Hello,

I live on Dogford Road in Etna, NH, where nearly 1/4 of all the homes have solar photovoltaic panels, including mine. Net metering is important to help us support our investments in generating clean electricity for our neighborhood. The Dunsky Energy study, as re-analyzed by Clean Energy NH, found that non-solar customers benefit even more from local solar than the estimates in the original study.

Please keep net-energy metering, to help keep electric rates down for everyone AND increase the clean energy fraction in New Hampshire's electricity mix.
