To the Public Utilities Commission,

Please accept the Settlement in Docket 22-060.

New Hampshire needs to maintain and improve net metering policies for rate paying residents. Net metering puts solar energy projects in reach for many who might not be able to pay for these projects otherwise. Residents of our state deserve to be fairly compensated for putting solar panels on their homes. Net metering is necessary to increase our local energy independence and prepare for the clean energy grid of the future. It would benefit us all for the Public Utilities Commission to accept the Settlement that Clean Energy NH and others have brought to this issue.

Thank you,

Matt Nolte
