NH PUC

To Whom It May Concern:

Monadnock Energy is a mission-based solar developer focused on building solar projects that benefit LMI (low to moderate income) customers in the NH Eversource territory. We currently have several projects (1 and 4 MW projects) with site control, and have received a U.S. Department of Energy prize (Community Power Accelerator) to develop solar projects in southern New Hampshire that directly benefit these low-income households.

In modeling these solar projects, we rely heavily on the existing NEM and GNEM framework for the excess energy we are providing to the grid. In projects such as ours, NEM underwrites the benefits we can provide to less advantaged NH households, along with supporting distributed energy generation, well-paid jobs on the installation and maintenance of solar systems, and clean energy sources.

We urge the NH PUC to strongly support NEM.

Thank you,

Brian Levy & Mike Putnam
