Governor Sununu,
(cc: NH-PUC, NH-DOE)

I recently learned that the NH Public Utilities Commission is about to release an Order concerning PUC Docket DE 22-060 on Changes to the Current Net Metering Tariff Structure. I understand a Settlement Agreement has been filed by the three investor-owned electric utilities, Clean Energy NH, Conservation Law Foundation (CLF), the Office of the Consumer Advocate (OCA), and the NH Hydro Association.

I urge the PUC to accept this Settlement Agreement. I find it hard to believe the in the year 2024 the State of NH does not vigorously support net metering. Our home has a solar PV system in use for several years using net metering that greatly reduces our overall energy costs. Without net metering we would be forced to purchase expensive batteries. Net metering must be part of how NH utilities provide electrical power for our citizens. Its clean, decentralized, and reduces overall costs to consumers in the long run. Its the future we need to be preparing for. Not the past.

I am copying the PUC Clerk on this email so that my concern and support for the Settlement Agreement will be entered into the docket.

Sincerely,
Brian Flynn
