Re: Fourth Calendar Quarter Emissions Verification Summary for Certified Biomass Renewable Energy Sources

Dear GIS Administrator:

Renewable Portfolio Standard eligibility determinations of generation facilities that use biomass fuels are conditional, as required by RSA 362-F:11, III. Within ten days of receiving the quarterly notice from the New Hampshire Department of Environmental Services (DES) that a facility has met DES emissions standards, the Commission must designate the facility as eligible to produce Renewable Energy Certificates (RECs).

Based on the DES recommendation received January 30, 2020, the Commission hereby certifies the following wood-fired power plants listed in **Table 1: Calendar Quarter 4, 2019 - NH REC Eligible Biomass Power Plants**, provided below, as renewable energy sources for the fourth quarter of 2019. These facilities meet average emission rates of 0.02 lb/MMBtu (or an alternative plan), and 0.075 lb/MMBtu for total suspended particulate (TSP) and nitrogen oxides (NO_x), respectively.

DE 08-024	Pinetree Power, Inc. – Bethlehem	III	1241 Whitefield Road, Bethlehem, NH 03574	NH-III-08-004	MSS337

¹ Formerly Eversource Energy (previously Public Service Company of New Hampshire).

² Bridgewater Power Company qualifies for NH Class III RECs according to RSA 362-F:11, IV, which allows for a biomass facility that does not meet the particulate (TSP) requirements, but would otherwise qualify for NH RECs, to submit a plan to the DES that demonstrates quantifiable emission reductions. The plan is approved by the DES, and the Commission has certified the facility in accordance with the plan approved by the DES.

³The DES reported that these facilities were not operating during this quarter.

A list of thermal biomass facilities that have been recommended by the DES **and** approved by the Commission as thermal renewable energy sources is provided below as **Table 2: Calendar Quarter 4, 2019 - Conditionally Approved Thermal Biomass Sources**. These facilities meet average emission rates of 0.10 lb/MMBtu for TSP and best management practices for NOx.

Please note that the Memorial Hospital facility has been added for Quarter 4, 2019. The facility's eligibility date is November 15, 2019.

Quarterly Emission Verification Summary reports will no longer list previously approved thermal facilities that are rated less than 3 MMBtu/hr design gross heat input, as they are required to meet best management practices determined by the DES during initial eligibility certification and do not require quarterly testing and approval. There were no newly eligible small (<3 MMBtu/hr) thermal renewable energy sources certified during calendar quarter 4, 2019.

If you have any questions regarding the DES recommendations, please contact Joe Fontaine at joseph.fontaine@des.nh.gov or 603-271-6794. Other questions should be directed to Jason Morse at Jason.Morse@puc.nh.gov or 603-271-7965.

Sincerely,
