

Docket IR 22-053

Electric and Gas Utilities Investigation of Energy Commodity Procurement; Renewable Portfolio Standard; Default Service Electric Power; Cost of Gas Methodology and Process

New Hampshire Public Utilities Commission Record Request Set 2

Date Request Received: 2/8/2023

Date Response is Due: 2/17/23

Record Request 11:

Please provide an overview on the types of Asset Management tools that exist or are entering the market, and how those can help optimize procurement decisions for both utilities and their suppliers.

Response:

The New Hampshire Department of Energy (Department) is not an active market participant in the Asset Management Market, nor does the Department manage any Asset Management Agreements (AMAs). As such, the Department is not aware of any Asset Management tools that exist or are entering the market, and how those can help optimize decisions for both utilities and their suppliers.

Utilities and/or other managers of the AMAs—the active market participants—are in a better position to respond to this record request. However, the Department reserves the right to comment further, after the utilities and other managers have filed their responses.

Person Responsible: Faisal Deen Arif, Gas Director, NHDOE

Date: February 14, 2023
