20 license since 2022. I joined Liberty in August 2023. Prior to joining Liberty, I was  
21 employed by Baker Newman Noyes, a public accounting firm, from 2020 through 2022. I

1 held positions as an Audit Senior and Audit Staff, and was responsible for performing  
2 financial audits of companies in a large range of industries, such as banking and  
3 healthcare.

4 **Q. Have you previously testified in regulatory proceedings before the New Hampshire**  
5 **Public Utilities Commission (the “Commission”)?**

6 A. Yes, we have.

7 **Q. What is the purpose of your testimony?**

8 A. Our testimony submits for Commission approval the Company’s updated firm sales Cost  
9 of Gas rates for the 2024/2025 Winter (or Peak) Period and 2025 Summer (or Off-Peak)  
10 Period. In addition, Liberty seeks approval to modify the letter informing customers of  
11 the Fixed Price Option (“FPO”) for use next year (2025/2026 winter period) in order to  
12 mitigate the issues that arise when the approved FPO rate varies substantially from the  
13 FPO rate initially communicated to customers, which has occurred in recent years.. Per  
14 the guidelines adopted in Docket No. 23-027, Liberty believes approval of this new letter  
15 and any other issues that may be raised concerning the FPO may be “carved out” and  
16 addressed in a separate phase of this proceeding, as a decision is not needed before  
17 November 1, 2024.

18 **Q. Can you summarize the proposed rates?**

19 A. The table below provides a summary of all rates proposed in this testimony, along with  
20 comparison to the rates approved for the previous rate year.

1 **Q. Has Liberty made any changes to the aforementioned schedules?**

2 A. Yes. Liberty has made several revisions to the Excel-based model underlying the  
3 attached schedules in order to improve accuracy and transparency, which will lead to  
4 more efficient processes for everyone. The model used in Docket No. DG 23-076 and  
5 previous dockets to create the schedules and calculate the Cost of Gas had grown to  
6 include duplicative information that is no longer useful and made updates and reviews  
7 difficult. Note that for ease of reference, the previously used schedule numbers were

1 retained, and the list of schedule numbers reflected in the table above appear  
2 nonsequential due to the bifurcation of the annual LDAC review from the COG review.

3 Many schedules were not changed at all, while others were revised, reformatted, or  
4 removed. The schedules that were removed include Pk (peak) and OP (off-peak)  
5 Schedules 1, 2, and 7, which all contained duplicative data that can be found on the  
6 remaining Pk and OP Schedules 5 and 6. OP Schedules 10B and 12 were also removed,  
7 as they were exact duplicates of the Pk Schedules 10B and 12, which remain in the  
8 current model. Pk and OP Schedules 4, 10A, and 11, as well as Pk Schedules 21 and 22  
9 were all reformatted to span fewer tabs and flow in a simpler way.

10 Pk and OP Schedule 3 were revised slightly to simplify the presentation of the interest  
11 calculation. Pk Schedule 16 was also revised to remove the unused inventory financing  
12 charge calculation, which is calculated on Pk Schedule 26.

13 The Company met with the Department of Energy and the Office of the Consumer  
14 Advocate ahead of this filing to provide an overview of the changes made in this filing.

15 **Q. Were any changes made to how costs are allocated?**

16 A. Yes. The most significant revision to the schedules can be found on Pk and OP  
17 Schedules 5 and 6. These schedules contain the detail of the estimated unadjusted gas  
18 costs that are the basis for the initial Cost of Gas rate calculation.

19 The estimated demand costs on Pk and OP Schedule 5 were previously allocated between  
20 peak and off-peak manually on a contract basis, with certain pipeline contracts allocated

1 entirely to the peak season and others split between peak and off-peak based on when the  
2 costs were estimated to be incurred. This approach was not necessarily reflective of when  
3 the gas was actually used season to season. Therefore, the Company has created an  
4 allocation factor based on a ratio of projected sales volumes to allocate estimated pipeline  
5 demand costs between the peak and off-peak season. The Company calculated the  
6 percentage of the firm sales projected on Pk Schedule 10B that were attributable to the  
7 off-peak season and used that percentage to allocate the demand costs expected to be  
8 incurred during the off-peak season, with the difference allocated to the peak season. All  
9 costs that are expected to be incurred solely in the peak season are still included in the  
10 peak season. The result of this change is that just over \$2.5M in pipeline demand costs  
11 that previously would have been included in the off-peak Cost of Gas are now included in  
12 the peak Cost of Gas, which is more representative of historical usage.

13 On Pk and OP Schedule 6 (Supply and Commodity Costs), all pipeline costs are included  
14 in the Cost of Gas for the season in which they are incurred, as they were previously.

15 However, the Company is now including 100% of the estimated storage and produced  
16 gas supply and commodity costs in the peak cost of gas because the peak season is when  
17 the stored and produced gas is intended to be used. This change results in about \$90,000  
18 in costs that would have previously been included in the off-peak Cost of Gas now being  
19 included in the peak Cost of Gas. These costs have been removed from OP Schedule 6 to  
20 simplify the schedule. All of these changes were made to increase the accuracy of the  
21 estimated costs for each season.

1 **II. WINTER 2024/2025 COST OF GAS FACTOR**

2 **Q. What are the proposed firm Winter sales and firm transportation Cost of Gas**  
3 **rates?**

4 A. The Company proposes a firm sales Cost of Gas rate of \$0.6792 per therm for residential  
5 customers, \$0.6793 per therm for commercial and industrial high winter use customers,  
6 and \$0.6796 per therm for commercial and industrial low winter use customers. The  
7 Company proposes a firm transportation Cost of Gas rate of \$0.0014 per therm.

8 **Q. Please explain tariff page Illustrative Nineteenth Revised Page 95.**

9 A. Illustrative Nineteenth Revised Page 95 in Attachment 3 contains the calculation of the  
10 2024/2025 winter period Cost of Gas Rate and summarizes the Company's forecast of  
11 firm gas costs and firm gas sales. As shown on tariff Page 95, the proposed 2024/2025  
12 Average Cost of Gas of \$0.6792 per therm is derived by adding the Direct Cost of Gas  
13 Rate of \$0.6259 per therm to the Indirect Cost of Gas Rate of \$0.0533 per therm. The  
14 estimated total Anticipated Direct Cost of Gas, derived on Illustrative Nineteenth Revised  
15 Page 95, is \$55,639,395. The estimated Indirect Cost of Gas, shown on Page 95, is  
16 \$4,736,843. The Direct Cost of Gas Rate of \$0.6259 and the Indirect Cost of Gas Rate of  
17 \$0.0533 are determined by dividing each of these total cost figures by the projected  
18 winter period firm sales volumes of 88,888,172 therms.

19 To calculate the total Anticipated Direct Cost of Gas, the Company adds a list of  
20 allowable adjustments from deferred gas cost accounts to the projected demand and  
21 commodity costs for the winter period supply portfolio. These allowable adjustments,  
22 shown on Illustrative Fourth Revised Page 96, total \$(2,288,082). These adjustments are

1 added to the Unadjusted Anticipated Cost of Gas of \$57,927,477 to determine the Total  
2 Anticipated Direct Cost of Gas of \$55,639,395.

3 **Q. What are the components of the Unadjusted Anticipated Cost of Gas?**

4 A. The Unadjusted Anticipated Cost of Gas shown in Attachment 3 on Illustrative Fourth  
5 Page 96 consists of the following components:

6	1. Purchased Gas Demand Costs	\$13,277,648
7	2. Purchased Gas Commodity Costs	40,009,791
8	3. Storage Demand and Capacity Costs	846,659
9	4. Storage Commodity Costs	4,210,226
10	5. Produced Gas Cost	4,078,054
11	Hedge Underground Storage Contract (saving)/Loss	<u>(4,494,900)</u>
12	Total	<u>\$57,927,477</u>

13 **Q. What are the components of the allowable adjustments to the Cost of Gas?**

14 A. The allowable adjustments to gas costs, listed on Illustrative Fourth Revised Page 96 in  
15 Attachment 3, are as follows:

16	1. Deferred Gas Cost Prior Period Over Collection	\$306,763
17	2. Interest	188,887
18	3. Accounting Adjustments	54,172
19	4. Gas Assistance Program	(618,933)
20	5. Fuel Inventory Revenue Requirement	462,146
21	6. Broker Revenues	30,408
22	7. Transportation COG Revenue	62,123
23	8. Capacity Release Margin	(2,836,642)
24	9. Fixed Price Option Administrative Costs	<u>62,993</u>
25	Total Adjustments	<u>\$(2,288,082)</u>

26 These allowable adjustments are standard adjustments made to the deferred gas cost  
27 balance through the operation of the Company's Cost of Gas adjustment clause.

1 **Q. How does the proposed average Cost of Gas rate in this filing compare to the**  
2 **average Cost of Gas rate approved by the Commission in Docket No. DG 23-076 for**  
3 **the 2023/2024 winter period?**

4 A. The table below contains the comparison of the Cost of Gas rate approved in Docket No.  
5 DG 23-076, to the proposed rate in this filing.

	<b>Rates Effective November 1, 2023 (Order No. 26,898)</b>	<b>November 1, 2024, Proposed Rate</b>	<b>Change</b>	<b>% Change</b>
<b>Residential – R3</b>	<b>\$0.7563</b>	<b>\$0.6792</b>	<b>\$(0.0771)</b>	<b>(10)%</b>
<b>C&amp;I - G41</b>	<b>\$0.7561</b>	<b>\$0.6793</b>	<b>\$(0.0768)</b>	<b>(10)%</b>
<b>C&amp;I - G42</b>	<b>\$0.7561</b>	<b>\$0.6793</b>	<b>\$(0.0768)</b>	<b>(10)%</b>
<b>C&amp;I - G52</b>	<b>\$0.7573</b>	<b>\$0.6796</b>	<b>\$(0.0777)</b>	<b>(10)%</b>

6

7 **Q. How does the proposed firm transportation winter Cost of Gas rate compare to the**  
8 **rate approved by the Commission for the 2023/2024 winter period?**

9 A. The proposed firm transportation winter Cost of Gas rate is \$0.0014 per therm. The rate  
10 approved in Docket No. DG 23-076 was \$0.0018 per therm. There is a \$0.0004 decrease  
11 in the firm transportation rate. The decrease is primarily due to a decrease in anticipated  
12 gas costs. Market changes are discussed in more detail in the Testimony of Mr. Tilbury,  
13 Mrs. Esposito, and Mr. Summerfield.

	<b>Rates Effective November 1, 2023 (Order No. 26,898)</b>	<b>November 1, 2024, Proposed Rate</b>	<b>Change</b>	<b>% Change</b>
<b>Transportation</b>	<b>\$0.0018</b>	<b>\$0.0014</b>	<b>\$(0.0004)</b>	<b>(22)%</b>

1

2 **Q. In the calculation of the firm transportation winter Cost of Gas rate, has the**  
3 **Company updated the estimated percentage used for pressure support purposes?**

4 A. No. The estimated percentage used for pressure support purposes of 8.7% stayed the  
5 same based on the marginal cost study used for the rate design approved in Docket No.  
6 DG 20-105.

7 **Q. Did the Company include a fuel inventory revenue requirement calculation in this**  
8 **filing?**

9 A. Yes. The calculation is provided on Pk Schedule 26. The Company proposes to collect  
10 \$462,146 in fuel inventory revenue requirement consistent with the approved rate of  
11 return in Order No. 26,505 (July 30, 2021) in Docket No. DG 20-105. The impact of this  
12 amount on the overall Cost of Gas rate is \$0.0052 per therm, which is determined by  
13 dividing the \$462,146 by the estimated November 2024 through April 2025 COG sales  
14 volumes of 88,888,172 therms.

15 **Q. How was the statutory tax rate of 27.08% on Schedule 26 calculated?**

16 A. Liberty calculated the statutory rate of 27.08% by using a 21% federal tax rate and a  
17 7.7% tax rate for the State of New Hampshire in the following equation:  $(0.21 + 0.077 -$   
18  $(0.21 \times 0.077) = 0.27083$ ).

19 **Q. How was the common equity pre-tax rate of 6.64% on Schedule 26 calculated?**

20 A. The common equity pre-tax rate of 6.64% was calculated by dividing the 9.30% rate of  
21 return on common equity, approved in Docket No. DG 20-105, by 0.72917  $(1 - 0.27083)$

1 and multiplied by 52.00% (equity component of the capital structure approved in DG 20-  
2 105)  $[0.093 / 0.72917 \times 0.5200 = 0.06664]$ .

3 **Q. Has the bad debt percentage in this filing of 0.23% changed from the bad debt**  
4 **percentage calculated in the Winter 2022/2023 Cost of Gas Reconciliation?**

5 A. Yes. The Company calculated a bad debt percentage of 1.99% for the period of May  
6 2023 – April 2024. The bad debt percentage that was calculated in the Winter 2022/2023  
7 Cost of Gas Reconciliations for the period of May 2022 – April 2023 was 0.23%.

	<b>Approved Rate Docket No. DG 23-076</b>	<b>Proposed Rate</b>	<b>% Change</b>
<b>Bad Debt %</b>	<b>0.23%</b>	<b>1.99%</b>	<b>765.22%</b>

8

9 **Q. What was the actual weighted average firm sales Cost of Gas rate for the 2023/2024**  
10 **winter period?**

11 A. The weighted average Cost of Gas rate was \$0.6249 per therm. This was calculated by  
12 applying the actual monthly Cost of Gas rates for November 2023 through April 2024 to  
13 the monthly therm usage of an average residential heating customer using 640 therms for  
14 the six winter period months. The table below shows the various rate classes and their  
15 changes from last winter:

	<b>Average COG Rate Winter 2023/2024</b>	<b>Proposed Rate</b>	<b>Change</b>	<b>% Change</b>
<b>Residential – R3</b>	<b>\$0.6249</b>	<b>\$0.6792</b>	<b>\$0.0543</b>	<b>9%</b>
<b>C&amp; I - G41</b>	<b>\$0.6292</b>	<b>\$0.6793</b>	<b>\$0.0501</b>	<b>8%</b>
<b>C&amp;I - G42</b>	<b>\$0.6261</b>	<b>\$0.6793</b>	<b>\$0.0532</b>	<b>9%</b>
<b>C&amp; I - G52</b>	<b>\$0.6127</b>	<b>\$0.6796</b>	<b>\$0.0669</b>	<b>11%</b>

1

2 **Q. What is the current percentage used to calculate the maximum increase in the Cost**  
3 **of Gas rate?**

4 A. The current percentage used to calculate the maximum allowed increase to the Cost of  
5 Gas rate through the monthly “trigger” filings is 25% for both the Winter and Summer  
6 period Cost of Gas rates.

7 **III. FIXED PRICE OPTION**

8 **Q. Has the Company established a winter period fixed price for the Fixed Price Option**  
9 **Program?**

10 A. Yes. Pursuant to Order No. 24,515 (Sept. 16, 2005) in Docket No. DG 05-127, the FPO  
11 rates are set by adding \$0.0200 per therm to the initial proposed COG rate. Applying that  
12 calculation, Illustrative Fourth Revised Page 94 in Attachment 3 contains the proposed  
13 FPO rate for the 2024/2025 Winter Period of \$0.6992 per therm for residential customers.  
14 This compares to the FPO rate approved for the 2023/2024 Winter Period of \$0.7763 per  
15 therm for residential customers. This represents a decrease of \$0.0771 per therm or 10%  
16 in the residential FPO rate. The total bill impact on the winter period bills for an average

1 FPO heating customer using 640 therms is a decrease of approximately \$33.12 or 3%  
2 compared to last winter's approved FPO rate. Pk Schedule 23 contains the historical  
3 results of the FPO program.

	<b>Winter 2023/2024 FPO Bill Impact</b>	<b>Winter 2023/2024 Non-FPO Bill Impact</b>
<b>Residential - R3</b>	\$(33.12) or (3)%	\$51.00 or 5%

4  
5 **Q. Has the Company provided a copy of the letter it intends to send customers**  
6 **informing them of the FPO option for the 2024/2025 winter period?**

7 A. Yes. As agreed during the October 19, 2023, hearings in Docket Nos. DG 23-076 and  
8 DG 23-084, a copy of the letter is provided in Attachment 1. It is essentially the same  
9 letter as provided in those cases last year, but with updated rates.

10 **Q. Does the Company propose any modifications to the FPO letter for use in future**  
11 **winter period mailings?**

12 A. Yes. In light of circumstances that caused Liberty to substantially alter its proposed Non-  
13 FPO and FPO rates after the letters were sent to customers in recent years (*e.g.*, dramatic  
14 increase in gas prices precipitated by the invasion of Ukraine and a booking error  
15 discovered shortly before last year's hearing) resulting in the need to send a second set of  
16 FPO letters with updated FPO rates, Liberty seeks approval to use the draft letter set forth  
17 in Attachment 2 beginning next year, for the winter period 2025/2026 FPO mailing. The  
18 key change is that the proposed letter does not include the FPO rate proposed at the time  
19 of the mailing, but simply states that the FPO rate will be two cents higher than the

1 approved COG rate, thereby emphasizing the 2-cent per them premium that participating  
2 customers will pay for the six-months of price certainty. If this change is approved for  
3 the 2025-2026 winter, then in advance of the winter 2026-2027 filing, Liberty will review  
4 its findings (*e.g.*, impact on enrollments, customer inquiries) with the Department of  
5 Energy and Office of the Consumer Advocate and determine whether to continue using  
6 the revised letter.

7 Per the guidelines adopted in Docket No. 23-027, the Company recommends that this  
8 matter be addressed in a separate phase of this docket, along with any other changes that  
9 may be proposed to the FPO.

10 **IV. SHORT TERM DEBT LIMIT**

11 **Q. Has the Company updated its Short Term Debt Limit for the period November 2024**  
12 **through October 2025?**

13 A. Yes. In Order No. 24,824 (Feb. 29, 2008) the Commission authorized Liberty to have a  
14 short-term debt limit for fuel purposes set at 30 percent of the Company's total gas costs.  
15 In Pk Schedule 24, the Company has calculated the short-term debt limit for fuel  
16 purposes for the upcoming year to be \$18,112,871.

1 **V. COMPANY GAS ALLOWANCE**

2 **Q. Has the Company also updated its Company Gas Allowance percentage for the**  
3 **period November 2024 through October 2025 in accordance with Section 8 of the**  
4 **Company's Delivery Terms and Conditions?**

5 A. Yes, in Pk Schedule 25 the Company has recalculated its Company Gas Allowance for  
6 the period November 2024 through October 2025. The Company calculated the  
7 Company Allowance of 2.64% based on sendout and throughput data for the twelve  
8 months ending June 2024. The Company proposes to apply this recalculated Company  
9 Gas Allowance to all supplier deliveries beginning in November 2024.

10 **VI. OTHER TARIFF CHANGES**

11 **Q. Is the Company proposing to update its Delivery Terms and Conditions?**

12 A. Yes. The Company is submitting Illustrative Fourth Revised Page 153 relating to  
13 Supplier Balancing and Peaking Demand Charges and Illustrative Fourth Revised Page  
14 154 relating to Capacity Allocation, both of which are reflected in Attachment 3.

15 **Q. Please describe the changes to tariff Page 153.**

16 A. In Illustrative Fourth Revised Page 153, the Company updates the Peaking Demand  
17 Charge from \$43.95 per MMBtu of Peak MDQ to \$56.21 per MMBtu of Peak MDQ.  
18 This calculation is presented in Schedule 21.

19 **Q. Please describe the changes to tariff Page 154.**

20 A. Illustrative Fourth Revised Page 154 updates the Capacity Allocator percentages used to  
21 allocate pipeline, storage, and local peaking capacity to high and low load factor

1 customers under the mandatory capacity assignment requirement for firm transportation  
2 service. Pk Schedule 22 contains the four-page worksheet that backs up the calculations  
3 for the updated allocators.

4 **VII. SUMMER 2024 COST OF GAS FACTOR**

5 **Q. What are the proposed 2024 summer firm sales Cost of Gas rates?**

6 A. The Company proposes a firm sales Cost of Gas rate of \$0.0724 per therm for residential  
7 customers, \$0.0725 per therm for commercial/industrial high winter use customers, and  
8 \$0.0726 per therm for commercial/industrial low winter use customers as shown on  
9 Illustrative Twelfth Revised Page 92.

10 **Q. Please explain Illustrative Fourth Revised Page 91 and Illustrative Twelfth Revised**  
11 **Page 92.**

12 A. In Attachment 3, Illustrative Fourth Revised Page 91 and Illustrative Twelfth Revised  
13 Page 92 contain the calculation of the 2025 Summer Period Cost of Gas Rate and  
14 summarize the Company's forecast of firm gas sales, firm gas sendout, and gas costs. On  
15 Illustrative Twelfth Revised Page 92, the Company derives the 2025 Average Cost of Gas  
16 of \$0.0724 per therm by adding the Direct Cost of Gas Rate of \$0.0376 per therm to the  
17 Indirect Cost of Gas Rate of \$0.0348 per therm. The estimated total Anticipated Direct  
18 Cost of Gas is \$843,821 and the estimated Indirect Cost of Gas is \$779,573. The Direct  
19 Cost of Gas Rate and the Indirect Cost of Gas Rates are determined by dividing each of  
20 these total cost figures by the projected summer firm sales volumes of 22,422,719 therms.  
21 Illustrative Twelfth Revised Page 92 also shows the calculation of the

1 Commercial/Industrial High Winter Use Cost of Gas Rate of \$0.0725 per therm and the  
2 Commercial/Industrial Low Winter Use Cost of Gas Rate of \$0.0726 per therm.

3 The calculation of the Anticipated Direct Cost of Gas is shown on Illustrative Fourth  
4 Revised Page 91. To derive the total Anticipated Direct Cost of Gas of \$843,821 the  
5 Company starts with the Unadjusted Anticipated Cost of Gas of \$4,297,502 and adds the  
6 Net Adjustment totaling (\$3,453,681).

7 **Q. What are the components of the Unadjusted Anticipated Cost of Gas?**

8 A. The Unadjusted Anticipated Cost of Gas shown on Illustrative Fourth Revised Page 91  
9 consists of the following components:

10	1. Purchased Gas Demand Costs	\$1,210,454
11	2. Purchased Gas Supply Costs	6,947,947
12	4. Hedge Contract (Savings)/loss	<u>(3,860,898)</u>
13		
14	Total Unadjusted Anticipated Cost of Gas	<u>\$4,297,502</u>

15 **Q. What are the components of the adjustments to the Cost of Gas?**

16 A. The allowable adjustments to gas costs, listed on Attachment 3, Illustrative Fourth  
17 Revised Page 91 are as follows:

18	1. Prior Period (Over)/Under Collection	\$(409,360)
19	2. Interest	<u>25,413</u>
20	2. Capacity Release and Off System Sales Margins	<u>(3,069,734)</u>
21		
22	Total Adjustments	<u>\$(3,453,681)</u>

1 **Q. How does the proposed average Summer Cost of Gas rates in this filing compare to**  
2 **the Cost of Gas rates approved by Order No. 26,898 (October 31, 2023) in Docket**  
3 **No. DG 23-076 for the 2024 Summer Period?**

**II. OVERVIEW OF WINTER 2024/2025 GAS SUPPLY PORTFOLIO**

**Q. What firm transportation contracts are in the Company’s portfolio?**

A. The Company currently holds firm transportation contracts on Tennessee Gas Pipeline (“Tennessee”) (146,833 MMBtu/day) and Portland Natural Gas Transmission System (“PNGTS”) (1,000 MMBtu/day) to provide a daily deliverability of 147,833 MMBtu/day to its citygate stations. In addition to these citygate delivery contracts, the Company also holds other transportation contracts further upstream on other pipelines that feed into the citygate delivery transportation contracts. Schedule 12 in the Company's filing is a schematic diagram of the transportation contracts (example below) which also provides a table listing these contracts. These transportation contracts provide delivery of natural gas from three sources.

1 First, the Company holds firm transportation contracts to allow for delivery of up to  
2 13,122 MMBtu/day of Canadian supply. These consist of the following:

- 3 • The Company can receive up to 4,000 MMBtu/day of firm Canadian supply from  
4 Dawn, Ontario. This supply is delivered to the Company on Company-held firm  
5 transportation contracts on Enbridge Inc. (formally Union Gas Limited),  
6 (“Enbridge”), TC Energy Corporation (formally TransCanada Pipelines Limited)  
7 (“TC Energy”), Iroquois Gas Transmission System (“Iroquois”), and Tennessee.
- 8 • The Company can receive up to 5,000 MMBtu/day of firm Canadian supply from  
9 Dawn, Ontario. This supply is delivered to the Company on Company-held firm  
10 transportation contracts on Enbridge, TC Energy, PNGTS, and Tennessee.
- 11 • The Company can receive up to 3,122 MMBtu/day of firm Canadian supply from  
12 the Canadian/New York border at Niagara Falls, NY. This supply is delivered to  
13 the Company on Company-held firm transportation contracts on Tennessee.
- 14 • The Company can receive up to 1,000 MMBtu/day of firm Canadian supply from  
15 a Company-held firm transportation contract PNGTS for delivery to its Berlin  
16 service territory.

17 Second, the Company holds the following firm transportation contracts to allow for  
18 delivery of up to 106,596 MMBtu/day of domestic supply from the producing and market  
19 areas within the United States.

- 1           • The Company can receive up to 21,596 MMBtu/day of firm domestic supplies  
2           from Texas and Louisiana production areas. These supplies are delivered to the  
3           Company on firm transportation contracts on Tennessee.
- 4           • The Company can receive up to 85,000<sup>1</sup> MMBtu/day of firm supply from  
5           Tennessee's Dracut receipt point located in Dracut, Massachusetts. This supply is  
6           delivered to the Company on three firm transportation contracts on Tennessee.

7           Third, the Company holds the following firm transportation contracts to allow for  
8           delivery of up to 28,115 MMBtu/day of domestic supply from underground storage fields  
9           in the New York/Pennsylvania area or the purchase of flowing supply in or downstream  
10          of Tennessee Zones 4 and 5.

- 11          • The Company can receive up to 19,076 MMBtu/day of firm domestic supplies  
12          from its Tennessee FS-MA storage contract. This contract allows for a storage  
13          inventory capacity of 1,560,391 MMBtu. These supplies are delivered to the  
14          Company on firm transportation contracts on Tennessee.
- 15          • The Company can receive up to 9,039 MMBtu/day of firm domestic supplies  
16          from its storage contracts with National Fuel Gas Supply Corporation, Honeoye  
17          Storage Corporation, and BE GT&S, Inc. In aggregate, these contracts allow for

<sup>1</sup> An additional 5,000 MMBtu/day of Dracut capacity is used to transport the previously described 5,000 MMBtu/day of firm Canadian supply from Dawn, Ontario via Enbridge, TC Energy, and PNGTS.

1 a storage inventory capacity of 1,018,780 MMBtu. These supplies are delivered  
2 to the Company on a firm transportation contract on Tennessee.

3 **Q. What sources of gas supplies do these firm transportation contracts enable the**  
4 **Company to access?**

5 A. The firm transportation contracts that interconnect at the Canadian border allow the  
6 Company to purchase firm gas supplies from both Eastern and Western Canada. The  
7 Company's domestic long-haul firm transportation contracts provide the Company with  
8 ability to buy firm gas supplies primarily from the U.S. Gulf Coast during the winter  
9 period and also provide access to natural gas supplies in the Marcellus Shale region.  
10 Supplies purchased at the Dracut receipt point, on the other hand, may originate from any  
11 number of locations.

12 **Q. Are there any changes to the portfolio of supply contracts for Winter 2024/2025**  
13 **compared to last winter?**

14 A. Yes. The Company negotiated a number of different supply contracts for delivery during  
15 the peak period. Since its 2023/2024 Cost of Gas filing (Docket No. 23-076), the  
16 Company has issued several requests for proposals (“RFP”) for supply for the upcoming  
17 winter period. These include a baseload Tennessee Zone 6 citygate or Dracut supply; a  
18 Canadian firm transportation capacity interconnecting with Iroquois supply; a Tennessee  
19 long-haul capacity from the Gulf Coast and the Zone 4 market areas supply; two requests  
20 for proposals for a Tennessee Zone 6 citygate or Dracut swing supply with a call option;  
21 and a Canadian firm transportation capacity interconnecting with Tennessee at Dracut

1 supply. Each of these RFPs for the 2024/2025 peak period supply is consistent with the  
2 RFPs issued for the 2023/2024 peak period.

3 **Q. What is the status of these RFPs?**

4 A. The Company has completed the process of obtaining and analyzing bids and expects all  
5 contracts to be in place by November 1.

6 **Q. What is the status of the Company's storage refill plan?**

7 A. During the 2024 off-peak period, the Company has been injecting supplies into its  
8 underground storage fields. The Company plans to have all storage fields, except for its  
9 Tennessee FS-MA storage, full by November 1, 2024. The Tennessee FS-MA field is  
10 targeted to be approximately 95 percent full by November 1, 2024. The approximate five  
11 percent unfilled portion of FS-MA storage provides a buffer that allows the Company  
12 operational flexibility to inject some of its supply into storage if needed due to weather  
13 fluctuations during the month of November.

14 **Q. What additional sources of gas supply are available to the Company that do not  
15 require pipeline transportation capacity?**

16 A. The Company has two additional sources of gas supply available. First, the Company has  
17 contracted for dedicated LNG with trucking to refill its LNG storage inventory. Since the  
18 Company's LNG storage capacity is limited, having dedicated LNG trucks allows the  
19 Company to replenish inventory as it is used, provides supply security for its customers,  
20 and enables the Company to adhere to its seven-day storage inventory requirement  
21 established by Puc 506.03.

1 Second, the Company has contracted for dedicated deliveries to the Company's three  
2 propane facilities including the refill of its propane storage facility located in Amherst,  
3 New Hampshire.

4 **Q. What is the capacity of these supplemental gas supply facilities?**

5 A. The Company owns three LNG vaporization facilities in Concord, Manchester, and  
6 Tilton that have a combined design vaporization rate of approximately 22,800  
7 MMBtu/day, but they are limited operationally by the combined workable storage  
8 capacity of approximately 12,600 MMBtu. As described previously, the Company  
9 solicited bids for LNG refill and associated trucking to utilize more vaporization capacity  
10 from its LNG facilities.

11 Additionally, the Company owns four propane facilities in Amherst (which is only  
12 storage), Manchester, Nashua, and Tilton (which have some storage and are connected to  
13 the Company's distribution system) that have a combined design vaporization capacity of  
14 approximately 28,200 MMBtu/day and a combined workable storage capacity of  
15 approximately 122,590 MMBtu. The Company has allocated approximately 12,000  
16 MMBtu of the Amherst propane storage capacity to its Keene Division,<sup>2</sup> leaving  
17 approximately 110,600 MMBtu of combined workable storage capacity for EnergyNorth.  
18 The Company's propane facilities were refilled during the summer of 2024, and they are  
19 ready for the 2024/2025 peak period.

---

<sup>2</sup> The Company will make the Keene Division Cost of Gas filing by September 15, 2023.

1 Together, these LNG and propane facilities provide the Company and its customers with  
2 necessary system pressure support during peak days as well as a critical gas supply  
3 source to meet design day requirements. These facilities contribute to the Company's  
4 reliable, flexible, and least-cost resource portfolio.

5 **III. FORECASTED SENDOUT**

6 **Q. What was the source of the projected sendout requirements and costs used in this**  
7 **filing?**

8 A. As in prior cost of gas filings, the Company used projected sendout requirements and  
9 costs from its forecasts and portfolio of resources.

10 **Q. What are the forecasted sendout requirements for the peak period of 2024/2025?**

11 A. Schedule 11, page 1 of the Company's filing shows the Company's forecasted sendout  
12 requirements for sales customers at 88,099,094 therms over the period November 1,  
13 2024, to April 30, 2025, under normal weather conditions, which is a slight decrease from  
14 last year's forecasted volume of 94,459,064 therms for the period November 1, 2023, to  
15 April 30, 2024. In comparison, the normalized actual sendout for firm sales customers  
16 for the November 1, 2023, to April 30, 2024, period was 92,395,519 therms.

17 Schedule 11, page 1 also shows the Company's forecasted sendout requirements for sales  
18 customers of 98,980,566 therms over the period November 1, 2024, to April 30, 2025,  
19 under design weather conditions, which is down from last year's design day forecasted  
20 volume of 105,567,453 therms. For the current peak period forecast, design weather

1 requirements are approximately 10 percent greater than normal sendout requirements for  
2 weather that is 10 percent colder than normal.

3 On Schedule 11, page 2, the Company summarizes the normal and design year sendout  
4 requirements, the seasonally available contract quantities (inclusive of assigned and  
5 Company Managed capacity), and the utilization rates of its pipeline firm transportation  
6 and storage contracts.

7 Schedule 11D shows the Company's forecasted design day sendout for sales customers  
8 for the upcoming 2024/2025 winter period of 1,627,640 therms, which is down from last  
9 year's figure of 1,676,882 therms.

10 **Q. Why did the demand forecast decrease relative to what was filed in the 2023/2024**  
11 **Cost of Gas filing?**

12 A. The demand forecast in the 2023/2024 Cost of Gas filing was based on the demand  
13 forecast presented in Liberty's most recent Integrated Resource Plan, which was filed on  
14 October 3, 2022, and relied on historical data through March 2022. Prior to the start of  
15 the COVID-19 pandemic the Company experienced growth in demand at a higher rate  
16 than during the post-pandemic period. Given the additional two years of historical data  
17 on which the current demand forecast relies, which reflects a lower level of growth, the  
18 demand forecast has decreased relative to the prior Cost of Gas filing.

19 **Q. What are the forecasted sendout requirements for the off-peak period of 2025?**

20 A. Schedule 11, page 1 of the Company's filing shows the Company's forecasted sendout  
21 requirements of 24,555,282 therms over the period May 1 to October 31, 2025, under

1 normal weather conditions, which is lower than last year's forecasted volume of  
2 26,848,752 therms over the period May 1 to October 31, 2024.

3 Schedule 11, page 1 also shows the Company's forecasted sendout requirements of  
4 24,394,417 therms over the period May 1 to October 31, 2025, under design weather  
5 conditions, which is lower than last year's forecasted volume of 26,721,201 therms over  
6 the period May 1 to October 31, 2024.

7 On Schedule 11, page 2, the Company summarizes the normal and design off-peak  
8 sendout requirements, the seasonally available contract quantities (inclusive of assigned  
9 and Company Managed capacity), and the calculated utilization rates of its pipeline  
10 transportation and storage contracts based on the normal and design off-peak forecasts  
11 contained on Schedule 11, page 1.

12 **IV. GAS SUPPLY COST**

13 **Q. What strategies did the Company employ to stabilize and mitigate costs for winter**  
14 **2024/2025?**

15 A. The Company engaged in several strategies to reduce and stabilize costs for customers.  
16 First, as described above, over the summer period the Company injected gas into the  
17 storage facilities using off-peak summer pricing from the least cost supply points as  
18 determined by transportation and storage capacity assets. Next, the Company initiated  
19 requests for proposals, or RFPs, from suppliers to obtain the lowest price for supply  
20 services. The Company also issued RFPs from suppliers to enter into asset management  
21 agreements where the Company allows the winning bidder to use capacity that Liberty

1 holds on various pipelines in exchange for a baseload supply or natural gas call options.

2 This technique results in monthly payments to Liberty, all to the benefit of customers.

3 **Q. How much does the Company expect to recover through asset management credits**  
4 **in 2024–2025?**

5 A. For 2024–2025, the Company expects to recover approximately [REDACTED] in asset  
6 management credits. These credits will all be used to reduce customer costs.

7 **Q. Has the Company hedged the Tennessee Zone 6 basis for winter 2024/2025?**

8 A. Yes. The Company conducted an RFP to solicit physical supply fixed basis bids for the  
9 months of January and February as provided for in Docket No. DG 14-133 and approved  
10 in Order No. 25,691 (July 10, 2014). The Company reviewed the bids and selected the  
11 supplier who offered the least cost.

12 **Q. How do the forecasted commodity prices in 2024-2025 compare to the actual prices**  
13 **from 2023-2024?**

14 A. The current NYMEX forecast for the upcoming 2024-2025 cost of gas period of \$3.0508  
15 is down slightly from the 2023-2024 cost of gas period NYMEX forecast of \$3.4163.  
16 This can be broken down further by comparing the winter and summer period average  
17 pricing. The average NYMEX price for Winter 2023-2024 was \$3.513, as compared to  
18 the forecasted NYMEX price for Winter 2024-2025 of \$2.982. The average NYMEX  
19 price for Summer 2024 was \$3.32, as compared to the forecasted NYMEX price for  
20 Summer 2025 of \$3.12. The Storage weighted average cost (WACOG) is also down for

1           2024-2025. Storage heading into Winter 2023-2024 had a WACOG of \$2.123, as  
2           compared to the estimated WACOG of \$1.70 for the upcoming Winter 2024-2025.

3   **Q.    Does this conclude your pre-filed direct testimony in this proceeding?**

4    A.    Yes, it does.

Capacity Assignment Calculations 2024-2025  
Derivation of Class Assignments, Weightings and Correction Factor**

Basic assumptions:

- 1 Residential class pays average seasonal gas cost rate (using MBA method to allocate costs to seasons)
- 2 Residual gas costs are allocated to C&I HLF and LLF classes based on MBA method
- 3 The MBA method allocates capacity costs based on design day demands in two pieces:
  - a The base use portion of the class design day demand based on base use
  - b The remaining portion of design day demand based on remaining design day demand
- 4 Base demand is composed solely of pipeline supplies
- 5 Remaining demand consists of a portion of pipeline and all storage and peaking supplies

**Off-Peak 2025 Summer Cost of Gas Filing**  
**Capacity Assignment Calculations 2024-2025**  
**Derivation of Class Assignments, Weightings and Correction Factor**

Basic assumptions:

- 1 Residential class pays average seasonal gas cost rate (using MBA method to allocate costs to seasons)
- 2 Residual gas costs are allocated to C&I HLF and LLF classes based on MBA method
- 3 The MBA method allocates capacity costs based on design day demands in two pieces:
  - a The base use portion of the class design day demand based on base use
  - b The remaining portion of design day demand based on remaining design day demand
- 4 Base demand is composed solely of pipeline supplies
- 5 Remaining demand consists of a portion of pipeline and all storage and peaking supplies

Dear [Name]:

Each fall, Liberty offers you the opportunity to “lock in” the price per therm for the Gas Supply Charge portion of your bills, from November 1 through April 30. With the Fixed Price Option, you will pay one fixed price per therm for the Gas Supply Charge portion of your bill during this period, even if the price of natural gas changes during the heating season.

**Applications for the program must be returned on or before October 22, 2024.** Energy prices – including natural gas – remain volatile as in years past. If you have multiple accounts, please return one form for each service address and account number. This program is available to customers who are billed on Budget Billing as well as those who are billed on a regular billing schedule.

**Does the FPO represent the entire amount on my monthly gas bill?**

No. Your monthly natural gas bill has two main components: (1) a Gas Delivery Charge and (2) a Gas Supply Charge. The FPO is for the Gas Supply Charge (often the largest portion of your bill during the winter season).

**What is the “Fixed Price” for the 2024–2025 heating season?**

The 2024–2025 FPO Gas Supply Charge that was submitted to the New Hampshire Public Utility Commission (NHPUC) is **\$0.6992** per therm (**\$0.3846** per therm for customers on Fuel Assistance). **These rates are not guaranteed until we receive a decision from the NHPUC.** A decision is expected prior to November 1. Visit [www.libertyenergyandwater.com](http://www.libertyenergyandwater.com) after November 1<sup>st</sup> to see the final approved rate.

**What will my Gas Supply Charge price be this winter if I don’t enroll in the FPO?**

As of today’s date, we estimate that the Gas Supply Charge price for the winter will be approximately **\$0.6792** per therm (**\$0.3736** per therm for customers on Fuel Assistance). This non-guaranteed price may increase if the market price of natural gas increases during the winter or decrease if the market price of natural gas decreases. Price fluctuations are market-driven, and it is difficult for Liberty to predict what those market conditions or prices will be. **These rates are not guaranteed until we receive a decision from the NHPUC.** A decision is expected prior to November 1. Visit [www.libertyenergyandwater.com](http://www.libertyenergyandwater.com) after November 1<sup>st</sup> to see the final approved rate.

**Are there any fees to sign up or minimum or maximum usage requirements?**

No. There are no sign-up fees or minimum or maximum usage levels. However, the program is non-transferable, and customers must remain in the program through April 30, 2025. If you move to a new location within our service territory and transfer your account, the FPO rate will apply at your new location through April 30, 2025.

**How do I sign up?**

Fill out the attached coupon and return it in the enclosed envelope on or before October 22, 2024. You will be notified whether or not you are enrolled in the FPO. Enrollment acceptance is based on a timely response.

**Please cut on the dotted line and return this coupon in the envelope provided.**

Dear [Name]:

To allow customers the ability to better budget and gain peace of mind from fluctuating energy prices, Liberty is pleased to offer customers the ability to 'lock in' the price per therm for the Gas Supply Charge portion of bills from November 1 through April 30 as part of our Fixed Price Option (FPO).

**What happens if I choose to enroll in the "Fixed Price" for the 2024-2025 heating season?**

Energy prices can be volatile, as price fluctuations are market-driven and difficult to predict. Customers who enroll in the FPO will pay a small premium to 'lock in' the price they pay per therm for the gas supply portion of their bill. The fixed price per therm will be **two cents higher** than the initial Gas Supply Charge rate approved by the Public Utilities Commission in October.

**What happens if I choose to stay with the normal Gas Supply Charge rate (non-FPO rate)?**

Customers who choose to stay on the normal Gas Supply Charge rate will also pay the initial rate approved by the Public Utilities Commission. However, this non-guaranteed rate may increase if the market price of natural gas increases or decrease if the market price of natural gas decreases.

**Does the FPO represent the entire amount on my monthly gas bill?**

No. Your monthly gas bill has two main components: (1) a Gas Delivery Charge and (2) a Gas Supply Charge. The FPO is for the Gas Supply Charge. (Often the largest portion of your bill during the winter season)

**When will the final approved rates be posted?**

The final rate for both the Fixed Price Option and the normal Gas Supply Charge will be proposed by Liberty and approved by the Public Utilities Commission prior to the rates taking effect in November 1. To view submitted rates and to keep up to date on the approval process, visit X.

**Are there any rules or restrictions with the Fixed Price Option?**

Yes. The program is non-transferable, and customers who enroll must remain in the program through April 30, 2025. If you move to a new location, the FPO rate will apply at your new location through April 30, 2025.

**How do I sign up?**

Fill out the attached coupon and return it in the enclosed envelope on or before **DATE**. Enrollment acceptance is based on a timely response. If you have multiple accounts, please return one form for each service address and account number.

Sincerely,  
Liberty

**Please cut on the dotted line and return this coupon in the envelope provided.**
