	**(61)**	(69)	**(122)**	(97)
Amortization of Prior Service Cost	**340**	340	**679**	680

Subtotal NPPBC	**1,173**	1,269	**2,346**	2,329
Amounts Capitalized and Deferred	**(504)**	(631)	**(1,017)**	(1,113)
NPPBC Recognized	**$ 669**	$ 638	**$ 1,329**	$ 1,216

Table of Contents

Weighted-Average Assumptions	2007	2006
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	5.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	8.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2016
Used to Determine NPPBC:		
Discount Rate	**5.50%**	5.50%
Expected Long-Term Rate of Return on Plan Assets	**8.50%/5.50% (1)**	8.50%/5.50% (1)
Health Care Cost Trend Rate Assumed for Next Year	**9.00%**	8.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2016

(1) Funding of the PBOP Plan is made into two VEBT's; one is a union VEBT and the other is a non-union VEBT. The expected long-term rate of return on plan assets for the union VEBT is 8.50%. The non-union VEBT is subject to income taxes and therefore the expected long-term rate of return on plan assets is 5.50%, reflecting the effect of taxes.

Employer Contributions – As of June 30, 2007, the Company had made $1.1 million of contributions to the PBOP Plan in 2007. The Company presently anticipates contributing an additional $1.4 million to fund the Plan in 2007 for an estimated funding total of $2.5 million in the year. The Company contributed $2.2 million in 2006.

SERP – The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (the SERP), with participation limited to executives selected by the Board of Directors.

The components of net periodic SERP cost are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Components of NPSC (000's)				
Service Cost	**$ 41**	$ 36	**$ 82**	$ 72
Interest Cost	**29**	26	**59**	52
Amortization of Transition Obligation	**—**	4	**—**	9
Amortization of Prior Service Cost	**—**	—	**(1)**	(1)
Amortization of Net Loss	**11**	10	**22**	20
Net Periodic SERP Cost	**$ 81**	$ 76	**$ 162**	$ 152

Employer Contributions – As of June 30, 2007, the Company has made payments of $36,000 to beneficiaries. The Company presently anticipates making additional benefit payments of $36,000 in 2007 for a total of $72,000.

NOTE 9: INCOME TAXES

The Company evaluated its tax positions at December 31, 2006 and for the current interim reporting period ended June 30, 2007 in accordance with FIN 48, and has concluded that no adjustment for recognition, derecognition, settlement and foreseeable future events to any unrecognized tax liabilities or assets as defined by FIN 48 is required. The Company does not have any unrecognized tax positions for which it is reasonably possible that the total amounts recognized will significantly change within the next 12 months. The Company remains subject to examination by Federal, Massachusetts and New Hampshire tax authorities for the tax periods ended December 31, 2003; December 31, 2004; and December 31, 2005. Income tax filings for the year ended December 31, 2006 have been extended and are due September 15, 2007. The Company classifies penalty and interest expense related to income tax liabilities as an income tax expense. There are no interest and penalties recognized in the statement of earnings or accrued on the balance sheet.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2006 as filed with the Securities and Exchange Commission on February 21, 2007.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) There were no sales of unregistered equity securities by the Company for the fiscal period ended June 30, 2007.

(b) Not applicable.

(c) Issuer repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(1)
4/1/07 – 4/30/07	—	—	—	n/a
5/1/07 – 5/31/07	114	$ 27.75	114	n/a
6/1/07 – 6/30/07	—	—	—	n/a
Total	114	$ 27.75	114	n/a

(1) Represents Common Stock purchased on the open market related to Board of Director Retainer Fees and Employee Length of Service Awards. Shares are not purchased as part of a specific plan or program and therefore there is no pool or maximum number of shares related to these purchases.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f))for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Unitil Reports Second Quarter Earnings

Hampton, NH – July 25, 2007: Unitil Corporation (AMEX: UTL) (www.unitil.com) today announced net income of $1.7 million for the second quarter of 2007, an increase of $0.3 million over the second quarter of 2006. Earnings per common share (EPS) were $0.30 for the three months ended June 30, 2007, an improvement of $0.05 per share or 20% over the second quarter of 2006. Unitil's improved second quarter performance was driven by higher gas sales and lower operation and maintenance expenses, which were partially offset by higher interest expense. For the six months ended June 30, EPS were $0.76 for 2007 compared to $0.61 for 2006, an improvement of $0.15, or 25%.

Unitil's non-regulated business, Usource, also continued to realize higher revenues compared to last year, which further contributed to the Company's overall improved earnings.

"Unitil continued strong year over year earnings growth in the second quarter," said Bob Schoenberger, Unitil Chairman and CEO. "This growth in earnings was primarily driven by increased distribution revenues, lower operating expenses and robust growth in our Usource subsidiary. We also continue to work with regulatory officials and local utilities to more appropriately align distribution company financial interests with the current public policy objectives of increased investment in energy efficiency and renewable energy technologies."

The following table presents the significant items (discussed below) contributing to the improvement in earnings per share in the three and six month periods ended June 30, 2007:

2007 Earnings Per Share vs. 2006

	Period Ended June 30,	
	QTD	**YTD**
2006	**$ 0.25**	**$ 0.61**
Electric Sales Margin	(0.02)	0.04
Gas Sales Margin	0.06	0.14
Usource Sales Margin	0.03	0.06
Operation & Maintenance Expense	0.04	0.02
Depreciation, Amortization & Other	(0.02)	(0.05)
Interest Expense, Net	(0.04)	(0.06)
2007	**$ 0.30**	**$ 0.76**

Total electric kWh sales in the three and six month periods ended June 30, 2007 increased 0.5% and 0.1%, respectively, compared to the same periods in 2006. Gas sales in the three and six month periods ended June 30, 2007 increased 12.1% and 9.0%, respectively, compared to the same periods in 2006. Selected Financial Data for 2007 is presented in the following table:

(Unaudited)

Unitil Corporation – Condensed Financial Data

(Millions, except Per Share data)

	Three Months Ended June 30,			Six Months Ended June 30,		
	2007	2006	Change	2007	2006	Change
Electric kWh Sales:						
Residential	152.0	149.7	1.5%	335.9	332.9	0.9%
Commercial/Industrial	262.5	262.8	(0.1%)	528.2	530.6	(0.5%)
Total	**414.5**	**412.5**	**0.5%**	**864.1**	**863.5**	**0.1%**
Gas Therm Sales:						
Residential	2.3	2.0	15.0%	7.2	6.9	4.3%
Commercial/Industrial	4.2	3.8	10.5%	11.0	9.8	12.2%
Total	**6.5**	**5.8**	**12.1%**	**18.2**	**16.7**	**9.0%**
Electric Revenues	$ 51.7	$ 53.4	$ (1.7)	$ 114.4	$ 109.8	$ 4.6
Purchased Electricity	37.3	38.8	(1.5)	86.5	82.4	4.1
Electric Sales Margin	**14.4**	**14.6**	**(0.2)**	**27.9**	**27.4**	**0.5**
Gas Revenues	6.4	6.3	0.1	20.6	20.0	0.6
Purchased Gas	4.0	4.4	(0.4)	13.8	14.5	(0.7)
Gas Sales Margin	**2.4**	**1.9**	**0.5**	**6.8**	**5.5**	**1.3**
Usource Sales Margin	**0.9**	**0.6**	**0.3**	**1.8**	**1.2**	**0.6**
Total Sales Margin:	**17.7**	**17.1**	**0.6**	**36.5**	**34.1**	**2.4**
Operation & Maintenance Expenses	6.8	7.2	(0.4)	13.3	13.5	(0.2)
Depreciation, Amortization & Other	6.8	6.5	0.3	14.4	13.3	1.1
Interest Expense, Net	2.4	2.0	0.4	4.5	3.9	0.6
Net Income:	**$ 1.7**	**$ 1.4**	**$ 0.3**	**$ 4.3**	**$ 3.4**	**$ 0.9**
Earnings Per Share	**$ 0.30**	**$ 0.25**	**$ 0.05**	**$ 0.76**	**$ 0.61**	**$ 0.15**

Electric sales margin decreased $0.2 million and increased $0.5 million in the three and six months ended June 30, 2007, respectively, compared to the same periods in 2006. The lower electric sales margin in the second quarter of 2007 is due to the timing of recognition, in the second quarter of 2006, of revenues retroactive to January 1, 2006 associated with higher new electric rates established in the Company's electric rate case settlement in New Hampshire. The overall electric sales margin improvement through the first six months of 2007 compared to 2006 reflects additional step rate increases approved and implemented in the last half of 2006 and the first half of 2007.

Gas sales margin increased $0.5 million and $1.3 million in the three and six months ended June 30, 2007, respectively, compared to the same periods in 2006 reflecting higher gas sales due to more normal winter weather than last year and higher gas revenue from new higher rates approved and implemented in early 2007.

Usource, Unitil's non-regulated energy brokering business, recorded increased sales of $0.3 million and $0.6 million in the three and six month periods ended June 30, 2007 compared to the same periods of 2006, representing increases of 50% over the comparable 2006 periods.

Total Operation and Maintenance (O&M) expenses decreased $0.4 million and $0.2 in the three and six month periods ended June 30, 2007 compared to the same periods in 2006. The decrease in the six month period reflects lower outside services expenses of $0.3 million as well as cost efficiencies achieved in utility operating and all other expenses of $0.3 million, net, partially offset by higher salaries and compensation expenses of $0.3 million and higher retiree and employee benefit costs of $0.1 million.

Depreciation, Amortization & Other expenses increased $0.3 million and $1.1 million in the three and six month periods ended June 30, 2007 compared to the same periods in 2006 primarily reflecting higher depreciation on utility plant additions and higher income taxes on higher levels of pre-tax earnings in 2007 compared to 2006.

Interest Expense, Net increased $0.4 million and $0.6 million in the three and six month periods ended June 30, 2007 compared to the same periods in 2006 reflecting an increase in the average cost of debt and higher long-term debt outstanding.

Also in the second quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

About Unitil

Unitil is a public utility holding company with subsidiaries providing electric service in New Hampshire and electric and gas service in Massachusetts and energy services throughout the Northeast. Its subsidiaries include Unitil Energy Systems, Inc., Fitchburg Gas and Electric Light Company, Unitil Power Corp., Unitil Realty Corp., Unitil Service Corp. and its non-regulated business segment Unitil Resources, Inc. Usource L.L.C. is a subsidiary of Unitil Resources, Inc.

This press release contains forward-looking statements, which are subject to the inherent uncertainties in predicting future results and conditions. All statements, other than statements of historical fact, are forward-looking statements. Certain factors that could cause the actual results to differ materially from those projected in these forward-looking statements include, but are not limited to the following: variations in weather; changes in the regulatory environment; customers' preferences on energy sources; general economic conditions; increased competition; fluctuations in supply, demand, transmission capacity and prices for energy commodities; and other uncertainties, all of which are difficult to predict, and many of which are beyond the control of Unitil Corporation.

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil's principal business is the retail distribution of electricity and natural gas through two utility subsidiaries: Unitil Energy System's Inc. (UES) and Fitchburg Gas and Electric Light Company (FG&E). UES is an electric utility with an operating franchise in the southeastern seacoast and capital city areas of New Hampshire. FG&E is a combination gas and electric utility with an operating franchise in the greater Fitchburg area of north central Massachusetts.

Unitil's two retail distribution utilities serve approximately 99,400 electric customers and 15,000 natural gas customers in their franchise areas. The retail distribution companies are pure distribution utilities with a combined investment in net utility plant of $246.6 million at September 30, 2007. Substantially all of Unitil's revenue and earnings are derived from regulated utility operations.

Unitil also conducts non-regulated operations principally through its Usource™ (Usource) subsidiary. Usource provides energy brokering and consulting services to large commercial and industrial customers in the northeastern United States. Unitil's other subsidiaries include Unitil Service and Unitil Realty, which provide centralized facilities, management and administrative services to Unitil's affiliated companies. Unitil's consolidated net income includes the earnings of the holding company and these subsidiaries.

RATES AND REGULATION

Unitil's utility operations related to wholesale and interstate business activities are regulated by the Federal Energy Regulatory Commission (FERC). The retail distribution utilities, UES and FG&E, are subject to regulation by the New Hampshire Public Utilities Commission (NHPUC) and the Massachusetts Department of Public Utilities (MDPU), formerly the Massachusetts Department of Telecommunications and Energy, respectively, in regards to their rates, issuance of securities and other accounting and operational matters. Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in their franchise areas, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on a historical test year, in addition to earning a return on their capital investment in utility assets.

As a result of the implementation of retail choice in New Hampshire and Massachusetts, Unitil's customers are free to contract for their supply of electricity with third-party suppliers. The retail distribution utilities provide for the delivery of that supply of electricity over their distribution systems at regulated rates. Both UES and FG&E continue to provide basic or default electric supply service to those customers who do not obtain their supply from third-party suppliers, with the costs associated with electricity supplied by the Company being recovered on a pass-through basis under periodically-adjusted rates.

As a result of the introduction of retail choice for all natural gas customers in Massachusetts, FG&E's customers are free to contract for their supply of natural gas with third-party suppliers. FG&E continues to provide natural gas supply services to those customers who do not obtain their supply from third-party suppliers. The costs associated with natural gas supplied by FG&E are recovered on a pass-through basis under periodically adjusted rates.

CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without

limitation, statements regarding the financial position, business strategy and other plans and objectives for the Company's future operations, are forward-looking statements.

These statements include declarations regarding the Company's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include the following:

- Variations in weather;
- Changes in the regulatory environment;
- Customers' preferences on energy sources;
- Interest rate fluctuation and credit market concerns;
- General economic conditions;
- Fluctuations in supply, demand, transmission capacity and prices for energy commodities;
- Increased competition; and
- Customers' future performance under multi-year energy brokering contracts.

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements. There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2006 as filed with the Securities and Exchange Commission on February 21, 2007.

RESULTS OF OPERATIONS

The following section of MD&A compares the results of operations for each of the two fiscal periods ended September 30, 2007 and September 30, 2006 and should be read in conjunction with the accompanying Consolidated Financial Statements and the accompanying Notes to Consolidated Financial Statements included in Item 1 of this report.

Earnings Overview

The Company's Earnings Applicable to Common Shareholders (Net Income) was $1.6 million for the third quarter of 2007. Earnings per common share (EPS) were $0.28 for the three months ended September 30, 2007 compared with $0.32 in the third quarter of 2006. Earnings for the third quarter of 2007 reflect higher depreciation and interest expenses, partially offset by higher electric and gas utility sales margins and improved profits from Usource, Unitil's non-regulated energy-brokering business. For the nine months ended September 30, EPS were $1.04 for 2007 compared to $0.93 for 2006, an increase of $0.11 per share, or 12%.

The following table presents the significant items (discussed below) contributing to the change in earnings per share in the three and nine month periods ended September 30, 2007:

2007 Earnings Per Share vs. 2006

		Period Ended September 30,	
		QTD	**YTD**
	2006	**$ 0.32**	**$ 0.93**
Electric Sales Margin		0.03	0.07
Gas Sales Margin		0.02	0.16
Usource Sales Margin		0.04	0.10
Operation & Maintenance Expense		---	0.02
Depreciation, Amortization & Other		(0.09)	(0.14)
Interest Expense, Net		(0.04)	(0.10)
	2007	**$ 0.28**	**$ 1.04**

Unitil's total electric kilowatt (kWh) sales decreased 3.9% and 1.4% in the three and nine month periods ended September 30, 2007, respectively compared to the same periods in 2006. The lower kWh sales in 2007 compared to 2006 were primarily driven by cooler summer weather this year and energy conservation by our residential and commercial and industrial (C&I) customers. Electric kWh sales to residential customers in the three and nine month periods ended September 30, 2007 decreased 4.7% and 1.1%, respectively, compared to the same periods in 2006 while sales to C&I customers decreased 3.3% and 1.5% in those periods compared to the same periods in 2006. Natural gas sales in the three and nine month periods ended September 30, 2007 increased 6.1% and 8.0%, respectively, compared to the same periods in 2006. The increase in gas sales in 2007 reflects a colder winter heating season this year and higher natural gas sales to C&I customers.

Electric sales margin increased $0.3 million and $0.7 million in the three and nine months ended September 30, 2007, respectively, compared to the same periods in 2006. The improvement in electric sales margin primarily reflects additional step rate increases approved and implemented in the last half of 2006 and the first half of 2007 in New Hampshire, partially offset by lower electric kWh sales volumes.

Natural gas sales margin increased $0.2 million and $1.6 million in the three and nine months ended September 30, 2007, respectively, compared to the same periods in 2006 primarily reflecting higher sales to commercial and industrial customers and new natural gas distribution rates approved and implemented in early 2007.

Usource increased revenues by $0.4 million and $1.0 million in the three and nine month periods ended September 30, 2007, increases of 67% and 56% respectively, over the comparable 2006 periods.

Total O&M expenses were flat for the three month period ended September 30, 2007 compared to the same period in 2006. For the nine month period ended September 30, 2007, total O&M expenses decreased $0.2 million compared to the same period in 2006. This decrease reflects lower Distribution Utility labor and operating expenses of $0.5 million in 2007 as the Company is realizing savings as a result of its recent significant investments in Automated Metering Infrastructure (AMI) improvements; as well as lower outside services expenses of $0.2 million, and lower bad debt expenses of $0.1 million and all other operating expenses of $0.3 million. These lower O&M costs were partially offset by higher retiree and employee benefit costs of $0.5 million and higher salaries and compensation expenses of $0.4 million in 2007.

Depreciation, Amortization, Taxes & Other expenses increased $0.7 million and $1.8 million in the three and nine month periods ended September 30, 2007 compared to the same periods in 2006 reflecting higher depreciation on utility plant and income taxes on higher levels of pre-tax earnings in 2007 compared to 2006. The higher depreciation on utility plant includes depreciation expense on normal plant additions in 2007 and the recognition, in the third quarter of 2006, of a non-recurring adjustment for lower depreciation rates on utility plant established in the Company's electric rate case settlement in New Hampshire.

Interest Expense, Net increased $0.4 million and $1.0 million in the three and nine month periods ended September 30, 2007 compared to the same periods in 2006 reflecting higher debt outstanding and higher interest rates.

Also in the third quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

A more detailed discussion of the Company's results of operations for the three and nine months ended September 30, 2007 and a period-to-period comparison of changes in financial position are presented below.

Balance Sheet

Regulatory Assets increased $19.3 million as of September 30, 2007 compared to September 30, 2006, reflecting the recording of Regulatory Assets for Retirement Benefit Obligations in accordance with newly issued Federal Accounting Standards Board (FASB) Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", (SFAS No. 158) (See Note 8) and the recording of a Regulatory Asset for future environmental remediation obligations associated with the Company's former manufactured gas plant site at Sawyer Passway, located in Fitchburg, Massachusetts (See Note 7), partially offset by a decrease related to current year cost recoveries.

Long-Term Debt increased $19.7 million as of September 30, 2007 compared to September 30, 2006, reflecting the issuance and sale on May 2, 2007 by Unitil Corporation of $20 million of 6.33% Senior Long-Term Notes, due May 1, 2022, to institutional investors, in the form of a private placement.

Deferred Income Taxes decreased $19.1 million as of September 30, 2007 compared to September 30, 2006, primarily reflecting the recording of deferred tax assets related to Retirement Benefit Obligations, discussed below.

Retirement Benefit Obligations increased $37.0 million as of September 30, 2007 compared to September 30, 2006, primarily reflecting the recording of pension, PBOP and SERP obligations in accordance with SFAS No. 158, discussed above.

Environmental Obligations increased $12.0 million as of September 30, 2007 compared to September 30, 2006, reflecting the recording of a liability for future environmental remediation obligations associated with the Company's former manufactured gas plant site at Sawyer Passway, discussed above.

Electric Sales, Revenues and Margin

Kilowatt-hour Sales – Unitil's total electric kWh sales decreased 3.9% and 1.4% in the three and nine month periods ended September 30, 2007, respectively compared to the same periods in 2006. The lower kWh sales in 2007 compared to 2006 were primarily driven by cooler summer weather this year and energy conservation by our residential and commercial and industrial (C&I) customers. Electric kWh sales to residential customers in the three and nine month periods ended September 30, 2007 decreased 4.7% and 1.1%, respectively, compared to the same periods in 2006 while sales to C&I customers decreased 3.3% and 1.5% in those periods compared to the same periods in 2006.

The following table details total kWh sales for the three and nine months ended September 30, 2007 and 2006 by major customer class:

kWh Sales (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2007	2006	Change	% Change	**2007**	2006	Change	% Change
Residential	**179.7**	188.6	(8.9)	(4.7%)	**515.6**	521.5	(5.9)	(1.1%)
Commercial / Industrial	**285.1**	294.9	(9.8)	(3.3%)	**813.2**	825.5	(12.3)	(1.5%)
Total	**464.8**	483.5	(18.7)	(3.9%)	**1,328.8**	1,347.0	(18.2)	(1.4%)

Electric Operating Revenues and Sales Margin - The following table details total Electric Operating Revenues and Sales Margin for the three and nine month periods ended September 30, 2007 and 2006:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2007	2006	$ Change	% Change[1]	**2007**	2006	$ Change	% Change[1]
Electric Operating Revenue:								
Residential	**$ 29.5**	$ 29.3	$ 0.2	0.3%	**$ 85.7**	$ 76.9	$ 8.8	5.1%
Commercial / Industrial	**27.4**	31.9	(4.5)	(7.4%)	**85.6**	94.1	(8.5)	(5.0%)
Total Electric Operating Revenue	**$ 56.9**	$ 61.2	$ (4.3)	(7.1%)	**$ 171.3**	$ 171.0	$ 0.3	0.1%
Cost of Electric Sales:								
Purchased Electricity	**$ 41.9**	$ 46.4	$ (4.5)	(7.4%)	**$ 126.4**	$ 126.9	$ (0.5)	(0.3%)
Conservation & Load Management	**0.8**	0.9	(0.1)	(0.2%)	**2.8**	2.7	0.1	0.1%
Electric Sales Margin	**$ 14.2**	$ 13.9	$ 0.3	0.5%	**$ 42.1**	$ 41.4	$ 0.7	0.3%

(1) Represents change as a percent of Total Electric Operating Revenue.

Total Electric Operating Revenues, decreased by $4.3 million, or 7.1%, and increased by $0.3 million, or 0.1%, in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. Total Electric Operating Revenues include the recovery of costs of electric sales, which are recorded as Purchased Electricity and Conservation & Load Management (C&LM) in Operating Expenses. The net decrease in Total Electric Operating Revenues in the three month period reflects lower Purchased Electricity costs of $4.5 million and lower C&LM revenues of $0.1 million, partially offset by higher sales margin of $0.3 million. The net increase in Total Electric Operating Revenues in the nine month period reflects lower Purchased Electricity costs of $0.5 million offset by higher C&LM revenues of $0.1 million and higher sales margin of $0.7 million.

Purchased Electricity and C&LM revenues decreased a net $4.6 million, or 7.6%, and $0.4 million, or 0.2%, of Total Electric Operating Revenues in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. These decreases primarily reflect an increase in the amount of electricity purchased by customers directly from third-party suppliers partially offset by higher electric commodity prices. Purchased Electricity revenues include the recovery of the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin increased $0.3 million and $0.7 million in the three and nine months ended September 30, 2007, respectively, compared to the same periods in 2006. The improvement in electric sales margin primarily reflects additional step rate increases approved and implemented in the last half of 2006 and the first half of 2007 in New Hampshire, partially offset by lower electric kWh sales volumes.

Gas Sales, Revenues and Margin

Therm Sales – Unitil's total therm sales of natural gas increased 6.1% and 8.0% in the three and nine months ended September 30, 2007, respectively, compared to the same periods in 2006. The increase in gas sales in 2007 reflects a colder winter heating season this year and higher natural gas sales to C&I customers. Gas sales to residential customers in the three month period ended September 30, 2007 were essentially unchanged compared to the same period in 2006 and increased 2.6% in the nine month period ended September 30, 2007, compared to the same period in 2006 while sales to C&I customers increased 7.7% and 11.3% in those periods compared to the same periods in 2006.

The following table details total firm therm sales for the three and nine months ended September 30, 2007 and 2006, by major customer class:

Therm Sales (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2007	2006	Change	% Change	**2007**	2006	Change	% Change
Residential	**0.7**	0.7	---	---	**7.9**	7.7	0.2	2.6%
Commercial / Industrial	**2.8**	2.6	0.2	7.7%	**13.8**	12.4	1.4	11.3%
Total	**3.5**	3.3	0.2	6.1%	**21.7**	20.1	1.6	8.0%

Gas Operating Revenues and Sales Margin – The following table details total Gas Operating Revenues and Sales Margin for the three and nine months ended September 30, 2007 and 2006:

Gas Operating Revenues and Sales Margin (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2007	2006	$ Change	% Change(1)	**2007**	2006	$ Change	% Change(1)
Gas Operating Revenue:								
Residential	**$ 2.3**	$ 2.0	$ 0.3	6.8%	**$ 14.7**	$ 13.0	$ 1.7	7.0%
Commercial / Industrial	**1.6**	2.4	(0.8)	(18.2%)	**9.8**	11.4	(1.6)	(6.6%)
Total Gas Operating Revenue	**$ 3.9**	$ 4.4	$ (0.5)	(11.4%)	**$ 24.5**	$ 24.4	$ 0.1	0.4%
Cost of Gas Sales:								
Purchased Gas	**$ 2.1**	$ 2.8	$ (0.7)	(15.9%)	**$ 15.8**	$ 17.2	$ (1.4)	(5.7%)
Conservation & Load Management	**---**	---	---	---	**0.1**	0.2	(0.1)	(0.4%)
Gas Sales Margin	**$ 1.8**	$ 1.6	$ 0.2	4.5%	**$ 8.6**	$ 7.0	$ 1.6	6.5%

(1) Represents change as a percent of Total Gas Operating Revenue.

Total Gas Operating Revenues decreased $0.5 million, or 11.4%, and increased $0.1 million, or 0.4%, in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. Total Gas Operating Revenues include the recovery of the cost of sales, which are recorded as Purchased Gas and C&LM in Operating Expenses. The net decrease in Total Gas Operating Revenues in the three month period reflects lower Purchased Gas costs of $0.7 million partially offset by higher sales margin of $0.2 million. The net increase in Total Gas Operating Revenues in the nine month period reflects higher sales margin of $1.6 million, partially offset by lower Purchased Gas costs of $1.4 million and lower C&LM revenues of $0.1 million.

Purchased Gas and C&LM revenues decreased a net $0.7 million, or 15.9%, and $1.5 million, or 6.1%, of Total Gas Operating Revenues in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006, reflecting lower natural gas commodity prices and an increase in the amount of natural gas purchased by customers directly from third-party suppliers. Purchased Gas revenues include the recovery of the cost of gas supply as well as the other energy supply related costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Natural gas sales margin increased $0.2 million and $1.6 million in the three and nine months ended September 30, 2007, respectively, compared to the same periods in 2006 primarily reflecting higher sales to commercial and industrial customers and new natural gas distribution rates approved and implemented in early 2007.

Operating Revenue - Other

The following table details total Other Revenue for the three and nine months ended September 30, 2007 and 2006:

Other Revenue (000's)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2007	2006	$ Change	% Change	**2007**	2006	$ Change	% Change
Other	**$ 1.0**	$ 0.6	$ 0.4	66.7%	**$ 2.8**	$ 1.8	$ 1.0	55.6%
Total Other Revenue	**$ 1.0**	$ 0.6	$ 0.4	66.7%	**$ 2.8**	$ 1.8	$ 1.0	55.6%

Total Other Revenue increased $0.4 million, or 66.7%, and $1.0 million, or 55.6% in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. These increases were the result of growth in revenues from the Company's non-regulated energy brokering business, Usource.

Operating Expenses

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity decreased $4.5 million, or 9.7% and $0.5 million, or 0.4%, in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. These decreases reflect lower electric kWh sales and an increase in the amount of electricity purchased by customers directly from third-party suppliers, partially offset by higher electric commodity prices. The Company recovers the costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas decreased $0.7 million, or 25.0%, and $1.4 million, or 8.1%, in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006. These decreases in Purchased Gas are attributable to lower natural gas commodity prices and an increase in the amount of natural gas purchased by customers directly from third-party suppliers. The

Company recovers the costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Operation and Maintenance (O&M) – O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total O&M expenses were flat for the three month period ended September 30, 2007 compared to the same period in 2006. For the nine month period ended September 30, 2007, total O&M expenses decreased $0.2 million compared to the same period in 2006. This decrease reflects lower Distribution Utility labor and operating expenses of $0.5 million in 2007 as the Company is realizing savings as a result of its recent significant investments in Automated Metering Infrastructure (AMI) improvements; as well as, lower outside services expenses of $0.2 million, lower bad debt expenses of $0.1 million and all other operating expenses of $0.3 million, net, partially offset by higher retiree and employee benefit costs of $0.5 million (driven by higher pension and postretirement benefit costs other than pension (PBOP) costs of $1.1 million, partially offset by lower medical and other benefit costs of $0.6 million) and higher salaries and compensation expenses of $0.4 million. The Company recovers its pension and PBOP costs through base distribution rates in New Hampshire. In Massachusetts, the Company recovers its pension and PBOP costs on a dollar for dollar basis through a recovery mechanism and therefore the revenue associated with the recovery of these costs is included in electric and gas sales margin.

Conservation & Load Management – C&LM expenses are associated with the development, management, and delivery of the Company's Energy Efficiency programs. Energy Efficiency programs are designed, in conformity with state regulatory requirements, to help consumers use natural gas and electricity more efficiently and thereby decrease their energy costs. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 90% of these costs are related to electric operations and 10% to gas operations.

Total C&LM expenses decreased $0.1 million, or 11.1% in the three month period ended September 30, 2007 compared to the same period in 2006. This change reflects the timing of spending on the implementation of Energy Efficiency programs. Total C&LM expenses for the nine month period ended September 30, 2007 were unchanged compared to the same period in 2006. These costs are collected from customers on a pass through basis and therefore, fluctuations in program costs have no impact on Net Income.

Depreciation, Amortization and Taxes

Depreciation and Amortization - Depreciation and Amortization expense increased $1.1 million, or 32.4% and $1.4 million, or 11.7% in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006 reflecting higher depreciation on utility plant. The higher depreciation on utility plant includes depreciation expense on normal plant additions in 2007 and the recognition, in the third quarter of 2006, of a non-recurring adjustment for lower depreciation rates on utility plant established in the Company's electric rate case settlement in New Hampshire.

Local Property and Other Taxes - Local Property and Other Taxes were flat for the three and nine month periods ended September 30, 2007 compared to the same periods in 2006.

Federal and State Income Taxes - Federal and State Income Taxes were lower by $0.3 million in the three month period ended September 30, 2007 compared to the same period in 2006 reflecting lower pre-tax earnings. Federal and State Income Taxes were higher by $0.3 million in the nine month period ended September 30, 2007 compared to the same period in 2006 reflecting higher pre-tax earnings.

Other Non-operating Expenses (Income)

Other Non-operating Expenses (Income) decreased by less than $0.1 million in the three period ended September 30, 2007 compared to the same period in 2006. For the nine month period ended September 30, 2007, Other Non-operating Expenses (Income) increased by $0.1 million compared to the same period in 2006. This change reflects the recognition in 2006 of a gain on the sale of land and timber harvest revenue.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. Certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

The Company operates a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the Company's rate tariff, interest is accrued on these balances and will produce either interest income or interest expense. Interest income is recorded on an under-collection of costs, which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (Millions)	**Three Months Ended September 30,**			**Nine Months Ended September 30,**		
	2007	2006	Change	**2007**	2006	Change
Interest Expense						
Long-term Debt	$ 2.9	$ 2.3	$ 0.6	$ 8.2	$ 7.0	$ 1.2
Short-term Debt	0.1	0.4	(0.3)	0.8	1.1	(0.3)
Regulatory Liabilities	0.1	0.1	---	0.4	0.2	0.2
Subtotal Interest Expense	3.1	2.8	0.3	9.4	8.3	1.1
Interest Income						
Regulatory Assets	(0.7)	(0.8)	0.1	(2.2)	(2.3)	0.1
AFUDC and Other	(0.1)	(0.1)	---	(0.4)	(0.2)	(0.2)
Subtotal Interest Income	(0.8)	(0.9)	0.1	(2.6)	(2.5)	(0.1)
Total Interest Expense, Net	$ 2.3	$ 1.9	$ 0.4	$ 6.8	$ 5.8	$ 1.0

Interest Expense, Net increased by $0.4 million and $1.0 million in the three and nine month periods ended September 30, 2007, respectively, compared to the same periods in 2006 reflecting an increase in the average cost of debt and higher debt outstanding. Interest expense on long-term borrowings increased in both the three and nine month periods in 2007 compared to 2006 due to the issuance of new fixed rate long-term debt. On May 2, 2007, Unitil Corporation issued and sold $20 million of 6.33% Senior Long-Term Notes, due May 1, 2022, to institutional investors in the form of a private placement. The proceeds from this fixed rate long-term financing were used to refinance existing variable rate short-term debt and for general corporate purposes of the Company and its subsidiaries, including the Company's investment in the AMI project. The higher interest costs associated with the higher levels of long-term debt are partially offset by labor cost savings in Distribution Utility operating expenses resulting from the AMI project. Interest expense on short-term debt decreased $0.3 million and $0.3 million in the three and nine month periods ended September 30, 2007 compared to the same periods in 2006 primarily due to lower average short-term borrowings.

CAPITAL REQUIREMENTS

Sources of Capital

Unitil requires capital to fund utility plant additions, working capital and other utility expenditures recovered in subsequent and future periods through regulated rates. The capital necessary to meet these requirements is derived primarily from internally-generated funds, which consist of cash flows from operating activities, excluding payment of dividends. The Company initially supplements internally generated funds through bank borrowings, as needed, under unsecured short-term bank lines. Long-term financings, mainly in the form of first mortgage bonds, unsecured notes and equity, are periodically issued to complement the addition of long-term plant investments and for other corporate purposes.

The continued availability of these methods of financing, as well as the Company's choice of a specific form of security, will depend on many factors, including, but not limited to: security market conditions; general economic climate; regulatory approvals; the ability to meet covenant issuance restrictions, if any; the level of the Company's earnings, cash flows and financial position; and the competitive pricing offered by financing sources.

On June 30, 2007 Unitil renewed $30 million in unsecured revolving lines of credit through three banks. Average daily short-term borrowings during the first nine months of 2007 were approximately $17.6 million, a decrease of approximately $7.8 million over the comparable period in 2006, reflecting principally the receipt of the Unitil Note financing proceeds in May 2007, described below.

On May 2, 2007, Unitil completed the sale of $20 million of Senior Long-Term Notes, through a private placement to institutional investors. The Notes have a term of 15 years maturity and a coupon rate of 6.33%. The Company utilized the proceeds from the long-term Note financing to refinance existing short-term debt and for other general corporate purposes of the Company's principal utility subsidiaries. On September 26, 2006 the Company's affiliate, UES sold $15 million of Series O 6.32% First Mortgage Bonds. The proceeds from this issuance were utilized to finance long-lived utility plant additions that had been previously financed by short-term indebtedness.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to the duration of the contracts, which range from less than one month to two and one-half years. As of September 30, 2007, there were approximately $8.3 million of guarantees outstanding and the longest term guarantee extends through March 13, 2009.

The tables below summarize the major sources and uses of cash (in millions) for the nine months ended September 30, 2007 compared to the same period in 2006.

Cash Provided by Operating Activities	**$**	**23.6**	$	17.0

Cash Provided by Operating Activities - Cash Provided by Operating Activities was $23.6 million during the first nine months ended September 30, 2007, an increase of $6.6 million over the comparable period in 2006. Sources of cash from Net Income were $0.7 million higher in the first nine months of 2007 compared to 2006. Sources of cash from Depreciation and Amortization increased by $1.4 million in the current period compared to the same period in 2006. An additional $1.3 million of cash was utilized for Deferred Taxes as compared to the comparable period in 2006. Working Capital related cash flows increased by $5.3 million during the first nine months of 2007 compared to the same period in 2006, principally due to recoveries of accrued revenue through reconciling mechanisms. All other changes in operating activities were a net $0.5 million in sources of cash in the first nine months of 2007 compared to 2006.

Cash (Used in) Investing Activities	**$**	**(25.9)**	$	(24.7)

Cash (Used in) Investing Activities - Cash (Used in) Investing Activities was $25.9 million for the nine months ended September 30, 2007, an increase of $1.2 million over the comparable period in 2006. Annual capital expenditures are projected to be $32.4 million in 2007 compared to $33.6 million expended in fiscal 2006. The

2007 projected capital expenditures include approximately $6.7 million of cash outlays for the last phase of investment for the AMI project. The Company's AMI expenditures were $5.9 million during the first nine months of 2007 compared to $4.5 million during the comparable period in 2006. Capital expenditure projections are subject to changes during the fiscal year.

Cash Provided by Financing Activities	**$ 1.9**	$ 8.3

Cash Provided by Financing Activities - Cash Provided by Financing Activities was $1.9 million in the nine months ended September 30, 2007, a decrease of $6.4 million over the comparable period in 2006. Cash provided from short term debt was $11.9 million lower at September 30, 2007, as compared to December 31, 2006, principally reflecting the issuance of $20 million in Senior Long-Term Notes in May 2007, as described above. Proceeds from Long-Term Debt issuances increased by $5 million in the current nine month period of 2007 compared to the same period last year, reflecting the net difference between the issuance of the $20 million 2007 Unitil Notes and $15 million 2006 UES Bond financings, described above. All other cash flows provided from other financing activities aggregated to a net $0.5 million increase in the first nine months of 2007 as compared to the same period in 2006.

CRITICAL ACCOUNTING POLICIES

The preparation of the Company's financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, management is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgments, the financial statements of the Company could be materially different than reported. The following is a summary of the Company's most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company's significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 21, 2007.

Regulatory Accounting - The Company's principal business is the distribution of electricity and natural gas by the retail distribution companies: UES and FG&E. Both UES and FG&E are subject to regulation by the FERC and FG&E is regulated by the MDPU and UES is regulated by the NHPUC. Accordingly, the Company uses the provisions of FASB Statement No. 71, "Accounting for the Effects of Certain Types of Regulation." (SFAS No. 71). In accordance with SFAS No. 71, the Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

The Company's principal regulatory assets and liabilities are detailed on the Company's Consolidated Balance Sheet and a summary of the Company's Regulatory Assets is provided below. Generally, the Company is currently receiving or being credited with a return on all of its regulatory assets for which a cash outflow has been made. Generally, the Company is currently paying or being charged with a return on all of its regulatory liabilities for which a cash inflow has been received.

Regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. The Company believes it is probable that its regulated utility companies will recover their investments in long-lived assets, including regulatory assets. The Company also has commitments under long-term contracts for the purchase of electricity and natural gas from various suppliers. The annual costs under these contracts are included in Purchased Electricity and Purchased Gas in the Consolidated Statements of Earnings and these costs are recoverable in current and future rates under various orders issued by the FERC, MDPU and NHPUC.

Regulatory Assets consist of the following (millions)	September 30, 2007	September 30, 2006	December 31, 2006
Power Supply Buyout Obligations	**$ 77.7**	$ 97.3	$ 92.6
Deferred Restructuring Costs	**29.5**	30.5	31.0
Generation-related Assets	**1.8**	2.7	2.5
Subtotal – Restructuring Related Items	**109.0**	130.5	126.1
Retirement Benefit Obligations	**37.3**	10.5	37.1
Income Taxes	**17.9**	16.4	19.1
Environmental Obligations	**13.1**	0.9	13.0
Other	**3.5**	3.2	3.5
Total Regulatory Assets	**$ 180.8**	$ 161.5	$ 198.8

If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of SFAS No. 71. If unable to continue to apply the provisions of SFAS No. 71, the Company would be required to apply the provisions of FASB Statement No. 101, "Regulated Enterprises – Accounting for the Discontinuation of Application of Financial Accounting Standards Board Statement No. 71." In the Company's opinion, its regulated operations will be subject to SFAS No. 71 for the foreseeable future.

Utility Revenue Recognition - Regulated utility revenues are based on rates and charges approved by federal and state regulatory commissions. Revenues related to the sale of electric and gas service are recorded when service is rendered or energy is delivered to customers. The determination of energy sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts - The Company recognizes a Provision for Doubtful Accounts each month. The amount of the monthly Provision is based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior periods. Account write-offs and recoveries, are processed monthly. At the end of each month, an analysis of the delinquent receivables is performed and the adequacy of the Allowance for Doubtful Accounts is reviewed. The analysis calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company is authorized by regulators to recover the supply-related portion of its written-off accounts from customers through periodically reconciling rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis. Also, the Company has experienced periods when state regulators have extended the periods during which certain standard credit and collection activities of utility companies are suspended. In periods when account write-offs exceed estimated levels, the Company adjusts the Provision for Doubtful Accounts to maintain an adequate Allowance for Doubtful Accounts balance.

Retirement Benefit Obligations - The Company sponsors the Unitil Corporation Retirement Plan (Pension Plan), which is a defined benefit pension plan covering substantially all of its employees. The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (SERP), covering certain executives of the Company and an employee 401(k) savings plan. Additionally, the Company sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan), primarily to provide health care and life insurance benefits to retired employees.

In September 2006, the FASB issued FASB Statement No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", (SFAS No. 158), an amendment of SFAS No. 87, "Employers' Accounting for Pensions", SFAS No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits," SFAS No. 106, "Employers' Accounting for Postretirement Benefits other than Pensions" and SFAS No. 132(R), "Employers' Disclosures about Pensions and Other Postretirement Benefits." SFAS No. 158 requires companies to record on their balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas retail rates.

The Company's reported costs of providing retirement benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. The Company's health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. The Company's RBO are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future costs. The Company's RBO may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the Company's RBO. If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's financial statements (See Note 8.)

Income Taxes - Provisions for income taxes are calculated in each of the jurisdictions in which the Company operates for each period for which a statement of income is presented. This process involves estimating the Company's current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deductions of expenses and recognition of taxable income for tax and book accounting purposes. These temporary differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets. The Company accounts for income tax assets, liabilities and expenses in accordance with FASB Statement No. 109, "Accounting for Income Taxes" (SFAS No. 109) which is the authoritative pronouncement on accounting for and reporting income taxes.

In June 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48), an interpretation of FAS 109. Under FIN 48, tax positions accounted for under FAS 109 will be evaluated for recognition, derecognition and classification. The Company adopted FIN 48 as of January 1, 2007, as required. The adoption of FIN 48 did not have a significant impact on the Company's financial position and results of operations.

Depreciation - Depreciation expense is calculated based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company's fixed assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements.

Commitments and Contingencies - The Company's accounting policy is to record and/or disclose commitments and contingencies in accordance with SFAS No. 5. SFAS No. 5 applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. As of September 30, 2007, the Company is not aware of any material commitments or contingencies other than those disclosed in the Commitments and Contingencies footnote to the Company's consolidated financial statements below.

Refer to "Recently Issued Accounting Pronouncements in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

There are approximately 100 employees of the Company represented by labor unions. In May 2005, the Company reached agreements with its bargaining units for new five-year contracts, effective June 1, 2005. These agreements replace contracts that expired on May 31, 2005.

INTEREST RATE RISK

The majority of the Company's debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new long-term debt securities issued by the Company. In addition, the Company's short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease the Company's interest expense in future periods. For example, if the Company had an average amount of short-term debt outstanding of $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000 (pre-tax). The average interest rates on the Company's short-term borrowings for the three months ended September 30, 2007 and September 30, 2006 were 5.71% and 5.82%, respectively. The average interest rates on the Company's short-term borrowings for the nine months ended September 30, 2007 and September 30, 2006 were 5.75% and 5.44%, respectively.

MARKET RISK

Although Unitil's utility operating companies are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

UNITIL CORPORATION AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three and nine months ended September 30, 2007 are not necessarily indicative of results to be expected for the year ending December 31, 2007. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2006, as filed with the SEC on February 21, 2007, for a description of the Company's Basis of Presentation.

Nature of Operations - Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (UES), Fitchburg Gas and Electric Light Company (FG&E), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. (Usource) are subsidiaries of Unitil Resources.

Unitil's principal business is the retail distribution of electricity in the southeastern seacoast and capital city areas of New Hampshire and the retail distribution of both electricity and natural gas in the greater Fitchburg area of north central Massachusetts, through the Company's two wholly-owned subsidiaries, UES and FG&E, collectively referred to as the retail distribution utilities.

A third utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for UES. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of UES on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve UES' customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service, Unitil Realty and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-regulated subsidiary. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Recently Issued Pronouncements – In February 2007, the FASB issued FASB Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." (SFAS No. 159), effective for fiscal years beginning after November 15, 2007. SFAS No. 159 includes an amendment of FASB Statement No. 115, "Accounting for Certain Investments in Debt and Equity Securities." SFAS No. 159 permits entities to choose, at specified election dates, to measure eligible items at fair value and requires unrealized gains and losses on items for which the fair value option has been elected to be reported in earnings. The Company does not expect SFAS No. 159 to have a material impact on the Company's Consolidated Financial Position.

In June 2006, the FASB issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48), an interpretation of FAS 109. Under FIN 48, tax positions accounted for under FAS 109 will be evaluated for recognition, derecognition, and classification. The Company adopted FIN 48 as of January 1, 2007, as required. The adoption of FIN 48 did not have a significant impact on the Company's financial position and results of operations. See Note 9.

In September 2006, the FASB issued FASB Statement No. 157, “Fair Value Measurements”, (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company does not expect SFAS No. 157 to have an impact on the Company’s Consolidated Financial Statements.

In February 2006, the FASB issued FASB Statement No. 155, “Accounting for Certain Hybrid Financial Instruments”, (SFAS No. 155), which amends SFAS No.133 and FASB Statement No. 140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities”, (SFAS No. 140), effective for all financial instruments acquired or issued after the beginning of an entity’s first fiscal year that begins after September 15, 2006. SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation and clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133. The Company’s adoption of SFAS No. 155 did not have an impact on the Company’s Consolidated Financial Statements.

Reclassifications - Certain amounts previously reported have been reclassified to conform to current year presentation. The Company reclassified retirement benefit obligations from Other Noncurrent Liabilities to Retirement Benefit Obligations on the balance sheet and certain expenses between Purchased Electricity, Purchased Gas and Operations and Maintenance Expenses for presentation purposes.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount
09/13/07	11/15/07	11/01/07	$ 0.345

03/22/07	05/15/07	05/01/07	$ 0.345
01/18/07	02/15/07	02/01/07	$ 0.345
09/29/06	11/15/06	11/01/06	$ 0.345
06/22/06	08/15/06	08/01/06	$ 0.345
03/23/06	05/15/06	05/01/06	$ 0.345
01/12/06	02/15/06	02/01/06	$ 0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

During the first nine months of 2007, the Company sold 28,675 shares of its Common Stock, at an average price of $27.65 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $793,000 were used to reduce short-term borrowings.

During the first nine months of 2006, the Company sold 30,782 shares of its Common Stock, at an average price of $24.59 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $757,000 were used to reduce short-term borrowings.

Also, in the third quarter of 2007, the Company issued and sold 42,437 shares of its Common Stock, at a final average price of $10.70 per share, in connection with the exercise of stock options under the Unitil Corporation Key Employee Stock Option Plan (KESOP). As disclosed in Note 2 to the Company’s Form 10-K for the year ended December 31, 2006, the KESOP was a 10-year plan which began in March 1989. The number of shares underlying options granted under this plan, as well as the terms and conditions of each grant, were determined by the Key Employee Stock Option Plan Committee of the Board of Directors, subject to plan limitations. All options granted under this plan vested upon grant. The 10-year period in which options could be granted under this plan expired in March 1999. The plan provides dividend equivalents on options granted, which are recorded at fair value as compensation expense. As of September 30, 2007, there are no options remaining under the KESOP. Net proceeds of $454,000 were used by the Company to reduce short-term borrowings.

The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 9, 2007, 9,020 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $230,461. Compensation expense associated with annual grants of shares issued under the Plan is recognized on a monthly basis as the shares vest and was $0.3 million and $0.3 million for the nine months ended September 30, 2007 and 2006, respectively. At September 30, 2007, there was approximately $0.8 million of total unrecognized compensation cost related to non-vested shares under the Plan which is expected to be recognized over approximately 2.4 years as the shares vest.

Details on preferred stock at September 30, 2007, September 30, 2006 and December 31, 2006 are shown below:

NOTE 4 – LONG-TERM DEBT

On May 2, 2007, Unitil Corporation issued and sold $20 million of 6.33% Senior Long-Term Notes, due May 1, 2022, to institutional investors in the form of a private placement. The proceeds from this long-term financing were used to refinance existing short-term debt and for general corporate purposes of the Company and its subsidiaries.

Details on long-term debt at September 30, 2007, September 30, 2006 and December 31, 2006 are shown below:

(Amounts in Millions)

	(Unaudited) September 30, 2007	September 30, 2006	December 31, 2006
Unitil Energy Systems, Inc.:			
First Mortgage Bonds:			
8.49% Series, Due October 14, 2024	**$ 15.0**	$ 15.0	$ 15.0

Unitil Corporation:			
Senior Notes:			
6.33% Notes, Due May 1, 2022	**20.0**	---	---
Unitil Realty Corp.:			
Senior Secured Notes:			
8.00% Notes, Due August 1, 2017	**5.2**	5.4	5.3
Total	**160.2**	140.4	140.3
Less: Installments due within one year	**0.4**	0.3	0.3
Total Long-term Debt	**$ 159.8**	$ 140.1	$ 140.0

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at September 30, 2007 is estimated to be in a range of up to approximately $170 million, before considering any costs, including prepayment costs, to market the Company's debt. Currently, the Company believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to the duration of the contracts, which range from three months to three years. As of September 30, 2007 there are $8.3 million of guarantees outstanding and these guarantees extend through March 13, 2009. These guarantees are not required to be recorded under the provisions of FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others."

NOTE 5 – SEGMENT INFORMATION

The following table provides significant segment financial data for the three and nine months ended September 30, 2007 and September 30, 2006 (Millions):

Three Months Ended:	Electric	Gas	Other	Non-Regulated	Total
September 30, 2007					
Revenues	**$ 56.9**	**$ 3.9**	**$ ---**	**$ 1.0**	**$ 61.8**
Segment Profit (Loss)	**2.3**	**(0.7)**	**(0.1)**	**0.1**	**1.6**
Capital Expenditures	**4.7**	**1.7**	**0.1**	**---**	**6.5**
September 30, 2006					
Revenues	$ 61.2	$ 4.4	$ ---	$ 0.6	$ 66.2
Segment Profit (Loss)	2.5	(0.8)	0.1	---	1.8
Capital Expenditures	7.0	3.3	---	---	10.3
Nine Months Ended:					
September 30, 2007					
Revenues	**$ 171.3**	**$ 24.5**	**$ ---**	**$ 2.8**	**$ 198.6**
Segment Profit (Loss)	**5.7**	**---**	**---**	**0.2**	**5.9**
Capital Expenditures	**21.8**	**3.9**	**0.4**	**---**	**26.1**
Segment Assets	**339.0**	**110.2**	**24.4**	**0.9**	**474.5**
September 30, 2006					
Revenues	$ 171.0	$ 24.4	$ ---	$ 1.8	$ 197.2
Segment Profit (Loss)	5.5	(0.5)	0.4	(0.2)	5.2
Capital Expenditures	18.6	6.0	0.1	---	24.7
Segment Assets	323.5	100.0	19.9	1.1	444.5

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2006 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 21, 2007.

FG&E – Electric Division – On December 1, 2006, FG&E submitted its annual reconciliation of costs and revenues for Transition, Transmission, Standard Offer Service, and Default Service filed under its restructuring plan (the Annual Reconciliation Filing). On May 25, 2007 the MDPU approved FG&E's 2005 Annual Reconciliation Filing. On September 7, 2007, a Settlement Agreement between FG&E and the Attorney General of Massachusetts was filed resolving all disputes with regard to FG&E's 2006 Annual Reconciliation Filing. Approval of the Settlement Agreement is pending.

On August 17, 2007, FG&E filed an electric distribution rate increase of $3.3 million, which represents an increase of 4.7 percent over FG&E's 2006 total electric operating revenue. The MDPU has suspended the effective date until March 1, 2008 in order to investigate the propriety of the Company's request.

FG&E – Gas Division – On January 26, 2007, the MDPU approved a rate Settlement Agreement (Settlement) between FG&E and the Attorney General of Massachusetts for FG&E's Gas Division. Under the Settlement, FG&E increased its gas distribution rates by $1.2 million on February 1, 2007, and an additional $1.0 million increase will occur on November 1, 2007. The Settlement also includes agreement on several other rate matters and service quality performance measures for the company's Gas Division in the areas of safety, customer service and satisfaction.

On September 7, 2006, the MDPU issued an order allowing FG&E to recover the costs of its actual gas and electric supply-related bad debt effective December 1, 2005. Prior to this final approval, FG&E had recovered supply-related bad debt costs based on a fixed rate formula that produced a significant under-recovery of these costs. On September 27, 2006, the Attorney General filed a Petition for Appeal with the Massachusetts Supreme Judicial Court seeking to set aside the MDPU's order. FG&E intends to support the MDPU's order but the Company cannot predict the outcome of the Attorney General's appeal at this time.

FG&E – Other – On June 22, 2007, the MDPU opened an investigation to review ratemaking practices for gas and electric utility distribution companies in Massachusetts, and consider whether existing mechanisms may be changed to better align utility companies' financial interests with the need to capture end use efficiencies and foster the advancement of price responsive demand in the wholesale energy market. This matter remains pending.

UES – On March 16, 2007, UES made its annual reconciliation and rate filing with the NHPUC under its restructuring plan, effective May 1, 2007, including reconciliation of prior year costs and revenues, power supply and power supply-related stranded costs. On April 30, 2007 the NHPUC approved UES' filing subject to adjustment and reconciliation depending on the Staff audit and Staff's on-going review with regard to the method for calculating unbilled revenues. No exceptions were noted in the final audit report, which was issued on July 11, 2007.

On October 6, 2006, UES received approval from the NHPUC of a Settlement Agreement (Agreement) resolving its electric distribution base rate case filed in November, 2005. The terms of the Agreement provide for an increase in base distribution rates of $2.3 million effective as of January 1, 2006. Additionally, the Agreement authorizes two step increases in base distribution rates, related to utility plant additions in 2006, of approximately $0.4 million and $0.1 million annually, effective as of November 1, 2006 and May 1, 2007, respectively. Also, the Agreement provides for the recovery of approximately $0.3 million annually of supply-related operating and administrative costs through default energy service rates and a reduction of approximately $0.6 million in annual depreciation expense, primarily reflecting an increase in utility plant and equipment average service lives. The stipulated rate of return under the settlement is 8.70%, including a return on equity of 9.67%. The Agreement also authorized a temporary rate surcharge for recovery of certain rate case expenses and recoupment of the authorized distribution rate increase from January through October 2006. On August 30, 2007, UES filed a reconciliation of the surcharge, which is expected to expire effective November 1, 2007.

On June 22, 2007, the NHPUC issued an order in its investigation into implementation of the federal Energy Policy Act of 2005 regarding the adoption of standards for time-based metering and interconnection. This order sets the framework for implementation of time based rates for utility provided default service, though a number of technical issues remain to be resolved. Under the order, UES is required to file draft tariffs to provide for fixed, time-based pricing of default service for all customer classes no later than November 30, 2007. On August 31, 2007, the NHPUC issued an order on motion for rehearing, staying the June 22, 2007 order pending hearing and reconsideration of the issues. This matter remains pending.

On May 14, 2007, the NHPUC issued an order opening an investigation into the merits of instituting, for electric utilities, appropriate rate mechanisms, such as revenue decoupling, which would have the effect of removing obstacles to, and encouraging investment in, energy efficiency. The matter remains pending.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2006 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 21, 2007.

The Company's past and present operations include activities that are generally subject to extensive federal and state environmental laws and regulations. The Company believes it is in compliance with all applicable environmental and safety laws and regulations, and the Company believes that as of September 30, 2007, there are no material losses reasonably possible in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Included on the Company's Consolidated Balance Sheet at September 30, 2007 in Environmental Obligations is $12.0 million related to estimated future clean up costs for permanent remediation of a former manufactured gas plant site at Sawyer Passway, located in Fitchburg, Massachusetts. A corresponding regulatory asset was recorded to reflect the future rate recovery of these costs. As noted above, please refer to Note 5 to the financial statements in Item 8 of Part II of the Company's Form 10-K for December 31, 2006 for additional information.

NOTE 8: RETIREMENT BENEFIT OBLIGATIONS

The Company provides certain pension and postretirement benefit plans for its retirees and current employees including defined benefit pension plans, postretirement health and welfare plans, a supplemental executive retirement plan and an employee 401(k) savings plan.

In September 2006, the FASB issued SFAS No. 158 which requires companies to record on their balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas retail rates.

Pension Plan – The Company's defined benefit pension plan covers substantially all of its employees. Under the Pension Plan, retirement benefits are based upon an employee's level of compensation and length of service.

FG&E recovers the costs associated with its pension and PBOP costs on an annually reconciling basis through a rate adjustment mechanism (the Pension / PBOP Adjustment Factor (PAF). FG&E records a regulatory asset to recognize the deferral for the difference between the level of pension and PBOP expenses that are currently included in its base rates and the amounts that are required to be recorded in accordance with SFAS No. 87 and SFAS No. 106 and amortizes increases and/or decreases in that deferral balance into the PAF for recovery over a three year period.

UES recovers its pension and PBOP expenses in base rates and amortizes deferred pension costs as these costs are recovered over a six year period in base rates.

The following tables show the components of net periodic pension cost, (NPPC), as well as key actuarial assumptions used in determining the various pension plan values:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	**2007**	2006
Components of NPPC (000's)				
Service Cost	**$ 492**	$ 450	**$ 1,476**	$ 1,350
Interest Cost	**834**	788	**2,502**	2,365
Expected Return on Plan Assets	**(1,050)**	(944)	**(3,146)**	(2,831)
Amortization of Prior Service Cost	**27**	27	**80**	80
Amortization of Net Loss	**336**	331	**1,008**	993
Subtotal NPPC	**639**	652	**1,920**	1,957
Amounts Capitalized and Deferred	**(215)**	(127)	**(651)**	(772)
NPPC Recognized	**$ 424**	$ 525	**$ 1,269**	$ 1,185

Key Assumptions (Weighted Average)	**2007**	2006
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	5.50%
Rate of Compensation Increase	**3.50%**	3.50%
Used to Determine NPPC:		
Discount Rate	**5.50%**	5.50%
Expected Long-Term Rate of Return on Plan Assets	**8.50%**	8.50%
Rate of Compensation Increase	**3.50%**	3.50%

Employer Contributions – On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA are new minimum funding rules which will go into effect for plan years beginning in 2008. The funding target will be 100% of a plan's liability with any shortfall amortized over seven years, with lower (92% - 100%) funding targets available to well-funded plans during the transition period. As of September 30, 2007, the Company has made contributions of $2.8 million to the Plan in 2007 and does not anticipate making any additional contributions in 2007. The Company contributed $2.5 million in 2006.

PBOP Plan - The Company sponsors the PBOP Plan, primarily to provide health care and life insurance benefits to employees and retirees. The Company has established Voluntary Employee Benefit Trusts (VEBT), into which it funds contributions to the PBOP Plan.

The following tables show the components of net periodic postretirement benefit cost (NPPBC), as well as key actuarial assumptions used in determining the various PBOP Plan values:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	**2007**	2006
Components of NPPBC (000's)				
Service Cost	**$ 358**	$ 321	**$ 1,073**	$ 962
Interest Cost	**514**	507	**1,543**	1,522
Expected Return on Plan Assets	**(61)**	(49)	**(184)**	(146)
Amortization of Prior Service Cost	**341**	340	**1,020**	1,020
Amortization of Transition (Asset) Obligation	**5**	5	**16**	16
Amortization of Net (Gain) Loss	**17**	40	**52**	120
Subtotal NPPBC	**1,174**	1,164	**3,520**	3,494
Amounts Capitalized and Deferred	**(489)**	(559)	**(1,506)**	(1,673)
NPPBC Recognized	**$ 685**	$ 605	**$ 2,014**	$ 1,821

Weighted-Average Assumptions	2007	2006
Used to Determine Benefit Obligations:		
Discount Rate	**5.50%**	5.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	8.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2016
Used to Determine NPPBC:		
Discount Rate	**5.50%**	5.50%
Expected Long-Term Rate of Return on Plan Assets	**8.50%/5.50%** [1]	8.50%/5.50% [1]
Health Care Cost Trend Rate Assumed for Next Year	**9.00%**	8.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year That the Health Care Cost Trend Rate Reaches the Ultimate Trend Rate	**2016**	2016

(1) Funding of the PBOP Plan is made into two VEBT's; one is a union VEBT and the other is a non-union VEBT. The expected long-term rate of return on plan assets for the union VEBT is 8.50%. The non-union VEBT is subject to income taxes and therefore the expected long-term rate of return on plan assets is 5.50%, reflecting the effect of taxes.

Employer Contributions – As of September 30, 2007, the Company had made $1.7 million of contributions to the PBOP Plan in 2007. The Company presently anticipates contributing an additional $0.8 million to fund the Plan in 2007 for an estimated funding total of $2.5 million in the year. The Company contributed $2.2 million in 2006.

SERP - The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (the SERP), with participation limited to executives selected by the Board of Directors.

The components of net periodic SERP cost are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	**2007**	2006
Components of NPSC (000's)				
Service Cost	**$ 40**	$ 36	**$ 122**	$ 110
Interest Cost	**29**	26	**88**	78
Amortization of Transition Obligation	**---**	4	**---**	13
Amortization of Prior Service Cost	**---**	---	**(1)**	(1)
Amortization of Net Loss	**11**	10	**33**	29
Net Periodic SERP Cost	**$ 80**	$ 76	**$ 242**	$ 229

Employer Contributions – As of September 30, 2007, the Company has made payments of $54,000 to beneficiaries. The Company presently anticipates making additional benefit payments of $18,000 in 2007 for a total of $72,000.

NOTE 9: INCOME TAXES

The Company evaluated its tax positions at December 31, 2006 and for the current interim reporting period ended September 30, 2007 in accordance with FIN 48, and has concluded that no adjustment for recognition, derecognition, settlement and foreseeable future events to any unrecognized tax liabilities or assets as defined by FIN 48 is required. The Company does not have any unrecognized tax positions for which it is reasonably possible that the total amounts recognized will significantly change within the next 12 months. The Company remains subject to examination by Federal, Massachusetts and New Hampshire tax authorities for the tax periods ended December 31, 2004; December 31, 2005; and December 31, 2006. Income tax filings for the year ended December 31, 2006 were filed on or before September 17, 2007. The Company classifies penalty and interest expense related to income tax liabilities as an income tax expense. There are no interest and penalties recognized in the statement of earnings or accrued on the balance sheet.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2006 as filed with the Securities and Exchange Commission on February 21, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) There were no sales of unregistered equity securities by the Company for the fiscal period ended September 30, 2007.

(b) Not applicable.

(c) Issuer repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(1)
7/1/07 – 7/31/07	---	---	---	n/a
8/1/07 – 8/31/07	---	---	---	n/a
9/1/07 – 9/30/07	---	---	---	n/a
Total	---	---	---	n/a

(1) Represents Common Stock purchased on the open market related to Board of Director Retainer Fees and Employee Length of Service Awards. Shares are not purchased as part of a specific plan or program and therefore there is no pool or maximum number of shares related to these purchases. The Company expects to continue with these purchases indefinitely.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f))for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: October 26, 2007

Exhibit 31.2

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Mark H. Collin, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Unitil Corporation (the "Company") on Form 10-Q for the period ending September 30, 2007 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned Robert G. Schoenberger, Chief Executive Officer and President, Mark H. Collin, Chief Financial Officer and Laurence M. Brock, Chief Accounting Officer, certifies, to the best knowledge and belief of the signatory, pursuant to 18 U.S.C. section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Unitil Reports Third Quarter Earnings

Hampton, NH – October 25, 2007: Unitil Corporation (AMEX: UTL) (www.unitil.com) today announced net income of $1.6 million for the third quarter of 2007. Earnings per common share (EPS) were $0.28 for the three months ended September 30, 2007 compared with $0.32 in the third quarter of 2006. Earnings for the third quarter of 2007 reflect higher depreciation and interest expenses, partially offset by higher electric and gas utility sales margins and improved profits from Usource™, Unitil's non-regulated energy-brokering business. For the nine months ended September 30, EPS were $1.04 for 2007 compared to $0.93 for 2006, an increase of $0.11 per share, or 12%.

The following table presents the significant items (discussed below) contributing to the change in earnings per share in the three and nine month periods ended September 30, 2007:

2007 Earnings Per Share vs. 2006

	Period Ended September 30,			
	QTD		YTD	
2006	**$**	**0.32**	**$**	**0.93**
Electric Sales Margin		0.03		0.07
Gas Sales Margin		0.02		0.16
Usource™ Sales Margin		0.04		0.10
Operation & Maintenance Expense		---		0.02
Depreciation, Amortization & Other		(0.09)		(0.14)
Interest Expense, Net		(0.04)		(0.10)
2007	**$**	**0.28**	**$**	**1.04**

Total electric kilowatt (kWh) sales decreased 3.9% and 1.4% in the three and nine month periods ended September 30, 2007, respectively compared to the same periods in 2006. The lower kWh sales in 2007 compared to 2006 were primarily driven by cooler summer weather this year and energy conservation by our residential and commercial and industrial (C&I) customers.

Natural gas sales in the three and nine month periods ended September 30, 2007 increased 6.1% and 8.0%, respectively, compared to the same periods in 2006. The increase in gas sales in 2007 reflects a colder winter heating season this year and higher natural gas sales to C&I customers.

Selected Financial Data for 2007 is presented in the following table:

(Unaudited)

Unitil Corporation – Condensed Financial Data

(Millions, except Per Share data)

	Three Months Ended Sept. 30,			Nine Months Ended Sept. 30,		
	2007	**2006**	**Change**	**2007**	**2006**	**Change**
Electric kWh Sales:						
Residential	179.7	188.6	(4.7%)	515.6	521.5	(1.1%)
Commercial/Industrial	285.1	294.9	(3.3%)	813.2	825.5	(1.5%)
Total	**464.8**	**483.5**	**(3.9%)**	**1,328.8**	**1,347.0**	**(1.4%)**
Gas Therm Sales:						
Residential	0.7	0.7	---	7.9	7.7	2.6%
Commercial/Industrial	2.8	2.6	7.7%	13.8	12.4	11.3%
Total	**3.5**	**3.3**	**6.1%**	**21.7**	**20.1**	**8.0%**
Electric Revenues	$ 56.9	$ 61.2	$ (4.3)	$ 171.3	$ 171.0	$ 0.3
Purchased Electricity	42.7	47.3	(4.6)	129.2	129.6	(0.4)
Electric Sales Margin	**14.2**	**13.9**	**0.3**	**42.1**	**41.4**	**0.7**
Gas Revenues	3.9	4.4	(0.5)	24.5	24.4	0.1
Purchased Gas	2.1	2.8	(0.7)	15.9	17.4	(1.5)
Gas Sales Margin	**1.8**	**1.6**	**0.2**	**8.6**	**7.0**	**1.6**
Usource Sales Margin	**1.0**	**0.6**	**0.4**	**2.8**	**1.8**	**1.0**
Total Sales Margin:	**17.0**	**16.1**	**0.9**	**53.5**	**50.2**	**3.3**
Operation & Maintenance Expenses	6.5	6.5	---	19.8	20.0	(0.2)
Depreciation, Amortization & Other	6.6	5.9	0.7	21.0	19.2	1.8
Interest Expense, Net	2.3	1.9	0.4	6.8	5.8	1.0
Net Income:	**$ 1.6**	**$ 1.8**	**$ (0.2)**	**$ 5.9**	**$ 5.2**	**$ 0.7**
Earnings Per Share	**$ 0.28**	**$ 0.32**	**$ (0.04)**	**$ 1.04**	**$ 0.93**	**$ 0.11**

Electric sales margin increased $0.3 million and $0.7 million in the three and nine months ended September 30, 2007, respectively, compared to the same periods in 2006. The improvement in electric sales margin primarily reflects additional step rate increases approved and implemented in the last half of 2006 and the first half of 2007 in New Hampshire, partially offset by lower electric kWh sales volumes.

Natural gas sales margin increased $0.2 million and $1.6 million in the three and nine months ended September 30, 2007, respectively, compared to the same periods in 2006 primarily reflecting higher sales to C&I customers and new natural gas distribution rates approved and implemented in early 2007.

Usource™ achieved increased revenues of $0.4 million and $1.0 million in the three and nine month periods ended September 30, 2007, increases of 67% and 56% respectively, over the comparable 2006 periods.

Total O&M expenses were flat for the three month period ended September 30, 2007 compared to the same period in 2006. For the nine month period ended September 30, 2007, total O&M expenses decreased $0.2 million compared to the same period in 2006. This decrease primarily reflects lower utility operating expenses which were partially offset by higher compensation and benefit costs.

Depreciation, Amortization, Taxes & Other expenses increased $0.7 million and $1.8 million in the three and nine month periods ended September 30, 2007 compared to the same periods in 2006 reflecting higher depreciation on utility plant and income taxes on higher levels of pre-tax earnings in 2007 compared to 2006.

Interest Expense, Net increased $0.4 million and $1.0 million in the three and nine month periods ended September 30, 2007 compared to the same periods in 2006 reflecting higher debt outstanding and higher interest rates.

Also in the third quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

About Unitil

Unitil is a public utility holding company with subsidiaries providing electric service in New Hampshire and electric and gas service in Massachusetts and energy services throughout the Northeast. Its subsidiaries include Unitil Energy Systems, Inc., Fitchburg Gas and Electric Light Company, Unitil Power Corp., Unitil Realty Corp., Unitil Service Corp. and its non-regulated business segment Unitil Resources, Inc. Usource L.L.C. is a subsidiary of Unitil Resources, Inc. Usource™ is a registered trademark of Unitil Resources, Inc.

This press release contains forward-looking statements, which are subject to the inherent uncertainties in predicting future results and conditions. All statements, other than statements of historical fact, are forward-looking statements. Certain factors that could cause the actual results to differ materially from those projected in these forward-looking statements include, but are not limited to the following: variations in weather; changes in the regulatory environment; customers' preferences on energy sources; general economic conditions; increased competition; fluctuations in supply, demand, transmission capacity and prices for energy commodities; and other uncertainties, all of which are difficult to predict, and many of which are beyond the control of Unitil Corporation.

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil's principal business is the retail distribution of electricity and natural gas through two utility subsidiaries: Unitil Energy System's Inc. (UES) and Fitchburg Gas and Electric Light Company (FG&E). UES is an electric utility with an operating franchise in the southeastern seacoast and capital city areas of New Hampshire. FG&E is a combination gas and electric utility with an operating franchise in the greater Fitchburg area of north central Massachusetts.

Unitil's two retail distribution utilities serve approximately 99,400 electric customers and 15,000 natural gas customers in their franchise areas. The retail distribution companies are pure distribution utilities with a combined investment in net utility plant of $249.4 million at March 31, 2008. Substantially all of Unitil's revenue and earnings are derived from regulated utility operations.

Unitil also conducts non-regulated operations principally through its Usource™ (Usource) subsidiary. Usource provides energy brokering and consulting services to large commercial and industrial customers in the northeastern United States. Unitil's other subsidiaries include Unitil Service and Unitil Realty, which provide centralized facilities, management and administrative services to Unitil's affiliated companies. Unitil's consolidated net income includes the earnings of the holding company and these subsidiaries.

On February 15, 2008, the Company entered into a Stock Purchase Agreement (Agreement) with NiSource Inc. (NiSource) and Bay Sate Gas Company (Bay State, which is a wholly owned utility subsidiary of NiSource), to acquire all of the outstanding stock of Northern Utilities, Inc. (Northern), and Granite State Gas Transmission, Inc. (Granite) for $160 million plus a net working capital adjustment. Northern's principal business is the retail distribution of natural gas to approximately 53,000 customers located in 44 coastal New Hampshire and southern Maine communities. Portions of Northern's natural gas service territory are contiguous and overlapping with Unitil's electric distribution service territory in New Hampshire. Granite's principal business is a natural gas transmission company, principally engaged in the business of rendering natural gas transportation services to Northern.

Consummation of the acquisition is subject to various closing conditions, including but not limited to the receipt of requisite regulatory approvals from certain federal and state public utility, antitrust and other regulatory authorities. It is currently anticipated that the acquisition will be consummated in the fourth quarter of 2008. However, no assurance can be given that the acquisition will occur, or, the timing of its completion.

RATES AND REGULATION

Unitil's utility operations related to wholesale and interstate business activities are regulated by the Federal Energy Regulatory Commission (FERC). The retail distribution utilities, UES and FG&E, are subject to regulation by the New Hampshire Public Utilities Commission (NHPUC) and the Massachusetts Department of Public Utilities (MDPU), formerly the Massachusetts Department of Telecommunications and Energy, respectively, in regards to their rates, issuance of securities and other accounting and operational matters. Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in their franchise areas, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on a historical test year, in addition to earning a return on their capital investment in utility assets.

As a result of the implementation of retail choice in New Hampshire and Massachusetts, Unitil's customers are free to contract for their supply of electricity with third-party suppliers. The retail distribution utilities provide for the delivery of that supply of electricity over their distribution systems at regulated rates. Both UES and FG&E

continue to provide basic or default electric supply service to those customers who do not obtain their supply from third-party suppliers, with the costs associated with electricity supplied by the Company being recovered on a pass-through basis under periodically-adjusted rates.

As a result of the introduction of retail choice for all natural gas customers in Massachusetts, FG&E's customers are free to contract for their supply of natural gas with third-party suppliers. FG&E continues to provide natural gas supply services to those customers who do not obtain their supply from third-party suppliers. The costs associated with natural gas supplied by FG&E are recovered on a pass-through basis under periodically adjusted rates.

CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for the Company's future operations, are forward-looking statements.

These statements include declarations regarding the Company's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include the following:

- Variations in weather;
- Changes in the regulatory environment;
- Customers' preferences on energy sources;
- Interest rate fluctuation and credit market concerns;
- General economic conditions;
- Fluctuations in supply, demand, transmission capacity and prices for energy commodities;
- Increased competition; and
- Customers' future performance under multi-year energy brokering contracts.
- Risks associated with the acquisition of Northern and Granite, discussed above include:
    - Successful integration of the acquired business into the Company;
    - Receipt of regulatory approval of the transaction;
    - Ability to finance transaction at reasonable terms; and
    - Acquisition costs expended for banker fees, legal fees and other acquisition related expenses would adversely affect the Company's financial condition if the acquisition is not completed;

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements. There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2007 as filed with the Securities and Exchange Commission on February 12, 2008, other than the risks disclosed above associated with the acquisition of Northern and Granite.

RESULTS OF OPERATIONS

The following section of MD&A compares the results of operations for each of the two fiscal periods ended March 31, 2008 and March 31, 2007 and should be read in conjunction with the accompanying Consolidated Financial Statements and the accompanying Notes to Consolidated Financial Statements included in Item 1 of this report.

Earnings Overview

The Company's Earnings Applicable to Common Shareholders (Net Income) was $3.3 million for the first quarter of 2008. Earnings per common share (EPS) were $0.57 for the three months ended March 31, 2008, an improvement of $0.11 per share or 24% over the first quarter of 2007.

Unitil's improved first quarter earnings in 2008 over 2007 were driven by higher gas sales margin and lower operating expenses, including the benefit from the proceeds of an insurance settlement associated with environmental remediation costs. These favorable factors were partially offset by higher amortization expenses and higher interest expense in the current year.

The following table presents the significant items contributing to the improvement in earnings per share in the first quarter of 2008 compared to the same period in 2007:

	Earnings Per Share
Three Months Ended March 31, 2007:	**$ 0.46**
Electric Sales Margin	(0.04)
Gas Sales Margin	0.10
Usource Sales Margin	0.01
Operation & Maintenance Expense	0.19
Depreciation, Amortization, Taxes & Other	(0.10)
Interest Expense, net	(0.05)
Three Months Ended March 31, 2008:	**$ 0.57**

In the first quarter of 2008, Unitil's electric kilowatt (kWh) sales decreased 1.4% compared to the same period in 2007. Gas sales in the first quarter of 2008 decreased 1.7% compared to the same period in 2007. The lower unit sales in 2008 compared to 2007 were driven by milder winter weather this year and lower average usage by our customers reflecting a slowing economy and energy conservation.

Electric sales margin was lower by $0.4 million in the three months ended March 31, 2008 compared to the same period in 2007 due to lower electric kWh sales volumes, partially offset by higher electric base rates. Gas sales margin increased $0.9 million in the three months ended March 31, 2008 compared to the same period in 2007 reflecting higher gas base rates, implemented in 2007. Usource, our non-regulated energy brokering business, recorded increased sales margin of $0.1 million in the first quarter of 2008, an increase of 11% over the first quarter of 2007.

Total Operation & Maintenance (O&M) expenses decreased $1.8 million for the three month period ended March 31, 2008 compared to the same period in 2007. This decrease reflects a reduction to operating expenses of $2.8 million from the proceeds of an insurance settlement associated with environmental remediation costs. This reduction to operating expenses was partially offset by annual increases in salary, wage and benefit costs of $0.7 million, higher professional fees of $0.2 million and higher bad debt expenses of $0.1 million.

Depreciation, Amortization, Taxes & Other expenses increased $1.2 million in the three month period ended March 31, 2008 compared to the same period in 2007 primarily reflecting the amortization of $0.7 million of natural gas inventory carrying costs and higher income taxes on higher levels of pre-tax earnings in 2008 compared to 2007.

Interest Expense, Net increased $0.5 million in the three month period ended March 31, 2008 compared to the same period in 2007 primarily reflecting higher debt outstanding.

In 2007, Unitil's annual common dividend was $1.38, representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock. At its January, 2008 and March, 2008 meetings, the Unitil Board of Directors declared quarterly dividends on the Company's common stock of $0.345 per share.

A more detailed discussion of the Company's results of operations for the three months ended March 31, 2008 and a period-to-period comparison of changes in financial position are presented below.

Balance Sheet

The Company's investment in Net Utility Plant increased by $11.7 million as of March 31, 2008 compared to March 31, 2007. This increase was due to capital expenditures related to UES' and FG&E's electric and gas distribution systems, including expenditures of approximately $1.0 million for the Company's Advanced Metering Infrastructure (AMI) project.

Regulatory Assets decreased $29.0 million as of March 31, 2008 compared to March 31, 2007, primarily reflecting current year cost recoveries. A significant portion of this decrease is matched by a corresponding decrease of $19.9 million in Power Supply Contract Obligations. The remaining decrease primarily reflects lower levels of Regulatory Assets associated with deferred taxes and retirement benefit obligations as well as recoveries of deferred charges.

Long-Term Debt increased $19.6 million as of March 31, 2008 compared to March 31, 2007, reflecting the issuance and sale on May 2, 2007 by Unitil Corporation of $20.0 million of 6.33% Senior Long-Term Notes, due May 1, 2022, to institutional investors in the form of a private placement. Short-term Debt decreased $13.0 million as of March 31, 2008 compared to March 31, 2007, as short-term borrowings were refinanced with the issuance of Senior Long-Term Notes, discussed above.

Electric Sales, Revenues and Margin

Kilowatt-hour Sales – In the first quarter of 2008, Unitil's total electric kWh sales decreased 1.4% compared to the first quarter of 2007. Sales to residential and C&I customers decreased 0.9% and 1.7%, respectively, in the first quarter of 2008 compared to the same period in 2007. The lower kWh sales in 2008 compared to 2007 were primarily driven by lower average usage by our customers reflecting a slowing economy and energy conservation.

The following table details total kWh sales for the three months ended March 31, 2008 and 2007 by major customer class:

kWh Sales (millions)

	Three Months Ended March 31,			
	2008	2007	Change	% Change
Residential	**182.4**	184.0	(1.6)	(0.9%)
Commercial/Industrial	**261.1**	265.6	(4.5)	(1.7%)
Total	**443.5**	449.6	(6.1)	(1.4%)

Electric Operating Revenues and Sales Margin - The following table details total Electric Operating Revenues and Sales Margin for the three months ended March 31, 2008 and 2007:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended March 31,			
	2008	2007	$ Change	% Change[1]
Electric Operating Revenue:				
Residential	**$ 30.3**	$ 32.8	$ (2.5)	(4.0%)
Commercial / Industrial	**26.3**	29.9	(3.6)	(5.7%)
Total Electric Operating Revenue	**$ 56.6**	$ 62.7	$ (6.1)	(9.7%)
Cost of Electric Sales:				
Purchased Electricity	**$ 42.9**	$ 48.2	$ (5.3)	(8.5%)
Conservation & Load Management	**0.6**	1.0	(0.4)	(0.6%)
Electric Sales Margin	**$ 13.1**	$ 13.5	$ (0.4)	(0.6%)

(1) Represents change as a percent of Total Electric Operating Revenue.

Total Electric Operating Revenues decreased by $6.1 million, or 9.7%, in the three months ended March 31, 2008 compared to the same period in 2007. Total Electric Operating Revenues include the recovery of costs of electric sales, which are recorded as Purchased Electricity and Conservation & Load Management (C&LM) in Operating Expenses. The decrease in Total Electric Operating Revenues in the three months ended March 31, 2008 reflects lower Purchased Electricity costs of $5.3 million, lower C&LM revenues of $0.4 million and lower sales margin of $0.4 million.

Purchased Electricity and C&LM revenues decreased a combined $5.7 million, or 9.1%, of Total Electric Operating Revenues in the three months ended March 31, 2008 compared to the same period in 2007, reflecting lower electric kWh sales, an increase in the amount of electricity purchased by customers directly from third-party suppliers and lower electric commodity prices. Purchased Electricity revenues include the recovery of the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin was lower by $0.4 million in the three months ended March 31, 2008 compared to the same period in 2007 due to lower electric kWh sales volumes, partially offset by higher electric base rates.

Gas Sales, Revenues and Margin

Therm Sales – Therm sales of natural gas decreased 1.7% in the three months ended March 31, 2008 compared to the same period in 2007. Sales to residential customers and C&I customers decreased 2.0% and 1.4%, respectively, in the first quarter of 2008 compared to the same period in 2007. The decrease in gas sales in 2008 reflects a milder winter heating season this year and lower average usage by our customers reflecting a slowing economy and energy conservation.

The following table details total firm therm sales for the three months ended March 31, 2008 and 2007, by major customer class:

Therm Sales (millions)

	Three Months Ended March 31,			
	2008	2007	Change	% Change
Residential	**4.8**	4.9	(0.1)	(2.0%)
Commercial/Industrial	**6.8**	6.9	(0.1)	(1.4%)
Total	**11.6**	11.8	(0.2)	(1.7%)

Gas Operating Revenues and Sales Margin – The following table details total Gas Operating Revenues and Sales Margin for the three months ended March 31, 2008 and 2007:

Gas Operating Revenues and Sales Margin (millions)

	Three Months Ended March 31,			
	2008	2007	$ Change	% Change[1]
Gas Operating Revenue:				
Residential	**$ 8.0**	$ 8.1	$ (0.1)	(0.7%)
Commercial / Industrial	**6.3**	6.1	0.2	1.4%
Total Gas Operating Revenue	**$ 14.3**	$ 14.2	$ 0.1	0.7%
Cost of Gas Sales:				
Purchased Gas	**$ 9.0**	$ 9.8	$ (0.8)	(5.6%)
Conservation & Load Management	**---**	---	---	---
Gas Sales Margin	**$ 5.3**	$ 4.4	$ 0.9	6.3%

(1) Represents change as a percent of Total Gas Operating Revenue.

Total Gas Operating Revenues increased $0.1 million, or 0.7%, in the three months ended March 31, 2008 compared to the same period in 2007. Total Gas Operating Revenues include the recovery of the cost of sales, which are recorded as Purchased Gas and C&LM in Operating Expenses. The net increase in Total Gas Operating Revenues in three months ended March 31, 2008 reflects higher sales margin of $0.9 million, offset by lower Purchased Gas costs of $0.8 million.

Purchased Gas and C&LM revenues decreased a combined $0.8 million, or 5.6%, of Total Gas Operating Revenues in three months ended March 31, 2008 compared to the same period in 2007, primarily reflecting lower natural gas sales and an increase in the amount of natural gas purchased by customers directly from third-party suppliers. Purchased Gas revenues include the recovery of the cost of gas supply as well as the other energy supply related costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Gas sales margin increased $0.9 million in the three months ended March 31, 2008 compared to the same period in 2007 reflecting higher gas base rates, implemented in 2007.

Operating Revenue - Other

The following table details total Other Operating Revenue for the three months ended March 31, 2008 and 2007:

Other Operating Revenue (Millions)

	Three Months Ended March 31,			
	2008	2007	$ Change	% Change
Other	**$ 1.0**	$ 0.9	$ 0.1	11.1%
Total Other Operating Revenue	**$ 1.0**	$ 0.9	$ 0.1	11.1%

Total Other Operating Revenue increased $0.1 million, or 11.1%, in the three month period ended March 31, 2008 compared to the same period in 2007. The increase was the result of growth in revenues from the Company's non-regulated energy brokering business, Usource.

Operating Expenses

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as the other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity decreased $5.3 million, or 11.0%, in the three month period ended March 31, 2008 compared to the same period in 2007, reflecting lower electric kWh sales, an increase in the amount of electricity purchased by customers directly from third-party suppliers and lower electric commodity prices. The Company recovers the costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas decreased $0.8 million, or 8.2%, in the three month period ended March 31, 2008 compared to the same period in 2007, primarily reflecting lower natural gas sales and an increase in the amount of natural gas purchased by customers directly from third-party suppliers. The Company recovers the costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Operation and Maintenance (O&M) - O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total O&M expenses decreased $1.8 million for the three month period ended March 31, 2008 compared to the same period in 2007. This decrease reflects a reduction to operating expenses of $2.8 million from the proceeds of an insurance settlement associated with environmental remediation costs. This reduction to operating expenses was partially offset by annual increases in salary, wage and benefit costs of $0.7 million, higher professional fees of $0.2 million and higher bad debt expenses of $0.1 million.

Conservation & Load Management – C&LM expenses are associated with the development, management, and delivery of the Company's Energy Efficiency programs. Energy Efficiency programs are designed, in conformity with state regulatory requirements, to help consumers use electricity and natural gas more efficiently and thereby decrease their energy costs. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 90% of these costs are related to electric operations and 10% to gas operations.

Total C&LM expenses decreased by $0.4 million, or 40.0%, in three month period ended March 31, 2008 compared to the same period in 2007. The decrease reflects the timing of spending on the implementation of Energy Efficiency programs. These costs are collected from customers on a pass through basis and therefore, fluctuations in program costs have no impact on Net Income.

Depreciation, Amortization and Taxes

Depreciation and Amortization - Depreciation and Amortization expense increased $0.7 million, or 15.6%, for the three month period ended March 31, 2008 compared to the same period in 2007. This increase primarily reflects the amortization of $0.7 million of natural gas inventory carrying costs deferred under a previous regulatory ruling.

Local Property and Other Taxes - Local Property and Other Taxes increased by $0.2 million, or 13.3% for the three month period ended March 31, 2008 compared to the same period in 2007. This increase was due to higher property tax rates on increased property assessments and higher payroll taxes on higher compensation expenses.

Federal and State Income Taxes - Federal and State Income Taxes were higher by $0.2 million for the three months ended March 31, 2008 compared to the same period in 2007 reflecting higher pre-tax earnings.

Other Non-Operating Expense

Other Non-Operating Expense increased by $0.1 million in the three month period ended March 31, 2008 compared to the same period in 2007. This increase reflects an adjustment of $0.1 million in conjunction with the Company's recently approved electric base distribution rate increase in Massachusetts.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. Certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

The Company operates a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the Company's tariff, interest is accrued on these balances and will produce either interest income or interest expense. Interest income is recorded on an under-collection of costs, which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (millions)	**Three Months Ended March 31,**		
	2008	2007	Change
Interest Expense			
Long-term Debt	**$ 2.9**	$ 2.6	$ 0.3
Short-term Debt	**0.2**	0.4	(0.2)
Regulatory Liabilities	**---**	---	---
Subtotal Interest Expense	**3.1**	3.0	0.1
Interest Income			
Regulatory Assets	**(0.6)**	(0.8)	0.2
AFUDC and Other	**0.1**	(0.1)	0.2
Subtotal Interest Income	**(0.5)**	(0.9)	0.4
Total Interest Expense, Net	**$ 2.6**	$ 2.1	$ 0.5

Interest Expense, Net increased by $0.5 million in the three month period ended March 31, 2008 compared to the same period in 2007. Interest expense on long-term borrowings increased due to the issuance of new long-term debt by Unitil on May 2, 2007. Unitil issued and sold $20 million of Senior Long-Term Notes at a coupon rate of 6.33%, through a private placement to institutional investors. The Company utilized the proceeds from the long-term Note financing to refinance existing short-term debt and for other corporate purposes of the Company's principal utility subsidiaries. The resulting reduction in average daily short-term bank borrowings lowered short-term interest expense for the first quarter of 2008 compared to the same period in 2007. An adjustment of $0.2 million related to earnings on funds used for capital projects ordered in conjunction with the Company's recently approved electric base distribution rate increase in Massachusetts and lower carrying charges earned on regulatory assets also contributed to the increase in Interest Expense, Net.

CAPITAL REQUIREMENTS

Sources of Capital

Unitil requires capital to fund utility plant additions, working capital and other utility expenditures recovered in subsequent and future periods through regulated rates. The capital necessary to meet these requirements is derived primarily from internally-generated funds, which consist of cash flows from operating activities, excluding payment of dividends. The Company initially supplements internally generated funds through bank borrowings, as needed, under unsecured short-term bank lines. The Company had short-term debt outstanding through bank borrowings of $16.7 and $29.7 at March 31, 2008 and March 31, 2007, respectively. In addition, Unitil had approximately $4.0 million in cash at March 31, 2008. Periodically, the Company replaces portions of its short-term debt with long-term financings more closely matched to the long-term nature of its utility assets.

The continued availability of these methods of financing, as well as the Company's choice of a specific form of security, will depend on many factors, including, but not limited to: security market conditions; general economic climate; regulatory approvals; the ability to meet covenant issuance restrictions, if any; the level of the Company's earnings, cash flows and financial position; and the competitive pricing offered by financing sources.

On February 15, 2008, the Company entered into a Stock Purchase Agreement with NiSource and Bay State to acquire all of the outstanding stock of Northern Utilities, Inc. and Granite State Gas Transmission, Inc. The Company has entered into a senior unsecured bridge facility, which is available to finance this transaction. The Company anticipates either financing the initial acquisition or refinancing the bridge facility with the issuance of a combination of unsecured senior notes and common/or preferred equity securities.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to the duration of the contracts, which range from less than one month to two and one-half years. As of March 31, 2008, there were approximately $6.0 million of guarantees outstanding and the longest term guarantee extends through October 31, 2009.

The tables below summarize the major sources and uses of cash (in millions) for the three months ended March 31, 2008, compared to the same period in 2007.

Cash Provided by Operating Activities	**$ 7.9**	$ 6.1

Cash Provided by Operating Activities - Cash Provided by Operating Activities was $7.9 million during the first three months ended March 31, 2008, an increase of $1.8 million over the comparable period in 2007. Cash flow from Net Income, adjusted for non-cash charges to depreciation, amortization and deferred taxes of $1.0 million, was $1.7 million higher in the first three months of 2008 compared to 2007. Working Capital related cash flows increased by $0.6 million during the first three months of 2008 compared to the same period in 2007. Deferred Restructuring Charges were a $1.0 million source of cash in the first quarter of 2008 compared to the same period in 2007. These charges were deferred in prior periods for collection current rates. All other changes in operating activities were a net $1.5 million in uses of cash in the first three months of 2008 compared to 2007, including a $2.8 million source of cash from the insurance settlement discussed above.

Cash (Used in) Investing Activities	**$ (4.5)**	$ (9.6)

Cash (Used in) Investing Activities - Cash (Used in) Investing Activities was $4.5 million for the three months ended March 31, 2008 reflecting a source of cash due to a decrease in capital spending of $5.1 million over the comparable period in 2007 mainly due to the completion of the Company's Advanced Metering Infrastructure ("AMI") project. In the first quarter 2007, capital expenditures included approximately $2.8 million of cash outlays for investment in the AMI project. Capital expenditure projections are subject to changes during the fiscal year.

Cash Provided by (Used in) Financing Activities	**$ (4.0)**	$ 1.7

Cash Provided by (Used in) Financing Activities - Cash Used in Financing Activities was $4.0 million in the three months ended March 31, 2008, a decrease of $5.7 million over the comparable period in 2007. Cash provided from short-term debt declined by $5.8 million in the first quarter of 2008, principally reflecting the repayment of short-term debt from the proceeds of an insurance settlement. All other cash flows provided from other financing activities aggregated to a net $0.1 million increase in the first three months of 2008 as compared to the same period in 2007.

CRITICAL ACCOUNTING POLICIES

The preparation of the Company's financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, management is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgments, the financial statements of the Company could be materially different than reported. The following is a summary of the Company's most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company's significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 12, 2008.

Regulatory Accounting - The Company's principal business is the distribution of electricity and natural gas by the retail distribution companies: UES and FG&E. Both UES and FG&E are subject to regulation by the FERC and FG&E is regulated by the MDPU and UES is regulated by the NHPUC. Accordingly, the Company uses the provisions of FASB Statement No. 71, "Accounting for the Effects of Certain Types of Regulation." (SFAS No. 71). In accordance with SFAS No. 71, the Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

The Company's principal regulatory assets and liabilities are detailed on the Company's Consolidated Balance Sheet and a summary of the Company's Regulatory Assets is provided below. The Company receives a return on investment on its regulated assets for which a cash outflow has been made.

Regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. The Company believes it is probable that its regulated utility companies will recover their investments in long-lived assets, including regulatory assets. The Company also has commitments under long-term contracts for the purchase of electricity and natural gas from various suppliers. The annual costs under these contracts are included in Purchased Electricity and Purchased Gas in the Consolidated Statements of Earnings and these costs are recoverable in current and future rates under various orders issued by the FERC, MDPU and NHPUC.

Regulatory Assets consist of the following (millions)	March 31, 2008	March 31, 2007	December 31, 2007
Power Supply Buyout Obligations	**$ 67.7**	$ 87.6	$ 72.7
Deferred Restructuring Costs	**29.6**	30.9	30.5
Generation-related Assets	**1.4**	2.1	1.6
Subtotal – Restructuring Related Items	**98.7**	120.6	104.8
Retirement Benefit Obligations	**35.1**	37.1	35.1
Income Taxes	**14.2**	18.7	14.6
Environmental Obligations	**13.3**	13.0	13.1
Other	**3.0**	3.9	2.9
Total Regulatory Assets	**$ 164.3**	$ 193.3	$ 170.5

If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of SFAS No. 71. If unable to continue to apply the provisions of SFAS No. 71, the Company would be required to apply the provisions of FASB Statement No. 101, "Regulated Enterprises – Accounting for the Discontinuation of Application of Financial Accounting Standards Board Statement No. 71." In the Company's opinion, its regulated operations will be subject to SFAS No. 71 for the foreseeable future.

Utility Revenue Recognition - Regulated utility revenues are based on rates and charges approved by federal and state regulatory commissions. Revenues related to the sale of electric and gas service are recorded when service is rendered or energy is delivered to customers. The determination of energy sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts - The Company recognizes a Provision for Doubtful Accounts each month. The amount of the monthly Provision is based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior years. Account write-offs, net of recoveries, are processed monthly. At the end of each month, an analysis of the delinquent receivables is performed and the adequacy of the Allowance for Doubtful Accounts is reviewed. The analysis takes into account an assumption about the cash recovery of delinquent receivables and also uses calculations related to customers who have chosen payment plans to resolve their arrears. The analysis also calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company is authorized by regulators to recover the supply-related portion of its written-off accounts from customers through periodically reconciling rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis, including expected fuel assistance payments from governmental authorities and the level of customers enrolling in payment plans with the Company. Also, the Company has experienced periods when state regulators have extended the periods during which certain standard credit and collection activities of utility companies are suspended. In periods when account write-offs exceed estimated levels, the Company adjusts the Provision for Doubtful Accounts to maintain an adequate Allowance for Doubtful Accounts balance. It has been the Company's experience that the assumptions it has used in evaluating the adequacy of the Allowance for Doubtful Accounts have proven to be reasonably accurate.

Retirement Benefit Obligations - The Company sponsors the Unitil Corporation Retirement Plan (Pension Plan), which is a defined benefit pension plan covering substantially all of its employees. The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (SERP), covering certain executives of the Company and an employee 401(k) savings plan. Additionally, the Company

sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan), primarily to provide health care and life insurance benefits to retired employees.

In September 2006, the FASB issued FASB Statement No. 158, “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans”, (SFAS No. 158), an amendment of SFAS No. 87, “Employers’ Accounting for Pensions”, SFAS No. 88, “Employers’ Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits,” SFAS No. 106, “Employers’ Accounting for Postretirement Benefits other than Pensions” and SFAS No. 132(R), “Employers’ Disclosures about Pensions and Other Postretirement Benefits.” SFAS No. 158 requires companies to record on their balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas retail rates.

The Company’s reported costs of providing retirement benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. The Company’s health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. The Company’s RBO are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future costs. The Company’s RBO may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the Company’s RBO.

If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's financial statements. The discount rate assumptions used in determining retirement plan costs and retirement plan obligations are based on a market average of long-term bonds that receive one of the two highest ratings given by a recognized rating agency. For the years ended December 31, 2007 and 2006, a change in the discount rate of 0.25% would have resulted in an increase or decrease of approximately $200,000 in the Net Periodic Benefit Cost for the Pension Plan. For the years ended December 31, 2007 and 2006, a 1.0% increase in the assumption of health care cost trend rates would have resulted in increases in the Net Periodic Benefit Cost for the PBOP Plan of $690,000 and $683,000, respectively. Similarly, a 1.0% decrease in the assumption of health care cost trend rates for those same time periods would have resulted in decreases in the Net Periodic Benefit Cost for the PBOP Plan of $539,000 and $530,000, respectively. (See Note 8)

Income Taxes - Provisions for income taxes are calculated in each of the jurisdictions in which the Company operates for each period for which a statement of income is presented. This process involves estimating the Company’s current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deductions of expenses and recognition of taxable income for tax and book accounting purposes. These temporary differences result in deferred tax assets and liabilities, which are included in the Company’s consolidated balance sheets. The Company accounts for income tax assets, liabilities and expenses in accordance with FASB Statement No. 109, “Accounting for Income Taxes” (SFAS No. 109) and under FASB Interpretation No. 48, “Accounting for Uncertainty in Income Taxes” (FIN 48), an interpretation of FAS 109.

Depreciation - Depreciation expense is calculated on a group straight-line basis based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company’s fixed assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements.

Commitments and Contingencies - The Company’s accounting policy is to record and/or disclose commitments and contingencies in accordance with SFAS No. 5. SFAS No. 5 applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. As of March 31, 2008, the Company is not aware of any material commitments or contingencies other than those disclosed in the Commitments and Contingencies footnote to the Company’s consolidated financial statements below.

Refer to “Recently Issued Accounting Pronouncements in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

There are approximately 100 employees of the Company represented by labor unions. In May 2005, the Company reached agreements with its bargaining units for new five-year contracts, effective June 1, 2005. These agreements replace contracts that expired on May 31, 2005.

INTEREST RATE RISK

The majority of the Company's debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new long-term debt securities issued by the Company. In addition, the Company's short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease the Company's interest expense in future periods. For example, if the Company had an average amount of short-term debt outstanding of $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000 (pre-tax). The average interest rates on the Company's short-term borrowings for the three months ended March 31, 2008 and March 31, 2007 were 3.84% and 5.77%, respectively.

MARKET RISK

Although Unitil's utility operating companies are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three months ended March 31, 2008 are not necessarily indicative of results to be expected for the year ending December 31, 2008. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2007, as filed with the SEC on February 12, 2008, for a description of the Company's Basis of Presentation.

Nature of Operations - Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the Securities and Exchange Commission (SEC). As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (UES), Fitchburg Gas and Electric Light Company (FG&E), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

Unitil's principal business is the retail distribution of electricity in the southeastern seacoast and capital city areas of New Hampshire and the retail distribution of both electricity and natural gas in the greater Fitchburg area of north central Massachusetts, through the Company's two wholly-owned subsidiaries, UES and FG&E, collectively referred to as the retail distribution utilities.

A third utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for UES. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of UES on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve UES' customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service, Unitil Realty and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-regulated subsidiary. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Recently Issued Pronouncements – In March 2008, the FASB issued FASB Statement No. 161, "Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133" (SFAS No. 161) , effective for fiscal years and interim periods beginning after November 15, 2008, with early adoption allowed. SFAS No. 161 amends and expands the disclosure requirements of SFAS No. 133 with the intent to provide users of financial statements with an enhanced understanding of an entity's use of derivative instruments and the effect of those derivative instruments on an entity's financial statements. The Company adopted SFAS No. 161 and there was no impact on its financial statements.

In December 2007, the FASB issued FASB Statement No. 141 (Revised 2007), "Business Combinations" (SFAS No. 141R), effective prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. SFAS No. 141R establishes principles and requirements on how an acquirer recognizes and measures in its financial statements identifiable assets acquired, liabilities assumed, noncontrolling interests in the acquiree, goodwill or gain from a bargain purchase and accounting for transaction costs. Additionally, SFAS No. 141R determines what information must be disclosed to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The Company will adopt SFAS No. 141R upon its effective date and expects the adoption to affect any business combinations effected on or subsequent to that date.

In September 2006, the FASB issued FASB Statement No. 157, "Fair Value Measurements", (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Certain requirements of SFAS No. 157 are effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The effective date for other requirements of SFAS No. 157 has been deferred for one year by the FASB. The Company adopted the sections of SFAS No. 157 which are effective for fiscal years beginning after November 15, 2007 and there was no additional impact on the Company's Consolidated Financial Statements. The Company's fixed rate long-term debt falls under the fair value reporting requirements of SFAS No. 157. Accordingly, the Company has estimated the fair value of its long-term debt as of March 31, 2008 based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities (See Note 4). The Company does not expect that the adoption of the deferred sections of SFAS No. 157 will have an impact on the Company's Consolidated Financial Statements.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount
03/20/08	05/15/08	05/01/08	$ 0.345
01/17/08	02/15/08	02/01/08	$ 0.345
09/13/07	11/15/07	11/01/07	$ 0.345
06/21/07	08/15/07	08/01/07	$ 0.345
03/22/07	05/15/07	05/01/07	$ 0.345
01/18/07	02/15/07	02/01/07	$ 0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

During the first quarter of 2008, the Company sold 7,596 shares of its Common Stock, at an average price of $27.94 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $212,000 were used to reduce short-term borrowings.

During the first quarter of 2007, the Company sold 9,628 shares of its Common Stock, at an average price of $26.19 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $252,000 were used to reduce short-term borrowings.

The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 6, 2008, 15,540 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $445,998. Compensation expense associated with shares issued under the Plan is recognized ratably as the shares vest and was $0.1 million and $0.1 million for three months ended March 31, 2008 and 2007, respectively. At March 31, 2008, there was approximately $1.1 million of total unrecognized compensation cost related to non-vested shares under the Plan which is expected to be recognized over approximately 2.9 years as the shares vest.

Details on preferred stock at March 31, 2008, March 31, 2007 and December 31, 2007 are shown below:

Less: Current Portion	**0.4**	0.3	0.4
Total Long-term Debt, Less Current Portion	**$ 159.6**	$ 140.0	$ 159.6

The fair value of the Company’s long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at March 31, 2008 is estimated to be approximately $166 million, before considering any costs, including prepayment costs, to market the Company's debt. Currently, the Company believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company’s policy is to limit these guarantees to two years or less. As of March 31, 2008 there are $6 million of guarantees outstanding and these guarantees extend through October 31, 2009. These guarantees are not required to be recorded under the provisions of FASB Interpretation No. 45, “Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others.”

NOTE 5 – SEGMENT INFORMATION

Capital Expenditures	9.1	0.7	(0.2)	---	9.6

NOTE 6 – REGULATORY MATTERS

UNITIL’S REGULATORY MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION’S FORM 10-K FOR DECEMBER 31, 2007 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 12, 2008.

FG&E – Electric Division – On December 3, 2007, FG&E submitted its annual reconciliation of costs and revenues for Transition, Transmission, Standard Offer Service, and Default Service filed under its restructuring plan (the Annual Reconciliation Filing). The rates were approved effective January 1, 2008, subject to reconciliation pursuant to the MDPU’s investigation. This matter remains pending.

On August 17, 2007, FG&E filed an electric distribution rate increase of $3.3 million, which represented an increase of 4.7 percent over FG&E’s 2006 total electric operating revenue. Evidentiary hearings were held in November 2007 and briefing was completed in January 2008. On February 29, 2008, the Company received a final order from the MDPU approving an electric distribution rate increase of $2.1 million, which represents an increase of 3.0 percent over FG&E’s 2006 total electric operating revenue. The order also provides for recovery of approximately $0.1 million annually of supply-related operating and administrative costs through default service rates. The new electric rates were effective as of March 1, 2008.

FG&E – Other – On June 22, 2007, the MDPU opened an inquiry into revenue decoupling, generally defined as a ratemaking mechanism designed to eliminate or reduce the dependence of a utility's distribution revenues on sales. Revenue decoupling is intended to remove the disincentive a utility has to administer and promote customer efforts to reduce energy consumption and demand or to install distributed generation to displace electricity delivered by the utility. This matter remains pending.

UES – On March 14, 2008, UES made its annual reconciliation and rate filing with the NHPUC under its restructuring plan, effective May 1, 2008, including reconciliation of prior year costs and revenues, power supply and power supply-related stranded costs. The filing is pending, subject to investigation. A hearing is scheduled for April 22, 2008.

On June 22, 2007, the NHPUC issued an order in its investigation into implementation of the federal Energy Policy Act of 2005 regarding the adoption of standards for time-based metering and interconnection. On August 31, 2007, the NHPUC issued an order on motion for rehearing, staying the June 22, 2007 order pending hearing and reconsideration of the issues. An order following rehearing was issued on January 22, 2008 finding that it is appropriate to implement time-based metering standards and ordering that the details, including cost-benefit analyses, form of rate design, time of implementation and applicable customer classes shall be determined in separate proceedings to be initiated by the Commission.

On May 14, 2007, the NHPUC issued an order opening an investigation into the merits of instituting appropriate rate mechanisms, such as revenue decoupling, which would have the effect of removing obstacles to, and encouraging investment in, energy efficiency. On March 13, 2008, the NHPUC issued a letter seeking written comments regarding the utilities experience with declining sales attributable to energy conservation, energy efficiency, and demand response and whether existing rate treatment poses an obstacle to investment in energy efficiency. Comments are due April 11, 2008.

Unitil Corp. – On February 15, 2008, Unitil reached agreement with NiSource Inc. and Bay State Gas Company to purchase 100 percent of the ownership shares of Northern Utilities, Inc. and Granite State Gas Transmission, Inc. for $160 million plus a net working capital adjustment. The Company has entered into a senior unsecured bridge facility, which is available to finance this transaction. The Company anticipates either financing the initial acquisition or refinancing the bridge facility with the issuance of a combination of unsecured senior notes and common/or preferred equity securities. On March 31, 2008, Unitil filed petitions and testimony with both the Maine Public Utilities Commission and the New Hampshire Public Utilities Commission requesting approval of the acquisitions. As of March 31, 2008, the Company has capitalized $1.1 million of transaction costs associated with the acquisition. The transaction is expected to close by the fourth quarter of 2008, subject to approval by these commissions and review by certain federal agencies.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2007 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 12, 2008.

The Company's past and present operations include activities that are generally subject to extensive federal and state environmental laws and regulations. The Company believes it is in compliance with all applicable environmental and safety laws and regulations, and the Company believes that as of March 31, 2008, there are no material losses reasonably possible in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Included on the Company's Consolidated Balance Sheet at March 31, 2008, in Environmental Obligations is $12.0 million related to estimated future clean up costs for permanent remediation of a former manufactured gas plant site at Sawyer Passway, located in Fitchburg, Massachusetts. A corresponding regulatory asset was recorded to reflect the future rate recovery of these costs. As noted above, please refer to Note 5 to the financial statements in Item 8 of Part II of the Company's Form 10-K for December 31, 2007 for additional information. As discussed above, the Company received an insurance settlement during the first quarter of 2008. Any recovery that FG&E receives from insurance or third parties with respect to environmental response costs, net of the unrecovered costs associated therewith, are split equally between FG&E and its gas customers.

NOTE 8: RETIREMENT BENEFIT OBLIGATIONS

The Company sponsors the following retirement benefit plans to provide certain pension and postretirement benefits for its retirees and current employees as follows:

- The Unitil Corporation Retirement Plan (Pension Plan) - The Pension Plan is a defined benefit pension plan covering substantially all of its employees. Under the Pension Plan, retirement benefits are based upon an employee's level of compensation and length of service.
- The Unitil Retiree Health and Welfare Benefits Plan (PBOP Plan) – The PBOP Plan provides health care and life insurance benefits to retirees. The Company has established Voluntary Employee Benefit Trusts (VEBT), into which it funds contributions to the PBOP Plan.
- The Unitil Corporation Supplemental Executive Retirement Plan (SERP) – The SERP is an unfunded retirement plan, with participation limited to executives selected by the Board of Directors.

The following table includes the key weighted average assumptions used in determining the Company's benefit plan costs and obligations:

	2008	2007
Used to Determine Plan Costs		
Discount Rate	**6.00%**	5.50%
Rate of Compensation Increase	**3.50%**	3.50%
Expected Long-term rate of return on plan assets	**8.50%**	8.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	9.00%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year that Ultimate Health Care Cost Trend Rate is reached	**2017**	2016
Used to Determine Benefit Obligations:		
Discount Rate	**6.00%**	5.50%
Rate of Compensation Increase	**3.50%**	3.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	8.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year that Ultimate Health care Cost Trend Rate is reached	**2017**	2016

The following table provides the components of the Company's Retirement plan costs ($000's):

Three Months Ended March 31,	Pension Plan 2008	Pension Plan 2007	PBOP Plan 2008	PBOP Plan 2007	SERP 2008	SERP 2007
Service Cost	**$ 488**	$ 492	**$ 355**	$ 358	**$ 37**	$ 41
Interest Cost	**944**	834	**559**	514	**32**	29
Expected Return on Plan Assets	**(1,093)**	(1,047)	**(81)**	(61)	**---**	---
Prior Service Cost Amortization	**27**	27	**340**	340	**---**	---
Transition Obligation Amortization	**---**	---	**5**	5	**---**	---
Actuarial Loss Amortization	**319**	336	**---**	17	**6**	11
Sub-total	**685**	642	**1,178**	1,173	**75**	81
Amounts Capitalized and Deferred	**(201)**	(217)	**(439)**	(513)	**---**	---
Net Periodic Benefit Cost Recognized	**$ 484**	$ 425	**$ 739**	$ 660	**$ 75**	$ 81

Employer Contributions

On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA are new minimum funding rules which will go into effect for plan years beginning in 2008. The funding target will be 100% of a plan's liability with any shortfall amortized over seven years, with lower (92% - 100%) funding targets available to well-funded plans during the transition period. The Company expects to contribute approximately $2.8 million to fund its Pension Plan in 2008.

As of March 31, 2008, the Company had made $0.5 million and $18,000 of contributions to the PBOP and SERP Plans, respectively, in 2008. The Company presently anticipates contributing an additional $2.0 million and $54,000 to the PBOP and SERP Plans, respectively, in 2008.

NOTE 9: INCOME TAXES

The Company bills its customers sales tax in Massachusetts and consumption tax in New Hampshire. These taxes are remitted to the appropriate departments of revenue in each state and are excluded from revenues on the Company's Consolidated Statements of Earnings.

The Company evaluated its tax positions at December 31, 2007 and for the current interim reporting period ended March 31, 2008 in accordance with FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48), an interpretation of FAS 109, and has concluded that no adjustment for recognition, derecognition, settlement and foreseeable future events to any unrecognized tax liabilities or assets as defined by FIN 48 is required. The Company does not have any unrecognized tax positions for which it is reasonably possible that the total amounts recognized will significantly change within the next 12 months. The Company remains subject to examination by Federal, Massachusetts and New Hampshire tax authorities for the tax periods ended December 31, 2004; December 31, 2005; and December 31, 2006. Income tax filings for the year ended December 31, 2007 have been extended and are due September 15, 2008. The Company classifies penalty and interest expense related to income tax liabilities as an income tax expense. There are no interest and penalties recognized in the statement of earnings or accrued on the balance sheets.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. *Controls and Procedures*

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company’s Form 10-K for the year-ended December 31, 2007 as filed with the Securities and Exchange Commission on February 12, 2008, other than the risks associated with the Company’s recently announced acquisition of Northern and Granite, as discussed in the Cautionary Statement section of Part I, Item 2 of this Quarterly Report on Form 10-Q for the quarter ended March 31, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no sales of unregistered equity securities by the Company for the fiscal period ended March 31, 2008.

Pursuant to the written trading plan under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), adopted by the Company on March 20, 2008, the Company periodically repurchases shares of its Common Stock on the open market related to Employee Length of Service Awards and the stock portion of the Directors’ annual retainer. The Company may suspend or terminate its Rule 10b5-1 trading plan at any time, so long as the suspension or termination is made in good faith and not as part of a plan or scheme to evade the prohibitions of Rule 10b-5 under the Exchange Act, or other applicable securities laws. There is no pool or maximum number of shares related to these purchases. There were no Company repurchases during the three months ended March 31, 2008.

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f))for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Unitil Reports First Quarter Earnings

Hampton, NH – April 23, 2008: Unitil Corporation (AMEX: UTL) (www.unitil.com) today announced net income of $3.3 million for the first quarter of 2008, an increase of $0.7 million over net income for the first quarter of 2007. Earnings per common share (EPS) were $0.57 for the three months ended March 31, 2008, an improvement of $0.11 per share, or 24%, over the first quarter of 2007.

Unitil's improved first quarter earnings in 2008 over 2007 were driven by higher gas sales margin and lower operating expenses, including the benefit from the proceeds of an insurance settlement associated with environmental remediation costs. These favorable factors were partially offset by higher amortization expenses and higher interest expense in the current year.

"We achieved a number of significant milestones in the first quarter of 2008 including the announcement of a Definitive Agreement with NiSource Inc. for the purchase of Northern Utilities and Granite State Gas Transmission," said Robert G. Schoenberger, Unitil's Chairman and Chief Executive Officer. "We also concluded an electric base rate case in Massachusetts providing an annualized revenue increase going forward of $2.1 million and achieved an important insurance settlement."

Unitil has filed with the New Hampshire and Maine Public Utilities Commission for approval of its acquisition of Northern Utilities for a purchase price of $160 million plus working capital. The transaction is expected to close in the fourth quarter of 2008.

The following table presents the significant items contributing to the improvement in earnings per share in the first quarter of 2008:

	Earnings Per Share
Three Months Ended March 31, 2007:	**$ 0.46**
Electric Sales Margin	(0.04)
Gas Sales Margin	0.10
Usource™ Sales Margin	0.01
Operation & Maintenance Expense	0.19
Depreciation, Amortization, Taxes & Other	(0.10)
Interest Expense, Net	(0.05)
Three Months Ended March 31, 2008:	**$ 0.57**

Total electric kilowatt (kWh) sales decreased 1.4% in the three month period ended March 31, 2008 compared to the same period in 2007. Gas sales in the three month period ended March 31, 2008 decreased 1.7% compared to the same period in 2007. The lower unit sales in 2008 compared to 2007 were driven by milder winter weather this year and lower average usage by our customers reflecting a slowing economy and energy conservation.

Electric sales margin was lower by $0.4 million in the three months ended March 31, 2008 compared to the same period in 2007 due to lower electric kWh sales volumes, partially offset by higher electric base rates.

Gas sales margin increased $0.9 million in the three months ended March 31, 2008 compared to the same period in 2007 reflecting higher gas base rates, implemented in 2007.

Usource™ revenues increased $0.1 million in the three month period ended March 31, 2008 over the comparable 2007 period.

Selected financial data for 2008 is presented in the following table:

Unitil Corporation - Condensed Financial Data

(Millions, except Per Share Data) (Unaudited)

	Three Months Ended March 31,		
	2008	**2007**	**Change**
Electric Kilowatt-Hours:			
Residential	182.4	184.0	(0.9%)
Commercial/Industrial	261.1	265.6	(1.7%)
Total Electric kWh Sales	**443.5**	**449.6**	**(1.4%)**
Gas Therms:			
Residential	4.8	4.9	(2.0%)
Commercial/Industrial	6.8	6.9	(1.4%)
Total Gas Therm Sales	**11.6**	**11.8**	**(1.7%)**
Electric Revenues	**$ 56.6**	**$ 62.7**	**$ (6.1)**
Purchased Electricity	43.5	49.2	(5.7)
Electric Sales Margin	**13.1**	**13.5**	**(0.4)**
Gas Revenues	**14.3**	**14.2**	**0.1**
Purchased Gas	9.0	9.8	(0.8)
Gas Sales Margin	**5.3**	**4.4**	**0.9**
Usource™ Sales Margin	**1.0**	**0.9**	**0.1**
Operation & Maintenance	4.7	6.5	(1.8)
Depreciation, Amortization, Taxes & Other	8.8	7.6	1.2
Interest Expense, Net	2.6	2.1	0.5
Net Income	**$ 3.3**	**$ 2.6**	**$ 0.7**
Earnings Per Share	**$ 0.57**	**$ 0.46**	

Total Operation & Maintenance (O&M) expenses decreased $1.8 million for the three month period ended March 31, 2008 compared to the same period in 2007. This decrease reflects a reduction to operating expenses of $2.8 million from the proceeds of an insurance settlement associated with environmental remediation costs. This reduction to operating expenses was partially offset by annual increases in salary, wage and benefit costs of $0.7 million, higher professional fees of $0.2 million and higher bad debt expenses of $0.1 million.

Depreciation, Amortization, Taxes & Other expenses increased $1.2 million in the three month period ended March 31, 2008 compared to the same period in 2007 primarily reflecting the amortization of $0.7 million of natural gas inventory carrying costs and higher income taxes on higher levels of pre-tax earnings in 2008 compared to 2007.

Interest Expense, Net increased $0.5 million in the three month period ended March 31, 2008 compared to the same period in 2007 primarily reflecting higher debt outstanding.

Also in the first quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

About Unitil

Unitil is a public utility holding company with subsidiaries providing electric service in New Hampshire and electric and gas service in Massachusetts and energy services throughout the Northeast. Its subsidiaries include Unitil Energy Systems, Inc., Fitchburg Gas and Electric Light Company, Unitil Power Corp., Unitil Realty Corp., Unitil Service Corp. and its non-regulated business segment Unitil Resources, Inc. Usource L.L.C. is a subsidiary of Unitil Resources, Inc. Usource™ is a registered trademark of Unitil Resources, Inc.

This press release contains forward-looking statements, which are subject to the inherent uncertainties in predicting future results and conditions. All statements, other than statements of historical fact, are forward-looking statements. Certain factors that could cause the actual results to differ materially from those projected in these forward-looking statements include, but are not limited to the following: variations in weather; changes in the regulatory environment; customers' preferences on energy sources; general economic conditions; increased competition; fluctuations in supply, demand, transmission capacity and prices for energy commodities; and other uncertainties, all of which are difficult to predict, and many of which are beyond the control of Unitil Corporation.

Table of Contents

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil's principal business is the retail distribution of electricity and natural gas through two utility subsidiaries: Unitil Energy System's Inc. (UES) and Fitchburg Gas and Electric Light Company (FG&E). UES is an electric utility with an operating franchise in the southeastern seacoast and capital city areas of New Hampshire. FG&E is a combination gas and electric utility with an operating franchise in the greater Fitchburg area of north central Massachusetts.

Unitil's two retail distribution utilities serve approximately 99,400 electric customers and 15,000 natural gas customers in their franchise areas. The retail distribution companies are pure distribution utilities with a combined investment in net utility plant of $251.1 million at June 30, 2008. Substantially all of Unitil's revenue and earnings are derived from regulated utility operations.

Unitil also conducts non-regulated operations principally through its Usource™ (Usource) subsidiary. Usource provides energy brokering and consulting services to large commercial and industrial customers in the northeastern United States. Unitil's other subsidiaries include Unitil Service and Unitil Realty, which provide centralized facilities, management and administrative services to Unitil's affiliated companies. Unitil's consolidated net income includes the earnings of the holding company and these subsidiaries.

On February 15, 2008, the Company entered into a Stock Purchase Agreement (Agreement) with NiSource Inc. (NiSource) and Bay Sate Gas Company (Bay State, which is a wholly owned utility subsidiary of NiSource), to acquire all of the outstanding stock of Northern Utilities, Inc. (Northern), and Granite State Gas Transmission, Inc. (Granite) for $160 million in cash, which amount is subject to a working capital adjustment. The transaction is expected to be financed by newly issued common stock and debt.

Northern's principal business is the retail distribution of natural gas to approximately 53,000 customers located in 44 coastal New Hampshire and southern Maine communities. Portions of Northern's natural gas service territory are contiguous and overlapping with Unitil's electric distribution service territory in New Hampshire. Granite's principal business is a natural gas transmission company, principally engaged in the business of providing natural gas transportation services to Northern for its access to natural gas pipeline supplies.

Consummation of the acquisition is subject to various closing conditions, including but not limited to the receipt of requisite regulatory approvals from certain federal and state public utility, antitrust and other regulatory authorities. It is currently anticipated that the acquisition will be consummated in the fourth quarter of 2008. However, no assurance can be given that the acquisition will occur, or, the timing of its completion.

RATES AND REGULATION

Unitil's utility operations related to wholesale and interstate business activities are regulated by the Federal Energy Regulatory Commission (FERC). The retail distribution utilities, UES and FG&E, are subject to regulation by the New Hampshire Public Utilities Commission (NHPUC) and the Massachusetts Department of Public Utilities (MDPU), formerly the Massachusetts Department of Telecommunications and Energy, respectively, in regards to their rates, issuance of securities and other accounting and operational matters. Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position.

Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in their franchise areas, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on a historical test year, in addition to earning a return on their capital investment in utility assets.

As a result of the implementation of retail choice in New Hampshire and Massachusetts, Unitil's customers are free to contract for their supply of electricity with third-party suppliers. The retail distribution utilities provide for the delivery of that supply of electricity over their distribution systems at regulated rates. Both UES and FG&E continue to provide basic or default electric supply service to those customers who do not obtain their supply from third-party suppliers, with the costs associated with electricity supplied by the Company being recovered on a pass-through basis under periodically-adjusted rates.

As a result of the introduction of retail choice for all natural gas customers in Massachusetts, FG&E's customers are free to contract for their supply of natural gas with third-party suppliers. FG&E continues to provide natural gas supply services to those customers who do not obtain their supply from third-party suppliers. The costs associated with natural gas supplied by FG&E are recovered on a pass-through basis under periodically adjusted rates.

CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without limitation, statements regarding the financial position, business strategy and other plans and objectives for the Company's future operations, are forward-looking statements.

These statements include declarations regarding the Company's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include the following:

- Variations in weather;
- Changes in the regulatory environment;
- Customers' preferences on energy sources;
- Interest rate fluctuation and credit market concerns;
- General economic conditions;
- Fluctuations in supply, demand, transmission capacity and prices for energy commodities;
- Increased competition; and
- Customers' future performance under multi-year energy brokering contracts.
- Risks associated with the acquisition of Northern and Granite, discussed above include:
    - Successful integration of the acquired business into the Company;
    - Receipt of regulatory approval of the transaction;
    - Ability to finance transaction at reasonable terms; and
    - Acquisition costs expended for banker fees, legal fees and other acquisition related expenses would adversely affect the Company's financial condition if the acquisition is not completed;

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements. There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2007 as filed with the Securities and Exchange Commission on February 12, 2008, other than the risks disclosed above associated with the acquisition of Northern and Granite.

RESULTS OF OPERATIONS

The following section of MD&A compares the results of operations for each of the two fiscal periods ended June 30, 2008 and June 30, 2007 and should be read in conjunction with the accompanying Consolidated Financial Statements and the accompanying Notes to Consolidated Financial Statements included in Item 1 of this report.

Earnings Overview

The Company's Earnings Applicable to Common Shareholders (Net Income) was $1.6 million for the second quarter of 2008, compared to net income of $1.7 million for the second quarter of 2007. Earnings per common share (EPS) were $0.28 for the three months ended June 30, 2008 compared with $0.30 in the second quarter of 2007. Earnings for the second quarter of 2008 reflect higher gas utility sales margins and lower interest expense offset by higher operating expenses and depreciation in the quarter. For the six months ended June 30, EPS were $0.85 for 2008 compared to $0.76 for 2007, an increase of $0.09 per share, or 12%.

The following table presents the significant items (discussed below) contributing to the change in earnings per share in the three and six month periods ended June 30, 2008:

2008 Earnings Per Share vs. 2007

		Period Ended June 30,	
		QTD	**YTD**
	2007	**$ 0.30**	**$ 0.76**
Electric Sales Margin		---	(0.04)
Gas Sales Margin		0.02	0.12
Usource Sales Margin		(0.01)	---
Operation & Maintenance Expense		(0.02)	0.17
Depreciation, Amortization & Other		(0.02)	(0.12)
Interest Expense, Net		0.01	(0.04)
	2008	**$ 0.28**	**$ 0.85**

Unitil's total electric kilowatt (kWh) sales decreased 3.1% and 2.2% in the three and six month periods ended June 30, 2008, respectively compared to the same periods in 2007. Natural gas sales in the three and six month periods ended June 30, 2008 decreased 4.6% and 2.2%, respectively, compared to the same periods in 2007. The lower unit sales in 2008 compared to 2007 reflect a milder winter heating season this year and lower average usage by our customers reflecting a slowing economy and energy conservation.

Electric sales margin was flat in the three month period ended June 30, 2008 compared to the same period in 2007. For the six month period ended June 30, 2008, electric sales margin decreased $0.4 million compared to the same period in 2007. The decrease in electric sales margin primarily reflects lower sales volumes, which was partially offset by higher electric base rates, implemented in March of 2008.

Natural gas sales margin increased $0.2 million and $1.1 million in the three and six months ended June 30, 2008, respectively, compared to the same periods in 2007 primarily reflecting higher gas base rates, implemented in November of 2007, partially offset by lower sales volumes.

Usource revenues decreased by $0.1 million in the three month period ended June 30, 2008 compared to the same period in 2007 and were flat in the six month period ended June 30, 2008 compared to the same period in 2007.

Total O&M expenses increased $0.2 million for the three month period ended June 30, 2008 compared to the same period in 2007. The increase in the three month period reflects higher salary and benefit costs of $0.4 million and higher bad debt expense of $0.1 million partially offset by lower utility operating costs of $0.1 million and lower professional fees and all other expenses of $0.2 million. For the six month period ended June 30, 2008, O&M expenses decreased $1.6 million compared to the same period in 2007, including a reduction of $2.8 million from the proceeds of an insurance settlement and lower other utility operating costs of $0.3 million, partially offset by increases in salary and benefit costs of $1.1 million, higher bad debt expenses of $0.2 million and all other expenses, net of $0.2 million.

Depreciation, Amortization, Taxes & Other expenses increased $0.1 million and $1.3 million in the three and six month periods ended June 30, 2008 compared to the same periods in 2007, primarily reflecting the amortization, in the first quarter of 2008, of $0.7 million of natural gas inventory carrying costs deferred under a previous regulatory ruling and higher depreciation on normal utility plant additions.

Interest Expense, Net decreased $0.1 million for the three month period ended June 30, 2008 compared to the same period in 2007. The decrease in the three month period reflects lower short term borrowings. For the six month period ended June 30, 2008, Interest Expense, Net increased $0.4 million compared to the same period in 2007, reflecting higher overall debt outstanding.

Also in the second quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

A more detailed discussion of the Company's results of operations for the three and six months ended June 30, 2008 and a period-to-period comparison of changes in financial position are presented below.

Balance Sheet

The Company's investment in Net Utility Plant increased by $7.3 million as of June 30, 2008 compared to June 30, 2007. This increase was due to capital expenditures related to UES' and FG&E's electric and gas distribution systems, including expenditures of approximately $1.2 million for the Company's Advanced Metering Infrastructure (AMI) project.

Regulatory Assets decreased $31.1 million as of June 30, 2008 compared to June 30, 2007, primarily reflecting current year cost recoveries. A significant portion of this decrease is matched by a corresponding decrease of $19.9 million in Power Supply Contract Obligations. The remaining decrease primarily reflects lower levels of Regulatory Assets associated with deferred taxes and retirement benefit obligations as well as recoveries of deferred charges.

Electric Sales, Revenues and Margin

Kilowatt-hour Sales – Unitil's total electric kilowatt (kWh) sales decreased 3.1% and 2.2% in the three and six month periods ended June 30, 2008, respectively compared to the same periods in 2007. Electric kWh sales to residential customers in the three and six month periods ended June 30, 2008 decreased 3.0% and 1.8%, respectively, compared to the same periods in 2007 while sales to C&I customers decreased 3.2% and 2.5%, respectively, in those periods compared to the same periods in 2007. The lower kWh sales in 2008 compared to 2007 were primarily driven by lower average usage by our customers reflecting a slowing economy and energy conservation.

The following table details total kWh sales for the three and six months ended June 30, 2008 and 2007 by major customer class:

kWh Sales (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2008	2007	Change	% Change	**2008**	2007	Change	% Change
Residential	**147.5**	152.0	(4.5)	(3.0%)	**329.9**	335.9	(6.0)	(1.8%)
Commercial / Industrial	**254.0**	262.5	(8.5)	(3.2%)	**515.1**	528.2	(13.1)	(2.5%)
Total	**401.5**	414.5	(13.0)	(3.1%)	**845.0**	864.1	(19.1)	(2.2%)

Electric Operating Revenues and Sales Margin - The following table details total Electric Operating Revenues and Sales Margin for the three and six month periods ended June 30, 2008 and 2007:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2008	2007	$ Change	% Change[1]	**2008**	2007	$ Change	% Change[1]
Electric Operating Revenue:								
Residential	**$ 25.9**	$ 25.9	$ ---	---	**$ 56.2**	$ 58.6	$ (2.4)	(2.1%)
Commercial / Industrial	**26.1**	25.8	0.3	0.6%	**52.4**	55.8	(3.4)	(3.0%)
Total Electric Operating Revenue	**$ 52.0**	$ 51.7	$ 0.3	0.6%	**$ 108.6**	$ 114.4	$ (5.8)	(5.1%)
Cost of Electric Sales:								
Purchased Electricity	**$ 36.8**	$ 36.3	$ 0.5	1.0%	**$ 79.7**	$ 84.5	$ (4.8)	(4.3%)
Conservation & Load Management	**0.8**	1.0	(0.2)	(0.4%)	**1.4**	2.0	(0.6)	(0.5%)
Electric Sales Margin	**$ 14.4**	$ 14.4	$ ---	---	**$ 27.5**	$ 27.9	$ (0.4)	(0.3%)

[1] Represents change as a percent of Total Electric Operating Revenue.

Total Electric Operating Revenues, increased by $0.3 million, or 0.6%, and decreased by $5.8 million, or 5.1%, in the three and six month periods ended June 30, 2008, respectively, compared to the same periods in 2007. Total Electric Operating Revenues include the recovery of costs of electric sales, which are recorded as Purchased Electricity and Conservation & Load Management (C&LM) in Operating Expenses. The net increase in Total Electric Operating Revenues in the three month period reflects higher Purchased Electricity costs of $0.5 million partially offset by lower C&LM revenues of $0.2 million. The net decrease in Total Electric Operating Revenues in the six month period reflects lower Purchased Electricity costs of $4.8 million, lower C&LM revenues of $0.6 million and lower sales margin of $0.4 million.

Purchased Electricity and C&LM revenues increased a net $0.3 million, or 0.6%, and decreased $5.4 million, or 4.8%, of Total Electric Operating Revenues in the three and six month periods ended June 30, 2008, respectively, compared to the same periods in 2007. The increase in the three month period primarily reflects higher electric commodity prices, partially offset by lower sales volumes. The decrease in the six month period reflects lower sales volumes, an increase in the amount of electricity purchased by customers directly from third-party suppliers and lower spending on energy efficiency and conservation programs. Purchased Electricity revenues include the recovery of the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin was flat in the three month period ended June 30, 2008 compared to the same period in 2007. For the six month period ended June 30, 2008, electric sales margin decreased $0.4 million compared to the same period in 2007. The decrease in electric sales margin primarily reflects lower sales volumes, partially offset by higher electric base rates, implemented in March of 2008.

Gas Sales, Revenues and Margin

Therm Sales – Unitil's total therm sales of natural gas in the three and six month periods ended June 30, 2008 decreased 4.6% and 2.2%, respectively, compared to the same periods in 2007. Gas sales to residential customers in the three and six month periods ended June 30, 2008 decreased 8.7% and 4.2%, respectively, compared to the same periods in 2007 while sales to C&I customers decreased 2.4% and 0.9%, respectively, in those periods compared to the same periods in 2007. The decrease in gas sales in 2008 reflects a milder winter heating season this year and lower average usage by our customers reflecting a slowing economy and energy conservation.

The following table details total firm therm sales for the three and six months ended June 30, 2008 and 2007, by major customer class:

Therm Sales (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2008	2007	Change	% Change	**2008**	2007	Change	% Change
Residential	**2.1**	2.3	(0.2)	(8.7%)	**6.9**	7.2	(0.3)	(4.2%)
Commercial / Industrial	**4.1**	4.2	(0.1)	(2.4%)	**10.9**	11.0	(0.1)	(0.9%)
Total	**6.2**	6.5	(0.3)	(4.6%)	**17.8**	18.2	(0.4)	(2.2%)

Gas Operating Revenues and Sales Margin – The following table details total Gas Operating Revenues and Sales Margin for the three and six months ended June 30, 2008 and 2007:

Gas Operating Revenues and Sales Margin (millions)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2008	2007	$ Change	% Change(1)	**2008**	2007	$ Change	% Change(1)
Gas Operating Revenue:								
Residential	**$ 3.5**	$ 3.6	$ (0.1)	(1.6%)	**$ 11.6**	$ 11.7	$ (0.1)	(0.4%)
Commercial / Industrial	**3.1**	2.8	0.3	4.7%	**9.3**	8.9	0.4	1.9%
Total Gas Operating Revenue	**$ 6.6**	$ 6.4	$ 0.2	3.1%	**$ 20.9**	$ 20.6	$ 0.3	1.5%
Cost of Gas Sales:								
Purchased Gas	**$ 3.9**	$ 3.9	$ ---	---	**$ 12.9**	$ 13.7	$ (0.8)	(3.8%)
Conservation & Load Management	**0.1**	0.1	---	---	**0.1**	0.1	---	---
Gas Sales Margin	**$ 2.6**	$ 2.4	$ 0.2	3.1%	**$ 7.9**	$ 6.8	$ 1.1	5.3%

(1) Represents change as a percent of Total Gas Operating Revenue.

Total Gas Operating Revenues increased $0.2 million, or 3.1%, and $0.3 million, or 1.5%, in the three and six month periods ended June 30, 2008, respectively, compared to the same periods in 2007. Total Gas Operating Revenues include the recovery of the cost of sales, which are recorded as Purchased Gas and C&LM in Operating Expenses. The net increase in Total Gas Operating Revenues in the three month period reflects higher sales margin of $0.2 million. The net increase in Total Gas Operating Revenues in the six month period reflects higher sales margin of $1.1 million, partially offset by lower Purchased Gas costs of $0.8 million.

Purchased Gas and C&LM revenues were flat in the three month period ended June 30, 2008 compared to the same period in 2007 and decreased $0.8 million, or 3.8% of Total Gas Operating Revenues in the six month period ended June 30, 2008 compared to the same period in 2007. The decrease in the six month period reflects lower sales volumes and an increase in the amount of natural gas purchased by customers directly from third-party suppliers, partially offset by higher natural gas commodity prices. Purchased Gas revenues include the recovery of the cost of gas supply as well as the other energy supply related costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Natural gas sales margin increased $0.2 million and $1.1 million in the three and six months ended June 30, 2008, respectively, compared to the same periods in 2007 primarily reflecting higher gas base rates, implemented in November of 2007, partially offset by lower sales volumes.

Operating Revenue - Other

The following table details total Other Revenue for the three and six months ended June 30, 2008 and 2007:

Other Revenue (000's)

	Three Months Ended June 30,				Six Months Ended June 30,			
	2008	2007	$ Change	% Change	**2008**	2007	$ Change	% Change
Other	**$ 0.8**	$ 0.9	$ (0.1)	(11.1%)	**$ 1.8**	$ 1.8	---	---
Total Other Revenue	**$ 0.8**	$ 0.9	$ (0.1)	(11.1%)	**$ 1.8**	$ 1.8	---	---

Total Other Revenue decreased $0.1 million, or 11.1% in the three month period ended June 30, 2008 compared to the same period in 2007. The decrease reflects lower revenues from the Company's non-regulated energy brokering business, Usource. Total Other Revenues for the six month period ended June 30, 2008 were flat compared to the same period in 2007.

Operating Expenses

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity increased $0.5 million, or 1.4%, and decreased $4.8 million, or 5.7%, in the three and six month periods ended June 30, 2008, respectively, compared to the same periods in 2007. The increase in the three month period primarily reflects higher electric commodity prices, partially offset by lower sales volumes. The decrease in the six month period reflects lower sales volumes, an increase in the amount of electricity purchased by customers directly from third-party suppliers and lower spending on energy efficiency and conservation programs. The Company recovers the costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas expenses were flat in the three month period ended June 30, 2008 compared to the same period in 2007 and decreased $0.8 million, or 5.8% in the six month period ended June 30, 2008 compared to the same period in 2007. The decrease in the six month period reflects lower sales volumes and an increase in the amount of natural gas purchased by customers directly from third-party suppliers, partially offset by higher natural gas commodity prices. The Company recovers the costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Operation and Maintenance (O&M) – O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. Total O&M expenses increased $0.2 million for the three month period ended June 30, 2008 compared to the same period in 2007. The increase in the three month period reflects higher salary and benefit costs of $0.4 million and higher bad debt expense of $0.1 million partially offset by lower utility operating costs of $0.1 million and lower professional fees and all other expenses of $0.2 million. For the six month period ended June 30, 2008, O&M expenses decreased $1.6 million compared to the same period in 2007, including a reduction of $2.8 million from the proceeds of an insurance settlement and lower other utility operating costs of $0.3 million, partially offset by increases in salary and benefit costs of $1.1 million, higher bad debt expenses of $0.2 million and all other expenses, net of $0.2 million.

Conservation & Load Management – C&LM expenses are associated with the development, management, and delivery of the Company's Energy Efficiency programs. Energy Efficiency programs are designed, in conformity with state regulatory requirements, to help consumers use natural gas and electricity more efficiently and thereby decrease their energy costs. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 90% of these costs are related to electric operations and 10% to gas operations.

Total C&LM expenses decreased $0.2 million, or 18.2% and $0.6 million, or 28.6%, in the three and six month periods ended June 30, 2008 compared to the same periods in 2007. These changes reflect the timing of spending on the implementation of Energy Efficiency programs. These costs are collected from customers on a pass through basis and therefore, fluctuations in program costs have no impact on Net Income.

Depreciation, Amortization and Taxes

Depreciation and Amortization - Depreciation and Amortization expense increased by $0.1 million, or 2.3% and $0.8 million, or 9.0% in the three and six month periods ended June 30, 2008, respectively, compared to the same periods in 2007. The increase in the three month period primarily reflects higher depreciation on normal utility plant additions, partially offset by lower amortization on computer systems. The increase in the six month period primarily reflects the amortization, in the first quarter of 2008, of $0.7 million of natural gas inventory carrying costs deferred under a previous regulatory ruling and higher depreciation on normal utility plant additions.

Local Property and Other Taxes - Local Property and Other Taxes in the three month period ended June 30, 2008 were flat compared to the same period in 2007 and increased by $0.2 million, or 6.9% in the six month period ended June 30, 2008 compared to the same period in 2007. This increase was due to higher property tax rates on increased property assessments and higher payroll taxes on higher compensation expenses.

Federal and State Income Taxes - Federal and State Income Taxes were lower by $0.1 million in the three month period ended June 30, 2008 compared to the same period in 2007 reflecting lower pre-tax earnings. Federal and State Income Taxes were higher by $0.1 million in the six month period ended June 30, 2008 compared to the same period in 2007 reflecting higher pre-tax earnings.

Other Non-operating Expenses (Income)

Other Non-operating Expenses (Income) increased by less than $0.1 million and by $0.2 million in the three and six month periods ended June 30, 2008 compared to the same periods in 2007. The increase in the six month period reflects an adjustment of $0.1 million in conjunction with the Company's recently approved electric base distribution rate increase in Massachusetts.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. Certain reconciling rate mechanisms used by the Company's distribution operating utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

The Company operates a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the Company's tariff, interest is accrued on these balances and will produce either interest income or interest expense. Interest income is recorded on an under-collection of costs, which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (Millions)	**Three Months Ended June 30,**			**Six Months Ended June 30,**		
	2008	2007	Change	**2008**	2007	Change
Interest Expense						
Long-term Debt	$ 2.9	$ 2.8	$ 0.1	$ 5.7	$ 5.3	$ 0.4
Short-term Debt	0.1	0.3	(0.2)	0.4	0.7	(0.3)
Regulatory Liabilities	---	0.2	(0.2)	0.1	0.3	(0.2)
Subtotal Interest Expense	3.0	3.3	(0.3)	6.2	6.3	(0.1)
Interest Income						
Regulatory Assets	(0.6)	(0.7)	0.1	(1.3)	(1.5)	0.2
AFUDC and Other	(0.1)	(0.2)	0.1	---	(0.3)	0.3
Subtotal Interest Income	(0.7)	(0.9)	0.2	(1.3)	(1.8)	0.5
Total Interest Expense, Net	$ 2.3	$ 2.4	$ (0.1)	$ 4.9	$ 4.5	$ 0.4

Interest Expense, Net decreased $0.1 million for the three month period ended June 30, 2008 compared to the same period in 2007. The decrease in the three month period reflects lower short term interest expense. For the six month period ended June 30, 2008, Interest Expense, Net increased $0.4 million compared to the same period in 2007, reflecting higher overall debt outstanding. Interest expense on long-term borrowings increased in both the three and six month periods in 2008 compared to 2007 due to the issuance of new fixed rate long-term debt. On May 2, 2007, Unitil Corporation issued and sold $20 million of 6.33% Senior Long-Term Notes, due May 1, 2022, to institutional investors in the form of a private placement. The Company utilized the proceeds from the long-term Note financing to refinance existing short-term debt and for other corporate purposes of the Company's principal utility subsidiaries. The resulting reduction in average daily short-term bank borrowings lowered short-term debt interest expense in both the three and six month periods in 2008 compared to 2007. An adjustment of $0.2 million in the first quarter of 2008 related to earnings on funds used for capital projects ordered in conjunction with the Company's recently approved electric base distribution rate increase in Massachusetts and lower carrying charges earned on regulatory assets, which are adjusted periodically to reflect prevailing interest rates, also contributed to the increase in Interest Expense, Net in the six month period ended June 30, 2008 compared to the same period in 2007.

CAPITAL REQUIREMENTS

Sources of Capital

Unitil requires capital to fund utility plant additions, working capital and other utility expenditures recovered in subsequent and future periods through regulated rates. The capital necessary to meet these requirements is derived primarily from internally-generated funds, which consist of cash flows from operating activities, excluding payment of dividends. The Company initially supplements internally generated funds through bank borrowings, as needed, under unsecured short-term bank lines. Periodically, the Company replaces portions of its short-term debt with long-term financings more closely matched to the long-term nature of its utility assets.

The continued availability of these methods of financing, as well as the Company's choice of a specific form of security, will depend on many factors, including, but not limited to: security market conditions; general economic climate; regulatory approvals; the ability to meet covenant issuance restrictions, if any; the level of the Company's earnings, cash flows and financial position; and the competitive pricing offered by financing sources.

At June 30, 2008, Unitil had $37 million in unsecured revolving lines of credit through two banks. The Company had short-term debt outstanding through bank borrowings of $12.8 million and $9.5 million at June 30, 2008 and June 30, 2007, respectively. In addition, Unitil had approximately $4.3 million in cash at June 30, 2008.

On February 15, 2008, the Company entered into a Stock Purchase Agreement with NiSource and Bay State to acquire all of the outstanding stock of Northern Utilities, Inc. and Granite State Gas Transmission, Inc. The Company has a commitment letter to enter into a senior unsecured bridge facility, which may be used to finance this transaction. The Company anticipates either financing the initial acquisition or refinancing the bridge facility with the issuance of a combination of long-term debt and common equity securities.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to the duration of the contracts, which range from less than one month to two and one-half years. As of June 30, 2008, there were approximately $9.0 million of guarantees outstanding and the longest term guarantee extends through October 31, 2009.

The tables below summarize the major sources and uses of cash (in millions) for the three months ended June 30, 2008, compared to the same period in 2007.

Cash Provided by Operating Activities	**$ 19.8**	$ 17.0

Cash Provided by Operating Activities - Cash Provided by Operating Activities was $19.8 million during the six months ended June 30, 2008, an increase of $2.8 million over the comparable period in 2007. Cash flow from Net Income, adjusted for non-cash charges to depreciation, amortization and deferred taxes of $1.2 million, was $4.9 million higher in the first six months of 2008 compared to 2007. Working Capital related cash flows decreased by $0.6 million during the first six months of 2008 compared to the same period in 2007. Deferred Restructuring Charges provided $0.8 million in cash in the second quarter of 2008 compared to the same period in 2007. These charges were deferred in prior periods for collection in current rates. All other changes in operating activities were a net $2.3 million in uses of cash in the first six months of 2008 compared to 2007.

Cash (Used in) Investing Activities	**$ (10.2)**	$ (19.6)

Cash (Used in) Investing Activities - Cash (Used in) Investing Activities was $10.2 million for the six months ended June 30, 2008, a decrease in capital spending of $9.4 million over the comparable period in 2007. This is mainly due to the funding in 2007 and the completion in 2008 of the Company's Advanced Metering Infrastructure ("AMI") project. In the first six months of 2007, capital expenditures included approximately $5.4 million of cash outlays for investment in the AMI project. Capital expenditure projections are subject to changes during the fiscal year.

Cash Provided by (Used in) Financing Activities	**$ (9.9)**	$ 0.2

Cash Provided by (Used in) Financing Activities - Cash (Used in) Financing Activities was $9.9 million in the three months ended June 30, 2008, reflecting an increase in the use of cash of $10.1 million over the comparable period in 2007. In the second quarter of 2007, Unitil received cash proceeds of $20.0 million from the issuance of Senior Long-term Notes, which was used to pay down Short-term Debt. As a result, the Company utilized an additional $10.5 million in short-term debt for the first six months of 2008 compared to the same period in 2007. All other cash flows used in other financing activities aggregated to a net $0.4 million increase in the first six months of 2008 over the comparable period in 2007.

CRITICAL ACCOUNTING POLICIES

The preparation of the Company's financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, management is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgments, the financial statements of the Company could be materially different than reported. The following is a summary of the Company's most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company's significant accounting policies, refer to the Note 1 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 12, 2008.

Regulatory Accounting - The Company's principal business is the distribution of electricity and natural gas by the retail distribution companies: UES and FG&E. Both UES and FG&E are subject to regulation by the FERC and FG&E is regulated by the MDPU and UES is regulated by the NHPUC. Accordingly, the Company uses the provisions of FASB Statement No. 71, "Accounting for the Effects of Certain Types of Regulation." (SFAS No. 71). In accordance with SFAS No. 71, the Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

The Company's principal regulatory assets and liabilities are detailed on the Company's Consolidated Balance Sheet and a summary of the Company's Regulatory Assets is provided below. The Company receives a return on investment on its regulated assets for which a cash outflow has been made.

Regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. The Company believes it is probable that its regulated utility companies will recover their investments in long-lived assets, including regulatory assets. The Company also has commitments under long-term contracts for the purchase of electricity and natural gas from various suppliers. The annual costs under these contracts are included in Purchased Electricity and Purchased Gas in the Consolidated Statements of Earnings and these costs are recoverable in current and future rates under various orders issued by the FERC, MDPU and NHPUC.

Regulatory Assets consist of the following (millions)	June 30, 2008	June 30, 2007	December 31, 2007
Power Supply Buyout Obligations	**$ 62.7**	$ 82.6	$ 72.7
Deferred Restructuring Costs	**28.8**	30.1	30.5
Generation-related Assets	**1.2**	2.1	1.6
Subtotal – Restructuring Related Items	**92.7**	114.8	104.8
Retirement Benefit Obligations	**35.1**	37.2	35.1
Income Taxes	**13.8**	18.3	14.6
Environmental Obligations	**11.3**	13.1	13.1
Other	**3.3**	3.9	2.9
Total Regulatory Assets	**$ 156.2**	$ 187.3	$ 170.5

If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of SFAS No. 71. If unable to continue to apply the provisions of SFAS No. 71, the Company would be required to apply the provisions of FASB Statement No. 101, "Regulated Enterprises – Accounting for the Discontinuation of Application of Financial Accounting Standards Board Statement No. 71." In the Company's opinion, its regulated operations will be subject to SFAS No. 71 for the foreseeable future.

Utility Revenue Recognition - Regulated utility revenues are based on rates and charges approved by federal and state regulatory commissions. Revenues related to the sale of electric and gas service are recorded when service is rendered or energy is delivered to customers. The determination of energy sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts - The Company recognizes a Provision for Doubtful Accounts each month. The amount of the monthly Provision is based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior years. Account write-offs, net of recoveries, are processed monthly. At the end of each month, an analysis of the delinquent receivables is performed and the adequacy of the Allowance for Doubtful Accounts is reviewed. The analysis takes into account an assumption about the cash recovery of delinquent receivables and also uses calculations related to customers who have chosen payment plans to resolve their arrears. The analysis also calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company is authorized by regulators to recover the supply-related portion of its written-off accounts from customers through periodically reconciling rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis, including expected fuel assistance payments from governmental authorities and the level of customers enrolling in payment plans with the Company. Also, the Company has experienced periods when state regulators have extended the periods during which certain standard credit and collection activities of utility companies are suspended. In periods when account write-offs exceed estimated levels, the Company adjusts the Provision for Doubtful Accounts to maintain an adequate Allowance for Doubtful Accounts balance. It has been the Company's experience that the assumptions it has used in evaluating the adequacy of the Allowance for Doubtful Accounts have proven to be reasonably accurate.

Retirement Benefit Obligations - The Company sponsors the Unitil Corporation Retirement Plan (Pension Plan), which is a defined benefit pension plan covering substantially all of its employees. The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (SERP), covering certain executives of the Company and an employee 401(k) savings plan. Additionally, the Company

sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan), primarily to provide health care and life insurance benefits to retired employees.

In September 2006, the FASB issued FASB Statement No. 158, “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans”, (SFAS No. 158), an amendment of SFAS No. 87, “Employers’ Accounting for Pensions”, SFAS No. 88, “Employers’ Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits,” SFAS No. 106, “Employers’ Accounting for Postretirement Benefits other than Pensions” and SFAS No. 132(R), “Employers’ Disclosures about Pensions and Other Postretirement Benefits.” SFAS No. 158 requires companies to record on their balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas retail rates.

The Company’s reported costs of providing retirement benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. The Company’s health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. The Company’s RBO are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future costs. The Company’s RBO may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the Company’s RBO.

If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's financial statements. The discount rate assumptions used in determining retirement plan costs and retirement plan obligations are based on a market average of long-term bonds that receive one of the two highest ratings given by a recognized rating agency. For the years ended December 31, 2007 and 2006, a change in the discount rate of 0.25% would have resulted in an increase or decrease of approximately $200,000 in the Net Periodic Benefit Cost for the Pension Plan. For the years ended December 31, 2007 and 2006, a 1.0% increase in the assumption of health care cost trend rates would have resulted in increases in the Net Periodic Benefit Cost for the PBOP Plan of $690,000 and $683,000, respectively. Similarly, a 1.0% decrease in the assumption of health care cost trend rates for those same time periods would have resulted in decreases in the Net Periodic Benefit Cost for the PBOP Plan of $539,000 and $530,000, respectively. (See Note 8)

Income Taxes - Provisions for income taxes are calculated in each of the jurisdictions in which the Company operates for each period for which a statement of income is presented. This process involves estimating the Company’s current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deductions of expenses and recognition of taxable income for tax and book accounting purposes. These temporary differences result in deferred tax assets and liabilities, which are included in the Company’s consolidated balance sheets. The Company accounts for income tax assets, liabilities and expenses in accordance with FASB Statement No. 109, “Accounting for Income Taxes” (SFAS No. 109) and under FASB Interpretation No. 48, “Accounting for Uncertainty in Income Taxes” (FIN 48), an interpretation of FAS 109.

Depreciation - Depreciation expense is calculated on a group straight-line basis based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company’s fixed assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements.

Commitments and Contingencies - The Company’s accounting policy is to record and/or disclose commitments and contingencies in accordance with SFAS No. 5. SFAS No. 5 applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. As of June 30, 2008, the Company is not aware of any material commitments or contingencies other than those disclosed in the Commitments and Contingencies footnote to the Company’s consolidated financial statements below.

Refer to “Recently Issued Accounting Pronouncements in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

There are approximately 100 employees of the Company represented by labor unions. In May 2005, the Company reached agreements with its bargaining units for new five-year contracts, effective June 1, 2005. These agreements replace contracts that expired on May 31, 2005.

INTEREST RATE RISK

The majority of the Company’s debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new long-term debt securities issued by the Company. In addition, the Company’s short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease the Company’s interest expense in future periods. For example, if the Company had an average amount of short-term debt outstanding of $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000 (pre-tax). The average interest rates on the Company’s short-term borrowings for the three months ended June 30, 2008 and June 30, 2007 were 2.84% and 5.77%, respectively. The average interest rates on the Company’s short-term borrowings for the six months ended June 30, 2008 and June 30, 2007 were 3.40% and 5.77%, respectively.

MARKET RISK

Although Unitil's utility operating companies are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

UNITIL CORPORATION AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three and six months ended June 30, 2008 are not necessarily indicative of results to be expected for the year ending December 31, 2008. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2007, as filed with the SEC on February 12, 2008, for a description of the Company's Basis of Presentation.

Nature of Operations - Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the Securities and Exchange Commission (SEC). As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (UES), Fitchburg Gas and Electric Light Company (FG&E), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

Unitil's principal business is the retail distribution of electricity in the southeastern seacoast and capital city areas of New Hampshire and the retail distribution of both electricity and natural gas in the greater Fitchburg area of north central Massachusetts, through the Company's two wholly-owned subsidiaries, UES and FG&E, collectively referred to as the retail distribution utilities.

A third utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for UES. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of UES on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve UES' customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service, Unitil Realty and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-regulated subsidiary. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Recently Issued Pronouncements – In May 2008, the FASB issued FASB Statement No. 162, "The Hierarchy of Generally Accepted Accounting Principles", (SFAS No. 162), effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board's amendments to AU Section 411. SFAS No. 162 identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. The Company will adopt SFAS No. 162 when it is approved and does not expect it to have any impact on its financial statements.

In March 2008, the FASB issued FASB Statement No. 161, “Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133” (SFAS No. 161), effective for fiscal years and interim periods beginning after November 15, 2008, with early adoption allowed. SFAS No. 161 amends and expands the disclosure requirements of SFAS No. 133 with the intent to provide users of financial statements with an enhanced understanding of an entity’s use of derivative instruments and the effect of those derivative instruments on an entity’s financial statements. The Company adopted SFAS No. 161 and there was no impact on its financial statements.

In December 2007, the FASB issued FASB Statement No. 141 (Revised 2007), “Business Combinations” (SFAS No. 141R), effective prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. SFAS No. 141R establishes principles and requirements on how an acquirer recognizes and measures in its financial statements identifiable assets acquired, liabilities assumed, noncontrolling interests in the acquiree, goodwill or gain from a bargain purchase and accounting for transaction costs. Additionally, SFAS No. 141R determines what information must be disclosed to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The Company will adopt SFAS No. 141R upon its effective date and expects the adoption to affect any business combinations effected on or subsequent to that date.

In September 2006, the FASB issued FASB Statement No. 157, “Fair Value Measurements”, (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Certain requirements of SFAS No. 157 are effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The effective date for other requirements of SFAS No. 157 has been deferred for one year by the FASB. The Company adopted the sections of SFAS No. 157 which are effective for fiscal years beginning after November 15, 2007 and there was no additional impact on the Company’s Consolidated Financial Statements. The Company’s fixed rate long-term debt falls under the fair value reporting requirements of SFAS No. 157. Accordingly, the Company has estimated the fair value of its long-term debt as of June 30, 2008 based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities (See Note 4). The Company does not expect that the adoption of the deferred sections of SFAS No. 157 will have an impact on the Company’s Consolidated Financial Statements.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount
06/19/08	08/15/08	08/01/08	$ 0.345
03/20/08	05/15/08	05/01/08	$ 0.345
01/17/08	02/15/08	02/01/08	$ 0.345
09/13/07	11/15/07	11/01/07	$ 0.345
06/21/07	08/15/07	08/01/07	$ 0.345
03/22/07	05/15/07	05/01/07	$ 0.345
01/18/07	02/15/07	02/01/07	$ 0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

During the first six months of 2008, the Company sold 14,889 shares of its Common Stock, at an average price of $27.76 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $413,000 were used to reduce short-term borrowings.

During the first six months of 2007, the Company sold 19,199 shares of its Common Stock, at an average price of $26.59 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $511,000 were used to reduce short-term borrowings.

Also, in the second quarter of 2008, the Company issued and sold 3,000 shares of its Common Stock, at an average price of $24.63 per share, in connection with the exercise of stock options under the Unitil Corporation 1998 Stock Option Plan (1998 Plan). Net proceeds of $73,875 were used by the Company to reduce short-term borrowings. As disclosed in Note 2 to the Company's Form 10-K for the year ended December 31, 2007, the 1998 Plan became effective on December 11, 1998. The number of shares granted under this plan, as well as the terms and conditions of each grant, were determined by the Compensation Committee of the Board of Directors, subject to plan limitations. All options granted under this plan vested over a three-year period from the date of the grant, with 25% vesting on the first anniversary of the grant, 25% vesting on the second anniversary, and 50% vesting on the third anniversary. Under the terms of this plan, key employees may be granted options to purchase the Company's Common Stock at no less than 100% of the market price on the date the option is granted. All options must be exercised no later than 10 years after the date on which they were granted. This plan was terminated on January 16, 2003. There was no compensation expense associated with this plan in 2008 and 2007. The plan will remain in effect solely for the purposes of the continued administration of all options currently outstanding under the plan. No further grants of options will be made under this plan. As of June 30, 2008, there are 104,000 options vested and exercisable outstanding.

The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 6, 2008, 15,540 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $445,998. Compensation expense associated with shares issued under the Plan is recognized ratably as the shares vest and was $0.2 million and $0.2 million for six months ended June 30, 2008 and 2007, respectively. At June 30, 2008, there was approximately $1.0 million of total unrecognized compensation cost related to non-vested shares under the Plan which is expected to be recognized over approximately 2.8 years as the shares vest.

Details on preferred stock at June 30, 2008, June 30, 2007 and December 31, 2007 are shown below:

(Amounts in Millions)

	(Unaudited) June 30,		December 31,
	2008	2007	2007

Less: Current Portion	**0.4**	0.3	0.4
Total Long-term Debt, Less Current Portion	**$ 159.4**	$ 160.0	$ 159.6

The fair value of the Company’s long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at June 30, 2008 is estimated to be approximately $162 million, before considering any costs, including prepayment costs, to market the Company's debt. Currently, the Company believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company’s policy is to limit these guarantees to two years or less. As of June 30, 2008 there are $9 million of guarantees outstanding and these guarantees extend through October 31, 2009. These guarantees are not required to be recorded under the provisions of FASB Interpretation No. 45, “Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others.”

NOTE 5 – SEGMENT INFORMATION

The following table provides significant segment financial data for the three and six months ended June 30, 2008 and June 30, 2007 (Millions):

Three Months Ended:	Electric	Gas	Other	Non-Regulated	Total
June 30, 2008					
Revenues	**$ 52.0**	**$ 6.6**	**$ ---**	**$ 0.8**	**$ 59.4**

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2007 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 12, 2008.

FG&E – Electric Division – On December 3, 2007, FG&E submitted its annual reconciliation of costs and revenues for Transition, Transmission, Standard Offer Service, and Default Service filed under its restructuring plan (the Annual Reconciliation Filing). The rates were approved effective January 1, 2008, subject to reconciliation pursuant to the MDPU's investigation. On June 6, 2008, FG&E submitted a revised Transition Charge reducing the recovery of net costs associated with the sale of Wyman 4 by $36,762 pursuant to an agreement with the Attorney General. This matter remains pending before the MDPU.

FG&E – Other – On June 22, 2007, the MDPU opened an inquiry into revenue decoupling for gas and electric distribution utilities, generally defined as a ratemaking mechanism designed to eliminate or reduce the dependence of a utility's distribution revenues on sales. Revenue decoupling is intended to remove the disincentive a utility has to administer and promote customer efforts to reduce energy consumption and demand or to install distributed generation to displace electricity delivered by the utility. On July 16, 2008, the MDPU issued an order establishing a comprehensive plan for decoupling to be adopted by gas and electric distribution utilities on a going-forward basis. Company specific rate cases will be required. Lost base revenue recovery associated with incremental energy efficiency savings will be allowed through 2012 consistent with the MDPU's expectation that, with limited exceptions, distribution companies will be operating under decoupling plans by year-end 2012. Within 45 days of this order, each distribution company must notify the MDPU of when the company expects to file a rate case to implement decoupling.

On July 2, 2008, Massachusetts Senate Bill No. 2768 (the "Green Communities Act") was signed into law. The Green Communities Act is intended to increase energy efficiency, update the renewable energy portfolio standard, increase public oversight of utilities, increase service quality of power companies, assist low-income energy customers, and increase the use of renewable generation and energy efficiency products. The Act requires electric companies to boost investment in energy efficiency measures that reduce energy demand and deliver savings to customers; provides a new funding source for efficiency measures through the auction of pollution allowances by power plants through the Regional Greenhouse Gas Initiative; creates stronger incentives for the development of renewable energy, like wind and solar, by requiring 15 percent of electricity to be supplied by new green power facilities by 2020 and establishing a pilot program for utilities to enter into long-term contracts with renewable energy projects; expressly authorizes cities and towns to own renewable energy facilities; and encourages green building design through updated codes, training and assistance. The MDPU is expected to initiate regulatory proceedings to implement various sections of the Act. The impact of any new measures to be required of FG&E in compliance with the Act cannot be estimated at this time.

UES –In July, 2008, the State of New Hampshire passed a law that allows electric utilities to make investments in distributed energy resources including energy efficiency and demand reduction technologies as well as clean cogeneration and renewable generation. In June, 2008, The State of New Hampshire also passed a law approving state participation in the Regional Greenhouse Gas Initiative ("RGGI"). The RGGI program begins in 2009 and requires large electric generators in the 10-state northeast region to purchase allowances for their carbon emissions. These allowances are being sold through a regional auction process and the funds will be used by the states for investments in energy efficiency and alternative energy.

On March 14, 2008, UES made its annual reconciliation and rate filing with the NHPUC under its restructuring plan, for rates effective May 1, 2008, including reconciliation of prior year costs and revenues, power supply and power supply-related stranded costs. The filing was approved on April 23, 2008. On July 9, 2008, UES proposed an increase to its External Delivery Charge, effective September 1, 2008, reflecting higher transmission costs.

On June 22, 2007, the NHPUC issued an order in its investigation into implementation of the federal Energy Policy Act of 2005 regarding the adoption of standards for time-based metering and interconnection. On August 31, 2007, the NHPUC issued an order on motion for rehearing, staying the June 22, 2007 order pending hearing and reconsideration of the issues. An order following rehearing was issued on January 22, 2008 finding that it is appropriate to implement some form of time-based metering standards and ordering that the details, including cost-benefit analyses, form of rate design, time of implementation and applicable customer classes shall be determined in separate proceedings to be initiated by the Commission.

On May 14, 2007, the NHPUC issued an order opening an investigation into the merits of instituting appropriate rate mechanisms, such as revenue decoupling, which would have the effect of removing obstacles to, and encouraging investment in, energy efficiency. This matter remains pending before the NHPUC.

Acquisition of Northern Utilities Inc. and Granite State Gas Transmission, Inc. – On February 15, 2008, the Company entered into a Stock Purchase Agreement (Agreement) with NiSource Inc. (NiSource) and Bay Sate Gas Company (Bay State, which is a wholly owned utility subsidiary of NiSource), to acquire all of the outstanding stock of Northern Utilities, Inc. (Northern), and Granite State Gas Transmission, Inc. (Granite) for $160 million in cash, which amount is subject to a working capital adjustment. The transaction is expected to be financed by newly issued common stock and debt. The Company has a commitment letter to enter into a senior unsecured bridge facility, which may be used to finance this transaction on an interim basis until permanent financing is completed.

On March 31, 2008, Unitil filed joint petitions with Nisource and BaySate along with supporting testimony with the Maine Public Utilities Commission and the New Hampshire Public Utilities Commission requesting approval of the acquisitions. The requests for approval are under active consideration and remain pending. As of June 30, 2008, the Company has deferred $3.4 million of transaction costs associated with the acquisition. The transaction is expected to close by the fourth quarter of 2008, subject to approval by the state commissions and review by certain federal agencies.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2007 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 12, 2008.

The Company's past and present operations include activities that are generally subject to extensive federal and state environmental laws and regulations. The Company believes it is in compliance with all applicable environmental and safety laws and regulations, and the Company believes that as of June 30, 2008, there are no material losses reasonably possible in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Included on the Company's Consolidated Balance Sheet at June 30, 2008, in Environmental Obligations is $12.0 million related to estimated future clean up costs for permanent remediation of a former manufactured gas plant site at Sawyer Passway, located in Fitchburg, Massachusetts. A corresponding regulatory asset was recorded to reflect the future rate recovery of these costs. As noted above, please refer to Note 5 to the financial statements in Item 8 of Part II of the Company's Form 10-K for December 31, 2007 for additional information. The Company received an insurance settlement during the first quarter of 2008 associated with environmental remediation costs. Any recovery that FG&E receives from insurance or third parties with respect to environmental response costs, net of the unrecovered costs associated therewith, are split equally between FG&E and its gas customers.

NOTE 8: RETIREMENT BENEFIT OBLIGATIONS

The Company sponsors the following retirement benefit plans to provide certain pension and postretirement benefits for its retirees and current employees as follows:

- The Unitil Corporation Retirement Plan (Pension Plan) - The Pension Plan is a defined benefit pension plan covering substantially all of its employees. Under the Pension Plan, retirement benefits are based upon an employee's level of compensation and length of service.

- The Unitil Retiree Health and Welfare Benefits Plan (PBOP Plan) – The PBOP Plan provides health care and life insurance benefits to retirees. The Company has established Voluntary Employee Benefit Trusts (VEBT), into which it funds contributions to the PBOP Plan.

- The Unitil Corporation Supplemental Executive Retirement Plan (SERP) – The SERP is an unfunded retirement plan, with participation limited to executives selected by the Board of Directors.

The following table includes the key weighted average assumptions used in determining the Company's benefit plan costs and obligations:

Used to Determine Plan Costs	**2008**	2007
Discount Rate	**6.00%**	5.50%
Rate of Compensation Increase	**3.50%**	3.50%
Expected Long-term rate of return on plan assets	**8.50%**	8.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	9.00%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year that Ultimate Health Care Cost Trend Rate is reached	**2017**	2016

Used to Determine Benefit Obligations:	**2008**	2007
Discount Rate	**6.00%**	5.50%
Rate of Compensation Increase	**3.50%**	3.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	8.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year that Ultimate Health care Cost Trend Rate is reached	**2017**	2016

The following table provides the components of the Company's Retirement plan costs ($000's):

	Pension Plan		**PBOP Plan**		**SERP**	
Three Months Ended June 30,	**2008**	2007	**2008**	2007	**2008**	2007
Service Cost	**$ 488**	$ 492	**$ 355**	$ 358	**$ 37**	$ 41
Interest Cost	**943**	834	**559**	514	**31**	29
Expected Return on Plan Assets	**(1,094)**	(1,050)	**(82)**	(61)	**---**	---

Actuarial Loss Amortization	**638**	672	**---**	35	**12**	22
Sub-total	**1,368**	1,281	**2,357**	2,346	**149**	162
Amounts Capitalized and Deferred	**(447)**	(436)	**(952)**	(1,017)	**---**	---
Net Periodic Benefit Cost Recognized	**$ 921**	$ 845	**$ 1,405**	$ 1,329	**$ 149**	$ 162

Employer Contributions

On August 17, 2006, the Pension Protection Act of 006 (PPA) was signed into law. Included in the PPA are new minimum funding rules which will go into effect for plan years beginning in 2008. The funding target will be 100% of a plan's liability with any shortfall amortized over seven years, with lower (92% - 100%) funding targets available to well-funded plans during the transition period. The Company expects to contribute approximately $2.8 million to fund its Pension Plan in 2008.

As of June 30, 2008, the Company had made $1.0 million and $33,000 of contributions to the PBOP and SERP Plans, respectively, in 2008. The Company presently anticipates contributing an additional $1.5 million and $26,000 to the PBOP and SERP Plans, respectively, in 2008.

NOTE 9: INCOME TAXES

The Company bills its customers sales tax in Massachusetts and consumption tax in New Hampshire. These taxes are remitted to the appropriate departments of revenue in each state and are excluded from revenues on the Company's Consolidated Statements of Earnings.

The Company evaluated its tax positions at December 31, 2007, and at each interim reporting date in the period ended June 30, 2008 in accordance with FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48), an interpretation of FAS 109, and has concluded that no adjustment for recognition, derecognition, settlement and foreseeable future events to any unrecognized tax liabilities or assets as defined by FIN 48 is required. The Company does not have any unrecognized tax positions for which it is reasonably possible that the total amounts recognized will significantly change within the next 12 months. The Company remains subject to examination by Federal, Massachusetts and New Hampshire tax authorities for the tax periods ended December 31, 2004; December 31, 2005; and December 31, 2006. Income tax filings for the year ended December 31, 2007 have been extended and are due September 15, 2008. The Company classifies penalty and interest expense related to income tax liabilities as an income tax expense. There are no interest and penalties recognized in the statement of earnings or accrued on the balance sheets.

NOTE 10: SUBSEQUENT EVENT – DEFINITIVE PROXY STATEMENT

On July 29, 2008, the Company filed a Definitive Proxy Statement (Proxy) with the SEC and subsequently mailed the Proxy to the Company's shareholders. The Proxy served as notification that a special meeting of the Company's shareholders will be held at the office of the Company on September 10, 2008 to approve and adopt an amendment to the Company's Articles of Incorporation, as amended, to increase the authorized number of shares of common stock, no par value per share, of the Company from 8,000,000 shares to 16,000,000 shares in the aggregate and to act on such other matters that may come before the meeting and any adjournments.

The Company intends to sell and issue up to 4,000,000 shares of Common Stock in a public offering to partially finance the proposed acquisition by the Company of Northern Utilities, Inc. and Granite State Gas Transmission, Inc., as discussed above in Note 6.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Unaudited Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2007 as filed with the Securities and Exchange Commission on February 12, 2008, other than the risks associated with the Company's recently announced acquisition of Northern and Granite, as discussed in the Cautionary Statement section of Part I, Item 2 of this Quarterly Report on Form 10-Q for the quarter ended June 30, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no sales of unregistered equity securities by the Company for the fiscal period ended June 30, 2008.

Pursuant to the written trading plan under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), adopted by the Company on March 20, 2008, the Company periodically repurchases shares of its Common Stock on the open market related to Employee Length of Service Awards and the stock portion of the Directors' annual retainer. The Company may suspend or terminate its Rule 10b5-1 trading plan at any time, so long as the suspension or termination is made in good faith and not as part of a plan or scheme to evade the prohibitions of Rule 10b-5 under the Exchange Act, or other applicable securities laws. There is no pool or maximum number of shares related to these purchases. Company repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
4/1/08 – 4/30/08	---	---	---	n/a
5/1/08 – 5/31/08	396	$27.68	396	n/a
6/1/08 – 6/30/08	---	---	---	n/a
Total	396	$27.68	396	n/a

Item 6. Exhibits

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f))for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Unitil Corporation (the "Company") on Form 10-Q for the period ending June 30, 2008 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned Robert G. Schoenberger, Chief Executive Officer and President, Mark H. Collin, Chief Financial Officer and Laurence M. Brock, Chief Accounting Officer, certifies, to the best knowledge and belief of the signatory, pursuant to 18 U.S.C. section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Table of Contents

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil's principal business is the retail distribution of electricity and natural gas through two utility subsidiaries: Unitil Energy System's Inc. (UES) and Fitchburg Gas and Electric Light Company (FG&E). UES is an electric utility with a service territory in the southeastern seacoast and state capital regions of New Hampshire. FG&E is a combination gas and electric utility with a service territory in the greater Fitchburg area of north central Massachusetts.

Unitil's two retail distribution utilities serve approximately 100,000 electric customers and 15,100 natural gas customers in their franchise areas. The retail distribution utilities are pure distribution utilities with a combined investment in net utility plant of $256.0 million at September 30, 2008. Substantially all of Unitil's revenue and earnings are derived from its regulated utility operations.

Unitil also conducts non-regulated operations principally through its Usource™ (Usource) subsidiary. Usource provides energy brokering and consulting services to large commercial and industrial customers in the northeastern United States. Unitil's other subsidiaries include Unitil Service and Unitil Realty, which provide centralized facilities, management and administrative services to Unitil's affiliated companies. Unitil's consolidated net income includes the earnings of the holding company and all of its subsidiaries.

On February 15, 2008, the Company entered into a Stock Purchase Agreement with NiSource, Inc. (NiSource) and Bay State Gas Company (Bay State, which is a wholly owned utility subsidiary of NiSource), to acquire all of the outstanding stock of Northern Utilities, Inc. (Northern), and Granite State Gas Transmission, Inc. (Granite) for $160 million in cash, which amount is subject to a working capital adjustment. The transaction is expected to be financed initially with proceeds from newly issued common stock together with a bridge credit facility. In the event that the equity offering is delayed until after the transaction closes, the Company may initially finance the transaction entirely with the bridge facility. The Company expects to repay the bridge facility as soon as practical after the transaction closes using the proceeds from the issuance of notes and newly issued common stock.

On March 31, 2008, Unitil and Northern filed joint petitions and supporting testimony with the Maine Public Utilities Commission (MPUC) and the New Hampshire Public Utilities Commission (NHPUC) requesting approval of the acquisitions. Subsequently, on May 30, 2008, Unitil and Northern filed joint petitions before both the NHPUC and MPUC requesting authority for Northern to issue unsecured long term debt to finance the acquisition of Northern by Unitil. In August, 2008, unopposed stipulation agreements resolving all outstanding issues and recommending approval of the acquisition and the financing petitions were filed with the MPUC and the NHPUC on behalf of Unitil, Northern and the active parties to the respective Maine and New Hampshire proceedings.

On October 10, 2008, the NHPUC issued orders approving the stipulation agreement and the financing petition, and authorizing the acquisition of Northern by Unitil.

On October 6, 2008, the MPUC publicly deliberated the matter and voted to approve the joint petition and stipulation agreement with conditions, subject to its issuance of a final written order. On October 22, 2008, the MPUC issued its written order approving the stipulation agreement and authorizing the acquisition of Northern by Unitil, subject to several conditions. Based on its review of the written order, Unitil expects to file along with Northern, a motion for reconsideration of the order on narrow grounds requesting clarification and/or modification of conditions of approval contained in the order. These conditions would potentially contravene the allocation of risks agreed to by the parties in the stipulation agreement and underlying Stock Purchase Agreement with regard to several pending regulatory safety and compliance proceedings involving Northern. At this time, Unitil can not predict what changes, if any, the MPUC's reconsideration and continued deliberation of this matter will have on its order or the unopposed stipulation agreement of the parties in this proceeding.

As a result of statutory changes in Massachusetts (see discussion of "Green Communities Act in Note 6), on August 13, 2008, Unitil and Bay State also filed a joint petition with the MDPU requesting an advisory ruling that Massachusetts law is not applicable to the proposed transaction, or, in the alternative, that it approve the transaction as consistent with the public interest. The Massachusetts Attorney General has asserted that Massachusetts law grants the MDPU jurisdiction to review the transaction, and argues that Bay State's customers will be harmed by the sale. Unitil and Bay State dispute the Attorney General's assertions. On October 1, 2008, a hearing on the joint petition was held before the MDPU, and on October 10 and October 17 the Parties to the proceeding filed their Initial and Reply Briefs, respectively. The Company has requested a final order from the MDPU on or before November 3, 2008, to allow the Company to proceed with the financing and closing of the transaction in the fourth quarter of 2008. The joint petition remains under active consideration by the MDPU.

Northern's principal business is the retail distribution of natural gas to approximately 52,000 customers located in 44 coastal New Hampshire and southern Maine communities. Portions of Northern's natural gas service territory are contiguous and overlapping with Unitil's electric distribution service territory in New Hampshire. Granite is a natural gas transmission company, principally engaged in the business of providing natural gas transportation services to Northern for its access to natural gas supply from interconnected upstream pipelines.

Consummation of the acquisitions is subject to various closing conditions, including but not limited to the receipt of the requisite regulatory approvals from state public utility commissions, noted above, from the Federal Communications Commission and clearance under federal antitrust regulations, which was received in May of 2008. It is currently anticipated that the acquisition will be consummated in the fourth quarter of 2008. However, no assurance can be given that the acquisition will close at that time, or at all.

On September 10, 2008, the Company's shareholders, at a Special Meeting of Shareholders, approved an increase in the authorized shares of the Company's Common Stock. Shareholders approved an amendment to the Company's Articles of Incorporation to increase the authorized number of shares of the Company's Common Stock, from 8,000,000 shares to 16,000,000 shares in the aggregate. The Company expects to issue and sell up to 4,000,000 shares in a public offering to partially finance the acquisition of Northern and Granite, discussed above.

On September 12, 2008, the Company priced the anticipated sale and issuance of $80.0 million aggregate principal amount of senior unsecured notes by Northern and $10.0 million aggregate principal amount of senior unsecured notes by Granite, subject to the conditions discussed below. The notes consist of:

(i) $30.0 million aggregate principal amount of 6.95% senior unsecured notes of Northern, which are due in 2018;

(ii) $50.0 million aggregate principal amount of 7.72% senior unsecured notes of Northern, which are due in 2038; and

(iii) $10.0 million aggregate principal amount of 7.15% senior unsecured notes of Granite, which are due in 2018.

The Company agreed to guarantee the payment of principal and interest on the Granite notes.

The Company expects to (i) finance its acquisition of Northern and Granite using the proceeds from a sale and issuance of common stock and a bridge credit facility and (ii) use the proceeds from the sale and issuance of the notes to repay all amounts outstanding under the bridge credit facility. In the event that the sale and issuance of common stock is delayed until after the acquisitions close, the Company may finance the acquisitions entirely with the bridge credit facility. Under those circumstances, the Company expects to repay the bridge facility as soon as practical after the acquisitions close using the proceeds from the issuance of notes and from the sale and issuance of common stock.

The foregoing is not intended to, and does not, constitute an offering of the Northern or Granite notes described above. The sale and issuance of such notes (i) is subject to the execution of definitive note purchase agreements by Northern, Granite and the prospective purchasers of the notes as well as receipt of certain regulatory approvals and satisfaction of closing conditions, including the closing of the acquisitions, (ii) will not be, and has not been, registered under the Securities Act of 1933 and the notes may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements and (iii) is not conditioned upon the closing of the offering of the Company's common stock, as described above. The Company has received the required regulatory approvals from the NHPUC and MPUC for these debt issuances.

As of August 21, 2008 the Company's Common Stock began trading on the New York Stock Exchange and ceased trading on the American Stock Exchange. The Company's Common Stock trades under the symbol, "UTL".

RATES AND REGULATION

Unitil's utility operations related to wholesale and interstate business activities are regulated by the Federal Energy Regulatory Commission (FERC). The retail distribution utilities, UES and FG&E, are subject to regulation by the NHPUC and the MDPU, formerly the Massachusetts Department of Telecommunications and Energy, respectively, in regards to their rates, issuance of securities and other accounting and operational matters. Because Unitil's primary operations are subject to rate regulation, the regulatory treatment of various matters could significantly affect the Company's operations and financial position. Following the closing of the acquisitions, Northern will continue to be regulated by the NHPUC and MPUC. Granite, as an interstate natural gas pipeline, will continue to be regulated by the FERC.

Unitil's retail distribution utilities have the franchise to deliver electricity and/or natural gas to all customers in their service territories, at rates established under traditional cost of service regulation. Under this regulatory structure, UES and FG&E recover the cost of providing distribution service to their customers based on a historical test year, in addition to earning a return on their capital investment in utility assets.

As a result of the implementation of retail choice in New Hampshire and Massachusetts, Unitil's customers are free to contract for their supply of electricity with third-party suppliers. The retail distribution utilities provide for the delivery of that supply of electricity over their distribution systems at regulated rates. Both UES and FG&E continue to provide basic or default electric supply service to those customers who do not obtain their supply from third-party suppliers, as a provider of last resort. The costs associated with electricity supplied by the Company are recovered on a pass-through basis under rates that are adjusted periodically during the year.

As a result of the introduction of retail choice for all natural gas customers in Massachusetts, FG&E's customers are free to contract for their supply of natural gas with third-party suppliers. FG&E provides for the delivery of that gas supply over its gas distribution system at regulated rates and continues to provide natural gas supply services to those customers who do not obtain their supply from third-party suppliers. The costs associated with natural gas supplied by FG&E are recovered on a pass-through basis under rates that are adjusted periodically during the year.

The NHPUC and MPUC have both announced their approval of Unitil's proposed acquisition of Northern. Regulatory approval for the acquisition is now pending in Massachusetts. The regulatory process in both Maine and New Hampshire included the negotiation and filing of settlement agreements reflecting commitments by Unitil with respect to Northern's rates, customer service and operations and for enhanced safety and reliability programs.

The settlement agreements were separately negotiated and filed in each state but reflect a number of common features. The settlements include commitments by Unitil with respect to Northern's rates, customer service and operations during and after the transition of Northern's management and business operations from NiSource, Northern's current ultimate parent company, to Unitil. Northern will be required to implement enhanced safety and reliability programs and upgrade the customer service quality programs for customers in both states. Unitil will also be required to conduct a study in collaboration with parties in both states of potential changes in organization or regulation of Granite.

CAUTIONARY STATEMENT

This report and the documents we incorporate by reference into this report contain statements that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included or incorporated by reference into this report, including, without

limitation, statements regarding the financial position, business strategy and other plans and objectives for the Company's future operations, are forward-looking statements.

These statements include declarations regarding the Company's beliefs and current expectations. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms or other comparable terminology. These forward-looking statements are subject to inherent risks and uncertainties in predicting future results and conditions that could cause the actual results to differ materially from those projected in these forward-looking statements. Some, but not all, of the risks and uncertainties include the following:

- Variations in weather;
- Changes in the regulatory environment;
- Customers' preferences on energy sources;
- Interest rate fluctuation and credit market concerns;
- General economic conditions, including recent distress in the financial markets that has had an adverse impact on the availability of credit and liquidity resources generally and could jeopardize certain of our counterparty obligations, including those of our insurers and financial institutions;
- Fluctuations in supply, demand, transmission capacity and prices for energy commodities;
- Increased competition;
- Customers' future performance under multi-year energy brokering contracts; and
- Risks associated with the acquisition of Northern and Granite, discussed above, include:
    - Successful integration of the acquired business into the Company;
    - Receipt of regulatory approval of the transaction and subsequent rate plan;
    - Conditions imposed on the Company under regulator orders related to the acquisition;
    - Ability to finance transaction at reasonable terms; and
    - Acquisition costs expended for banker fees, legal fees and other acquisition related expenses would adversely affect the Company's financial condition if the acquisition is not completed.

Many of these risks are beyond the Company's control. Any forward-looking statements speak only as of the date of this report, and the Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which such statements are made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for the Company to predict all of these factors, nor can the Company assess the impact of any such factor on its business or the extent to which any factor, or combination of factors, may cause results to differ materially from those contained in any forward-looking statements. There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2007 as filed with the Securities and Exchange Commission on February 12, 2008, other than the risks disclosed above associated with the acquisition of Northern and Granite and the risks associated with the recent distress in the financial markets.

RESULTS OF OPERATIONS

The following section of MD&A compares the results of operations for each of the two fiscal periods ended September 30, 2008 and September 30, 2007 and should be read in conjunction with the accompanying Consolidated Financial Statements and the accompanying Notes to Consolidated Financial Statements included in Item 1 of this report.

Earnings Overview

The Company's Earnings Applicable to Common Shareholders (Net Income) was $1.5 million for the third quarter of 2008, compared to net income of $1.6 million for the third quarter of 2007. Earnings per common share (EPS) were $0.27 for the three months ended September 30, 2008 compared with $0.28 in the third quarter of 2007. Earnings for the third quarter of 2008 reflect higher operating expenses and interest expense in the quarter offset by higher electric and gas utility sales margins. For the nine months ended September 30, EPS were $1.12 for 2008 compared to $1.04 for 2007, an increase of $0.08 per share, or 8%.

The following table presents the significant items (discussed below) contributing to the change in earnings per share in the three and nine month periods ended September 30, 2008:

2008 Earnings Per Share vs. 2007

	Period Ended September 30,	
	QTD	**YTD**
2007	**$ 0.28**	**$ 1.04**
Electric Sales Margin	0.01	(0.03)
Gas Sales Margin	0.03	0.15
Usource Sales Margin	0.01	0.01
Operation & Maintenance Expense	(0.05)	0.12
Depreciation, Amortization & Other	---	(0.12)
Interest Expense, Net	(0.01)	(0.05)
2008	**$ 0.27**	**$ 1.12**

Unitil's total electric kilowatt-hour (kWh) sales decreased 2.0% and 2.1% in the three and nine month periods ended September 30, 2008, respectively, compared to the same periods in 2007. Natural gas sales in the three month period ended September 30, 2008 increased 5.7% compared to the same period in 2007 and decreased 0.5% in the nine month period ended September 30, 2008 compared to the same period in 2007. The lower kWh sales in 2008 compared to 2007 reflect milder summer weather in 2008 and lower average usage by the Company's customers reflecting a slowing economy and energy conservation. The increased natural gas sales in the three month period reflect increased consumption by Commercial and Industrial (C&I) customers for production operations. The lower natural gas sales in the nine month period reflect a milder winter heating season earlier this year and lower average usage by the Company's customers reflecting a slowing economy and energy conservation.

Electric sales margin increased $0.1 million in the three month period ended September 30, 2008 compared to the same period in 2007, reflecting higher electric base rates partially offset by lower sales volumes. For the nine month period ended September 30, 2008, electric sales margin decreased $0.3 million compared to the same period in 2007. The decrease in electric sales margin in the nine month period primarily reflects lower sales volumes, partially offset by higher electric base rates, implemented in March of 2008.

Gas sales margin increased $0.2 million and $1.3 million in the three and nine months ended September 30, 2008, respectively, compared to the same periods in 2007. The increase in the three month period reflects gas base rates implemented in November 2007 and higher natural gas sales to C&I customers. The increased sales margin in the nine month period reflects higher rates, partially offset by lower sales.

Usource revenues increased by $0.1 million and $0.1 million in the three and nine month periods ended September 30, 2008 compared to the same periods in 2007 reflecting higher revenues from energy brokering.

Operation & Maintenance (O&M) expenses increased $0.5 million for the three month period ended September 30, 2008 compared to the same period in 2007. The increase in the three month period reflects higher salary and benefit costs of $0.3 million, higher bad debt expenses of $0.2 million and higher utility operating costs of $0.2 million, partially offset by lower professional fees of $0.2 million. For the nine month period ended September 30, 2008, O&M expenses decreased $1.1 million compared to the same period in 2007, including a reduction of $2.8 million from the proceeds of an insurance settlement, lower utility operating costs of $0.1 million and lower professional fees of $0.1 million, partially offset by increases in salary and benefit costs of $1.5 million and higher bad debt expenses of $0.4 million.

Depreciation, Amortization & Other expenses decreased $0.1 million in the three month period ended September 30, 2008, reflecting lower amortization of information systems related costs and lower income tax expense in the current quarter compared to the same period in 2007, partially offset by higher depreciation on normal utility plant additions. For the nine month period ended September 30, 2008, Depreciation, Amortization & Other expenses increased $1.2 million, primarily reflecting the amortization, in the first quarter of 2008, of $0.7 million of natural gas inventory carrying costs deferred under a previous regulatory ruling and higher depreciation on normal utility plant additions.

Interest Expense, Net increased $0.1 million and $0.5 million for the three and nine month periods ended September 30, 2008, respectively, compared to the same periods in 2007, reflecting higher overall debt outstanding.

Also in the third quarter, the Unitil Corporation Board of Directors declared the regular quarterly dividend on the Company's common stock of $0.345 per share. This quarterly dividend results in a current effective annual dividend rate of $1.38 per share representing an unbroken record of quarterly dividend payments since trading began in Unitil's common stock.

A more detailed discussion of the Company's results of operations for the three and nine months ended September 30, 2008 and a period-to-period comparison of changes in financial position are presented below.

Balance Sheet

The Company's investment in Net Utility Plant increased by $9.4 million as of September 30, 2008 compared to September 30, 2007. This increase was due to capital expenditures related to UES' and FG&E's electric and gas distribution systems, including expenditures of approximately $0.5 million for the Company's Advanced Metering Infrastructure (AMI) project, which was substantially completed in the first quarter of 2008.

Regulatory Assets decreased by $30.5 million as of September 30, 2008 compared to September 30, 2007, primarily reflecting current year cost recoveries. A significant portion of this decrease is matched by a corresponding decrease of $20.0 million in Power Supply Contract Obligations. The remaining decrease primarily reflects lower levels of Regulatory Assets associated with retirement benefit obligations as well as recoveries of deferred charges (See "Regulatory Accounting" section of "Critical Accounting Policies").

Other Noncurrent Assets increased by $6.8 million as of September 30, 2008 compared to September 30, 2007, including the deferral of $3.9 million of transaction costs and $0.6 million of financing costs in connection with the Company's pending acquisition of Northern and Granite, discussed above, $1.6 million of pre-acquisition information system development costs and $0.7 million of other items unrelated to the acquisition.

Electric Sales, Revenues and Margin

Kilowatt-hour Sales – Unitil's total electric kWh sales decreased 2.0% and 2.1% in the three and nine month periods ended September 30, 2008, respectively compared to the same periods in 2007. Electric kWh sales to residential customers in the three and nine month periods ended September 30, 2008 decreased 1.9% and 1.8%, respectively, compared to the same periods in 2007 while sales to C&I customers decreased 2.0% and 2.3%, respectively, in those periods compared to the same periods in 2007. The lower electric kWh sales in 2008 compared to 2007 were driven by lower average usage per customer reflecting milder summer temperatures, a slowing economy and energy conservation.

The following table details total electric kWh sales for the three and nine months ended September 30, 2008 and 2007 by major customer class:

Electric kWh Sales (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	Change	% Change	**2008**	2007	Change	% Change
Residential	**176.3**	179.7	(3.4)	(1.9%)	**506.2**	515.6	(9.4)	(1.8%)
Commercial / Industrial	**279.4**	285.1	(5.7)	(2.0%)	**794.5**	813.2	(18.7)	(2.3%)
Total	**455.7**	464.8	(9.1)	(2.0%)	**1,300.7**	1,328.8	(28.1)	(2.1%)

Electric Operating Revenues and Sales Margin - The following table details total Electric Operating Revenues and Sales Margin for the three and nine month periods ended September 30, 2008 and 2007:

Electric Operating Revenues and Sales Margin (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	$ Change	% Change(1)	**2008**	2007	$ Change	% Change(1)
Electric Operating Revenues:								
Residential	**$ 30.9**	$ 28.6	$ 2.3	4.0%	**$ 87.0**	$ 87.2	$ (0.2)	(0.1%)
Commercial / Industrial	**32.7**	28.3	4.4	7.8%	**85.2**	84.1	1.1	0.6%
Total Electric Operating Revenues	**$ 63.6**	$ 56.9	$ 6.7	11.8%	**$ 172.2**	$ 171.3	$ 0.9	0.5%
Cost of Electric Sales:								
Purchased Electricity	**$ 48.7**	$ 41.9	$ 6.8	12.0%	**$ 128.4**	$ 126.4	$ 2.0	1.2%
Conservation & Load Management	**0.6**	0.8	(0.2)	(0.4%)	**2.0**	2.8	(0.8)	(0.5%)
Electric Sales Margin	**$ 14.3**	$ 14.2	$ 0.1	0.2%	**$ 41.8**	$ 42.1	$ (0.3)	(0.2%)

(1) Represents change as a percent of Total Electric Operating Revenues.

Total Electric Operating Revenues, increased by $6.7 million, or 11.8%, and $0.9 million, or 0.5%, in the three and nine month periods ended September 30, 2008, respectively, compared to the same periods in 2007. Total Electric Operating Revenues include the recovery of costs of electric sales, which are recorded as Purchased Electricity and Conservation & Load Management (C&LM) in Operating Expenses. The net increase in Total Electric Operating Revenues in the three month period reflects higher Purchased Electricity costs of $6.8 million and higher sales margin of $0.1 million, partially offset by lower C&LM revenues of $0.2 million. The net increase in Total Electric Operating Revenues in the nine month period reflects higher Purchased Electricity costs of $2.0 million, lower C&LM revenues of $0.8 million and lower sales margin of $0.3 million.

Purchased Electricity and C&LM revenues increased a net $6.6 million, or 11.6%, and $1.2 million, or 0.7%, of Total Electric Operating Revenues in the three and nine month periods ended September 30, 2008, respectively, compared to the same periods in 2007. The increase in the three month period primarily reflects higher electric commodity prices, partially offset by lower sales volumes. The increase in the nine month period reflects higher electric commodity prices, largely offset by lower sales volumes and lower spending on energy efficiency and conservation programs. Purchased Electricity revenues include the recovery of the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Electricity and C&LM in its rates at cost on a pass through basis.

Electric sales margin increased $0.1 million in the three month period ended September 30, 2008 compared to the same period in 2007, reflecting higher electric base rates partially offset by lower sales volumes. For the nine month period ended September 30, 2008, electric sales margin decreased $0.3 million compared to the same period in 2007. The decrease in electric sales margin in the nine month period primarily reflects lower sales volumes, partially offset by higher electric base rates, implemented in March of 2008. Total electric kWh sales decreased 2.0% and 2.1% in the three and nine month periods ended September 30, 2008, respectively, compared to the same periods in 2007, driven by lower average usage per customer reflecting a slowing economy and energy conservation.

Gas Sales, Revenues and Margin

Therm Sales – Unitil's total therm sales of natural gas increased 5.7% in the three month period ended September 30, 2008 compared to the same period in 2007. Gas sales to residential customers in the three month period ended September 30, 2008 were flat compared to the same period in 2007 while sales to C&I customers increased 7.1% in that period compared to the same period in 2007. The increase in gas sales to C&I customers in the three month period reflects increased usage of natural gas in their production operations.

Total therm sales of natural gas in the nine month period ended September 30, 2008 decreased 0.5% compared to the same period in 2007. Gas sales to residential customers in the nine month period ended September 30, 2008 decreased 2.5% compared to the same period in 2007 while sales to C&I customers increased 0.7% in that period compared to the same period in 2007. The lower sales to residential customers in 2008 reflects a milder winter heating season earlier this year and lower average usage by our customers reflecting a slowing economy and energy conservation. The increase in gas sales to C&I customers in the nine month period reflects increased usage of natural gas in those customers' production operations.

The following table details total therm sales for the three and nine months ended September 30, 2008 and 2007 by major customer class:

Therm Sales (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	Change	% Change	**2008**	2007	Change	% Change
Residential	**0.7**	0.7	---	---	**7.7**	7.9	(0.2)	(2.5%)
Commercial / Industrial	**3.0**	2.8	0.2	7.1%	**13.9**	13.8	0.1	0.7%
Total	**3.7**	3.5	0.2	5.7%	**21.6**	21.7	(0.1)	(0.5%)

Gas Operating Revenues and Sales Margin – The following table details total Gas Operating Revenues and Sales Margin for the three and nine months ended September 30, 2008 and 2007:

Gas Operating Revenues and Sales Margin (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	$ Change	% Change[1]	**2008**	2007	$ Change	% Change[1]
Gas Operating Revenues:								
Residential	**$ 2.1**	$ 1.8	$ 0.3	7.7%	**$ 13.7**	$ 13.6	$ 0.1	0.4%
Commercial / Industrial	**2.3**	2.1	0.2	5.1%	**11.6**	10.9	0.7	2.9%
Total Gas Operating Revenues	**$ 4.4**	$ 3.9	$ 0.5	12.8%	**$ 25.3**	$ 24.5	$ 0.8	3.3%
Cost of Gas Sales:								
Purchased Gas	**$ 2.4**	$ 2.1	$ 0.3	7.7%	**$ 15.3**	$ 15.8	$ (0.5)	(2.0%)
Conservation & Load Management	**---**	---	---	---	**0.1**	0.1	---	---
Gas Sales Margin	**$ 2.0**	$ 1.8	$ 0.2	5.1%	**$ 9.9**	$ 8.6	$ 1.3	5.3%

[1] Represents change as a percent of Total Gas Operating Revenues.

Total Gas Operating Revenues increased $0.5 million, or 12.8%, and $0.8 million, or 3.3%, in the three and nine month periods ended September 30, 2008, respectively, compared to the same periods in 2007. Total Gas Operating Revenues include the recovery of the cost of gas sales, which are recorded as Purchased Gas and C&LM in Operating Expenses. The net increase in Total Gas Operating Revenues in the three month period reflects higher Purchased Gas costs of $0.3 million and higher gas sales margin of $0.2 million. The net increase in Total Gas Operating Revenues in the nine month period reflects higher gas sales margin of $1.3 million, partially offset by lower Purchased Gas costs of $0.5 million.

Purchased Gas and C&LM revenues increased by $0.3 million, or 7.7% of Total Gas Operating Revenues in the three month period ended September 30, 2008 compared to the same period in 2007 and decreased $0.5 million, or 2.0% of Total Gas Operating Revenues in the nine month period ended September 30, 2008 compared to the same period in 2007. The increase in the three month period reflects higher sales volumes and higher natural gas commodity prices. The decrease in the nine month period reflects lower sales volumes and an increase in the amount of natural gas purchased by customers directly from third-party suppliers, partially offset by higher natural gas commodity prices. Purchased Gas revenues include the recovery of the cost of gas purchased and manufactured to supply the Company's total gas supply requirements as well as other energy supply related costs. C&LM revenues include the recovery of the cost of energy efficiency and conservation programs. The Company recovers the cost of Purchased Gas and C&LM in its rates at cost on a pass through basis.

Gas sales margin increased $0.2 million and $1.3 million in the three and nine months ended September 30, 2008, respectively, compared to the same periods in 2007. The increase in the three month period reflects gas base rates implemented in November 2007 and higher natural gas sales to C&I customers. The increased gas sales margin in the nine month period reflects higher rates, partially offset by lower sales.

Other Operating Revenue

The following table details total Other Operating Revenue for the three and nine months ended September 30, 2008 and 2007:

Other Operating Revenue (millions)

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	$ Change	% Change	**2008**	2007	$ Change	% Change
Other Operating Revenue	**$ 1.1**	$ 1.0	$ 0.1	10.0%	**$ 2.9**	$ 2.8	$ 0.1	3.6%
Total Other Operating Revenue	**$ 1.1**	$ 1.0	$ 0.1	10.0%	**$ 2.9**	$ 2.8	$ 0.1	3.6%

Total Other Operating Revenue increased by $0.1 million, or 10.0%, and $0.1 million, or 3.6%, in the three and nine month periods ended September 30, 2008 compared to the same periods in 2007. These increases reflect higher revenues from the Company's non-regulated energy brokering business, Usource.

Operating Expenses

Purchased Electricity – Purchased Electricity expenses include the cost of electric supply as well as other energy supply related restructuring costs, including long-term power supply contract buyout costs. Purchased Electricity increased $6.8 million, or 16.2%, and $2.0 million, or 1.6%, in the three and nine month periods ended September 30, 2008, respectively, compared to the same periods in 2007. These increases reflect higher electric commodity prices, partially offset by lower sales volumes. The Company recovers the costs of Purchased Electricity in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Purchased Gas – Purchased Gas expenses include the cost of gas purchased and manufactured to supply the Company's total gas supply requirements. Purchased Gas expenses increased by $0.3 million, or 14.3%, in the three month period ended September 30, 2008 compared to the same period in 2007 and decreased $0.5 million, or 3.2% in the nine month period ended September 30, 2008 compared to the same period in 2007. The increase in the three month period reflects higher sales volumes and higher natural gas commodity prices. The decrease in the nine month period reflects lower sales volumes and an increase in the amount of natural gas purchased by customers directly from third-party suppliers, partially offset by higher natural gas commodity prices. The Company recovers the costs of Purchased Gas in its rates at cost on a pass through basis and therefore changes in these expenses do not affect Net Income.

Operation and Maintenance (O&M) – O&M expense includes electric and gas utility operating costs, and the operating cost of the Company's unregulated business activities. O&M expenses increased $0.5 million for the three month period ended September 30, 2008 compared to the same period in 2007. The increase in the three month period reflects higher salary and benefit costs of $0.3 million, higher bad debt expenses of $0.2 million and higher utility operating costs of $0.2 million, partially offset by lower professional fees of $0.2 million. For the nine month period ended September 30, 2008, O&M expenses decreased $1.1 million compared to the same period in 2007, including a reduction of $2.8 million from the proceeds of an insurance settlement, lower utility operating costs of $0.1 million and lower professional fees of $0.1 million, partially offset by increases in salary and benefit costs of $1.5 million and higher bad debt expenses of $0.4 million.

Conservation & Load Management – C&LM expenses are associated with the development, management, and delivery of the Company's Energy Efficiency programs. Energy Efficiency programs are designed, in conformity with state regulatory requirements, to help consumers use natural gas and electricity more efficiently and thereby decrease their energy costs. Programs are tailored to residential, small business and large business customer groups and provide educational materials, technical assistance, and rebates that contribute toward the cost of purchasing and installing approved measures. Approximately 90% of these costs are related to electric operations and 10% to gas operations.

Total C&LM expenses decreased $0.2 million, or 25.0% and $0.8 million, or 27.6%, in the three and nine month periods ended September 30, 2008 compared to the same periods in 2007. These changes reflect the timing of spending on the implementation of Energy Efficiency programs. These costs are collected from customers on a pass through basis and therefore, fluctuations in program costs have no impact on Net Income.

Depreciation, Amortization and Taxes

Depreciation and Amortization - Depreciation and Amortization expense increased by $0.1 million, or 2.2% and $0.9 million, or 6.7% in the three and nine month periods ended September 30, 2008, respectively, compared to the same periods in 2007. The increase in the three month period primarily reflects higher depreciation on normal utility plant additions, partially offset by lower amortization of information systems related costs. The increase in the nine month period primarily reflects the amortization, in the first quarter of 2008, of $0.7 million of natural gas inventory carrying costs deferred under a previous regulatory ruling and higher depreciation on normal utility plant additions.

Local Property and Other Taxes - Local Property and Other Taxes increased by $0.1 million, or 7.7% and by $0.3 million, or 7.1% in the three and nine month periods ended September 30, 2008 compared to the same periods in 2007. These increases were due to higher property tax rates on increased property assessments and higher payroll taxes on higher compensation expenses.

Federal and State Income Taxes - Federal and State Income Taxes were lower by $0.3 million in the three month period ended September 30, 2008 compared to the same period in 2007 reflecting lower pre-tax earnings and a lower effective tax rate year over year due to the recognition of higher permanent book/tax differences, including higher tax credits and prior year tax return true-up adjustments, in the third quarter of 2008. Federal and State Income Taxes were lower by $0.2 million in the nine month period ended September 30, 2008 compared to the same period in 2007 reflecting a lower effective tax rate year over year due to the same items discussed above.

Other Non-operating Expenses

Other Non-operating Expenses were flat in the three month period ended September 30, 2008 compared to the same period in 2007 and increased by $0.2 million in the nine month period ended September 30, 2008 compared to the same period in 2007. The increase in the nine month period reflects an adjustment of $0.1 million in conjunction with the Company's electric base distribution rate increase in Massachusetts which was implemented in March, 2008.

Interest Expense, Net

Interest expense is presented in the financial statements net of interest income. Interest expense is mainly comprised of interest on long-term debt and short-term borrowings. Certain reconciling rate mechanisms used by the Company's retail distribution utilities give rise to regulatory assets (and regulatory liabilities) on which interest is calculated.

The Company operates a number of reconciling rate mechanisms to recover specifically identified costs on a pass through basis. These reconciling rate mechanisms track costs and revenue on a monthly basis. In any given month, this monthly tracking and reconciling process will produce either an under-collected or an over-collected balance of costs. In accordance with the Company's tariff, interest is accrued on these balances and will produce either interest income or interest expense. Interest income is recorded on an under-collection of costs, which creates a regulatory asset to be recovered in future periods when rates are reset. Interest expense is recorded on an over-collection of costs, which creates a regulatory liability to be refunded in future periods when rates are reset.

Interest Expense, Net (Millions)	Three Months Ended September 30,			Nine Months Ended September 30,		
	2008	2007	Change	**2008**	2007	Change
Interest Expense						
Long-term Debt	$ 2.9	$ 2.9	$ ---	$ 8.6	$ 8.2	$ 0.4
Short-term Debt	0.1	0.1	---	0.5	0.8	(0.3)
Regulatory Liabilities	---	0.1	(0.1)	0.1	0.4	(0.3)
Subtotal Interest Expense	3.0	3.1	(0.1)	9.2	9.4	(0.2)
Interest Income						
Regulatory Assets	(0.6)	(0.7)	0.1	(1.9)	(2.2)	0.3
AFUDC[1] and Other	---	(0.1)	0.1	---	(0.4)	0.4
Subtotal Interest Income	(0.6)	(0.8)	0.2	(1.9)	(2.6)	0.7
Total Interest Expense, Net	$ 2.4	$ 2.3	$ 0.1	$ 7.3	$ 6.8	$ 0.5

[1] AFUDC – Allowance for Funds Used During Construction

Interest Expense, Net increased $0.1 million for the three month period ended September 30, 2008 compared to the same period in 2007. The increase in the three month period reflects lower Allowance for Funds Used During Construction (AFUDC) and interest earned on regulatory assets. For the nine month period ended September 30, 2008, Interest Expense, Net increased $0.5 million compared to the same period in 2007, reflecting higher interest expense associated with an increase in long-term debt outstanding and lower AFUDC and interest earned on regulatory assets compared to the prior period.

LIQUIDITY AND CAPITAL REQUIREMENTS

Sources of Capital

Unitil requires capital to fund utility plant additions, working capital and other utility expenditures recovered in subsequent and future periods through regulated rates. The capital necessary to meet these requirements is derived primarily from internally-generated funds, which consist of cash flows from operating activities, excluding payment of dividends. The Company initially supplements internally generated funds through bank borrowings, as needed, under unsecured short-term bank lines. Periodically, the Company replaces portions of its short-term debt with long-term financings more closely matched to the long-term nature of its utility assets.

The continued availability of these methods of financing, as well as the Company's choice of a specific form of security, will depend on many factors, including, but not limited to: security market conditions; general economic climate; regulatory approvals; the ability to meet covenant issuance restrictions, if any; the level of the Company's earnings, cash flows and financial position; and the competitive pricing offered by financing sources.

At September 30, 2008, Unitil had $37.0 million in unsecured revolving lines of credit through two banks. The Company had short-term debt outstanding through bank borrowings of $21.7 million and $13.0 million at September 30, 2008 and 2007, respectively.

On February 15, 2008, the Company entered into a Stock Purchase Agreement with NiSource and Bay State to acquire all of the outstanding stock of Northern and Granite. The Company has a commitment letter to enter into a senior unsecured bridge facility, which the Company expects to use to finance this transaction. The Company anticipates either financing the initial acquisition or refinancing the bridge facility with the issuance of a combination of long-term debt and common equity securities. (See discussion on the pricing of the anticipated sale and issuance of long-term debt in the "Overview" section above and in Note 4.)

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiaries. The Company's policy is to limit these guarantees to the duration of the contracts, which range from less than one to thirteen months. As of September 30, 2008, there were approximately $6.0 million of guarantees outstanding and the longest term guarantee extends through October 31, 2009. The Company also agreed to guarantee the payment of principal and interest on the Granite notes, when they are issued, as discussed in the "Overview" section above and in Note 4.

Off-Balance Sheet Arrangements

There have been no material changes to the discussion of "Off-Balance Sheet Arrangements" included in Part II, Item 7 of the Company's Form 10-K for the year ended December 31, 2007, as filed with the Securities and Exchange Commission on February 12, 2008.

Cash Flows

The tables below summarize the major sources and uses of cash (in millions) for the nine months ended September 30, 2008 compared to the same period in 2007.

	Nine Months Ended September 30,	
	2008	2007
Cash Provided by Operating Activities	**$ 27.1**	$ 23.6

Cash Provided by Operating Activities - Cash Provided by Operating Activities was $27.1 million during the nine months ended September 30, 2008, an increase of $3.5 million over the comparable period in 2007. Cash flow from Net Income, adjusted for non-cash charges to depreciation, amortization and deferred taxes was $23.2 million and $16.9 million in the first nine months of 2008 and 2007, respectively. Changes in Current Assets and Liabilities (working capital) provided $1.2 million and $3.5 million in cash flow in the 2008 and 2007 nine-month periods. Deferred Restructuring Charges provided $2.4 million and $1.5 million in cash in the first nine months of 2008 and the same period in 2007, respectively. All other items resulted in net sources of cash of $0.3 million and $1.7 million in the first nine months of 2008 and 2007, respectively.

	Nine Months Ended September 30,	
	2008	2007
Cash (Used in) Investing Activities	**$ (20.6)**	$ (25.9)

Cash (Used in) Investing Activities - Cash (Used in) Investing Activities was $20.6 million for the nine months ended September 30, 2008, a decrease in capital spending of $5.3 million over the comparable period in 2007. This is mainly due to the funding in 2007 and the completion in 2008 of the Company's Advanced Metering

Infrastructure (AMI) project. In the first nine months of 2007, capital expenditures included approximately $5.9 million of cash outlays for investment in the AMI project.

	Nine Months Ended September 30,	
	2008	2007
Cash Provided by (Used in) Financing Activities	**$ (6.1)**	$ 1.9

Cash Provided by (Used in) Financing Activities - Cash (Used in) Financing Activities was $6.1 million in the nine months ended September 30, 2008. Uses of cash primarily reflect Unitil's regular quarterly dividend payments on Common and Preferred Stock, expenditures related to the Company's acquisition of Northern and Granite, discussed above, and the scheduled repayment of long-term debt. Proceeds from the issuance of Common Stock through the Company's stock plans and additional short-term debt provided $3.6 million of cash in 2008. In the second quarter of 2007, Unitil received cash proceeds of $20.0 million from the issuance of Senior Long-term Notes, which were used to pay down short-term debt.

CRITICAL ACCOUNTING POLICIES

The preparation of the Company's financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In making those estimates and assumptions, management is sometimes required to make difficult, subjective and/or complex judgments about the impact of matters that are inherently uncertain and for which different estimates that could reasonably have been used could have resulted in material differences in its financial statements. If actual results were to differ significantly from those estimates, assumptions and judgments, the financial statements of the Company could be materially different than reported. The following is a summary of the Company's most critical accounting policies, which are defined as those policies where judgments or uncertainties could materially affect the application of those policies. For a complete discussion of the Company's significant accounting policies, refer to Note 1 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K, as filed with the Securities and Exchange Commission on February 12, 2008.

Regulatory Accounting - The Company's principal business is the distribution of electricity and natural gas by the retail distribution utilities: UES and FG&E. Both UES and FG&E are subject to regulation by the FERC and FG&E is regulated by the MDPU and UES is regulated by the NHPUC. Accordingly, the Company uses the provisions of Financial Accounting Standards Board (FASB) Statement on Financial Accounting Standards (SFAS) No. 71, "Accounting for the Effects of Certain Types of Regulation." (SFAS No. 71). In accordance with SFAS No. 71, the Company has recorded Regulatory Assets and Regulatory Liabilities which will be recovered from customers, or applied for customer benefit, in accordance with rate provisions approved by the applicable public utility regulatory commission.

The Company's principal regulatory assets and liabilities are detailed on the Company's Consolidated Balance Sheet and a summary of the Company's Regulatory Assets is provided below. The Company receives a return on investment on its regulated assets for which a cash outflow has been made.

Regulatory commissions can reach different conclusions about the recovery of costs, which can have a material impact on the Company's consolidated financial statements. The Company believes it is probable that its regulated distribution utilities will recover their investments in long-lived assets, including regulatory assets. The Company also has commitments under long-term contracts for the purchase of electricity and natural gas from various suppliers. The annual costs under these contracts are included in Purchased Electricity and Purchased Gas in the Consolidated Statements of Earnings and these costs are recoverable in current and future rates under various orders issued by the FERC, MDPU and NHPUC.

Regulatory Assets consist of the following (millions)	September 30, 2008	September 30, 2007	December 31, 2007
Power Supply Buyout Obligations	**$ 57.7**	$ 77.7	$ 72.7
Deferred Restructuring Costs	**28.1**	29.5	30.5
Generation-related Assets	**1.0**	1.8	1.6
Subtotal – Restructuring Related Items	**86.8**	109.0	104.8
Retirement Benefit Obligations	**35.2**	37.3	35.1
Income Taxes	**13.4**	17.9	14.6
Environmental Obligations	**11.6**	13.1	13.1
Other	**3.3**	3.5	2.9
Total Regulatory Assets	**$ 150.3**	$ 180.8	$ 170.5

If the Company, or a portion of its assets or operations, were to cease meeting the criteria for application of these accounting rules, accounting standards for businesses in general would become applicable and immediate recognition of any previously deferred costs, or a portion of deferred costs, would be required in the year in which the criteria are no longer met, if such deferred costs were not recoverable in the portion of the business that continues to meet the criteria for application of SFAS No. 71. If unable to continue to apply the provisions of SFAS No. 71, the Company would be required to apply the provisions of FASB Statement No. 101, "Regulated Enterprises – Accounting for the Discontinuation of Application of Financial Accounting Standards Board Statement No. 71." In the Company's opinion, its regulated operations will be subject to SFAS No. 71 for the foreseeable future.

Utility Revenue Recognition - Regulated utility revenues are based on rates and charges approved by federal and state regulatory commissions. Revenues related to the sale of electric and gas service are recorded when service is rendered or energy is delivered to customers. The determination of energy sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each calendar month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on estimated customer usage by class and applicable customer rates.

Allowance for Doubtful Accounts - The Company recognizes a provision for doubtful accounts each month. The amount of the monthly provision is based upon the Company's experience in collecting electric and gas utility service accounts receivable in prior years. Account write-offs, net of recoveries, are processed monthly. At the end of each month, an analysis of the delinquent receivables is performed and the adequacy of the Allowance for Doubtful Accounts is reviewed. The analysis takes into account an assumption about the cash recovery of delinquent receivables and also uses calculations related to customers who have chosen payment plans to resolve their arrears. The analysis also calculates the amount of written-off receivables that are recoverable through regulatory rate reconciling mechanisms. The Company is authorized by regulators to recover the supply-related portion of its written-off accounts from customers through periodically reconciling rate mechanisms. Evaluating the adequacy of the Allowance for Doubtful Accounts requires judgment about the assumptions used in the analysis, including expected fuel assistance payments from governmental authorities and the level of customers enrolling in payment plans with the Company. Also, the Company has experienced periods when state regulators have extended the periods during which certain standard credit and collection activities of utility companies are suspended. In periods when account write-offs exceed estimated levels, the Company adjusts the provision for doubtful accounts to maintain an adequate Allowance for Doubtful Accounts balance. It has been the Company's experience that the assumptions it has used in evaluating the adequacy of the Allowance for Doubtful Accounts have proven to be reasonably accurate.

Retirement Benefit Obligations - The Company sponsors the Unitil Corporation Retirement Plan (Pension Plan), which is a defined benefit pension plan covering substantially all of its employees. The Company also sponsors an unfunded retirement plan, the Unitil Corporation Supplemental Executive Retirement Plan (SERP), covering certain executives of the Company and an employee 401(k) savings plan. Additionally, the Company

sponsors the Unitil Employee Health and Welfare Benefits Plan (PBOP Plan), primarily to provide health care and life insurance benefits to retired employees.

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans", (SFAS No. 158), an amendment of SFAS No. 87, "Employers' Accounting for Pensions", SFAS No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits," SFAS No. 106, "Employers' Accounting for Postretirement Benefits other than Pensions" and SFAS No. 132(R), "Employers' Disclosures about Pensions and Other Postretirement Benefits." SFAS No. 158 requires companies to record on their balance sheets as an asset or liability the overfunded or underfunded status of their retirement benefit obligations (RBO) based on the projected benefit obligation. The Company has recognized a corresponding Regulatory Asset, to recognize the future collection of these obligations in electric and gas retail rates.

The Company's reported costs of providing retirement benefits are dependent upon numerous factors resulting from actual plan experience and assumptions of future experience. The Company has made critical estimates related to actuarial assumptions, including assumptions of expected returns on plan assets, future compensation, health care cost trends, and appropriate discount rates. The Company's health care cost trend assumptions are developed based on historical cost data, the near-term outlook and an assessment of likely long-term trends. The Company's RBO are affected by actual employee demographics, the level of contributions made to the plans, earnings on plan assets, and health care cost trends. Changes made to the provisions of these plans may also affect current and future costs. The Company's RBO may also be significantly affected by changes in key actuarial assumptions, including, anticipated rates of return on plan assets and the discount rates used in determining the Company's RBO.

If these assumptions were changed, the resultant change in benefit obligations, fair values of plan assets, funded status and net periodic benefit costs could have a material impact on the Company's financial statements. The discount rate assumptions used in determining retirement plan costs and retirement plan obligations are based on a market average of long-term bonds that receive one of the two highest ratings given by a recognized rating agency. For the years ended December 31, 2007 and 2006, a change in the discount rate of 0.25% would have resulted in an increase or decrease of approximately $200,000 in the Net Periodic Benefit Cost for the Pension Plan. For the years ended December 31, 2007 and 2006, a 1.0% increase in the assumption of health care cost trend rates would have resulted in increases in the Net Periodic Benefit Cost for the PBOP Plan of $690,000 and $683,000, respectively. Similarly, a 1.0% decrease in the assumption of health care cost trend rates for those same time periods would have resulted in decreases in the Net Periodic Benefit Cost for the PBOP Plan of $539,000 and $530,000, respectively. (See Note 8)

Income Taxes - Provisions for income taxes are calculated in each of the jurisdictions in which the Company operates for each period for which a statement of income is presented. This process involves estimating the Company's current tax liabilities as well as assessing temporary and permanent differences resulting from the timing of the deductions of expenses and recognition of taxable income for tax and book accounting purposes. These temporary differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets. The Company accounts for income tax assets, liabilities and expenses in accordance with FASB Statement No. 109, "Accounting for Income Taxes" (SFAS No. 109) and under FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48), an interpretation of FAS 109.

Depreciation - Depreciation expense is calculated on a group straight-line basis based on the useful lives of assets and judgment is involved when estimating the useful lives of certain assets. The Company conducts independent depreciation studies on a periodic basis as part of the regulatory ratemaking process and considers the results presented in these studies in determining the useful lives of the Company's fixed assets. A change in the estimated useful lives of these assets could have a material impact on the Company's consolidated financial statements.

Commitments and Contingencies - The Company's accounting policy is to record and/or disclose commitments and contingencies in accordance with SFAS No. 5, "Accounting for Contingencies". SFAS No. 5 applies to an existing condition, situation, or set of circumstances involving uncertainty as to possible loss that will ultimately be resolved when one or more future events occur or fail to occur. As of September 30, 2008, the Company is not aware of any material commitments or contingencies other than those disclosed in the Commitments and Contingencies footnote to the Company's consolidated financial statements below.

Refer to "Recently Issued Pronouncements" in Note 1 of the Notes of Consolidated Financial Statements for information regarding recently issued accounting standards.

LABOR RELATIONS

As of September 30, 2008, there were 305 employees of the Company, of which 82 employees are represented by labor unions. In May 2005, the Company reached agreements with its bargaining units for new five-year contracts, effective June 1, 2005. These agreements replace contracts that expired on May 31, 2005.

INTEREST RATE RISK

The majority of the Company's debt outstanding represents long-term notes bearing fixed rates of interest. Changes in market interest rates do not affect interest expense resulting from these outstanding long-term debt securities. However, the Company periodically repays its short-term debt borrowings through the issuance of new long-term debt securities. Changes in market interest rates may affect the interest rate and corresponding interest expense on any new long-term debt securities issued by the Company. In addition, the Company's short-term debt borrowings bear a variable rate of interest. As a result, changes in short-term interest rates will increase or decrease the Company's interest expense in future periods. For example, if the Company had an average amount of short-term debt outstanding of $25 million for the period of one year, a change in interest rates of 1% would result in a change in annual interest expense of approximately $250,000 (pre-tax). The average interest rates on the Company's short-term borrowings for the three months ended September 30, 2008 and 2007 were 3.03% and 5.71%, respectively. The average interest rates on the Company's short-term borrowings for the nine months ended September 30, 2008 and 2007 were 3.28% and 5.75%, respectively.

MARKET RISK

Although Unitil's retail distribution utilities are subject to commodity price risk as part of their traditional operations, the current regulatory framework within which these companies operate allows for full collection of electric power and natural gas supply costs in rates on a pass-through basis. Consequently, there is limited commodity price risk after consideration of the related rate-making. Additionally, as discussed above and below in Regulatory Matters, the Company has divested its commodity-related contracts and therefore, further reduced its exposure to commodity risk.

REGULATORY MATTERS

Please refer to Note 6 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Regulatory Matters.

ENVIRONMENTAL MATTERS

Please refer to Note 7 to the Consolidated Financial Statements in Part I, Item 1 of this report for a discussion of Environmental Matters.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation – The accompanying unaudited consolidated financial statements of Unitil have been prepared in accordance with the instructions to Form 10-Q and include all of the information and footnotes required by generally accepted accounting principles. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results of operations for the three and nine months ended September 30, 2008 are not necessarily indicative of results to be expected for the year ending December 31, 2008. For further information, please refer to Note 1 of Part II to the Consolidated Financial Statements – "Summary of Significant Accounting Policies" of the Company's Form 10-K for the year ended December 31, 2007, as filed with the SEC on February 12, 2008, for a description of the Company's Basis of Presentation.

Nature of Operations - Unitil Corporation (Unitil or the Company) is a public utility holding company. Unitil and its subsidiaries are subject to regulation as a holding company system by the Federal Energy Regulatory Commission (FERC) under the Energy Policy Act of 2005. Prior to the passage of the Energy Policy Act of 2005, Unitil and its subsidiaries were subject to regulation as a registered holding company system under the Public Utility Holding Company Act of 1935 (PUHCA) by the Securities and Exchange Commission (SEC). As a result of the enactment of the Energy Policy Act of 2005, PUHCA has been repealed. The following companies are wholly-owned subsidiaries of Unitil: Unitil Energy Systems, Inc. (UES), Fitchburg Gas and Electric Light Company (FG&E), Unitil Power Corp. (Unitil Power), Unitil Realty Corp. (Unitil Realty), Unitil Service Corp. (Unitil Service) and its non-regulated business unit Unitil Resources, Inc. (Unitil Resources). Usource, Inc. and Usource L.L.C. are subsidiaries of Unitil Resources.

Unitil's principal business is the retail distribution of electricity in the southeastern seacoast and capital city areas of New Hampshire and the retail distribution of both electricity and natural gas in the greater Fitchburg area of north central Massachusetts, through the Company's two wholly-owned subsidiaries, UES and FG&E, collectively referred to as the retail distribution utilities.

A third utility subsidiary, Unitil Power, formerly functioned as the full requirements wholesale power supply provider for UES. In connection with the implementation of electric industry restructuring in New Hampshire, Unitil Power ceased being the wholesale supplier of UES on May 1, 2003 and divested of its long-term power supply contracts through the sale of the entitlements to the electricity associated with various electric power supply contracts it had acquired to serve UES' customers.

Unitil also has three other wholly-owned subsidiaries: Unitil Service, Unitil Realty and Unitil Resources. Unitil Service provides, at cost, a variety of administrative and professional services, including regulatory, financial, accounting, human resources, engineering, operations, technology and management services on a centralized basis to its affiliated Unitil companies. Unitil Realty owns and manages the Company's corporate office in Hampton, New Hampshire and leases this facility to Unitil Service under a long-term lease arrangement. Unitil Resources is the Company's wholly-owned non-regulated subsidiary. Usource, Inc. and Usource L.L.C. (collectively, Usource) are wholly-owned subsidiaries of Unitil Resources. Usource provides brokering and advisory services to large commercial and industrial customers in the northeastern United States.

Recently Issued Pronouncements – On September 12, 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FAS 133-1 and FIN 45-4, "Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133, "Accounting for Derivative Instruments and Hedging Activities", (SFAS No. 133) and FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others", (FIN 45); and Clarification of the Effective Date of FASB Statement No. 161, "Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133" (SFAS No. 161)", (FSP FAS 133-1 and FIN 45-4). FSP FAS 133-1 and FIN 45-4 is effective for reporting periods ending after November 15, 2008, with early adoption permitted. FSP FAS 133-1 and FIN 45-4 (i) amends SFAS No. 133 to require disclosures by sellers of credit derivatives, including credit derivatives embedded in a hybrid instrument, (ii) amends FIN 45 to require an additional disclosure about the current status of the payment/performance risk of a guarantee, and (iii) clarifies the

FASB's intent about the effective date of SFAS No. 161. The Company adopted FSP FAS 133-1 and FIN 45-4 and there was no impact on its financial statements.

In May 2008, the FASB issued FASB Statement No. 162, "The Hierarchy of Generally Accepted Accounting Principles", (SFAS No. 162), effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board's amendments to AU Section 411. SFAS No. 162 identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. The Company will adopt SFAS No. 162 when it is approved and does not expect it to have any impact on its financial statements.

In March 2008, the FASB issued SFAS No. 161, effective for fiscal years and interim periods beginning after November 15, 2008, with early adoption allowed. SFAS No. 161 amends and expands the disclosure requirements of SFAS No. 133 with the intent to provide users of financial statements with an enhanced understanding of an entity's use of derivative instruments and the effect of those derivative instruments on an entity's financial statements. The Company adopted SFAS No. 161 and there was no impact on its financial statements.

In December 2007, the FASB issued FASB Statement No. 141 (Revised 2007), "Business Combinations" (SFAS No. 141R), effective prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. SFAS No. 141R establishes principles and requirements on how an acquirer recognizes and measures in its financial statements identifiable assets acquired, liabilities assumed, noncontrolling interests in the acquiree, goodwill or gain from a bargain purchase and accounting for transaction costs. Additionally, SFAS No. 141R determines what information must be disclosed to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The Company will adopt SFAS No. 141R upon its effective date and expects the adoption to affect any business combinations effected on or subsequent to that date.

In September 2006, the FASB issued FASB Statement No. 157, "Fair Value Measurements", (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Certain requirements of SFAS No. 157 are effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The effective date for other requirements of SFAS No. 157 has been deferred for one year by the FASB. The Company adopted the sections of SFAS No. 157 which are effective for fiscal years beginning after November 15, 2007 and there was no additional impact on the Company's Consolidated Financial Statements. The Company's fixed rate long-term debt falls under the fair value reporting requirements of SFAS No. 157. Accordingly, the Company has estimated the fair value of its long-term debt as of September 30, 2008 based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities (See Note 4). The Company does not expect that the adoption of the deferred sections of SFAS No. 157 will have an impact on the Company's Consolidated Financial Statements.

NOTE 2 – DIVIDENDS DECLARED PER SHARE

Declaration Date	Date Paid (Payable)	Shareholder of Record Date	Dividend Amount
09/25/08	10/31/08	10/17/08	$ 0.345

NOTE 3 – COMMON STOCK AND PREFERRED STOCK

As of August 21, 2008 the Company's Common Stock began trading on the New York Stock Exchange and ceased trading on the American Stock Exchange. The Company's Common Stock will continue to trade under its current symbol, "UTL".

On September 10, 2008, the Company's shareholders, at a Special Meeting of Shareholders, approved an increase in the authorized shares of the Company's Common Stock. Shareholders approved an amendment to the Company's Articles of Incorporation to increase the authorized number of shares of the Company's Common Stock, from 8,000,000 shares to 16,000,000 shares in the aggregate. Of the 8,000,000 additional shares of newly authorized Common Stock, the Company expects to issue and sell up to 4,000,000 shares in a public offering to partially finance the acquisition of Northern Utilities, Inc. and Granite State Gas Transmission, Inc., discussed below in Note 6. The Company had 5,781,025, 5,730,395, and 5,740,023 of common shares outstanding at September 30, 2008, September 30, 2007 and December 31, 2007, respectively.

During the first nine months of 2008, the Company sold 22,462 shares of its Common Stock, at an average price of $27.43 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $616,000 were used to reduce short-term borrowings.

During the first nine months of 2007, the Company sold 28,675 shares of its Common Stock, at an average price of $27.65 per share, in connection with its Dividend Reinvestment and Stock Purchase Plan and its 401(k) plans. Net proceeds of approximately $793,000 were used to reduce short-term borrowings.

Also, in the second quarter of 2008, the Company issued and sold 3,000 shares of its Common Stock, at an average price of $24.63 per share, in connection with the exercise of stock options under the Unitil Corporation 1998 Stock Option Plan (1998 Plan). Net proceeds of $73,875 were used by the Company to reduce short-term borrowings. As disclosed in Note 2 to the Company's Form 10-K for the year ended December 31, 2007, the 1998 Plan became effective on December 11, 1998. The number of shares granted under this plan, as well as the terms and conditions of each grant, were determined by the Compensation Committee of the Board of Directors, subject to plan limitations. All options granted under this plan vested over a three-year period from the date of the grant, with 25% vesting on the first anniversary of the grant, 25% vesting on the second anniversary, and 50% vesting on the third anniversary. Under the terms of this plan, key employees may be granted options to purchase the Company's Common Stock at no less than 100% of the market price on the date the option is granted. All options must be exercised no later than 10 years after the date on which they were granted. This plan was terminated on January 16, 2003. There was no compensation expense associated with this plan in 2008 and 2007. The plan will remain in effect solely for the purposes of the continued administration of all options currently outstanding under the plan. No further grants of options will be made under this plan. As of September 30, 2008, there are 104,000 options vested and exercisable outstanding.

The Company maintains a Restricted Stock Plan (the Plan) which has been ratified and approved by the Company's shareholders. On February 6, 2008, 15,540 restricted shares were issued in conjunction with the Plan with an aggregate market value at the date of issuance of $445,998. Compensation expense associated with shares issued under the Plan is recognized ratably as the shares vest and was $0.4 million and $0.3 million for nine months ended September 30, 2008 and 2007, respectively. At September 30, 2008, there was approximately $0.9 million of total unrecognized compensation cost related to non-vested shares under the Plan which is expected to be recognized over approximately 2.6 years as the shares vest. During 2008, 11,249 restricted shares vested. As of September 30, 2008 there were 32,218 unvested restricted shares.

Details on preferred stock at September 30, 2008, September 30, 2007 and December 31, 2007 are shown below:

(Amounts in Millions)

Less: Current Portion	**0.4**	0.4	0.4
Total Long-term Debt, Less Current Portion	**$ 159.4**	$ 159.8	$ 159.6

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities. The fair value of the Company's long-term debt at September 30, 2008 is estimated to be approximately $158 million, before considering any costs, including prepayment costs, to market the Company's debt. Currently, the Company believes that there is no active market in the Company's debt securities, which have all been sold through private placements.

The Company provides limited guarantees on certain energy contracts entered into by its regulated subsidiary companies. The Company's policy is to limit these guarantees to two years or less. As of September 30, 2008 there are $6 million of guarantees outstanding and these guarantees extend through October 31, 2009. These guarantees are not required to be recorded under the provisions of FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others."

On September 12, 2008, in connection with the Company's acquisition of Northern Utilities, Inc. and Granite State Gas Transmission, Inc. (See Note 6), the Company priced the anticipated sale and issuance of $80.0 million aggregate principal amount of senior unsecured notes by Northern and $10.0 million aggregate principal amount of senior unsecured notes by Granite. The notes consist of:

(iv) $30.0 million aggregate principal amount of 6.95% senior unsecured notes of Northern, which are due in 2018;

(v) $50.0 million aggregate principal amount of 7.72% senior unsecured notes of Northern, which are due in 2038; and

(vi) $10.0 million aggregate principal amount of 7.15% senior unsecured notes of Granite, which are due in 2018.

The Company agreed to guarantee the payment of principal and interest on the Granite notes.

The Company plans to use the proceeds from the sale and issuance of the notes to repay all amounts outstanding under a bridge credit facility that will used to partially finance the acquisitions of Northern and Granite. The Company expects to close the sale and issuance of the notes promptly after the closing of the acquisitions.

The sale and issuance of the notes (i) is subject to the execution of definitive note purchase agreements by Northern, Granite and the prospective purchasers of the notes and satisfaction of closing conditions, (ii) will not be, and has not been, registered under the Securities Act of 1933 and the notes may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements and (iii) is not conditioned upon the closing of the offering of the Company's common stock, as described above. The Company has received the required regulatory approvals from the Public Utilities Commissions in New Hampshire and Maine for these debt issuances.

NOTE 5 – SEGMENT INFORMATION

The following table provides significant segment financial data for the three and nine months ended September 30, 2008 and September 30, 2007 (Millions):

Three Months Ended:	**Electric**	**Gas**	**Other**	**Non-Regulated**	**Total**

NOTE 6 – REGULATORY MATTERS

UNITIL'S REGULATORY MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2007 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 12, 2008.

FG&E – Electric Division – On December 3, 2007, FG&E submitted its annual reconciliation of costs and revenues for Transition, Transmission, Standard Offer Service, and Default Service filed under its restructuring plan (the Annual Reconciliation Filing). The rates were approved effective January 1, 2008, subject to reconciliation pursuant to the MDPU's investigation. On June 6, 2008, FG&E submitted a revised Transition Charge reducing the recovery of net costs associated with the sale of Wyman 4 by $36,762 pursuant to an agreement with the Attorney General. This filing was approved on August 19, 2008.

FG&E – Other – On June 22, 2007, the MDPU opened an inquiry into revenue decoupling for gas and electric distribution utilities, generally defined as a ratemaking mechanism designed to eliminate or reduce the dependence of a utility's distribution revenues on sales. Revenue decoupling is intended to remove the disincentive a utility has to administer and promote customer efforts to reduce energy consumption and demand or to install distributed generation to displace electricity delivered by the utility. On July 16, 2008, the MDPU issued an order establishing a comprehensive plan for decoupling to be adopted by gas and electric distribution utilities on a going-forward basis. Company specific rate cases will be required. Lost base revenue recovery associated with incremental energy efficiency savings will be allowed through 2012 consistent with the MDPU's expectation that, with limited exceptions, distribution companies will be operating under decoupling plans by year-end 2012. Within 45 days of this order, each distribution company was to notify the MDPU of when the company expects to file a rate case to implement decoupling. FG&E notified the MDPU that it will be prepared to file rate cases for each of its divisions by the third quarter of 2009, based upon a calendar 2008 test year, along with a comprehensive decoupling proposal and associated base rate adjustment mechanism. This matter remains pending before the MDPU.

On July 2, 2008, Massachusetts Senate Bill No. 2768 (the "Green Communities Act") was signed into law. The Green Communities Act is intended to increase energy efficiency, update the renewable energy portfolio standard, increase public oversight of utilities, increase service quality of power companies, assist low-income energy customers, and increase the use of renewable generation and energy efficiency products. The Act requires electric companies to boost investment in energy efficiency measures that reduce energy demand and deliver savings to customers; provides a new funding source for efficiency measures through the auction of pollution allowances by power plants through the Regional Greenhouse Gas Initiative; creates stronger incentives for the development of renewable energy, like wind and solar, by requiring 15 percent of electricity to be supplied by new green power facilities by 2020 and establishing a pilot program for utilities to enter into long-term contracts with renewable energy projects; expressly authorizes cities and towns to own renewable energy facilities; and encourages green building design through updated codes, training and assistance. The MDPU has begun to initiate regulatory proceedings to implement various sections of the Act. The impact of any new measures to be required of FG&E in compliance with the Act cannot be estimated at this time.

UES – In July, 2008, the State of New Hampshire passed a law that allows electric utilities to make investments in distributed energy resources including energy efficiency and demand reduction technologies as well as clean cogeneration and renewable generation. In June, 2008, The State of New Hampshire also passed a law approving state participation in the Regional Greenhouse Gas Initiative (RGGI). The RGGI program begins in 2009 and requires large electric generators in 10 northeast and mid-atlantic states to purchase allowances for their carbon emissions. These allowances are being sold through a regional auction process and the funds will be used by the states for investments in energy efficiency and alternative energy.

On March 14, 2008, UES made its annual reconciliation and rate filing with the NHPUC under its restructuring plan, for rates effective May 1, 2008, including reconciliation of prior year costs and revenues, power supply and power supply-related stranded costs. The filing was approved on April 23, 2008. On July 9, 2008, UES proposed an increase to its External Delivery Charge, effective September 1, 2008, reflecting higher transmission costs. The filing was approved on August 29, 2008.

On June 22, 2007, the NHPUC issued an order in its investigation into implementation of the federal Energy Policy Act of 2005 regarding the adoption of standards for time-based metering and interconnection. On August 31, 2007, the NHPUC issued an order on motion for rehearing, staying the June 22, 2007 order pending hearing and reconsideration of the issues. An order following rehearing was issued on January 22, 2008 finding that it is appropriate to implement some form of time-based metering standards and ordering that the details, including cost-benefit analyses, form of rate design, time of implementation and applicable customer classes shall be determined in separate proceedings to be initiated by the Commission. In a decision issued on September 15, 2008, the NHPUC ordered the establishment of a working group to facilitate the evaluation and implementation of advanced metering infrastructure and time-based rates and that such working group make a report to the Commission by December 1, 2008 with regard to next steps toward utility specific cost-benefit analyses regarding such implementation. The Commission also found that additional review of the energy standards for net metering, fuel diversity and fossil fuel generation efficiency as proposed in the Energy Policy Act of 2005 is not required due to action of the NH legislature and the Commission in adopting comparable standards.

On May 14, 2007, the NHPUC issued an order opening an investigation into the merits of instituting appropriate rate mechanisms, such as revenue decoupling, which would have the effect of removing obstacles to, and encouraging investment in, energy efficiency. This matter is pending before the NHPUC.

Acquisition of Northern Utilities Inc. and Granite State Gas Transmission, Inc.: On February 15, 2008, the Company entered into a Stock Purchase Agreement with NiSource, Inc. (NiSource) and Bay State Gas Company (Bay State, which is a wholly owned utility subsidiary of NiSource), to acquire all of the outstanding stock of Northern Utilities, Inc. (Northern), and Granite State Gas Transmission, Inc. (Granite) for $160 million in cash, which amount is subject to a working capital adjustment. The transaction is expected to be financed initially with proceeds from newly issued common stock together with a bridge credit facility. In the event that the equity offering is delayed until after the transaction closes, the Company may initially finance the transaction entirely with the bridge facility. The Company expects to repay the bridge facility as soon as practical after the transaction closes using the proceeds from the issuance of notes and newly issued common stock.

On March 31, 2008, Unitil and Northern filed joint petitions and supporting testimony with the Maine Public Utilities Commission (MPUC) and the NHPUC requesting approval of the acquisitions. Subsequently, on May 30, 2008, Unitil and Northern filed joint petitions before both the NHPUC and MPUC requesting authority for Northern to issue unsecured long term debt to finance the acquisition of Northern by Unitil. In August, 2008, unopposed stipulation agreements resolving all outstanding issues and recommending approval of the acquisition and the financing petitions were filed with the MPUC and the NHPUC on behalf of Unitil, Northern and the active parties to the respective Maine and New Hampshire proceedings.

On October 10, 2008, the NHPUC issued orders approving the stipulation agreement and the financing petition, and authorizing the acquisition of Northern by Unitil.

On October 6, 2008, the MPUC publicly deliberated the matter and voted to approve the joint petition and stipulation agreement with conditions, subject to its issuance of a final written order. On October 22, 2008, the MPUC issued its written order approving the stipulation agreement and authorizing the acquisition of Northern by Unitil, subject to several conditions. Based on its review of the written order, Unitil expects to file along with Northern, a motion for reconsideration of the order on narrow grounds requesting clarification and/or modification of conditions of approval contained in the order. These conditions would potentially contravene the allocation of risks agreed to by the parties in the stipulation agreement and underlying Stock Purchase Agreement with regard to several pending regulatory safety and compliance proceedings involving Northern. At this time, Unitil can not predict what changes, if any, the MPUC's reconsideration and continued deliberation of this matter will have on its order or the unopposed stipulation agreement of the parties in this proceeding.

As a result of statutory changes in Massachusetts (see discussion of "Green Communities Act," above), on August 13, 2008, Unitil and Bay State also filed a joint petition with the MDPU requesting an advisory ruling that Massachusetts law is not applicable to the proposed transaction, or, in the alternative, that it approve the transaction as consistent with the public interest. The Massachusetts Attorney General has asserted that Massachusetts law grants the MDPU jurisdiction to review the transaction, and argues that Bay State's customers will be harmed by the sale. Unitil and Bay State dispute the Attorney General's assertions. On October 1, 2008, a hearing on the joint petition was held before the MDPU, and on October 10 and October 17 the Parties to the proceeding filed their Initial and Reply Briefs, respectively. The Company has requested a final order from the MDPU on or before November 3, 2008, to allow the Company to proceed with the financing and closing of the transaction in the fourth quarter of 2008. The joint petition remains under active consideration by the MDPU.

As of September 30, 2008, the Company has deferred $3.9 million of transaction costs and $0.6 million of financing costs in connection with the Company's pending acquisition of Northern and Granite, discussed above, and $1.6 million of pre-acquisition system development costs. The transaction is expected to close by the end of 2008, subject to completion of the regulatory review process.

NOTE 7 – ENVIRONMENTAL MATTERS

UNITIL'S ENVIRONMENTAL MATTERS ARE DESCRIBED IN NOTE 5 TO THE FINANCIAL STATEMENTS IN ITEM 8 OF PART II OF UNITIL CORPORATION'S FORM 10-K FOR DECEMBER 31, 2007 AS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION ON FEBRUARY 12, 2008.

The Company's past and present operations include activities that are generally subject to extensive federal and state environmental laws and regulations. The Company believes it is in compliance in all material respects with all applicable environmental and safety laws and regulations, and the Company believes that as of September 30, 2008, there are no material losses reasonably possible in excess of recorded amounts. However, there can be no assurance that significant costs and liabilities will not be incurred in the future. It is possible that other developments, such as increasingly stringent federal, state or local environmental laws and regulations could result in increased environmental compliance costs.

Included on the Company's Consolidated Balance Sheet at September 30, 2008, in Environmental Obligations is $12.0 million related to estimated future clean up costs for permanent remediation of a former manufactured gas plant site at Sawyer Passway, located in Fitchburg, Massachusetts. A corresponding regulatory asset was recorded to reflect the future rate recovery of these costs. As noted above, please refer to Note 5 to the financial statements in Item 8 of Part II of the Company's Form 10-K for December 31, 2007 for additional information. The Company received an insurance settlement during the first quarter of 2008 associated with environmental remediation costs. Any recovery that FG&E receives from insurance or third parties with respect to environmental response costs, net of the unrecovered costs associated therewith, are split equally between FG&E and its gas customers.

NOTE 8: RETIREMENT BENEFIT OBLIGATIONS

The Company sponsors the following retirement benefit plans to provide certain pension and postretirement benefits for its retirees and current employees as follows:

- The Unitil Corporation Retirement Plan (Pension Plan) - The Pension Plan is a defined benefit pension plan covering substantially all of its employees. Under the Pension Plan, retirement benefits are based upon an employee's level of compensation and length of service.

- The Unitil Retiree Health and Welfare Benefits Plan (PBOP Plan) – The PBOP Plan provides health care and life insurance benefits to retirees. The Company has established Voluntary Employee Benefit Trusts (VEBT), into which it funds contributions to the PBOP Plan.

- The Unitil Corporation Supplemental Executive Retirement Plan (SERP) – The SERP is an unfunded retirement plan, with participation limited to executives selected by the Board of Directors.

The following table includes the key weighted average assumptions used in determining the Company's benefit plan costs and obligations:

Used to Determine Plan Costs	**2008**	2007
Discount Rate	**6.00%**	5.50%
Rate of Compensation Increase	**3.50%**	3.50%
Expected Long-term rate of return on plan assets	**8.50%**	8.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	9.00%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year that Ultimate Health Care Cost Trend Rate is reached	**2017**	2016

Used to Determine Benefit Obligations:	**2008**	2007
Discount Rate	**6.00%**	5.50%
Rate of Compensation Increase	**3.50%**	3.50%
Health Care Cost Trend Rate Assumed for Next Year	**8.50%**	8.50%
Ultimate Health Care Cost Trend Rate	**4.00%**	4.00%
Year that Ultimate Health care Cost Trend Rate is reached	**2017**	2016

The following tables provide the components of the Company's Retirement plan costs ($000's):

	Pension Plan		PBOP Plan		SERP	
Three Months Ended September 30,	**2008**	2007	**2008**	2007	**2008**	2007
Service Cost	**$ 488**	$ 492	**$ 355**	$ 358	**$ 37**	$ 40
Interest Cost		834	**559**	514	**31**	29

Net Periodic Benefit Cost Recognized	**$ 1,379**	$ 1,269	**$ 2,088**	$ 2,014	**$ 224**	$ 242

Employer Contributions

On August 17, 2006, the Pension Protection Act of 2006 (PPA) was signed into law. Included in the PPA are new minimum funding rules which will go into effect for plan years beginning in 2008. The funding target will be 100% of a plan's liability with any shortfall amortized over seven years, with lower (92% - 100%) funding targets available to well-funded plans during the transition period. As of September 30, 2008, the Company has funded $2.8 million to fund its Pension Plan in 2008 and does not anticipate making additional contributions in 2008.

As of September 30, 2008, the Company had made $1.6 million and $46,000 of contributions to the PBOP and SERP Plans, respectively, in 2008. The Company presently anticipates contributing an additional $1.1 million and $13,000 to the PBOP and SERP Plans, respectively, in 2008.

NOTE 9: INCOME TAXES

The Company bills its customers sales tax in Massachusetts and consumption tax in New Hampshire. These taxes are remitted to the appropriate departments of revenue in each state and are excluded from revenues on the Company's Consolidated Statements of Earnings.

The Company evaluated its tax positions at December 31, 2007, and at each interim reporting date in the period ended September 30, 2008 in accordance with FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48), an interpretation of FAS 109, and has concluded that no adjustment for recognition, derecognition, settlement and foreseeable future events to any unrecognized tax liabilities or assets as defined by FIN 48 is required. The Company does not have any unrecognized tax positions for which it is reasonably possible that the total amounts recognized will significantly change within the next 12 months. The Company remains subject to examination by Federal, Massachusetts and New Hampshire tax authorities for the tax periods ended December 31, 2005; December 31, 2006; and December 31, 2007. Income tax filings for the year ended December 31, 2007 have been filed with the Internal Revenue Service. The Company classifies penalty and interest expense related to income tax liabilities as an income tax expense. There are no interest and penalties recognized in the statement of earnings or accrued on the balance sheets.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to the "Interest Rate Risk" and "Market Risk" sections of Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" (above).

Item 4. Controls and Procedures

As of the end of the quarter covered by this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings.

There have been no changes in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter covered by this Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in legal and administrative proceedings and claims of various types, which arise in the ordinary course of business. Certain specific matters are discussed in Notes 6 and 7 to the Unaudited Consolidated Financial Statements. In the opinion of Management, based upon information furnished by counsel and others, the ultimate resolution of these claims will not have a material impact on the Company's financial position.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in the Company's Form 10-K for the year-ended December 31, 2007 as filed with the Securities and Exchange Commission on February 12, 2008, other than the risks associated with the Company's recently announced acquisition of Northern and Granite and the risks associated with the recent distress in the financial markets, as discussed in the Cautionary Statement section of Part I, Item 2 of this Quarterly Report on Form 10-Q for the quarter ended September 30, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no sales of unregistered equity securities by the Company for the fiscal period ended September 30, 2008.

Pursuant to the written trading plan under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), adopted by the Company on March 20, 2008, the Company periodically repurchases shares of its Common Stock on the open market related to Employee Length of Service Awards and the stock portion of the Directors' annual retainer. The Company may suspend or terminate its Rule 10b5-1 trading plan at any time, so long as the suspension or termination is made in good faith and not as part of a plan or scheme to evade the prohibitions of Rule 10b-5 under the Exchange Act, or other applicable securities laws. There is no pool or maximum number of shares related to these purchases. Company repurchases are shown in the table below for the monthly periods noted:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
7/1/08 – 7/31/08	---	---	---	n/a
8/1/08 – 8/31/08		---	---	n/a
9/1/08 – 9/30/08	225	$26.60	225	n/a
Total	225	$26.60	225	n/a

CERTIFICATION UNDER SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Robert G. Schoenberger, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Unitil Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f))for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal controls over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Quarterly Report of Unitil Corporation (the "Company") on Form 10-Q for the period ending September 30, 2008 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned Robert G. Schoenberger, Chief Executive Officer and President, Mark H. Collin, Chief Financial Officer and Laurence M. Brock, Chief Accounting Officer, certifies, to the best knowledge and belief of the signatory, pursuant to 18 U.S.C. section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Supplementary Filing Requirements
Pursuant to Puc 1604.01(a)

In accordance with Puc 1604.01(a), please provide:

(25) If a utility is a subsidiary, duplicates of all items required by this section for the parent company except as provided in (26) below;

(25.21) A description of the utility's projected need for external capital for the 2 year period immediately following the test year.

Response:

Unitil Corporation plans to continue to issue common stock through its Dividend Reinvestment Plan and other stock plans as filed with the Securities and Exchange Commission. At this time, Unitil Corporation does not have any plans in the next two years to do a long-term financing, including public common stock, preferred stock or long-term debt.

Unitil Corporation currently has an $80 million bank credit facility for its short-term debt requirements with $66.8 million outstanding as of December 31, 2010. Unitil Corporation utilizes and manages its short-term bank credit facility on a daily basis to meet the obligations of the Unitil Corporation Cash Pool. Unitil Corporation and its subsidiaries are individually and collectively members of the Cash Pool, which is the financing vehicle for day-to-day cash borrowing and investing. Unitil Corporation may increase or decrease the size of the bank credit facility in the next two years to manage the cash requirements of its subsidiaries.

Pursuant to Puc 1604.01(a)

In accordance with Puc 1604.01(a), please provide:

(27) For gas utilities, as defined in Puc 500, and for electric utilities, as defined in Puc 300, the uniform statistical report to the American Gas Association-Edison Electric Institute for the last 2 years; and

Response:

Northern Utilities, Inc. has not completed / provided any uniform statistical reports to the American Gas Association - Edison Electric Institute. However, Northern Utilities does file with the Pipeline Hazardous Materials Safety Administration ("PHMSA") the Form PHMSA F 7100.1-1 annual report that does provide statistical data on the Northern Utilities distribution system.

Please see the following reports:

- Attachment 1, Form PHMSA F 7100.1-1, 2009
- Attachment 2, Form PHMSA F 7100.1-1, 2008

NOTICE: This report is required by 49 CFR Part 191. Failure to report may result in a civil penalty not to exceed $100,000 for each violation for each day the violation continues up to a maximum of $1,000,000 as provided in 49 USC 60122.

ANNUAL REPORT FOR CALENDAR YEAR **2009**

GAS DISTRIBUTION SYSTEM

INITIAL REPORT **X**
SUPPLEMENTAL REPORT ☐

PART A - OPERATOR INFORMATION

DOT USE ONLY

1. NAME OF OPERATOR
NORTHERN UTILITIES, INC.

2. LOCATION OF OFFICE WHERE ADDITIONAL INFORMATION MAY BE OBTAINED
325 West Rd
Number and Street
Portsmouth, Rockingham County
City and County1
New Hampshire, 03801
State and Zip Code

3. OPERATOR'S 5 DIGIT IDENTIFICATION NUMBER
/ 1 / 3 / 8 / 0 / 0 /

4. HEADQUARTERS NAME & ADDRESS, IF DIFFERENT
Number and Street
City and County
State and Zip Code

5. STATE IN WHICH SYSTEM OPERATES:/ N / H / (provide a **separate** report for each state in which system operates)

PART B - SYSTEM DESCRIPTION

Report miles of main and number of services in system at end of year.

1. GENERAL

	STEEL				PLASTIC	CAST/ WROUGHT IRON	DUCTILE IRON	COPPER	OTHER	OTHER	TOTAL
	UNPROTECTED		CATHODICALLY PROTECTED
