Dear PUC,

I am asking that you decide that we deserve a fair price for our power. I had solar panels put on my lawn office in Exeter in 2011, and while I may be grandfathered it is only fair that all solar panel owners be paid a fair price.

NEM really incentivizes people to offset their electricity bills and know what the future will bring as far as costs. It's empowering to be able to generate electricity and be more self sufficient which is the NH way!

It also encourages energy production from a distributed sources rather than count on large power plants that may be less reliable.

Please support NEM as being incredibly cost effective which is more important now than ever.

Thank you,

Rick Russman
