Dear Members of the PUC,

In the interest of promoting more cost-effective energy generation in NH, it is essential to ensure that our state continues to support local, affordable, distributed energy generation. Net metering is one of the best ways to support and facilitate that.

For that reason, I am writing this appeal to you. It is imperative for NH to wean itself from its dependence on burning fuels that produce air pollution in our state and the greenhouse gas emissions that drive increasingly destructive and costly storms.

Please support Net Metering and its valuable role, assisting in the use of clean energy in NH.

Beverly Edwards
