Subject: Net metering settlement

EXTERNAL: Do not open attachments or click on links unless you recognize and trust the sender.

We have lived in NH for over 50 years and are proud of our state's participation in the adoption of clean energy practice and policy.

We installed solar panels years ago, and founded Kensington's Energy Committee to help other residents take advantage of this cost-saving, forward-thinking, economically sound technology.

Net energy metering is an important part of this evolution, and the proposed settlement in Docket 22-060 is an essential, timely program.

We strongly urge you to support and implement the NEM settlement.

Respectfully, Susan and Jim Varn
