GI 1-15 Assume, for purposes of illustration, that a CLEC currently obtains 20% of its volume commitment for a particular Verizon service in Maine, New Hampshire and Vermont. After the transaction, what volume level will the CLEC have to maintain in the remaining Verizon territories to meet the volume commitment?

REPLY: Generally speaking, for Special Access services offered pursuant to federal tariff that have a commitment component, volume commitments would be adjusted to exclude amounts that are attributable to Vermont, New Hampshire, and Maine. Generally speaking, then, a CLEC that obtains 20% of its volume commitment in those states should expect to see a commensurate reduction in that commitment. The specific reductions will be dictated by the terms of Verizon's FCC Tariff No. 11.

Wholesale Advantage is offered through confidential commercial agreements negotiated between individual parties and Verizon that are protected by non-disclosure agreements, and any impacts to these proprietary commercial agreements are addressed in a letter that was sent to all Wholesale Advantage customers.
