Dear Members of the PUC,

We are urging you to approve the settlement that will preserve net metering in New Hampshire.

Ten years ago when we built our new house in Cornish we included roof top solar. The solar system has minimized our energy cost and net metering has allowed us to already pay for our solar system, in part, because we have gotten reasonable compensation for the electricity we return to the grid.

Maintaining net metering will encourage other New Hampshire residents to install roof top solar and enjoy the economic benefits that solar generated electricity provides. In addition, generation of clean electricity has other benefits including health benefits and will enable New Hampshire to continue to be an attractive place for families to settle in.

Thank you,

Jane and Jonathan
