

FairPoint Communications, Inc.
State of New Hampshire
Docket No. DT 07-011

Respondent: Michael Haga
Title: Director of Billing and
Operations Support Systems

REQUEST: BayRing, segTEL & OTEL ("CLECs") - Rebuttal

DATED: September 19, 2007

ITEM: CLEC's R-41 With respect to the WISOR demonstration referred to at page 17 of the rebuttal testimony of Mr. Haga and Mr. Kurtze, please respond to the following:

- a. Was the WISOR demonstration limited to the user interface only?
- b. Did the WISOR demonstration display or permit the interaction of any of the 41 systems listed in Mr. Haga's and Mr. Kurtze's testimony?

REPLY:

- a. The WISOR demonstration was primarily the GUI interface for LSR and ASR interactions, but it also contained material on the system architecture and components.
- b. At the time of the demonstration, WISOR was not interconnected with any of the FairPoint systems. The purpose of the demonstration was to show CLECs the principal point of interface so they could understand the similarities between the Wisor GUI and the currently used Verizon GUI.
